Comments:

1. Igraves 9/11/2006 P/U

Comment: Rights 63-7688 and 63-7689 were combined into this right because they share the same p/d, system and have the same priority date. 68 total acres were originally licensed and 60 were claimed due to feedlot development. Based on 1987 aerial photography, only 55 acres were found irrigated. The W1/2 NE qtrs were added based on ArcView technology.

2. Igraves 9/11/2006 Flow Rate

Comment: Original acres were licensed at 2 inches/acra.

3. Igraves 9/11/2006 Overlaps

Comment: Rights 63-2630B and 63-2279 from separate sources appear to overlap acres in the SENE, however, were not claimed in the SRBA.

4. Igraves 9/11/2006 Parcel Nos.

Comment: Irrigation is within Parcel Nos. R2615500000, R2615900000 and R2616000000.

5. Igraves 9/11/2006 Source

Comment: Source was clarified to South Boise Drain per the topo map.

License of Water Right No. 63-7688 Priority November 9, 1972 Amount 1.48 cfs

THIS IS TO CERTIFY, that Gary Van Vliet

of Parma, Idaho, has complied with the terms and conditions of Permit No. 63-7688 issued pursuant to Application for Permit dated November 9, 1972, and has submitted proof to the Department of Water Resources on July 20, 1981, that he has applied water to a beneficial use; an examination by the Department indicates that the works have a capacity for the diversion of 2.67 cfs of water from Alkali Drain, tributary to Snake River, and that the permit holder has applied to a beneficial use and established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>March 15</u> to <u>November 15</u>	<u>1.48</u> cfs and	<u>166.5</u> acre feet
	from	cfs and	
	from	cfs and	

Subject, however, to the condition that no more than 1.48 cfs of water be used at any one time, and that the amount of water so diverted and to which such right is entitled and confirmed for the purpose aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed 166.5 acre feet per year, said waters to be diverted within the SE 1/4 Section 14, Twp 5N, Rge 6W in the County of Canyon

RESPONSE DATE: AUGUST 9, 1995

RE: Notice of Claim to a Water Right No. A63-21767

Dear Mr. and Ms. Van Vliet:

IDWR's initial investigation of the Notice of Claim listed above indicates that the claim includes changes in the places of use from the previous places of use to the new places of use as shown below:

Original place of use: Twp. 05N, Rge. 06W, section 14
NENE 31 acres, SENE 37 acres

New place of use: Twp. 05N, Rge. 06W, section 14
NENE 21 acres, SENE 39 acres

A water right owner who has made a change in use of a water right prior to commencement of the SRBA may claim the change in the SRBA. IDWR may recommend the right as changed however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights.

Before IDWR may recommend your claim, you must provide IDWR with the date the change was made and submit some evidence tending to support that date. If the change was made before November 19, 1987, then the date provided must include the month, day, and year. If the change was made after November 19, 1987, then a specific date is not necessary, and the evidence need only support that the change occurred sometime after November 19, 1987. An information sheet is enclosed that describes the types of evidence that can be submitted for showing the date of change.

Your response must be received by this office by the response date shown above. If no response is received, then your claim to water for the new places of use will not be recommended to be decreed.

If you have any questions or need additional information, please do not hesitate to contact this office.

Sincerely,

Maria Miniucucci

Re: Request for supplemental water right by John Lamb,
Hoswell, Idaho

Dear Mr. Heggelson:

Mr. John Lamb has requested a statement from the Soil
Conservation Service concerning the request to increase his
water right from 11.1 to 11.5 per acre.

Most of the land on which the water will be applied is
moderate to high in silt content. Excess waters is required
for the leaching process to remove these harmful salts. For
this reason I believe the request for additional water is
justified.

Ample water appears to be available to fill this request,
since it is drawn from drain ditches that flow directly into
the Snake River a short distance downstream from the farm.

Respectfully yours,

W. L. Nelson

RE: Claim(s) to a Water Right filed in the Snake River Basin Adjudication

Claim Nos. A63-21767

Dear Claimants:

The Department of Water Resources will be conducting claim verification field exams in your area beginning in March. An examination is needed to verify your water use in order to complete our report for the court's decree.

The field exams are conducted to gather information about your water right. This information may include the source of water, type of usage, amount of water used, number of acres irrigated, and the legal description of the point of diversion and/or place of use.

Please contact this office by March 10, 1995, in order to make an appointment at a time which is convenient for you. Although it is not mandatory that you accompany IDWR's examiner, it is helpful if someone familiar with the water delivery system is present during the exam. This will help insure that your water right is described accurately for the report to the court.

To make an appointment, or if you have any questions or concerns about the field exam, please contact me at your earliest convenience.

Sincerely,

Maria Minicucci
