RE: Coeur d'Alene-Spokane River Basin Adjudication (CSRBA) claims 95-14885, 95-14886, and 95-14887

Dear Mr. and Ms. Lorenz,

I am in the process of reviewing 3 claims you filed in the CSRBA, and I ran into a couple of questions. I sent you an e-mail to steveandcarmen@gmail.com with some questions on September 2, 2016, but thought I would follow up with a letter.

Below is a summary of the three claims you filed.

95-14885	claims Domestic and Stockwater use from a well with a priority date of 2008
95-14886	claims Stockwater use from a well with a priority date of 1979
95-14887	claims Stockwater use from a well with a priority date of 2004

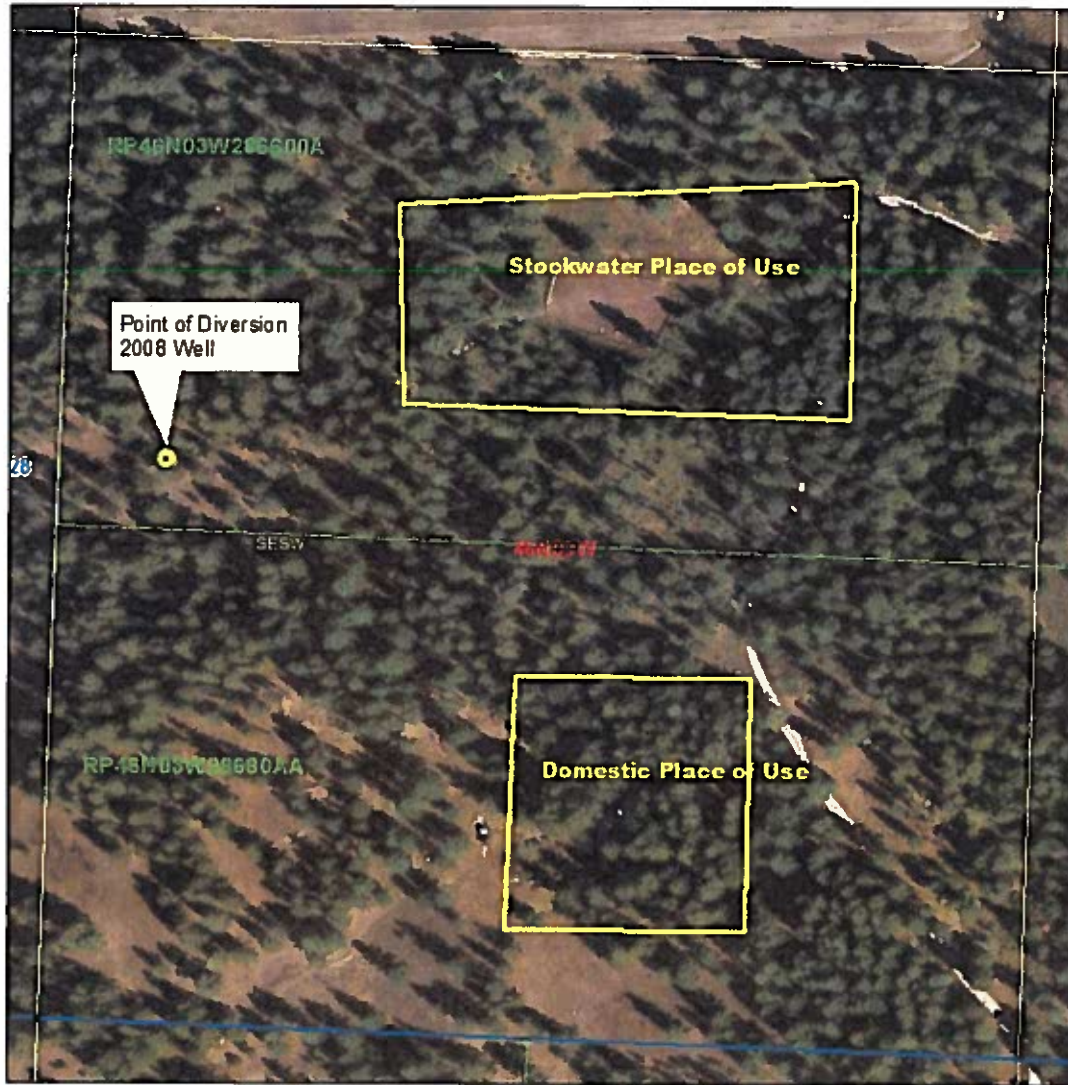

In short, I am trying to figure out which well(s) supplies water for the domestic home, and which wells provide water for the Stockwater use.

95-14885:

Claim 95-14885 claims domestic and stockwater use from a well with a 2008 priority date. I wanted to confirm with you the location of the well and the place of use and point of diversion for the domestic and Stockwater use. The claim identifies the Point of Diversion as being in parcel RP46N03W286600A (northern parcel). A parcel number is not identified for the Place of Use, but the only domestic structure I can see in the aerial photography is in parcel 46N03W28680AA (southern parcel).

