RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-9818A

NAME AND ADDRESS: ROBERT M HENGGELE
5144 ELMORE RD
FRUITLAND ID 83619

~~BOX 6633 WHITLEY DR~~
~~FRUITLAND ID 83619~~

SOURCE: GROUND WATER

TRIBUTARY:

QUANTITY: 1.050 CFS
583.900 AFY

The rights listed below are limited to a total combined diversion rate of 4.28 cfs and to a total combined annual diversion volume of 47.9 AF for the commercial portion of these rights. Combined Right Nos.: 63-7955A and 63-9818A.

The rights listed below are limited to a total combined diversion rate of 5.93 cfs and to a total combined annual diversion volume of 1334.2 AF, and 296.5 acres for the irrigation portion of these rights. Combined Right Nos.: 63-7955A, 63-7955B, 63-9818A, 63-9818B, 63-10364A, and 63-10364B.

The rights listed below are limited to a total combined diversion rate of 4.28 cfs and to a total combined annual diversion volume of 963 AF, and 214 acres for the irrigation portion of these rights. Combined Right Nos.: 63-7955A and 63-9818A.

This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.

PRIORITY DATE: 10/02/1981

POINT OF DIVERSION:

T06N R04W S7 NWSWNW Lot 2 Within PAYETTE County

T06N R04W S7 NENWSW Lot 3 Within PAYETTE County

Rights 63-7955A, 63-7955B, 63-9818A, 63-9818B, 63-10364A, and 63-10364B are also diverted through the point(s) of diversion described above.

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
COMMERCIAL	03/01 03/15	1.050 CFS 47.90 AFY
IRRIGATION	03/15 11/15	1.050 CFS 536.00 AFY

The use of water for irrigation under this right may begin as early as March 1 and may continue to as late as November 15, provided other elements of the right are not exceeded. The use of water before March 1 and after November 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.

Commercial use is for orchard frost control.

PLACE OF USE: IRRIGATION in PAYETTE County

This right is a split from former right 63-9818

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE
STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	Water Rights: See Attached List
	)	
Case No. 39576	)	NOTICE OF COMPLETED
	)	ADMINISTRATIVE
_____	)	PROCEEDING

IDWR has completed the following administrative proceeding:

XX Address change

☐ Substitution of Party

☐ IC § 42-222 transfer

☐ Point of diversion ☐ Place of use

☐ Period of use ☐ Nature of use

☐ Split of water right ☐ Change in ownership

☐ Other

☐ IC § 42-219 license

IDWR certifies that it has completed its investigation into the changes to the elements of the water rights listed above as set forth in the attached *Amended Director's Report(s)* for said water right(s). No other changes have been made to the elements of these water rights except as set forth above.

IDWR has served copies of the *Notice of Completed Administrative Proceeding* and *Amended Director's Report(s)* on the claimant(s), prior claimant(s) and all parties in the subcases affected, if any, as reflected on the attached certificate of mailing.

DATED: February 7, 2008

Signature of IDWR Representative

CERTIFICATE OF MAILING

I certify that on February 7, 2008, I delivered the original and copies of this form, including all attachments, to the following persons, postage prepaid if required and addressed as follows:

1. Original to:

Clerk of the District Court

Dear Mr. Henggeler:

Enclosed are copies of the above referenced water rights which reflect your change of address. Also enclosed is a copy of the Notice of Completed Administrative Proceedings which has been sent to the Snake River Basin Court as notification of the change.

If you have any questions concerning the enclosed water rights, please feel free to contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Lori Harris". The signature is written in dark ink and is positioned above the typed name and title.

MEMORANDUM

TO: ADJUDICATION CLAIM FILES 63-7955A, 63-7955B, 63-9818A,
63-9818B, 63-10364A, 63-10364B

FROM: DANIEL A. NELSON

DATE: 5/26/06

SUBJECT: CLAIM REVIEW

The above-mentioned claims are the result of three licenses that were filed on the same ground. The licenses were then split in the Snake River Basin Adjudication (SRBA) when one of the brothers wanted his portion of the water rights in his name and not the name of the corporation. All six of these claims are still operated as a single system, so it is best to address them as a group instead of each claim individually. Department records still show the licenses under single ownership, and only the adjudication claims have been split.

