OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

The quantity of water decreed for this water right for domestic use and stockwater use is not a determination of historical beneficial use.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Beneficial Use
Stockwater use is for 50 range cattle.

To Whom It May Concern:

This letter is to clarify the beneficial use of Water Right Number: 63-21064. I, Maurice Clements, can personally verify that the well was in operation providing irrigation water on the ground described in Adjudication Claim Report 63-21064. A 1955 establishment date is accurate. In 1955, the property was owned by Elmer Tiegs, or one of his companies. 1955 was the same year I married Elmer's daughter, Barbara Tiegs. I was farming on my own in 1956 and through my college career, was very interested in my Father-in-Law's business. Barbara and I are no longer married and the well is owned by her company BMK Inc.

Sincerely,

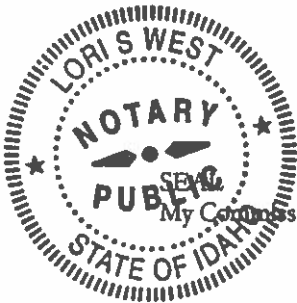

Maurice Clements
President, Dry Lake Farms, Inc.

STATE OF IDAHO

On this 17th day of May, 2006, personally appeared before me the signer(s) of the above instrument, who duly acknowledged to me that he (she)(they) executed the same.

SYSTEM DESCRIPTION

A63-21064

Information submitted by the claimant shows the well to be 1265 ft deep, cased to 990 ft. Susie at Dave Adamson Pump found records that show a 5 HP Grunfos pump was installed in November 1992. Static water is at 354 ft and the pump is set at 435 ft. The pump is rated at 25 gpm.

The water is pumped into a tank of approximately 1000 gallons (48" diameter, 10.5 ft length). A 1 HP pump then relifts the water to the place of use.

Based on the IDWR field examiner's handbook for open discharge of GW,

$$Q = \frac{(8.8)(\text{HP})(\text{Eff.})}{\text{lift}}$$

$$Q = \frac{(8.8)(5.0)(.70)}{435}$$

$$Q = .07 \text{ cfs}$$

System Capacity

$$.07 \text{ cfs} \times 448.83 \text{ gpm/cfs} \times 60 \text{ min/hr} \times 24 \text{ hr/day} = 45,242 \text{ gpd}$$

Required Capacity

$$4.5 \text{ afa} \div 246 \text{ days} = .018 \text{ af/acre/day}$$

$$20 \text{ acres} \times .018 \text{ af/acre/day} \times 325,850 \text{ gal/af} = 117,306 \text{ gpd}$$

