Water Right Profile Report(s)

M E M O T O F I L E

FROM: Georgia Satterlee
DATE: 10 February 1998
RE: Application for Transfer per 37-02747

If approved, the application for transfer proposes to add a point of diversion to the licensed irrigation right. The intent, according to William Yager, manager for Wood River Ranch, is to eventually sell the northern portion (24 acres more/less). The applicant desires to continue irrigating the 32 acres in the southern portion, via the new well.

In reviewing the 1971 licensing exam, the field examiner found 56 irrigated acres, 24 acres in the SWSE $\frac{1}{4}$ of Section 12 and 32 acres in the NWNE $\frac{1}{4}$ of Section 13. Both sections are in T01N, R18E.

I went to the area 02 February 1998. The information for the well and pump (located in Section 12, T01N, R18E NESWSE $\frac{1}{4}$) is the same data as the field examiner recorded in 1971.

The enclosed copy of the 1992 ASCS photograph shows a decrease in irrigated acres. There are 19.6 irrigated acres in SWSE $\frac{1}{4}$ of Section 12 and 29.4 acres irrigated in NWNE $\frac{1}{4}$ of Section 13. According to the ASCS aerial slides, dated 1992-1997, there appears to be a history of irrigation.

Necessary information per approval:

- Subject to final SRBA determination.
- This right when split is limited to 0.019 cfs per acre.
- Measuring device(s) shall be installed and maintained on the well(s).
- The irrigation use is subject to North Snake Groundwater District measuring and reporting requirements.

The two adjudication claims for domestic and stock, A37-11836 and A37-11837 are claimed by Wood River Ranch.

On 02 February 1998, the domestic and stock for A37-11836 was alive and well. However, it was a different story for A37-11837. The house seemed to have that abandoned look and there was not a critter around claiming stockwater. I looked around for another well besides the existing irrigation well but did not locate one. I presume the house, when it was used, tapped into the existing irrigation well.