63-7955 was the first right licensed. It was licensed from a single well. 63-9818 was then filed on pretty much the same land using the original well with the development of a second well. 63-9818 was applied for in 1981 and the field exam was done in 1986. Water right 63-10364 was then filed to include additional acres, and license the full capacity of the two wells.

A63-7955A and A63-7955B adjudication claims claim both wells, even though they were only licensed with a single point of diversion. Whereas the second well was in place and verified in a field exam for 63-9818 by the department in 1986, it should be allowable to have both wells on the earlier right with an accomplished transfer, since the second well was introduced to the system prior to 1987.

Both 63-7955 and 63-9818 were licensed with two irrigation components. The first irrigation component was for standard irrigation between 3/15 to 11/15. The second component was for orchard frost control between 3/1 to 3/15. In reviewing these uses, they did not fit the true definition of irrigation. Therefore, I changed these uses to a more accurate descriptor of commercial use. The commercial use is a better fit to this scenario, and would allow the additional volume granted on the licenses. I would be hesitant to recommend more than the standard volume even for multiple type irrigation uses. This will make the files cleaner, and fit better in the overall description of the four adjudication claims with this component. Like in wastewater land application for commercial dairy uses, the commercial use will share the place of use as the irrigation component.

Page 2
Henggeler memo

63-7955 and 63-9818 were licensed with some combined limitations for diversion rate and volume. 63-9818 was filed to add a couple of additional acres to the system, and increase the diversion rate to a minor inch or 0.02 cfs per acre for the lands covered by 63-7955. 63-9818 was not even assigned a volume during licensing, but it is not possible to divert water without consuming any volume. Therefore, I assigned a volume based on the rate of diversion for A63-9818A and A63-9818B, and added remarks that would limit the total use to the standard use per acre of 0.02 cfs and 4.5 afa per acre irrigated for all six adjudication claims.

Water right 63-10364 was in essence filed to have the full diversion capacity of the well licensed, and to add 11.5 additional acres to fill in around the edges of the other two licenses. I added a condition to all six rights that limits the system capacity at the time of licensing.

It was difficult to determine which acres were licensed under each right due to previous mapping capabilities, but I believe that the shape files were the best possible depictions of the way they were originally licensed.

IDAHO DEPARTMENT OF WATER RESOURCES

Adjudication Recommendation Report 63-9818A V1

1. The rights listed below are limited to a total combined diversion rate of 4.28 cfs and to a total combined annual diversion volume of 47.9 AF for the commercial portion of these rights. Combined Right Nos.: 63-7955A and 63-9818A.
2. X36 Rights 63-7955A, 63-7955B, 63-9818A, 63-9818B, 63-10364A, and 63-10364B are also diverted through the point(s) of diversion described above.
3. P21 This right is a split from former right 63-9818
4. S39 The use of water for irrigation under this right may begin as early as March 1 and may continue to as late as November 15, provided other elements of the right are not exceeded. The use of water before March 1 and after November 15 under this remark is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the date a partial decree is entered for this right.
5. E61 The rights listed below are limited to a total combined diversion rate of 5.93 cfs and to a total combined annual diversion volume of 1334.2 AF, and 296.5 acres for the irrigation portion of these rights. Combined Right Nos.: 63-7955A, 63-7955B, 63-9818A, 63-9818B, 63-10364A, and 63-10364B.
6. The rights listed below are limited to a total combined diversion rate of 4.28 cfs and to a total combined annual diversion volume of 963 AF, and 214 acres for the irrigation portion of these rights. Combined Right Nos.: 63-7955A and 63-9818A.
7. C18 This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.
8. R65 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
9. X01 Commercial use is for orchard frost control.

Remarks:

IDAHO DEPARTMENT OF WATER RESOURCES
Adjudication Recommendation Report 63-9818A V1

Comments:

1. dnelson 5/26/2006 Text

Comment: Use of water for irrigation purposes from 3/1 to 3/15 is for orchard frost protection.

The maximum combined annual volume of water under this right & Right 63-7955 shall not exceed 1282.5 acre feet per annum.

