Case No. 39576

) SPECIAL MASTER'S REPORT
)
) FINDINGS OF FACT AND
) CONCLUSIONS OF LAW
)
) FOR WATER RIGHT 63-27265

A notice of claim was filed for the above-captioned water right pursuant to I.C. § 42-1409. The Director of the State of Idaho Department of Water Resources (IDWR) examined the water system for this reporting area. The *Director's Report* recommended that the water right claim be disallowed.

On June 14, 2007, the Symms Fruit Ranch, Inc., filed an objection to the *Director's Report*, asserting that the water right should be allowed. On September 17, 2008, the parties filed a *Standard Form 5 - Stipulated Elements of a Water Right* which resolved the objection. The Idaho Department of Water Resources concurred with the stipulation.

II. CONCLUSIONS OF LAW

Therefore based on the file and record herein and pursuant to the *Standard Form 5*, IT IS RECOMMENDED that water right 63-27265 be decreed with the elements as set forth in the attached *Recommendation for Partial Decree Pursuant to I.R.C.P. 54(b)*.

This photo is looking northwest on the right to southwest on the left and is an overview of the upper reach area of the spring –seep area associated with the spring source claims. There are 2 PODs within this photo area. One is just to the right of the road crossing the seep area with a ditch going southwest and eventually turning northwest on the far side of the orchard area shown above the vehicles. The second diversion is just to the left of the road and water is diverted into a flexible pipe (roughly 12 mill) which conveys water to a garden area on the south side of the seep area.

A single GPS reading was made on the north side of the road closer to the Right side diversion. The reading was 2274091 and 1380439.

Close-up of the left side diversion previously described. The Flexible pipe ties into the culvert that goes under the road.

Ditch route Check structure
Close-up of the right side diversion structure. There is a board check at this point that diverts water into an earthen ditch. The ditch is covered in vegetation and goes up and to the left in this photo.

This photo was taken just west of State Highway 55 and north of Apricot Ln and shows the point where canal water and the spring water co-mingles to be delivered further west to the Lizard place of use. The canal water enters the structure in the foreground, flows over a cipolletti weir to eventually co-mingle with the spring water in the far right structure

This is a closer view of the weir described in the other photo. This weir measures the canal portion of the co-mingled water.

Dear Mr. Symms:

We received the Evidence of Priority affidavits that you submitted in regard to the above referenced claims on November 3rd, 2006. If you will recall these claims were recommended for disallow because we had not received any Evidence documenting the claimed priority dates. The evidence of priority was submitted so closely to the time our recommendations were to be submitted to the SRBA Court that we did not change our preliminary recommendations and the claims remained as disallowed in our Director's report. Please be advised that if you wish to pursue obtaining decreed rights for these claims, you should file a Standard Form 1 – Objection – with the SRBA Court that will allow us time to conduct a field examination of the water uses and revise our recommendations before the court decrees the claims as disallowed. I have enclosed a Standard Form 1 for your convenience. This form can also be obtained over the internet at www.srba.state.id.us if you need additional forms.

I have enclosed computer-generated reports of each of the above referenced claims for your convenience. The evidence submitted only documents evidence of use since 1961 so the additional time allowed during objection period would also allow you to obtain additional information in regard to evidence of priority if you wish to submit additional evidence.

If you have any questions in regard to this matter, please feel free to contact me at 334-2190. I have recently changed positions within the Department and am now located at our Western Regional office at 2735 Airport Way in Boise.

Re: Claim to a Water Right No. 63-27265

Dear Claimants:

In April of 1990, you submitted the above referenced claim in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim for your reference only; this print-out is **NOT** to be returned or re-filed. You have indicated, when this claim was filed, that the water right was based on a "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "**Priority Date**" as shown on the enclosed print-out. This claim has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is required to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "**Evidence of Priority**" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, the priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize the water use under this right, if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel.

The required evidence supporting the priority date must be submitted by **May 26, 2006**, referencing all documents with the corresponding claim number. If you have any questions not covered by this letter, or the enclosed pamphlet, please feel free to call me at 287-4953.

Sincerely,

Kay Walker

Dear Mr. Henley:

This letter acknowledges receipt of your objection to adjudication claim no. A63-27265. The letter will be placed in the adjudication claim file.

Your objection is filed prematurely and should be refiled with the adjudication court when the director's report for Basin 63 is submitted to the adjudication court. However, your letter will be helpful in developing recommendations.

You submitted \$25.00, which is the filing fee for a protest opposing an administrative water right filing with the department. No fee is required for an objection to an adjudication claim. With this letter, I am requesting that our accounting section return the \$25.00 to you (receipt no. W022616).

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on either a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no decree, license, or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. Any other claims you may have filed, that are not listed above, do not require evidence of priority be submitted at this time.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes why evidence of the priority date is necessary along with examples of types of evidence that can be submitted to fulfill this requirement. If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, may not be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify claims in this area are now being conducted by Department personnel. Please contact this office as soon as possible to schedule a field exam appointment convenient for you.

The required evidence supporting the priority date(s) must be submitted by September 1 1995, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter, or the enclosed pamphlet, please call the Western Region office shown above.
