DEPARTMENT OF
WATER RESOURCES

The above-captioned water rights were claimed as implied federal reserved water rights by the United States Bureau of Land Management. The federal basis for all of the claims is the Wild and Scenic Rivers Act and the Omnibus Public Land Management Act of 2009. The claims were included in the *Director's Report of Late and Miscellaneous Claims* filed on December 27, 2012. The State of Idaho filed objections to the claims. The objections were resolved via *Stipulation* filed by the parties on March 30, 2016. The *Stipulation* was approved by this Court's *Order Approving Stipulation and Entry of Partial Decrees* issued contemporaneously herewith. As a result of the *Stipulation* there are no remaining objections to the above-captioned water right claims.

As required by Idaho Code § 42-1411A(12), a hearing was held on September 20, 2016, for the purpose of allowing the United States to demonstrate a *prima facie* case regarding the existence of the above-captioned water rights established under federal law. No party appeared in opposition. The United States filed affidavits in support of its claims. The Court has reviewed the affidavits and heard the arguments of counsel in open court and finds that the

United States has met its burden of establishing the existence and elements of an implied federal reserved water right for each of the above-captioned water right claims.

THEREFORE, IT IS ORDERED that above-captioned water rights are hereby decreed as set forth in the attached *Partial Decrees* pursuant to I.R.C.P. 54(b).
