

Well in T50N, R4W, Section 30, SW1/4NW1/4 Gov't. Lot 2, parcel number 50N04W304000. This well was to serve three homes; however, third property was never developed.

Two holding tanks in basement of above home. One tank is for home where well is located and the second tank is for home on parcel number 50N04W303950.

Spigot at above home - was to serve home on third lot (parcel number 50N04W303850) but water line stops here.

Unimproved property (parcel number 50N04W303850). No water use occurring & pipeline from above well not stubbed in.

From: Linda Werner, Water Resource Agent *LW.*

Subject: Well Location

On this date Mr. Steve Greene came to my office requesting more information on the above claim. This claim is a split off of license 95-8012 which was issued for domestic usage from a well to two homes located in the SW1/4NW1/4, government lot 2, T50N, R4W, with priority date of 4/25/1980.

Mr. Greene states the well is located on his property, parcel number 50N04W-30-4000, and there are two bladder tanks and pipeline which supply water to his home and the lot north of his currently owned by Charles and Shirley McCarthy Family Trust, parcel number 50N04W-30-3950. The intent was for the well to supply water to three parcels which would include the parcel north of the McCarthys, owned by Gomer W. and Bonnie Davis Living Trust, parcel number 50N04W-30-3850.

The McCarthy's filed adjudication claim 95-10803 based on beneficial use showing parcel number 50N04W-30-3950 as where the well is located and Gomer and Bonnie Davis filed claim number 95-10559 based on beneficial use with well located on their parcel numbered 50N04W-30-3850. They may have field beneficial use claims, rather than claims based on license 95-8012, on these parcels to claim an earlier priority date, as the same well report that they both submitted as evidence of priority shows the well drilled on 5/30/1970, which is what they claimed on their beneficial use claims.

Mr. Greene states that there is no well on either the McCarthy or the Davis parcel, and that there is no home on the Davis parcel.

Consequently, a field exam may be necessary to locate the diversion point(s) and corresponding place of use.