The map below shows how I have interpreted the claimed point of diversion and place of use:

95-14885

The well location reflects the GPS coordinates on the well drillers report.

95-14886:

Claim 95-14886 claims Stockwater use from a well. The claim lists a 1979 priority date. The Point of diversion is identified as being within the southern parcel (46N03W28680AA). The well location on the map below was already in the IDWR database.

95-14886

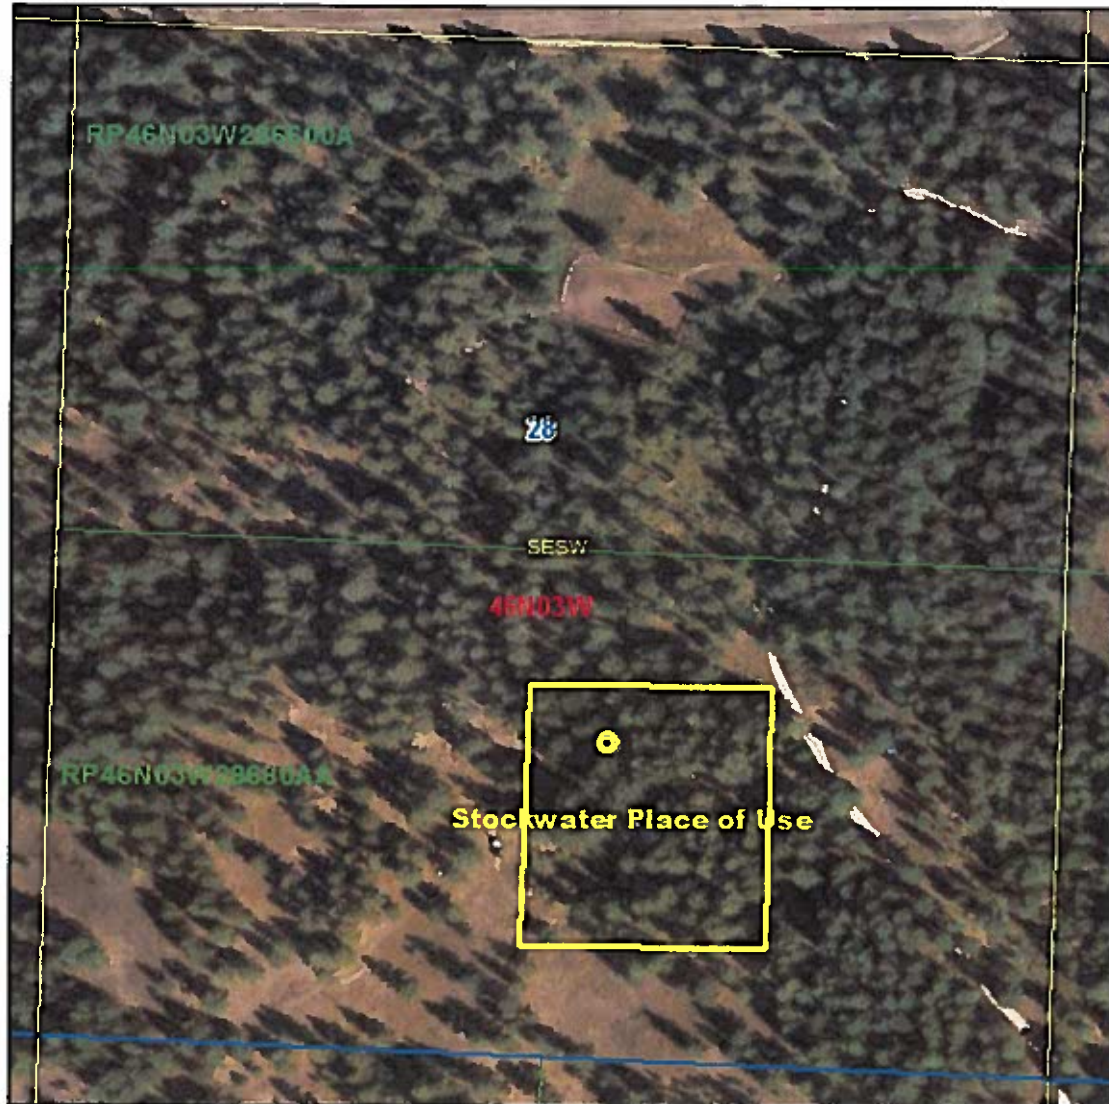

There is a note on claim 95-14886 indicating that the use claimed under this right might have been intended to include domestic use even though domestic use is not identified as a purpose of use on the claim.

95-14887:

Claim 95-14887 claims Stockwater use from a well. The claim lists a 2004 priority date. The Point of diversion is identified as being within the southern parcel (46N03W28680AA). The well location on the map below was already in the IDWR database.

95-14887

For your convenience I have included copies of the original claims. If my interpretation of your claims is accurate, then no further action is required. However, if my interpretation of your claims does not accurately reflect your actual water use, please contact me so we can take the steps necessary to more accurately describe your water use.

Please contact me with any questions.

Respectfully,

Craig L. Saxton
