DIRECTOR OF SRBA
TWIN FALLS CO, IDAHO

AL

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	SPECIAL MASTER'S REPORT
	)	
Case No. 39576	)	FINDINGS OF FACT AND
	)	CONCLUSIONS OF LAW FOR
	)	
	)	WATER RIGHT 34-00439A
	)	

I. FINDINGS OF FACT

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990). The director of the State of Idaho Department of Water Resources (IDWR) examined the water system for Reporting Area 1 and investigated the notices of claim for Reporting Area 1 (Basin 34), which includes portions of Custer, Butte, Bonneville and Jefferson Counties, State of Idaho. The *Director's Report for Reporting Area 34 (Director's Report)* contained a recommendation or abstract for the elements of this water right.

An objection to the Director's Report for water right 34-00439A was filed by the United States Bureau of Land Management. On June 4, 1993, a response was filed by the Idaho Department of Water Resources. A response was also filed on June 23, 1993 by claimant Smith Ranches, Inc. Subsequently, a settlement was reached as to how the elements of this water right could be decreed. A *Standard Form 5 - Proposed Elements of a Water Right* was filed on February 6, 1995, reflecting the agreement of the parties. The signatories to the *Standard Form 5* are the claimant/respondent, Smith Ranches, Inc; the objectors, Bureau of Land Management; and IDWR. Thus it appears that all parties to this subcase, and IDWR, are signatories to the *Standard Form 5*.

The court gives *prima facie* weight to the *Standard Form 5* to which IDWR is a signatory.

A. UNCHANGED ELEMENTS

Most elements of the water right remain unchanged from the original *Director's Report*, specifically, **element 1**, name and address of the claimant; **element 2**, source; **element 3**, quantity; **element 4**, priority date; **element 5**, point of diversion; **element 6**, purpose of use; and **element 7**, period of year; remain unchanged from the original *Director's Report* for 34-00439A.

B. CHANGED ELEMENTS

The remaining elements of this water right as stipulated to in the *Standard Form 5* differ from the original *Director's Report* for 34-00439A.

Element 8, the place of use was changed to accurately reflect the legal description of the place of use.

Element 9, annual volume of consumptive use is changed from 832.5 AFY to 830 AFY.

II. CONCLUSIONS OF LAW

Under *SRBA Administrative Order 1*, a Special Master is required to make a recommendation to the Presiding Judge as to whether and how a water right should be decreed for each subcase.

Where a *Standard Form 5* is signed by every party to the subcase and the Idaho Department of Water Resources, it may be treated as an *Amended Director's Report* and given *prima facie* weight. The record on file for this subcase, including the *Standard Form 5*, clearly establishes the intent of the parties that water right 34-00439A be decreed with the elements as set forth in the *Standard Form 5* as set forth in the Findings of Fact.

Therefore, based on the file and record herein, IT IS RECOMMENDED that water right 34-00439A be decreed with the elements as set forth in the attached *Special Master's Recommendation for Partial Decree*.

DATED September 6, 1996.

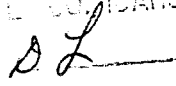

BRIGETTE BLEYEU
Special Master, Reporting Area 1
Snake River Basin Adjudication
