COMMUNICATION DOCUMENTATION

March 11, 1999

Regarding:

37-10478

Customer:

NEAL BOWMAN

From: Vikie Hancock

[illegible]

Mr. Bowman came in to discuss the above claim for domestic and stock. He was concerned that the total diversion rate was not sufficient. His claim was filed for .04 for domestic and .04 for stock with a combined total diversion rate of 0.04 cfs. He expressed concern that with his 1½ hp pump, his diversion rate would be greater than 0.04 cfs when the 800 head of cattle were drinking. I discussed the procedure needed for him to amend his claim to a total diversion rate of 0.08. He said that that had been his original intent at claims taking.

He also questioned the limit of 13,000 gpd. He wondered if that would be enough water for his house and stock, should things change and the Department begin to regulate d&s claims more closely. I told him that he could file an additional claim for stockwater, for a use above the 13,000 gpd, but that he would have to prove an historical use of water above 13,000 gpd, prove a priority date, and explained the fees required to file a late non-de minimus claim.

Mr. Bowman decided to amend his claim to a total diversion rate of 0.08 cfs at this time. I gave him an original Amended claim, an SF4 and explained the general procedure of motioning the court. He also took a copy of AO1, and asked if he needed an attorney. I told him that I certainly would never discourage him from contacting an attorney, but to read the SF4 first to see if it would be necessary for him. I also told him to contact me if he had any questions regarding the amendment, or about filing a new claim.
