MEMORANDUM

TO: Files 63-09058, 63-09074, 63-09881 & 63-10555

FROM: Pam Skaggs^{CS}/State Office

SUBJECT: Transfer 5246

DATE: July 30, 1998

Transfer 5246 adds points of diversion under all the rights listed above and changes the place of use of 17.0 acres under Rights 63-09058 and 63-09881. A total of three (3) wells will serve this common distribution system and the shift of acres more accurately describes the current place of use under a new pivot. ✓

Rights 63-09058 and 63-09881 have been claimed in the SRBA, but no action has been taken place at this time. The other rights do not require a claim.

Recommended conditions include drilling permit conditions, supplemental groundwater, irrigation overlap, multiple points of diversion/measuring devices, future annual reporting, combined right limits, right-of-way and standard transfer conditions. ✓

Apparently Mr. Hall is still under the impression that the 0.90 cfs claimed on right A63-09881 is in addition to the 1.175 cfs claimed on on right A63-09058A. It was explained to Mr. Hall at the time of filing that the diversion rates were not additive.

MEMORANDUM

Application for Transfer

63-09058, 63-09074, 63-09881, 63-10555

The applicant seeks to add a point of diversion to 63-09058 and 63-09881 to reflect the integration of the irrigation system and to add a new well to all four rights. The wells are supplemental to Wilder Irrigation District water. The 1987 NRCS map and 1994 scanned airphotos (map nos. H-0, G-0, G-1) confirm irrigation of the entire POU.

The applicant also seeks to change the places of use for portions of 63-09058 and 63-09881 to reflect the installation of a pivot in the SW4 S31 T5N R5W. The center of the pivot is in the NW corner of the SW4, and irrigates the lands in the SW4 on the north side of the canal.

The application retires 15 acres from the NWSE (63-09881), 1 acre from the NESW (63-09881), and 1 acres from SWSW (63-09058). The resulting 17 acres are moved to the SESW, north of the canal, on previously non-irrigated acres.

NRCS has determined, based on 1997 aerial photography, that the new pivot irrigates 116 acres (see application attachments A1 and A2). The 1987 NRCS (ASCS) shows 116.2 irrigated acres in the SW4 and NWSE. 121 acres of irrigation are licensed in these QQs. 1.7 acres (SWSW) of the 121 acres has been sold to another party, leaving 119 licensed acres for the applicant. The SRBA claim shows all 121 acres in the name of one owner (see ownership discussed below).

The 3 acre discrepancy (116 found, 119 licensed) is 2.5% of the licensed acres. The rights can be reduced in the approval for the transfer, or can be left for SRBA review. Should the rights be reduced, two acres should come out of the SWSW (63-09058), since two acres (1.7) have been sold to another owner. The other acre should come from the NESW (63-09881), where the NRCS map appears to show that the pivot misses more than 1 acre (1 acre is moved to the SESW by this transfer).

63-09881 (licensed at .02 cfs/ and 4.5 af/acre) could be reduced by 1 acre in the transfer. The other two acres coming from 63-09058 are licensed at .0125 cfs/acre - a reduction of 2 acres would result in a rate of .0126 cfs per acre. This rate of diversion is acceptable, but the volume should be reduced by 9.0 afa.

The application for transfer should be approved. If the approval reduces acres, conditions should include the changes in rate of diversion and diversion volume, including combined rate limitations on 63-09058 and 63-09074.

SRBA claims have been filed on 63-09058 and 63-09881. The other two rights are not subject to the SRBA. 63-09058 was split by ownership in the SRBA. 63-09881 was filed by the previous owner. The applicant is purchasing the lands described in A63-09058A and A63-09881 under contract, and will provide IDWR with a notarized statement providing permission of the lien holder to proceed with the application for transfer.
