Subject: RE: POU location for Claim 95-11651

Mr. Malloy,

Thank you for your timely response to my letter. If the two homes are on separate parcels and served by two separate water systems, I would recommend you amend your existing claim (95-11651) to include only the home on parcel 50N05W088050 and the well that serves that home. The priority date for that claim can also be amended to 1959 when the home was built and connected to the well. A second Notice of Claim to a Water Right would then be needed for your other home on parcel 50N05W088650 and the two wells that serve it. The priority date for that claim would be when the home was first built and connected to the wells, which according to tax lot records was in 1983. If you need any assistance with amending your water right claim or filing an additional claim, I would be happy to help you can schedule an appointment to meet with me in my office. Feel free to call our office if you have additional questions.

Regards,

Subject: POU location for Claim 95-11651

Evan,

Thanks for your letter dated June 3, 2016 in which you ask for clarification on the location and service of the wells. Your records show that there are three wells and two homes, which is correct (I just didn't know how to address that issue when I filed).

I'll need your help in getting to you the information you need.
The Parcel (50N05W088050) has the home which was built in 1959.
The northernmost well serves this home, which is owned by me.

The other two wells serve the home in which I live on parcel (50N05W088650).
We built the home in 1983 as your records indicate.

Can you instruct me in what you need me to do to "set the record straight?"

Thanks,
John Malloy
1221 S. Old Creek Rd.
