

MEMO TO SRBA CLAIM FILE NO. A29-10092

CLAIMANT'S NAME: Allen and Linda Collins DATE: 4-7-92

COUNTY: Bannock

EMPLOYEE: Carter Fritschle

Telcon with Brent Morgan (232-7800). O.K. to
contact Allen Collins directly.

Lawn was watered one day about 2
weeks ago. Has not been watered since.
Well has been overflowing for about
6 weeks and running into the pond.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

water to flow to a "sump" near the unnamed stream that flows along the south side of the Collins' lawn. The 2 H.P. pump is placed above the sump and is connected to the sprinkler system to irrigate the lawn. Mr. Collins stated that he can run up to 6 sprinklers at one time. The sprinklers were a mixture of Toro 606 and a "rainbird type" lettered 461 DP with $5/32$ " nozzles. Only the pump in the house was connected to the system at the time of the exam. Only one of the claims (A29-10023 or A29-10092) should be recommended. These claims are duplicate filings on the same system.

CLAIMANT(S): Allen R. or Linda Collins

ANALYSIS OF THE WATER USE

Mrs. Collins stated that a well on her property originally provided water to two homes (the Collins home and the DiCataldo home). When that well would no longer produce enough water to supply both homes, a new well was drilled for the DiCataldo home and the well for the Collins home was deepened. The 1 horsepower "irrigation" pump found on March 24, 1986 by Harold Jones when he conducted the field inspection for application 29-7804 appears to have been replaced by a 2 horsepower pump. The same report shows that an increase in the amount of lawn being irrigated had occurred after the Collins purchased the property. However, there is less than one-half acre (approximately 16,000 square feet) of lawn irrigated with water from the well.

Priority date claimed: June 1, 1962

Priority date recommended: June 1, 1962

Priority date verified by county assessor's records.

MEMO

TO: File
FROM: Lynne Krogh-Hampe
DATE: February 9, 1990
RE: Lundburg v. Collins

I. CLAIMS

A. A29-10023, A29-10092 - Collins

These appear to be duplicative filings. Ernest says '23 was done in the regional office by Mr. Collins, and '92 was submitted a year later by his attorney. They are the same, and are consistent with indoor/outdoor single domestic use of GW. Priority date claimed is 6/1/62. The claim is consistent with an investigation of Mr. Collins' use that was done in 1986 as part of the processing of an application by Mr. Collins for a spring right which was denied. The priority date claimed is supported by an allegation in the Lundburg complaint that Collins' predecessor drilled a well in 1962. The only investigation that would appear appropriate is to verify with Mr. Collins attorney that he is seeking only one ground water right.

B. A29-10108 - DiCataldo

Claim consistent with indoor/outdoor single domestic use of GW. Description of diversion works is "community well 1963, new well drilled 10/6/85", priority claimed is 3/1/63. There is an allegation in the Lundburg complaint that supports the new well date of 1985, but we have no information as to the previous community well use. Although it has been proposed that IDWR will not seek further evidence of priority as to small D&S uses, since this claim discloses a potential change in PD, we will need more information about the community well before priority other than 1985 can be recommended. The claimant acquired the property very recently, and is not likely to have much information. I understand, however, that Stan Kantrowitz of FNMA in California initially prepared the claim, and may have more information. His number is 818-568-5166.

C. A29-10093 - Freshman

Claim is consistent with indoor/outdoor single domestic use. At time of the application field inspection (1986), the pipeline to the house was not hooked up, and if it still isn't then there may be a possibility of forfeiture that needs to be investigated. Also, there is some question whether the right is used for outdoor use only, which should be investigated, and if so, the amount of water claimed may need to be reviewed. Priority date claimed is consistent with the posted notice claimed by Lundburg, although the basis of claim is marked as beneficial use. Since the Lundburg's will need to prove up their priority date (see below), Freshman should have to also (despite the proposed

general policy not to require further information as to priority date of small D&S claims).

D. A29-04177 - Lundburg.

There is a posted notice attached to the claim and a statutory claim attached to the complaint. There was also some investigation of the use of water from the springs by the Lundburgs as part of an application by Collins, No. 29-7804. This report was sent to the parties in the application proceeding and the Lundburg's objected to its findings, hearing was held, but no findings are made in the permitting decision as to the use of water by Lundburgs.

Source: Source of adj claim and stat claim is spring, source of posted notice is unnamed stream but may correspond to overflow of spring.

