Additional explanation or supporting documentation of the error:

Rights in Basin 34 (one of the SRBA test basins) were originally recommended to the Court with all remarks and conditions shown in a Remarks section of the recommendations. The Remark section of the recommendations appeared after the listing of the elements of the water rights. Prior to issuance of partial decrees in Basin 34, and with the assistance of the SRBA Court, the recommendations were reformatted. Any required conditions originally shown in the Remarks section were moved to appear under the element that the condition modified or further described. Any remaining remarks or conditions were considered explanatory material and appeared in IDWR records and recommendations only, and were not included on the face of partial decrees.

Besides explanatory material, the recommendation of right 34-2252 contained a source remark, a combined quantity condition, a point of diversion remark and a combined place of use condition which were all shown in the Remarks section. The Bureau of Land Management filed an objection to the recommendation which was withdrawn a short time later. The right was also reported on June 24, 1999, in IDWR's *Supplemental Director's Report, Reporting Area 1, IDWR Basin 34, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*. The recommendation contained a Period of Use condition that appeared in the Purpose and Period of Use element. That recommendation was also unobjected to.

On February 13, 2002, a partial decree for water right 34-2252 was issued. The partial decree did not contain the conditions or remarks reported in the original Director's Report. IDWR believes this error may have occurred, in part, at the point of reformatting of the Basin 34 recommendations.

The Period of Use condition reported in June of 1999, appears on the partial decree, but should be updated to reflect the actual language of the standard condition.

IDWR is requesting correction/addition of remarks and conditions in the Source, Quantity, Point of Diversion, Period of Year, and Place of Use elements of water right 34-2252.

As Explanatory Material does not appear on partial decrees of water rights, but is reflected in IDWR records, the remaining remarks or conditions included on the June 18, 1992 Director's Report that should appear as explanatory are shown on the attached proposed correction.

For more information about the error the Court and/or water right holder should contact the person identified below.
