SOURCE: SNAKE RIVER

TRIBUTARY: COLUMBIA RIVER

QUANTITY: 1,700.000 CFS

The right to divert as natural flow during each irrigation season under this water right, having a March 30, 1921, priority, as follows: From May 1 of each irrigation season continuing during that season so long as there is natural flow available for that priority, the first 1,700 cubic feet per second of flow to be available one-half (1/2) to American Falls Reservoir District No. 2 and one-half (1/2) to American Falls Reservoir, except that in any year in which American Falls Reservoir is full to capacity on April 30 or fills after that date, taking into account any water that may be temporarily stored to its credit in upstream reservoirs, all water diverted by American Falls Reservoir District No. 2 within the maximum of 1,700 cubic feet per second during the year prior to the initial storage draft on American Falls Reservoir after the reservoir finally fills in that year shall be considered as natural flow under water right No. 1-6. Nothing herein shall prevent American Falls Reservoir District No. 2 from diverting water under said license prior to May 1 of a given irrigation season but all such diversions shall be charged as storage in the event the reservoir is not full on April 30 of that season or does not fill after April 30 of that season.

PRIORITY DATE: 03/30/1921

POINT OF
DIVERSION:

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	1,700.000 CFS

PLACE OF USE:

101903 ACRES TOTAL

Place of use is within the boundary of American Falls Reservoir District No. 2 pursuant to Section 43-323, Idaho Code.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right is limited to the irrigation of 62,361 acres within the place of use described above in a single irrigation season.

IDAHO DEPARTMENT OF WATER RESOURCES
RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

Rights have also been claimed to water from Basin 37 for the same purpose of use at the same place of use described above, which will be included in a Directors Report to be filed at a later date. Any water rights recommended in the Basin 37 report for the same purpose of use at the same place of use described above will contain combined use limitations for this right and the Basin 37 rights.

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The name of the United States of America acting through the Bureau of Reclamation appears in the Name and Address sections of this partial decree. However, as a matter of Idaho Constitutional and Statutory Law, title to the use of the water is held by the consumers or users of the water. The irrigation organizations act on behalf of the consumers or users to administer the use of the water for the landowners in the quantities and/or percentages specified in the contracts between the Bureau of Reclamation and the irrigation organizations for the benefit of the landowners entitled to receive distribution of this water from the respective irrigation organizations. The interest of the consumers or users of the water is appurtenant to the lands within the boundaries of or served by such irrigation organizations, and that interest is derived from law and is not based exclusively on the contracts between the Bureau of Reclamation and the irrigation organizations.

The delivery of water to this right may be subject to procedures described in the United States Bureau of Reclamation "space holder" contracts and the Burley Irrigation Dist. v. Eagle, Supplemental Decree (Idaho 5th Jud. Dist., July 10, 1968) and Aberdeen Springfield Canal Co. v. Eagle, Supplemental Decree (Idaho 7th Jud. Dist., March 12, 1969) together with the natural flow and storage deliveries as calculated by the Idaho Department of Water Resources.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Water is delivered through Milner Gooding Canal.

This right was originally licensed as no. 15134 and claimed in the Snake River Basin Adjudication as 1-02040.

Right includes accomplished change in point of diversion pursuant to Section 42-1425, Idaho Code.

Contract No.
14-06-100-6031

Gooding Division, Minidoka Project, Idaho

Company-District Contract Among
THE UNITED STATES OF AMERICA,
AMERICAN FALLS RESERVOIR DISTRICT NO. 2
and
BIG WOOD CANAL COMPANY

THIS CONTRACT, made this 1st day of June 1962, among
THE UNITED STATES OF AMERICA, hereinafter called the United States, acting
through the Secretary of the Interior and pursuant to the Federal
Reclamation Laws, AMERICAN FALLS RESERVOIR DISTRICT NO. 2, hereinafter
called the District, an irrigation district organized and existing under
and by virtue of the laws of the State of Idaho and having its principal
place of business at Gooding, Idaho, and the BIG WOOD CANAL COMPANY, here-
inafter styled the Company, a corporation organized under the laws of the
State of Idaho and having its principal place of business at Shoshone,
Idaho,

WITNESSETH, THAT:

Explanatory Recitals

2. WHEREAS, the parties entered into a joint use and operating
agreement dated May 1, 1928, which was supplemented by the contract of
February 1, 1933; and

3. WHEREAS, the District and the United States have entered into
an amendatory repayment contract dated October 14, 1954, which contemplates
a revision of the agreement of May 1, 1928; and

4. WHEREAS, it is the desire of the parties to supersede the existing contract of May 1, 1928, as amended, by a new Company-District contract as contemplated by the arrangements embodied in the amendatory contract of October 14, 1954;

NOW, THEREFORE, in consideration of the mutual and dependent stipulations and covenants herein contained, it is hereby mutually agreed by and between the parties hereto as follows:

Definitions

5. The following terms, whenever used in this contract, shall have the following respective meanings:

(a) "Secretary" shall mean the Secretary of the Interior or his duly authorized representative.