Priority: Priority claimed is date of posting set forth on posted notice, stat claim priority date is much later. Note however that as of this date there is no evidence of completion of the appropriation described in the posted notice (also, the posted notice claims 3 cfs for irrigation of 200 acres, and it is highly doubtful that this spring could ever have done that). As to the statutory claim, pursuant to statute the claim can be evidence of use as of the year filed (only if the current use matches the claim, which it does not appear to, see below) but not as of the priority date claimed. The stat claim was filed in 1980. The application file contains an agreement by Collins predecessor and the Lundburgs to pay them for use of the spring, which is some indication that Lundburg's priority predates Collins (the next in line), otherwise why would he pay someone to use a spring on his own land. There is also an agreement in the abstract of title that makes reference to a reservoir on the land of Tech Farm Inc., which may support an inference that the current use goes back at least to April 28, 1934, the date of the agreement. More information is necessary (either showing completion of the posted notice application within a reasonable time after filing, or tracing back the current use of water) before an earlier priority date can be recommended. I'm not sure if this agreement should be deemed to support a similar priority date for Mr. Freshman (see above), who is also a successor to the Tech Farm property.

PD: First and second PDs match stat claim, but description of second PD is ambiguous. The PDs should be verified and properly described. The claim also sets forth instream flow ending and beginning point, but there is no basis for an instream flow claim so no further investigation should be necessary as to it.

Amount and purpose and period: Same as stat claim, except that stat claim shows small amount (.04 cfs) for year round domestic and stockwater, and claim shows small amount for year

round irrigation and domestic irrigation. It is within the amount set forth on posted notice. Posted notice does not include storage, does not include stockwater either but domestic use in the posted notice could be interpreted as including water for household stock.

The first problem is the year-round irrigation and domestic irrigation. My understanding is that the only year around irrigation IDWR recognizes is as part of a domestic use. The adj claim does not show stockwater use in part 6, but does in part 9, but the stockwater use is small and should probably be recommended as part of a domestic use. Also, the claim indicates that the spring is used only for outdoor domestic. Therefore, the amount of water used for outdoor domestic needs to be determined and recommended with a year round period of use.

There are some problems with the amounts for irrigation. To get a start on taking take of these problems, the irrigated acreage and where it is irrigated from (direct flow or storage) needs to be determined and recommended accordingly (see PU below). Once that is determined, we need to look again at the amounts. Assuming we can find enough acreage irrigated from storage to justify the 4 AF claimed, what about the .30 cfs diversion to storage? Is that much necessary or reasonable?

Note that .34 cfs is claimed from 11/1 to 3/31, .04 cfs is claimed from 4/1 to 11/1. Permitting decision found .22 cfs flowing from stream on two days in March, 1986.

PU: Adj claim shows irrigated acreage in same $\frac{1}{4}$ as in stat claim, but includes 4 acres more in one $\frac{1}{4}$. Irrigated acreage in adj claim is included in intended irrigated acreage in posted notice. Field inspection report by Harold Jones dated 5/26/86 as part of application found 2.05 acres irrigated (calculated by square feet of several irrigated parcels), but didn't say which qtr qtr. Copy of report was sent to parties and Lundburg objected to it, and hearing was held. Decision does not make finding as to usage by Lundburgs. Lundburgs attached soil and water conservation plan by person who leases their land that may support irrigation of 12.5 acres, but it appears to show proposed irrigation, not actual irrigation, and shows Portneuf River as additional source of water. Again, actual irrigated acreage and source of water for irrigated needs to be determined. The claim indicates that Arnold Trappett and his son Jeff are farming the Lundburg place on a lease so they may have information as to past irrigation.

II. Notes

Lundburg is claiming that use of the wells interferes with flow of the spring resulting in injury to her water right. So there are two things we need to determine - what she has a right to, and whether use of the wells has diminished the flow of the spring below the point necessary to supply that right (and

possibly also Freshman's).

Note that the only factual allegations in the complaint to support the alleged injury is that the spring flow is less than the .34 cfs claimed, and that there is a portion of the ground that was irrigated that the plaintiff can no longer irrigate.

Also, it would appear that the Lundburg's primary purpose is to protect the pond. Is there enough water in the spring to fill the pond? If so, then is the real complaint that the flow is diminished to point afterwards that the pond does not refill? If so, then there probably is no relief, since they only claimed diversion to storage in the non-irrigation season.

I had told Lundburg's attorney that we would probably be contacting him later this month concerning our proposal for testing the well and it's effect on the spring. Maybe we should reinvestigate Lundburg's uses first, and unless we have reason to believe that spring flow has diminished below the level necessary to supply what we believe her right to be, then maybe our proposal should be that we consider testing unnecessary because we have yet to see proof of Lundburg's claim to injury. We probably need to contact the region about when the field examination should be done to get the best information.

RE: Field examination of a water right claimed in the Snake
River Basin Adjudication

Dear Mr. Morgan:

We are planning to conduct water right field examinations in the vicinity of your client's water right claim on March 14 and 15, 1990. A field examination is needed to verify the water use. The field examiner will be visiting your client's property to obtain information necessary for the verification process.

A copy of the letter sent to your client is enclosed. If you wish to be present with your client at the time of the field examination, or if you have any questions regarding the field examination, you may contact this office at (208) 327-7862.

Sincerely,

Carter Fritschle
Senior Water Resource Agent