THIS RT.IS SPLIT FROM THE PARENT RT. TO COVER LANDS OWNED BY THE CLAIMANT. THE REMAINING 71 ACRES OF IRRIG. IS CLAIMED UNDER A63- 09818B BY HENGGELE

2. dnelson 5/26/2006 Claim Review

Comment: The above-mentioned claims are the result of three licenses that were filed on the same ground. The licenses were then split in the Snake River Basin Adjudication (SRBA) when one of the brothers wanted his portion of the water rights in his name and not the name of the corporation. All six of these claims are still operated as a single system, so it is best to address them as a group instead of each claim individually. Department records still show the licenses under single ownership, and only the adjudication claims have been split.

63-7955 was the first right licensed. It was licensed from a single well. 63-9818 was then filed on pretty much the same land using the original well with the development of a second well. 63-9818 was applied for in 1981 and the field exam was done in 1986. Water right 63-10364 was then filed to include additional acres, and license the full capacity of the two wells.

A63-7955A and A63-7955B adjudication claims claim both wells, even though they were only licensed with a single point of diversion. Whereas the second well was in place and verified in a field exam for 63-9818 by the department in 1986, it should be allowable to have both wells on the earlier right with an accomplished transfer, since the second well was introduced to the system prior to 1987.

Both 63-7955 and 63-9818 were licensed with two irrigation components. The first irrigation component was for standard irrigation between 3/15 to 11/15. The second component was for orchard frost control between 3/1 to 3/15. In reviewing these uses, they did not fit the true definition of irrigation. Therefore, I changed these uses to a more accurate descriptor of commercial use. The commercial use is a better fit to this scenario, and would allow the additional volume granted on the licenses. I would be hesitant to recommend more than the standard volume even for multiple type irrigation uses. This will make the files cleaner, and fit better in the overall description of the four adjudication claims with this component. Like in wastewater land application for commercial dairy uses, the commercial use will share the place of use as the irrigation component.

Page 2

Henggeler memo

63-7955 and 63-9818 were licensed with some combined limitations for diversion rate and volume. 63-9818 was filed to add a couple of additional acres to the system, and increase the diversion rate to a minor inch or 0.02 cfs per acre for the lands covered by 63-7955. 63-9818 was not even assigned a volume during licensing, but it is not possible to divert water without consuming any volume. Therefore, I assigned a volume based on the rate of diversion for A63-9818A and A63-9818B, and added remarks that would limit the total use to the standard use per acre of 0.02 cfs and 4.5 afa per acre irrigated for all six adjudication claims.

Water right 63-10364 was in essence filed to have the full diversion capacity of the well licensed, and to add 11.5 additional acres to fill in around the edges of the other two licenses. I added a condition to all six rights that limits the system capacity at the time of licensing.

It was difficult to determine which acres were licensed under each right due to previous mapping capabilities, but I believe that the shape files were the best possible depictions of the way they were originally licensed.

MEMORANDUM

TO: FILE NO.'S 63-7955, 63-9818, & 63-10364

FROM: JAN SHURTE *JS*

SUBJECT: THE WHOLE STORY BEHIND THE EXAMS FOR 63-7955 & 63-9818 AND
WHY PERMIT NO. 63-10364 WAS FILED
✓

On August 12, 1980, Ric Morris conducted an exam for Robert Henggeler on Permit No. 63-7955. At that time he measured the well in Govt. Lot. 2, SWNW, S. 7, T. 6N, R. 4W (Well #1) and found a rate of flow of 4.31 cfs for 280 acres. Mr. Henggler did not agree with that measurement nor with an additional measurement later (same amount) which was not documented by Ric. Then Dave Shaw requested that Lee Sisco measure the discharge again and on November 17, 1981, he went to Henggeler's farm to conduct the measurement. At that time he measured the same or maybe a little less than Ric Morris had and in lieu of this Mr. Henggler agreed to accept Ric's measurement of 4.31 cfs (this information came per phone conversation with Lee Sisco on 12/11/86). Then Mr. Henggler wanted to try and get a measurement on Permit No. 63-9818 (Well #2) and that's when Lee went out on Dec. 18, 1981 (see attached incomplete exam for 63-9818). He said that either the power was not turned on or something was froze up and he couldn't do the measurement then. So the exam was not completed until this last summer when Rich Gemperle did it.