$$1,000 \text{ gal}/25 \text{ gpm} = 40 \text{ min. per fill}$$

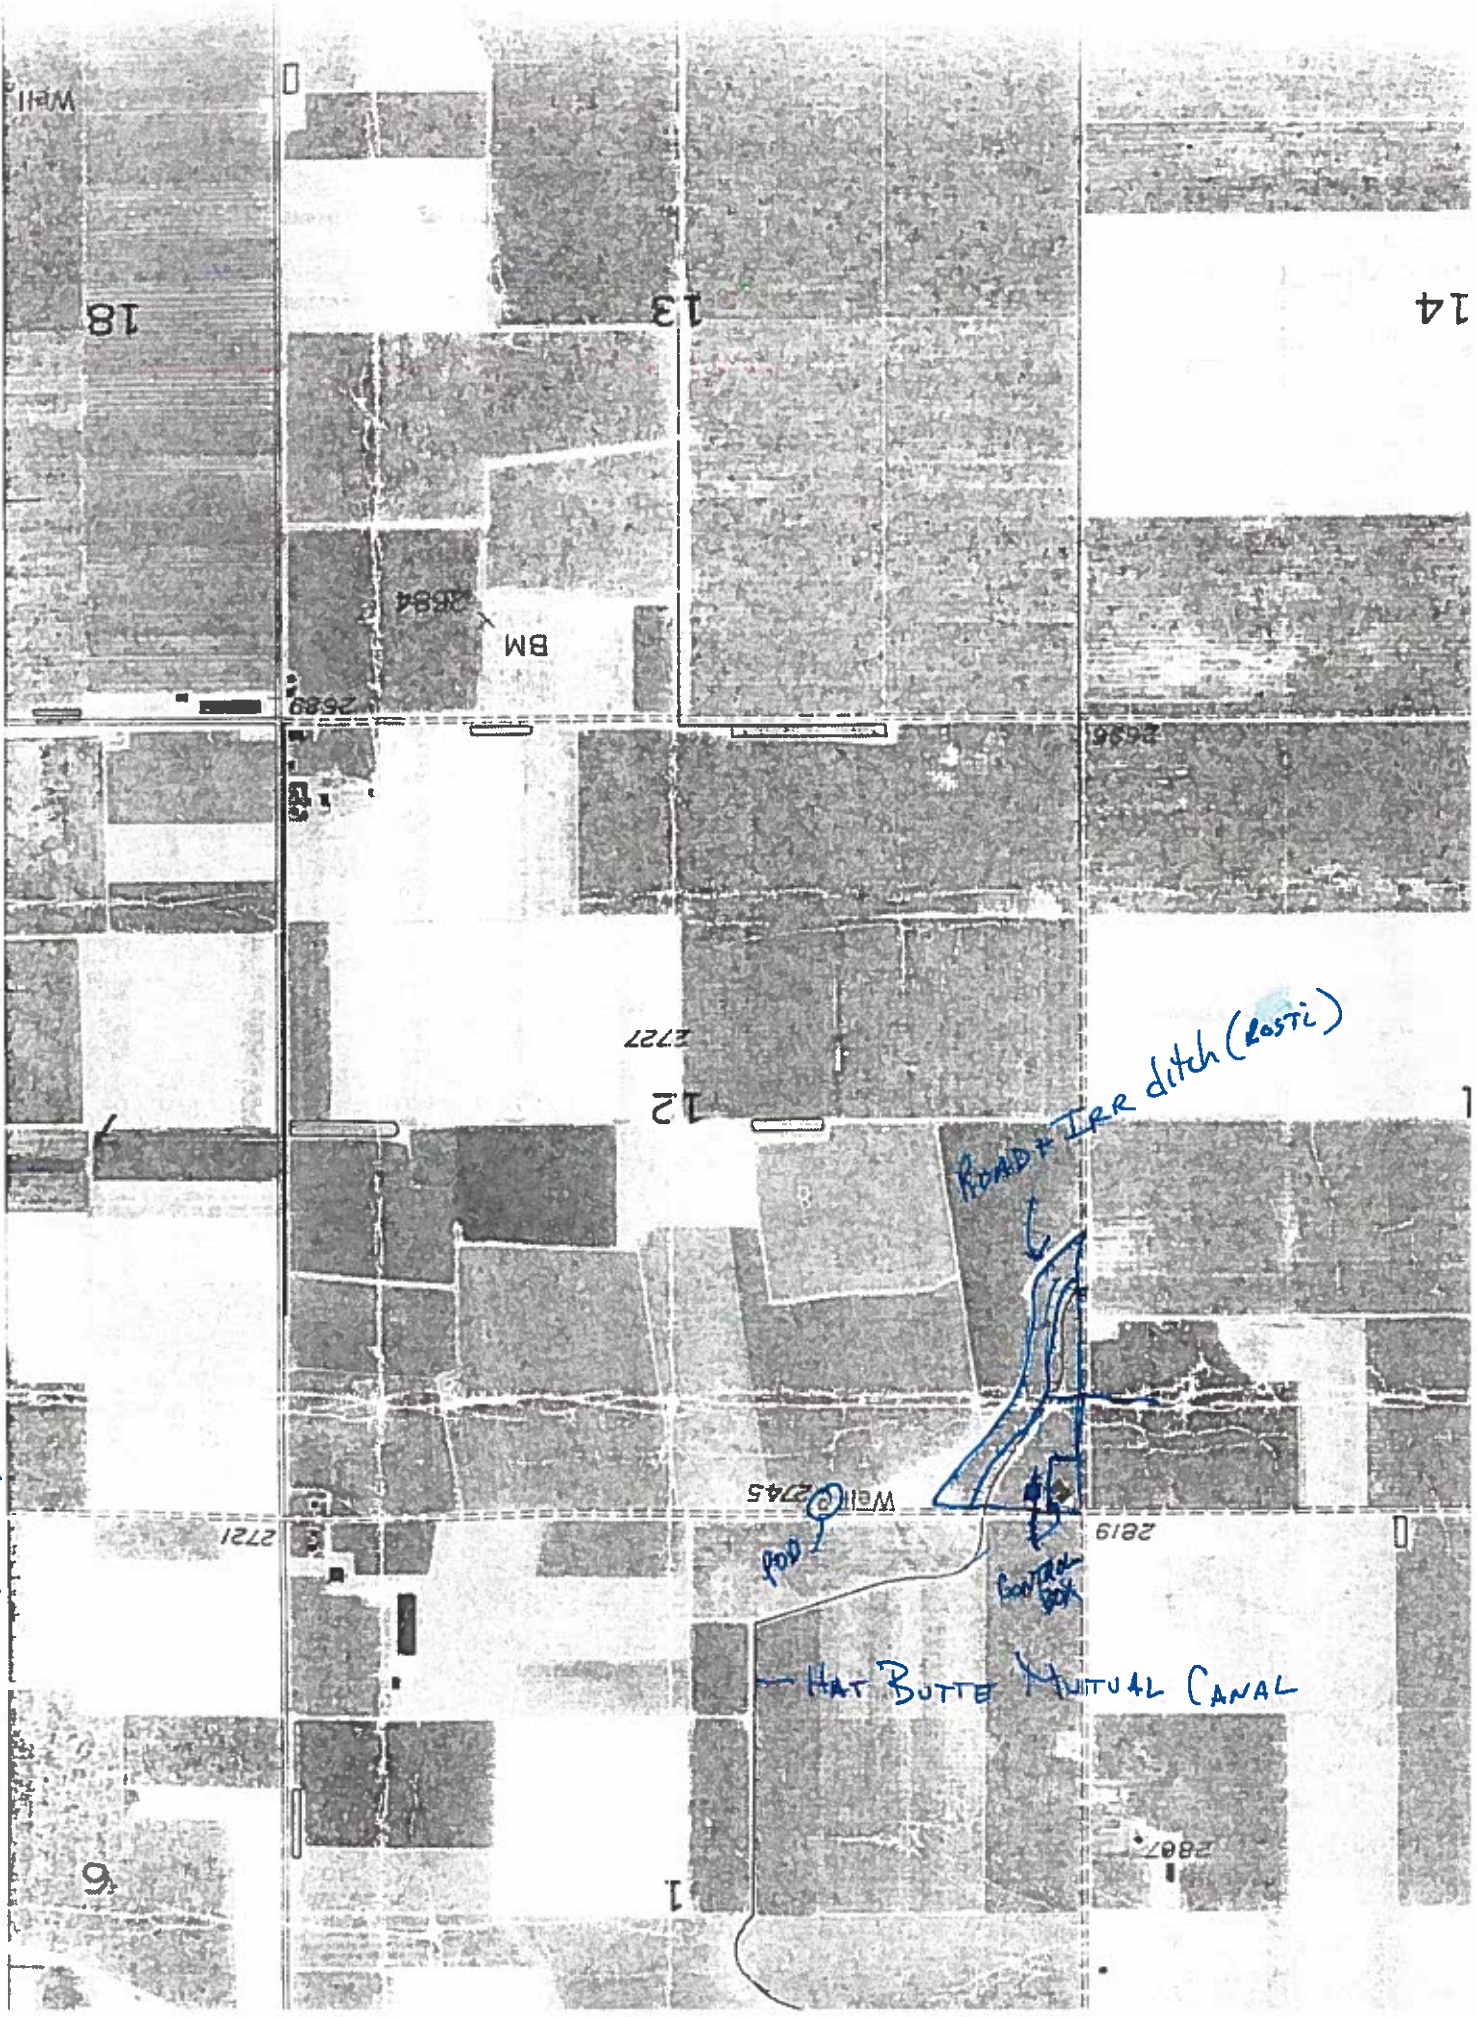

$$117,306 \text{ gpd}/1,000 \text{ gal} = 117.3 \text{ fills/day}$$

117.3 X 40 = 4692 min.s for system to run to meet required amt for irrigation.

$$4692 \text{ min.}/60 \text{ min./hr} = 78.2 \text{ hrs.}$$

Maurice L. Clements being first duly sworn,
deposes and says: This well was drilled for the
purpose of irrigation in 1935, by Elmer Tieg,
who is the father of the present owner of the
well and water right. The well was very deep
and did not produce much water and was
eventually discontinued as a primary source of
irrigation water for land located in the North 1/2
of sec 12 1 N 3 W. At that time it was then
converted to the use of Elmer Tieg's daughter,
Barbara Craven. For domestic, livestock, and
irrigation for her home, farmstead and
approximately 40 Acres of lawn and pasture
in the NW 1/4 NW 1/4 of sec. 12 1 N 3 W.

Dear Maria,

This letter is in response to your letter of December 19, 1995, asking for additional information about my irrigation system around my house & pasture.

1. Dave Adamson records showing that he installed a 4", 5 horsepower pump 435 feet down. Nov. 1192 would be the well at the bottom of the hill. I do not have a copy of that bill.

2. The water used on the pasture and yard are not co-mingled. When the river water is being used on my farm, I do not use the well water for irrigation.

I hope this answers your questions.

Sincerely,

Barbara Craven

RE: Notice of Claim to a Water Right No. A63-21064

Dear Ms. Craven:

This letter is a request for additional information about the irrigation system used at your home and surrounding pasture.

I contacted Dave Adamson for information about the well and pump. His records show that they installed a 4", 5 horsepower pump, set 435 feet down, in November of 1992. However, since Mr. Adamson's office was not sure that this information pertains to the irrigation well at the bottom of the hill, I am asking that you send to this office the specifications of your system. Please include the pump make and model number and the depth at which the pump is set. This information should be on the receipt you received when the system was installed.

The other information which is needed is about the canal water which is used on the same ground as the well water. Based on my field notes, the two sources of water are co-mingled in the same irrigation system. The information needed is a confirmation that both sources are used on the lands, and that they are used through the same sprinkler system. In order to accurately recommend the water right, IDWR also requires information on whether well water is used all season or only when canal water is unavailable.

Thank you for your assistance. Please send the requested information to this office to my attention. If you have any questions please do not hesitate to contact me.

Sincerely,

Maria Minicucci

Re: Claim No(s). ALS-210164

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
