

Memo

To: McGrath & The Mead Family Trust Files

From: G. Taylor *GT*

Date: 1-26-2010

The Meads and McGrath share a well that was drilled by Mr. Mead when he owned both homes. The recommendations should limit the Q to 0.07 cfs total for 95-11822 & 95-11823.

The Meads and McGrath also share the springs that were originally licensed for two homes under 95-8034. The legal description for the springs were not licensed correctly and have been corrected using better mapping technology. Claims 95-11821 & 95-11824 should be limited to a total combined diversion rate of 0.04 cfs.

Points of diversion for springs are claimed as an accomplished change prior to 1-1-2006.