There is some confusion on the point of diversion legal for both 63-7955 and 63-9818. I believe 63-7955 had been taken care of and the whole thing is explained in the memo of 6/17/86 attached to the amendment already filed. No fee was charged for this amendment. However, Permit No. 63-9818 also needs an amendment and it appears to be an error Mr. Henggler had on his permit from the very beginning. The point of diversion was listed in the NESW, S. 7 on the original application. Then an amendment was filed on 63-9818 to add well #1 (63-7955) since both wells were now used together in the system. However, the quarter-quarter for well #2 still remained the NESW, S. 7. Rich Gemperle found that the actual point for well #2 is in the NWSW (Lot 3), S. 7 so it appears that Mr. Henggler will have to pay for this one.

So, I have written the exam up for Permit No. 63-7955 for 4.31 cfs as Ric Morris measured in 1980 and 280 acres from Well #1 in Lot 2, SWNW, S. 7, T. 6N, R. 4W as it was the only well in operation at that time. Then Permit No. 63-9818 will show both wells, which is the present operation at this time, but using only the measurement from Well #2 for the amount of water, 1.39 cfs. This permit will be for 285 acres of irrigation rather than 280 as shown on 63-7955. Mr. Henggeler stated that Well No. 1 (63-7955) has not increased since Ric Morris measured it and probably has decreased (Mr. Henggler did not say it has decreased). The measurement from Well #2 made this summer is sufficient to satisfy this right and then some.

This brings me to the next permit. This is a new application recently filed and has been approved under Permit No. 63-10364. This permit was filed to utilize

RECORDED
MAR 14 1988

the additional capacity of well #2 as measured under Permit No. 63-9818. Rich Gemperle measured 1.82 cfs and the permit amount is 1.39 cfs which leaves .43 cfs available. The important part for the field examiner to be aware of when he/she conducts the exam is that in order for Mr. Henggeler to receive the .35 cfs he applied for on Permit No. 63-10364 he must develop the 17 additional acres applied for in this permit(302-285=17). The 285 acres now irrigated have a full inch to the acre after 63-7955 and 63-9818 are licensed. This new permit shows two points of diversion, one in the NWSW(Lt. 3), and one in the NESW, S. 7, T. 6N, R. 4W. Actually, Mr. Henggeler filed on well #2 which was measured under 63-9818, and listed both quarter-quarters because he wasn't sure which one was right. So, he is not filing on a new well and well #2 is in the NWSW(Lt. 3), S. 7, as found by the field examiner, Rich Gemperle. I will place a copy of this memo in Permit No. 63-10364 to, hopefully, avoid any further confusion when the exam is done concerning Mr. Henggeler's water rights and irrigation system.

WATER RIGHT LICENSE

WATER RIGHT NO. 63-9818

Priority: October 2, 1981 Amount: 1.39 CFS

This is to certify, that ROBERT HENGGELE
RT. 1 BOX 1472

FRUITLAND, ID 83619 has complied with the terms and conditions of the permit issued pursuant to Application for Permit dated October 2, 1981, and has submitted proof to the Department of Water Resources on December 29, 1981, that water has been applied to a beneficial use; an examination by the Department indicates that the works have a diversion capacity of 6.13 cfs of water from a GROUNDWATER source and that a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>VOLUME</u>
Irrigation	03/15 to 11/15	1.39 cfs	
Irrigation	03/01 to 03/15	1.39 cfs	
	Totals	1.39 CFS	

LOCATION OF POINT OF DIVERSION(S): LOT 2(SWNW), Sec. 7, Township 6N, Range 4W
LOT 3(NWSW), Sec. 7

Payette County

PLACE OF USE: Irrigation

<u>TWN</u>	<u>RGE</u>	<u>SEC</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>ACRES</u>	<u>TOTAL</u>

							Total number of acres irrigated: 285

CONDITIONS/REMARKS:

1. The right to the use of the water hereby confirmed is limited to the amount which can actually be beneficially used and is restricted and appurtenant to the lands or place of use and to the purpose herein described, as provided by the laws of Idaho.
2. This right is subject to all prior water rights and may be forfeited by five years of non-use.
3. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
4. The rate of diversion and annual volume under this right shall be appurtenant to the place of use so that each irrigated acre will receive an equal portion of water when all rights appurtenant to the place of use from the same source are considered cumulatively.
5. Use of water for irrigation purposes from 3/1 to 3/15 is for orchard frost protection.
6. The maximum combined annual volume of water under this right & Right 63-7955 shall not exceed 1282.5 acre feet per annum.

