Re: CSRVA Water Right Claim 95-13735

Dear Mr. Roda:

I previously wrote to you indicating that I would respond when I returned from a vacation to the southwest United States.

Springs—The Coulter Family, LLC, claims a water right for domestic water use from two springs. I've taken the liberty of printing a Google Earth map and generally locating the springs. Both of these springs are tied together and the water is pumped through the spring line to service the Coulter Family, LLC, domestic water use. This domestic water use is a lake cabin that goes back to approximately 1898. The best information that I have is that the spring use started in approximately 1900.

Irrigation—I prepared a new claim as to your suggestion contained in your March 18, 2016, letter. This claim is enclosed and is for a water right that involves pumping water from Lake Coeur d'Alene. The pumping started in 1960 and is for the period of time between approximately June 15 through September 15 as evidenced by the information on the claim to water right enclosed.

The water is drawn from Lake Coeur d'Alene and pumped up to the hill are behind the lake cabin. The water use is for what I call irrigation purposes and is in reality fire protection to keep the area wet in case of a fire.
