Additional explanation or supporting documentation of the error:

Water right 21-110, claimed by North Fork Reservoir Co., is for storing water in Henry's Lake and ultimately using the stored water for irrigation. The partial decree of the right, originally issued in 2011, was amended in 2013. The Name and Address element of the partial decree currently identifies Ray W. Rigby Sec as the "in care of" individual for the reservoir co. Although not an error, the element should be updated to identify Jerry R Rigby as the "in care of" individual noted in the partial decree per IDWR records.

IDWR also discovered the Source condition addressing the redirection of storage water could be interpreted in a manner which would impose an unintended limit to the right. IDWR has modified the condition for clarity and to better describe when the right is actually diverted.

IDWR is requesting revision to the listing of water rights in the existing Quantity condition which notes a total combined annual diversion volume of 79,350 AF. The revision will provide clarity to the list of combined water rights. In addition, IDWR's review of other North Fork Reservoir Co. rights led to the discovery that rights 21-110, 21-111, 21-112, 21-2154, 21-2161, 21-12946 and late claim 21-13193 all contribute to the total combined annual diversion volume of 90,000 AF for Henry's Lake. Rights 21-2154, 21-2161 and 21-12946 were reported in 2015 in an Amended Director's Report with a Quantity element condition noting the relationship between all these rights. IDWR is seeking to correct the Quantity element of rights 21-110, 21-111 and 21-112 with the addition of that Quantity condition clarifying the relationship between the rights in these partial decrees as well.

The Quantity section of the Purpose and Period of Use element of the partial decree of 21-110 incorrectly lists a quantity of 320.00 CFS for both the Irrigation Storage and Irrigation from Storage uses—the amount was recommended as 320.00 AFY and should be corrected. Finally, North Fork late claim 21-13193 should be added to the Place of Use condition listing the water rights limited to the irrigation of a

combined total of 41,098 acres. The late claim had not been reported at the time right 21-110 was decreed in 2013. IDWR believes addition of the late claim to the condition adds clarity to the partial decree and will be consistent with the partial decrees of the other North Fork Reservoir Co. rights involving Henry's Lake if corrections to partial decrees of North Fork rights 21-111 and 21-112 (also being filed at this time) are granted.