(b) "Federal Reclamation Laws" shall mean the Act of June 17, 1902 (32 Stat. 388) and all acts amendatory thereof or supplementary thereto, including without limitation by this enumeration, the Reclamation Project Act of 1939 (53 Stat. 1187) and the act authorizing the execution of the amendatory contract.

(c) "Amendatory contract" shall mean the contract of October 14, 1954, contract No. 14-06-W-73, which is recorded in Lincoln County, Idaho in Book 5 of Agreements at page 485, in Jerome County, Idaho in Book 154 at page 361, and in Gooding County in Book 6 of Agreements at page 66.

(d) "Hunt area" shall mean those approximately 8,000 acres of new lands located below the main canal and south of the northerly boundary of township 8 south, ranges 19 and 20 east, Boise meridian.

(e) "Old lands" shall mean the 78,167.1 acres of irrigable lands within the District which, as of the date of the amendatory contract, have apportioned thereto a part of the obligation under the Government-District contract, as defined in the amendatory contract, under the District's then prevailing orders for the apportionment of benefits and costs, including those 4,263 acres of land designated as "river-right lands".

(f) "New lands" shall mean not to exceed 20,500 acres of irrigable lands as described in public notices Nos. 40, as corrected, 42, and 43, as new lands may be redefined pursuant to the provisions of article 30 of the amendatory contract.

(g) "Transferred works" shall mean the Milner-Gooding canal, all ditches and laterals, together with all works appurtenant or incidental to the foregoing facilities, which works were constructed by the United States to serve the lands within the District.

Scope and Term of Company-District Contract

6. This Company-District contract supersedes and takes the place of the contract of May 1, 1928, as amended and supplemented by the contract of February 1, 1933, becoming effective on the date of its execution by the Secretary, after approval by the Secretary, in accordance with provisions of article 29 of the amendatory contract. Except as to provisions of the contract of May 1, 1928, which have been fully executed prior to the date of this contract, which shall remain unaffected thereby, the contract of May 1, 1928 shall remain effective only to the extent expressly provided in this contract.

Responsibilities for Operation of Works

7. The relative responsibilities of the Company and the District for operation of works to serve the various categories of land within the jurisdiction of the District shall be as follows:

- (1) That the District will operate and maintain (i) the entire main canal from its heading in Snake River to mile 72, and (ii) the distribution system required to serve the irrigable lands of the Hunt area, and to serve approximately 561.5 acres of new lands in township 5 south, range 14 east, through the so-called Carpenter lateral.

- (2) The Company will operate and maintain the Company's storage, diversion, and distribution system including works and capacity added to that system under the contract of May 1, 1928, and works and capacity that may hereafter be provided.

Water Delivery

8. (a) The District will deliver water made available under the amendatory contract as follows: (i) to the Company for delivery as required, (ii) into the Big Wood and Little Wood rivers for diversion by river-right lands, and (iii) to new lands where delivery falls to the District's responsibility.

(b) The Company will deliver, in accordance with entitlements, water made available under the amendatory contract (including released water as hereinafter defined) to all old lands (excluding river-right lands) and all new lands other than those to be served by the District.

"Released water" shall be defined to mean, in the case of old lands above the main canal, water from the Big Wood and Little Wood rivers and Magic Reservoir which becomes available to such lands by reason of the releases and exchanges effected pursuant to article 28 of the amendatory contract; and in the case of old lands below the main canal, water in addition to that required to replace that released under article 28 to old lands above the main canal.

Modification of Company's System

9. The District, or the United States while it may be operating the transferred works, shall have the right to enlarge or improve any part of the Company's water distribution system where required for the carrying out of the amendatory contract between the United States and the District.

Joint Operation and Maintenance Cost
Determinations and Adjustment of Levies

10. (a) There shall be determined for each year the total estimated cost of operation and maintenance of all the storage, diversion, and distribution works chargeable to both the Company and the District, exclusive of such costs which are allocable to making stored water available to river-right lands and of the costs allocable to those 610.7 acres of Company land not within the jurisdiction of the District; and the average per irrigable acre cost shall be derived therefrom by dividing such total annual cost by the total area of the District's new and old lands, excluding river-right lands. In determining total annual costs as herein provided, all costs of operation and maintenance that are properly chargeable against either the Company's or the District's system shall be included, regardless of whether chargeable initially to the Company or the District.

(b) The respective levies by the Company and the District for operation and maintenance costs shall be adjusted so that the combined annual operation and maintenance levies of the Company and the District against each irrigable acre of old land (excluding river-right lands) and the District's annual operation and maintenance levy against each acre of irrigable new land shall be the same.

