RE: Objection to Snake River Basin Adjudication (SRBA) recommendations 67-582, 67-587, 67-594, and 67-4253

Dear Ms. Watkins,

I left you a voicemail the other day, but thought I would re-cap a little of what I told you.

I did review the information you sent me and feel that I can support 190 acres of irrigation based on the evidence you submitted. However, due to the overlapping nature of the water rights, in order for me to be able to make the necessary changes, you will need to file an objection to 67-4253. For your convenience, I have enclosed another objection form.

I have also enclosed copies of **proposed** amended recommendations. This is how I foresee your water rights looking after you file the objection to 67-4253 and we make the appropriate changes to the recommended acreage for decreed rights 67-582, 67-587, and 67-594. There are a couple of things I feel I should point out.

Your irrigated place of use (POU) is proposed to be recommended in two different systems. 67-582 and 67-587 are both served from Lolley ditch, while 67-594 is served from Hanna ditch. Originally, claim 67-4253 was filed to "blanket" all the ground irrigated with decreed rights 67-582, 67-587, and 67-594, filling in the acreage that wasn't described in the decreed rights with beneficial use water or flood water.

In the proposed recommendations, I propose we split 67-4253 into two parts: 67-14866 from the Lolley Ditch and 67-14867 from the Hanna ditch. The result would be recommending 5 rights for two different systems that in combination irrigate 190 acres.

Lolley Ditch

67-582	Decreed for 30 acres
67-587	Decreed for 50 acres
67-14866	<u>Recommended for 28 acres</u>
Total = 108 acres	

Hanna Ditch

67-594	Decreed for 60 acres
67-14867	<u>Recommended for 22 acres</u>
Total = 82 acres	

Take a look at the proposed recommendations and let me know what you think. Meanwhile, I encourage you to file the objection for water right 67-4253. This will allow me to split the water right into the two pieces and adjust the recommended acreage under each portion.

Lastly, I cannot stress enough that the copies of the proposed recommendations are simply a suggestion. Right now, in the eyes of the SRBA court, your water rights look just how they did when you objected.

I look forward to hearing from you.

Respectfully submitted,

Re: Objection for SRBA recommendations 67-582, 67-587, & 67-594

I contacted Barbara Watkins by phone today and requested that she submit copies of the FSA photos and Mann Creek Irrigation district records referenced in her objection. She agreed and said she would go into town tomorrow and have them photocopied.

In addition, I told her that I had found about 185 acres but would like something more to support the 190 she was talking about. She said that the FSA photos supported about 188.5 acres and then there was a little field below that could be irrigated which is an acre and a half and that is what brings us up to 190 ac.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Recommendation Report 67-582 V1

1. 168 This right is a Secondary Right, as established by the district court in Jefferson et al. v. Higgenbotham et al. (Washington County, June 3, 1921), and, as such, is subordinate to all Primary Rights on Mann Creek.
2. 167 This right shall receive 100% of its decreed amount until the natural flow of the waters of Mann Creek shall decrease so that all rights cannot receive 100%, at which time this right and other various decreed rights, as established by the district court in Jefferson et al. v. Higgenbotham et al. (Washington County, June 3, 1921), shall be cut to 70% of the said amounts, beginning with the latest right and proceeding to the earliest right in the order of priority.
3. C05 Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.
4. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

Remarks:Comments:

1. mcase 6/3/2004 POU

Comment: Updated Shape

2. mcase 6/3/2004 Quantity

Comment: Decreed flow is .6 cfs. Claimed low water flow of .42 cfs. Recommended claimed amount. Could not determine annual diversion.

3. mcase 6/4/2004 POD

Comment: Updated shape

4. dnarsavage 1/12/2006 POU

Comment: Updated Shape

5. dnarsavage 1/12/2006 Quantity

Comment: Morgans earlier note on the quantity claimed is correct, but 0.6 CFS is noted in the remarks as the "flood water right," which matches the language of the decree. Based on this, I will recommend the full 0.6 cfs that was decreed to this right in 1921.