System Description (continued)

3. Narrative: Description (As operating at time of measurement. Indicate pressure, number of sprinklers, etc.)

The well is used in conjunction with another well (63-7955) to irrigate 300 acres of fruit trees. This well is cased to 695 feet with 16" casing. Dynamic water level is at 308 feet. The two wells supply water to a pressurized sprinkler irrigation system. Gravity supplies pressure since the well is at the top of a hill. An 8" mainline supplies the sprinkler system.

G. VOLUME CALCULATIONS

1. Volume Calculations for Irrigation:

$V_{IR} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = 285 \times 4.5 = 1282.5$
 $V_{D.R.} = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = (1.39) \times 245 \times 1.98 = 674.3$
 $V = \text{Smaller of } V_{IR} \text{ and } V_{D.R.} = 674.3 \text{ AFA}$

2. Volume Calculations for Other Uses:

HEATING $1.39 \times 31 \times 1.98 = 86.4$
 TOTAL V = 674.3 + 86.4 = 760.7 AFA

H. REMARKS AND OVERLAP REVIEW ANALYSIS

63-7955 Both these water rights together work to supply one inch per acre of irrigation for the same lands

$285 \text{ acres} \times .02 = 5.7 \text{ cfs}$

63-7955 = 9.3 cfs

THIS PERMIT $\sim$ 63-9818 = 1.39 cfs

5.69 cfs $\approx$ 5.70 cfs

I. RECOMMENDATIONS

1. Recommended Amounts

Beneficial Use	Period of Use From	To	Rate of Diversion Q (cfs)	Annual Volume V (afa)
Irrigation	4/1	10/20	1.39	~~6468~~ 6743
Heating	3/1	4/1	1.39	85.4
Totals:				~~6468~~ AFA

2. Recommended Amendments

- ☒ Change P.D. as reflected above
 ☐ Add P.D. as reflected above
 ☐ None
- ☐ Change P.U. as reflected above
 ☐ Add P.U. as reflected above

MEMORANDUM

Department of Water Resources

TO: FILE NO.'S 63-7955, 63-9818, & 63-10364

FROM: JAN SHURTE

JS 12/11/86 *MS 2/23/87*

SUBJECT: THE WHOLE STORY BEHIND THE EXAMS FOR 63-7955 & 63-9818 AND
WHY PERMIT NO. 63-10364 WAS FILED

On August 12, 1980, Ric Morris conducted an exam for Robert Henggeler on Permit No. 63-7955. At that time he measured the well in Govt. Lot. 2, SWNW, S. 7, T. 6N, R. 4W (Well #1) and found a rate of flow of 4.31 cfs for 280 acres. Mr. Henggler did not agree with that measurement nor with an additional measurement later (same amount) which was not documented by Ric. Then Dave Shaw requested that Lee Sisco measure the discharge again and on November 17, 1981, he went to Henggler's farm to conduct the measurement. At that time he measured the same or maybe a little less than Ric Morris had and in lieu of this Mr. Henggler agreed to accept Ric's measurement of 4.31 cfs (this information came per phone conversation with Lee Sisco on 12/11/86). Then Mr. Henggler wanted to try and get a measurement on Permit No. 63-9818 (Well #2) and that's when Lee went out on Dec. 18, 1981 (see attached incomplete exam for 63-9818). He said that either the power was not turned on or something was froze up and he couldn't do the measurement then. So the exam was not completed until this last summer when Rich Gemperle did it.

There is some confusion on the point of diversion legal for both 63-7955 and 63-9818. I believe 63-7955 had been taken care of and the whole thing is explained in the memo of 6/17/86 attached to the amendment already filed. No fee was charged for this amendment. However, Permit No. 63-9818 also needs an amendment and it appears to be an error Mr. Henggler had on his permit from the very beginning. The point of diversion was listed in the NESW, S. 7 on the original application. Then an amendment was filed on 63-9818 to add well #1 (63-7955) since both wells were now used together in the system. However, the quarter-quarter for well #2 still remained the NESW, S. 7. Rich Gemperle found that the actual point for well #2 is in the NWSW (Lot 3), S. 7 so it appears that Mr. Henggler will have to pay for this one.

