E. REASONS SUPPORTING OBJECTION(S): The legal description of the Point of Diversion (POD) of this water right shown in the Directors Report Recommendation is the NWSE Sec 30 T48N R6E. This quarter-quarter is mixed private and federal ownership. Information in IDWR files shows that the POD is on private land within Mineral Survey (MS) 2104. This is the actual legal description of the property and needs to be included in the elements of the water right to distinguish that it is not on National Forest System (NFS) land also in the NWSE Sec 30 that is surveyed as Lot 5. The elements of the water right also need to have a phrase that the POD and Place of Use (POU) are not on federal land. The Directors Report Recommendation includes information that this water right shares the same POD as water right nos. 94-04221, 94-08554, 94-08920 and 94-08922. There is an inconsistency here because the source for 94-04221 and 94-08554 is a spring tributary to Daisy Gulch Creek while the source for 94-08919, 94-08920 and 94-08922 is Daisy Gulch Creek tributary to the South Fork Coeur d'Alene River. This inconsistency needs to be rectified and water right source changed on the applicable water right descriptions to reflect the actual source of water.
