Additional explanation or supporting documentation of the error:

Water rights 21-2154, 21-2161 and 21-12946, claimed by North Fork Reservoir Co., are for storing water in Henry's Lake. The rights were originally partially decreed in 2013. The rights were noted in a Stipulation lodged on January 30, 2015, which addressed water rights of on-stream reservoirs in Basins 01, 21 and 25. The Stipulation memorialized resolution of issues of "fill" and/or "refill." On February 5, 2015, North Fork Reservoir Co. filed a Motion to Set Aside Partial Decrees and a Memorandum in Support of the Motion to Set Aside Partial Decrees on water rights 21-2154, 21-2161 and 21-12946. The documents were filed pursuant to the Stipulation to update the partial decrees to add a combined annual diversion volume condition to the Quantity element and add a reference regarding North Fork late claim 21-13193 (reported in January 2015) to a Place of Use condition listing combined rights. The Memorandum contains draft recommendations noting the additions.

On July 17, 2015, an Amended Director's Report (ADR) was filed on rights 21-2154, 21-2161 and 21-12946. The ADR added a combined annual diversion volume condition (recommending a total volume of 90,000 AF) to the Quantity element and added the North Fork late claim 21-13193 to a Place of Use element condition. No objections were filed to the ADR, and amended partial decrees were issued on September 10, 2015.

It was recently discovered that Quantity condition noting the 90,000 AF limit and the reference to late claim 21-13193 are missing from the 2015 amended partial decree of right 21-2161. IDWR is requesting correction of the partial decree of right 21-2161 to reflect the additions made through the 2015 ADR.

A Quantity condition referencing a total combined annual diversion volume of 79,350 AF appears on the partial decrees of North Fork rights 21-110, 21-111, 21-112, 21-2154, and 21-12946. IDWR is seeking to revise that Quantity condition on those partial decrees to add clarity to the list of combined water rights. Although right 21-2161 is not limited by this combined annual diversion volume, IDWR believes addition of the revised condition to the partial decree of right 21-2161 brings consistency to the partial decrees of the North Fork Reservoir Co. rights involving Henry's Lake.

IDWR also notes the proposed recommendation of right 21-2161 contained in the Memorandum indicates the total combined annual diversion volume to be 94,000 AF. The correct volume is 90,000 AF as shown in the ADR. Rights 21-2154 and 21-12946 are the subject of a separate Request for Error Correction.

For more information about the error the Court and/or water right holder should contact the person identified below.