So, I have written the exam up for Permit No. 63-7955 for 4.31 cfs as Ric Morris measured in 1980 and 280 acres from Well #1 in Lot 2, SWNW, S. 7, T. 6N, R. 4W as it was the only well in operation at that time. Then Permit No. 63-9818 will show both wells, which is the present operation at this time, but using only the measurement from Well #2 for the amount of water, 1.39 cfs. This permit will be for 285 acres of irrigation rather than 280 as shown on 63-7955. Mr. Henggler stated that Well No. 1 (63-7955) has not increased since Ric Morris measured it and probably has decreased (Mr. Henggler did not say it has decreased). The measurement from Well #2 made this summer is sufficient to satisfy this right and then some.

This brings me to the next permit. This is a new application recently filed and has been approved under Permit No. 63-10364. This permit was filed to utilize

MAR 14 1988

the additional capacity of well #2 as measured under Permit No. 63-9818. Rich Gemperle measured 1.82 cfs and the permit amount is 1.39 cfs which leaves .43 cfs available. The important part for the field examiner to be aware of when he/she conducts the exam is that in order for Mr. Henggeler to receive the .35 cfs he applied for on Permit No. 63-10364 he must develop the 17 additional acres applied for in this permit ($302-285=17$). The 285 acres now irrigated have a full inch to the acre after 63-7955 and 63-9818 are licensed. This new permit shows two points of diversion, one in the NWSW(Lt. 3), and one in the NESW, S. 7, T. 6N, R. 4W. Actually, Mr. Henggeler filed on well #2 which was measured under 63-9818, and listed both quarter-quarters because he wasn't sure which one was right. So, he is not filing on a new well and well #2 is in the NWSW(Lt. 3), S. 7, as found by the field examiner, Rich Gemperle. I will place a copy of this memo in Permit No. 63-10364 to, hopefully, avoid any further confusion when the exam is done concerning Mr. Henggeler's water rights and irrigation system.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
LICENSING REPORT

Permit No.

1. Measurement Calculations

a) Field Measurement Calculations (Include theoretical capacities and system capacity)

same land irrig. from pld #1 → $285 \text{ ac.} \times 0.02 \text{ cfs} = 5.70 \text{ cfs}$
 $\rightarrow \text{Rt. 63-7955} = \frac{4.31 \text{ cfs}}{1.39 \text{ cfs needed for 1" per acre-}}$

Capacity of both wells = #1 - 4.31 cfs
 #2 - 1.82 cfs
 6.13 cfs

b) Volume Calculations for Irrigation:

$V_{I.R.} = (\text{Acres Irrigated}) \times (\text{Irrigation Requirement}) = \frac{4.5 = 1282.5 \text{ AFA}}{1.39 \text{ cfs}}$
 $V_{D.R.} = (\text{Diversion Rate (cfs)}) \times (\text{Days in Irrigation Season}) \times 1.9835 = \frac{675.5 \text{ AFA}}{1.39 \text{ cfs}}$
 $V = \text{Smaller of } V_{I.R.} \text{ and } V_{D.R.} = 675.5 \text{ AFA}$

c) Volume Calculations for Other Uses: $\text{irrig./frost control} = 1.39 \times 1.9835 \times 15 = 41.4 \text{ AFA}$
 $41.4 \div 2 (12 \text{ hrs}) = 20.7 \text{ AFA}$
 $\frac{1282.5}{- 1260.0} \leftarrow \text{Rt. 63-7955}$

USE * ~~RTA~~ 22.5 allowable for this lic.
 The maximum combined annual volume of water under this Rt. & Rt. 63-7955 shall not exceed 1282.5 acre feet per annum.

2. Overlap Review

a) Other water rights with same place of use: 63-7955, 63-8205, 63-10364

b) Other water rights with same point of diversion: 63-7955

c) Analysis: Rt. 63-7955 - using P/D #1 this right is for same land - also being licensed at this time.
Rt. 63-8205 - application filed in conjunction with a DLE, no overlap due to stage
Rt. 63-10364 - new permit, same right holder no proof, no overlap due to stage.
