B. OVERLAP REVIEW

1. Other water rights with same place of use: None ☐ Copies Attached
2. Other water rights with same point of diversion: None ☐ Copies Attached ☐ Copies of Field Exam's Attached

C. SYSTEM DESCRIPTION

1. **Diversion System Diagram:** Indicate all major components and distances between components. Indicate weir size/ditch size/pipe i.d. as applicable. ☐ Alternative diagram attached

Scale: 1" = 10'

2. ☒ Copy of U.S.G.S. Quadrangle Attached Showing location(s) of point(s) of diversion and place(s) of use (required). ☒ Aerial Photo Attached (required for irrigation of 10 acres or more).
- ☒ Photo of Diversion and System Attached (required for all but single household domestic groundwater, and stockwater).

System Description (continued)

3. **Narrative:** Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

The system has a 4" cased well with a 2 HP submersible pump. The electrical box and pressure tank are located in the basement of the home. The well is located approximately 35' west of the southwest corner of the house. The landscaping consists of small areas of grass and juniper trees. The total irrigation appears to be less than 1/2 acre.

$V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} =$ _____

2. Volume Calculations for Other Uses:

H. REMARKS AND OVERLAP REVIEW ANALYSIS

Mrs. DiCataldo thought that the well had been recently deepened rather than replaced. She also stated the home was built approximately 25 years ago.

A valve is located on a pipe extending from the side of the well casing above ground level, and a shutoff appears to be located underground to the east of the well casing. There was no evidence that the well was flowing at the time of the exam.
uncontrolled.

CLAIMANTS(S): Antonio George DiCataldo

ANALYSIS OF THE WATER USE

Linda Collins (co-claimant on claim A29-10092) stated that the water for the DiCataldo home had been supplied from the well on her property. The production of the Collins well diminished to the point of being insufficient to supply both homes. Mrs. Collins stated that her well was deepened, and the DiCataldo well was drilled. No uncontrolled artesian flow was evident at the time of the exam. The well driller's report indicates a flow of 20 gpm.

Priority date claimed: March 1, 1963

Priority date recommended: March 1, 1963

Priority date verified by county assessor's records.

CLAIMANT'S NAME: Antonio George Di Cataldo

DATE: 11-7-90

EMPLOYEE: Carter Fritschle

Telephone conversation with Anita Hymas of the
Bannock County Assessor's office. 236-7340

The assessor's records show the house at 3121
S. Bannock Hwy. was constructed (approximately) in 1964.

DEPARTMENT OF WATER RESOURCES WELL DRILLER'S REPORT

State law requires that this report be filed with the Director, Department of Water Resources within 30 days after the completion or abandonment of the well.

RE: Field examination of a water right claimed in the Snake
River Basin Adjudication

Dear

We are planning to conduct water right field examinations in the vicinity of your client's water right claim on March 14 and 15, 1990. A field examination is needed to verify the water use. The field examiner will be visiting your client's property to obtain information necessary for the verification process.

A copy of the letter sent to your client is enclosed. If you wish to be present with your client at the time of the field examination, or if you have any questions regarding the field examination, you may contact this office at (208) 327-7862.

Sincerely,

Carter Fritschle
Senior Water Resource Agent
Adjudication Bureau

RE: Field examination of a water right claimed in the Snake River
Basin Adjudication

Dear Claimant:

We are planning to conduct water right field examinations in the vicinity of your water right claim on March 14 and 15, 1990. A field examination is needed to verify your water use.

The field examiner will be visiting your property to obtain information necessary for the verification process. If you, or someone with knowledge of your water system could be available at the time of the field examination, it would be appreciated.

You will be contacted by telephone to schedule a time for the field examination. If you have any questions regarding the field examination, you may contact this office at (208) 327-7862.

Sincerely,

Carter Fritschle
Senior Water Resource Agent
Adjudication Bureau

MEMO

TO: File
FROM: Lynne Krogh-Hampe
DATE: February 9, 1990
RE: Lundburg v. Collins

I. CLAIMS

A. A29-10023, A29-10092 - Collins

These appear to be duplicative filings. Ernest says '23 was done in the regional office by Mr. Collins, and '92 was submitted a year later by his attorney. They are the same, and are consistent with indoor/outdoor single domestic use of GW. Priority date claimed is 6/1/62. The claim is consistent with an investigation of Mr. Collins' use that was done in 1986 as part of the processing of an application by Mr. Collins for a spring right which was denied. The priority date claimed is supported by an allegation in the Lundburg complaint that Collins' predecessor drilled a well in 1962. The only investigation that would appear appropriate is to verify with Mr. Collins attorney that he is seeking only one ground water right.

B. A29-10108 - DiCataldo

Claim consistent with indoor/outdoor single domestic use of GW. Description of diversion works is "community well 1963, new well drilled 10/6/85", priority claimed is 3/1/63. There is an allegation in the Lundburg complaint that supports the new well date of 1985, but we have no information as to the previous community well use. Although it has been proposed that IDWR will not seek further evidence of priority as to small D&S uses, since this claim discloses a potential change in PD, we will need more information about the community well before priority other than 1985 can be recommended. The claimant acquired the property very recently, and is not likely to have much information. I understand, however, that Stan Kantrowitz of FNMA in California initially prepared the claim, and may have more information. His number is 818-568-5166.

