AFFIDAVIT OF JERRY COBB

STATE OF IDAHO)
) ss:
COUNTY OF SHOSHONE)

I, Jerry Cobb, being first duly sworn upon oath, hereby depose and state as follows:

1. I am 68 years old and lived in Shoshone County, Idaho roughly 68 years, since 1948. I am of sound mind and am personally acquainted with the matters described in this statement.

2. I am personally familiar with the Kellogg area. I have been a board member of Shoshone Medical Center since and have worked in the County since approximately 1986, most recently until retirement as the Public Health Officer for Panhandle Health District for the 42 years.

3. I am familiar with the Shoshone Medical Center property located in Kellogg, Shoshone County, Idaho. I recall the landscaped and maintained areas surrounding the Medical Center being irrigated, and kept green and neat utilizing the water from the reservoir coming from Jackass Creek during the time I was member of the board for Shoshone Medical Center. This is the same system that was then transitioned to the grounds for the new hospital located at 25 Jacobs Gulch.

4. During all this time, to the best of my knowledge, the yard has been irrigated by a sprinkler system using water from the reservoir. The reservoir consists of a small pond dammed by a concrete wall, with an overflow that feeds Jackass Creek, and a gate and pipe providing a water source for Shoshone Medical Center and Kellogg High School. The main line begins at the reservoir and ends at a vault located at the Medical Center property. At one time, a chlorinator was placed between the reservoir and the vault for drinking water purposes feeding the Medical Center, but has since been bypassed. The main line consists of a direct pipe run directly from the dam to the vault, including distribution legs to Kellogg High School. After distribution to Kellogg High School, the main line continues ending with a connection to a vault. The vault contains a main valve, which controls the 3 distribution legs supplying Shoshone Medical Center. The 3 distribution legs consist of today's hospital's utilization for Decontamination, Non-Potable Water, and Irrigation. Each of the distribution legs have been active prior to 2004 when the new hospital was constructed. Decontamination water supply serves as the only water supply to a contained unit used in conjunction and typically associated with a medical surge, and/or emergent event. Non-potable water source is utilized as part of our disaster response plans, and is piped into the mechanical room, along with one fire hydrant located on the East side of the building. Irrigation is used to irrigate the hospitals grounds and landscaping.

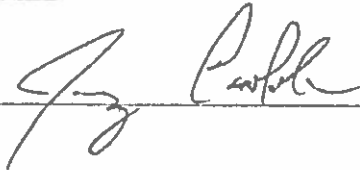

5. I am not exactly sure of the dates and how modifications were made from the time the original hospital was built to the transition of the new hospital. But at some point there was modification of the distribution lines. As described in the beginning, there is one single line that runs from the reservoir to the vault located at the hospital. When the new hospital was built in 2004-2005, the location of the new hospital was placed just South of the original hospital, which required some modification of the distribution lines during construction of the new hospital. All of the distribution lines and services have since been upgraded to today's standards. However, none of the water supplied is utilized for drinking water. All of these modifications have been in place since construction of the new hospital 2004-2005.

6. I have voluntarily provided this statement. I have reviewed this statement and have made all changes and corrections that I feel are necessary. This statement accurately reflects my knowledge, recollection, and understanding about the Shoshone Hospital/Shoshone Medical Center property.

I understand that I am signing this affidavit under oath before a notary public. I swear under penalty of perjury that this statement is true and correct to the best of my knowledge and belief.

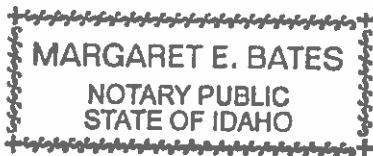

FURTHER THE AFFIANT SAITH NAUGHT.

Dated this 26 day of July 2016.

Subscribed and sworn to before me this 26th day of July, 2016.

AFFIDAVIT OF GARY MOORE

RECEIVED

AUG 01 2016

IDWR / NORTH

STATE OF IDAHO)
) ss:
COUNTY OF SHOSHONE)

I, Gary Moore, being first duly sworn upon oath, hereby depose and state as follows:

1. I am 67 years old and lived in Shoshone County, Idaho roughly 7 years, since 1999 until 2006. I am of sound mind and am personally acquainted with the matters described in this statement.

