

MEMO TO FILE 67-7573

MAY 17, 2017

FROM: LORI HARRIS

Per a phone conversation on May 16, 2017 with Charlotte Spencer, the owner of the property appurtenant to water right 67-7573, called concerned that she could possibly be losing her water right or neighbor was taking it from her, since she had allowed him to use her equipment (pump and lines) to water his property and has not returned them as she has requested several times. I explained to her that she could not lose her water right or he could not take it from her as it stays with the property. She stated that the property will be left to her daughter in the future. I asked if the neighbor, Mark Councilman had a valid water right, and she stated that he did not.

I am making these notes to the file for future reference of any concerns when the property may be sold or transferred to another party, and if the neighbor using the equipment, were to try and make any claims to the water right based on use or possession of the pump and lines.