C. A29-10093 - Freshman

Claim is consistent with indoor/outdoor single domestic use. At time of the application field inspection (1986), the pipeline to the house was not hooked up, and if it still isn't then there may be a possibility of forfeiture that needs to be investigated. Also, there is some question whether the right is used for outdoor use only, which should be investigated, and if so, the amount of water claimed may need to be reviewed. Priority date claimed is consistent with the posted notice claimed by Lundburg, although the basis of claim is marked as beneficial use. Since the Lundburg's will need to prove up their priority date (see below), Freshman should have to also (despite the proposed

general policy not to require further information as to priority date of small D&S claims).

D. A29-04177 - Lundburg.

There is a posted notice attached to the claim and a statutory claim attached to the complaint. There was also some investigation of the use of water from the springs by the Lundburgs as part of an application by Collins, No. 29-7804. This report was sent to the parties in the application proceeding and the Lundburg's objected to its findings, hearing was held, but no findings are made in the permitting decision as to the use of water by Lundburgs.

Source: Source of adj claim and stat claim is spring, source of posted notice is unnamed stream but may correspond to overflow of spring.

Priority: Priority claimed is date of posting set forth on posted notice, stat claim priority date is much later. Note however that as of this date there is no evidence of completion of the appropriation described in the posted notice (also, the posted notice claims 3 cfs for irrigation of 200 acres, and it is highly doubtful that this spring could ever have done that). As to the statutory claim, pursuant to statute the claim can be evidence of use as of the year filed (only if the current use matches the claim, which it does not appear to, see below) but not as of the priority date claimed. The stat claim was filed in 1980. The application file contains an agreement by Collins predecessor and the Lundburgs to pay them for use of the spring, which is some indication that Lundburg's priority predates Collins (the next in line), otherwise why would he pay someone to use a spring on his own land. There is also an agreement in the abstract of title that makes reference to a reservoir on the land of Tech Farm Inc., which may support an inference that the current use goes back at least to April 28, 1934, the date of the agreement. More information is necessary (either showing completion of the posted notice application within a reasonable time after filing, or tracing back the current use of water) before an earlier priority date can be recommended. I'm not sure if this agreement should be deemed to support a similar priority date for Mr. Freshman (see above), who is also a successor to the Tech Farm property.

PD: First and second PDs match stat claim, but description of second PD is ambiguous. The PDs should be verified and properly described. The claim also sets forth instream flow ending and beginning point, but there is no basis for an instream flow claim so no further investigation should be necessary as to it.

Amount and purpose and period: Same as stat claim, except that stat claim shows small amount (.04 cfs) for year round domestic and stockwater, and claim shows small amount for year

round irrigation and domestic irrigation. It is within the amount set forth on posted notice. Posted notice does not include storage, does not include stockwater either but domestic use in the posted notice could be interpreted as including water for household stock.

The first problem is the year-round irrigation and domestic irrigation. My understanding is that the only year around irrigation IDWR recognizes is as part of a domestic use. The adj claim does not show stockwater use in part 6, but does in part 9, but the stockwater use is small and should probably be recommended as part of a domestic use. Also, the claim indicates that the spring is used only for outdoor domestic. Therefore, the amount of water used for outdoor domestic needs to be determined and recommended with a year round period of use.

There are some problems with the amounts for irrigation. To get a start on taking take of these problems, the irrigated acreage and where it is irrigated from (direct flow or storage) needs to be determined and recommended accordingly (see PU below). Once that is determined, we need to look again at the amounts. Assuming we can find enough acreage irrigated from storage to justify the 4 AF claimed, what about the .30 cfs diversion to storage? Is that much necessary or reasonable?

Note that .34 cfs is claimed from 11/1 to 3/31, .04 cfs is claimed from 4/1 to 11/1. Permitting decision found .22 cfs flowing from stream on two days in March, 1986.

PU: Adj claim shows irrigated acreage in same $\frac{1}{4}$ as in stat claim, but includes 4 acres more in one $\frac{1}{4}$. Irrigated acreage in adj claim is included in intended irrigated acreage in posted notice. Field inspection report by Harold Jones dated 5/26/86 as part of application found 2.05 acres irrigated (calculated by square feet of several irrigated parcels), but didn't say which qtr qtr. Copy of report was sent to parties and Lundburg objected to it, and hearing was held. Decision does not make finding as to usage by Lundburgs. Lundburgs attached soil and water conservation plan by person who leases their land that may support irrigation of 12.5 acres, but it appears to show proposed irrigation, not actual irrigation, and shows Portneuf River as additional source of water. Again, actual irrigated acreage and source of water for irrigated needs to be determined. The claim indicates that Arnold Trappett and his son Jeff are farming the Lundburg place on a lease so they may have information as to past irrigation.

II. Notes

Lundburg is claiming that use of the wells interferes with flow of the spring resulting in injury to her water right. So there are two things we need to determine - what she has a right to, and whether use of the wells has diminished the flow of the spring below the point necessary to supply that right (and

possibly also Freshman's).

Note that the only factual allegations in the complaint to support the alleged injury is that the spring flow is less than the .34 cfs claimed, and that there is a portion of the ground that was irrigated that the plaintiff can no longer irrigate.

Also, it would appear that the Lundburg's primary purpose is to protect the pond. Is there enough water in the spring to fill the pond? If so, then is the real complaint that the flow is diminished to point afterwards that the pond does not refill? If so, then there probably is no relief, since they only claimed diversion to storage in the non-irrigation season.

I had told Lundburg's attorney that we would probably be contacting him later this month concerning our proposal for testing the well and it's effect on the spring. Maybe we should reinvestigate Lundburg's uses first, and unless we have reason to believe that spring flow has diminished below the level necessary to supply what we believe her right to be, then maybe our proposal should be that we consider testing unnecessary because we have yet to see proof of Lundburg's claim to injury. We probably need to contact the region about when the field examination should be done to get the best information.
