phone call (x) walk-in (.)

He called about replacing a new pump in the well per the above claims. He wanted to make sure he was replacing a "legal" size, we discussed the rate on the permit, in addition to what was reported on the Proof of Beneficial Use. After all was said and done, it was decided to go with the rate on permit.

RE: 37-08215

On 19 June 1997 at 1000 hrs. I met with Doug Sluder. The permit 37-08215 is for irrigation only. There is an adjudication claim, A37-11706, that calls to the domestic and stockwater. Mr. Sluder does not reside on the property. Mr. Sluder's son lives in one home and his daughter lives in the second home.

The #1 well, irrigation, was measured by the flowmeter. Please see the attached measurements. The pump was recently replaced by Ken Smith of Wood River Drilling. See memo dated June 3, 1997. Mr. Sluder says #1 well is used only for irrigation. However, he says, in the future both wells will be tied together.

The #2 well is supplying water to 2 homes plus stockwater for six horses. The rate for the #2 well was measured with a bucket and stopwatch.

The irrigation was on at the time of examination. There were 13 sprinklers, Weather Tec 10-30, and 4" handlines.

The westerly portion of property is the largest area irrigated. As the the photograph depicts, the land is on a slope. I asked Mr. Sluder what is being irrigated on the sloped area. I did not get a definite answer. I suppose fire protection would be one reason.

See Remarks and Conditions, #7, each acre of land is limited to 0.03 cfs. The property is approximately 4.0 acres (calculated by using a planimeter). Excepting out the property surrounding the homes (lawns will be irrigated from the irrigation well), the remainder is 3.0 irrigated acres. The recommended diversion rate is 0.09 cfs.

Analysis/Recommendation:

37-08215
Irrigation - Recommend 3.0 acres 10.5 afa

A37-11706
Domestic 2 homes 1.2 afa
Stock 6 horses 0.1 afa

PLEASE SEE BACK OF BENEFICIAL USE FIELD REPORT FOR RATES AND VOLUMES.