2. I am personally familiar with the Kellogg area. I worked at Shoshone Medical Center as the Chief Executive Officer from 1999 until 2006 and am current employed by the Department of health and Welfare as Division Administrator for Family and Community Services.

3. I am familiar with the Shoshone Medical Center property located in Kellogg, Shoshone County, Idaho. I recall the landscaped and maintained areas surrounding the Medical Center being irrigated, and kept green and neat utilizing the water from the reservoir coming from Jackass Creek during the time I was CEO for the hospital. This is the same system that was then transitioned to the grounds for the new hospital located at 25 Jacobs Gulch.

4. During all of the time I worked at the Medical Center the yard has been irrigated by a sprinkler system using water from the reservoir. The reservoir consists of a small pond dammed by a concrete wall, with an overflow that feeds Jackass Creek, and a gate and pipe providing a water source for Shoshone Medical Center and Kellogg High School. The main line begins at the reservoir and ends at a vault located at the Medical Center property. At one time, a chlorinator was placed between the reservoir and the vault for drinking water purposes feeding the Medical Center, but has since been bypassed. The main line consists of a direct pipe run directly from the dam to the vault, including distribution legs to Kellogg High School. After distribution to Kellogg High School, the main line continues ending with a connection to a vault. The vault contains a main valve, which controls the 3 distribution legs supplying Shoshone Medical Center. The 3 distribution legs consist of today's hospital's utilization for Decontamination, Non-Potable Water, and Irrigation. Each of the distribution legs have been active prior to 2004 when the new hospital was constructed. Decontamination water supply serves as the only water supply to a contained unit used in conjunction and typically associated with a medical surge, and/or emergent event. Non-potable water source is utilized as part of our disaster response plans, and is piped into the mechanical room, along with one fire hydrant located on the East side of the building. Irrigation is used to irrigate the hospitals grounds and landscaping.

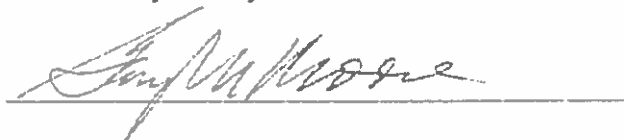

5. I am not exactly sure of the dates and how modifications were made from the time the original hospital was built to the transition of the new hospital. But at some point there was modification of the distribution lines. As described in the beginning, there is one single line that runs from the reservoir to the vault located at the hospital. When the new hospital was built in 2004-2005, the location of the new hospital was placed just South of the original hospital, which required some modification of the distribution lines during construction of the new hospital. All of the distribution lines and services have since been upgraded to today's standards. However, none of the water supplied is utilized for drinking water. All of these modifications have been in place since construction of the new hospital 2004-2005.

6. I have voluntarily provided this statement. I have reviewed this statement and have made all changes and corrections that I feel are necessary. This statement accurately reflects my knowledge, recollection, referencing supporting documentation, and understanding about the Shoshone Hospital/Shoshone Medical Center property.

I understand that I am signing this affidavit under oath before a notary public. I swear under penalty of perjury that this statement is true and correct to the best of my knowledge and belief.

AFFIDAVIT OF MICHEAL PEACOCK

STATE OF IDAHO)
) ss:
COUNTY OF SHOSHONE)

I, Mike Peacock, being first duly sworn upon oath, hereby depose and state as follows:

1. I am 67 years old and lived in Shoshone County, Idaho roughly 67 years, since 1948. I am of sound mind and am personally acquainted with the matters described in this statement.

2. I am personally familiar with the Kellogg area. I was board member of Shoshone Medical Center since 1982 and have worked in the County since 1978 as an attorney.

3. I am familiar with the Shoshone Medical Center property located in Kellogg, Shoshone County, Idaho. I recall the landscaped and maintained areas surrounding the Medical Center being irrigated, and kept green and neat utilizing the water from the reservoir coming from Jackass Creek during the time I was member of the board for Shoshone Medical Center and prior to that time. Prior tot the time and during the time I was on the board I walked along the creek and looked at the various improvements put there by the hospital district. This is the same system that was then transitioned to the grounds for the new hospital located at 25 Jacobs Gulch.

4. During all this time, to the best of my knowledge, the yard has been irrigated by a sprinkler system using water from the reservoir. The reservoir consists of a small pond dammed by a concrete wall, with an overflow that feeds Jackass Creek, and a gate and pipe providing a water source for Shoshone Medical Center and Kellogg High School.