(c) In connection with the requirements of (a) and (b) above, adequate working arrangements for budgeting and accounting for anticipated and actual operation and maintenance costs of the systems involved shall be provided by the Company and the District.

Refusal to Deliver Water in Case of Default

11. The Company shall not deliver water from any source to lands within the District that are delinquent in the payment of operation and maintenance charges to the Company, the District, or the United States, or more than twelve (12) months delinquent in the payment of any construction charge obligation installment due to the Company, the District, or the United States; if the Company should be unable so to withhold delivery or should fail to do so, it shall pay to the District or to the United States, as the case may be, the charges plus accrued penalties owing to the District or the United States which the Company was unable or failed to collect as herein required; and the District or the United States shall be entitled to withhold delivery of water made available under this contract to the Company in the event the Company is in default on any of its obligations under this provision.

Company to Observe Limitations on Areas
Entitled to Receive Water

12. The Company, in so far as it has the responsibility for the delivery of any water made available under the amendatory contract, including "released water" for old lands, shall make deliveries only to those lands entitled to receive such water, having regard for limitations provided in articles 42 and 43 of the amendatory contract, and any other controlling provisions of the Federal Reclamation Laws.

Company to Be Agent of District

13. For the purpose of delivery of water made available under this amendatory contract, including "released water", the Company shall be deemed to be the agent of the District and be subject to the same limitations as is the District by reason of the Federal Reclamation Laws and the amendatory contract.

Pertinent Amendatory Contract Provisions Binding

14. The Company hereby accepts and agrees to be bound by all the provisions of the amendatory contract that are pertinent to the entitlement of lands to water made available under the amendatory contract, including "released water".

Amendment of Contract

15. This Company-District contract may be revised from time to time but only with the approval of the Secretary.

Discrimination Against Employees or Applicants
for Employment Prohibited

16. In connection with the performance of work under this contract, the Company, in this article termed the contractor, agrees as follows:

(a) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff

or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

(b) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

(c) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

(d) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

(e) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting

agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

(f) In the event of the contractor's non-compliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled in whole or in part and the contractor may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, and such other sanctions may be imposed and remedies invoked as provided in the said Executive Order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

(g) The contractor will include the provisions of the foregoing subarticles (a) through (f) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for non-compliance; Provided, however, That in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States.

Contingent on Appropriations or Allotment of Funds

17. The expenditure of any money or the performance of any work by the United States herein provided for, which may require appropriations of money by the Congress or the allotment of Federal funds, shall be contingent on such appropriations or allotments being made. The failure of the Congress to appropriate funds, or the failure of any allotment of funds, shall not, however, relieve the District or the Company from any obligations theretofore accrued under this contract, nor give the District or the Company the right to terminate this contract as to any of its executory features. No liability shall accrue against the United States in case such funds are not so appropriated or allotted.

Assignments Prohibited;
Successors and Assigns Obligated

18. The provisions of this contract shall apply to and bind the successors and assigns of the parties hereto, but no assignment or transfer of this contract, or any part thereof, or interest therein, shall be valid until approved by the Secretary.

Officials Not to Benefit

19. No Member of or Delegate to Congress or Resident Commissioner shall be admitted to any share or part of this contract or to any benefit that may arise herefrom, but this restriction shall not be construed to extend to this contract if made with a corporation or company for its general benefit.

Re: Water Right Claim No. 1-6

Dear Mr. Hobdey:

This letter is written in response to your letter to Michael Holliday at the Idaho Department of Water Resources' ("Department" or "IDWR") Eastern Region Office dated May 17, 2006. I am the Deputy Attorney General representing the Department in the Snake River Basin Adjudication ("SRBA") in Basin 01.

In your letter, you are inquiring about the Department's basis for recommending the quantity remark for the above listed water right. During the preliminary reporting process, the Department provided you a copy of the preliminary Director's Report that contained a different quantity remark. As this draft was a preliminary there was further review of this water right and the Department concluded that the proper remark was the one the Director recommended in the Director's Report for claim number 1-6. The Department concluded that the quantity remark as currently worded more accurately describes the historical delivery practice for this water right, helps better define the water right and is more administrable than the previous remark.

If your client disagrees with this remark, it may file an objection as set forth in the notice that accompanied the Director's Report. Once the Director's Report is filed with the SRBA District Court, the Director will not change the recommendation absent an objection and subsequent resolution of the matter either through settlement or judicial decision.

Once the objection and response deadlines have passed, I would anticipate an initial hearing in this matter to be set sometime in the spring of 2007. Settlement discussions between the Department and your client can commence prior to the initial hearing, and if the matter is resolved, then a Standard Form 5 settlement document may

be prepared and filed with the SRBA District Court. If the matter is resolved, then the initial hearing can be vacated.

If you have any further questions concerning this matter, please feel free to contact me at (208) 287-4810.

Very Truly Yours,

Candice M. McHugh
Deputy Attorney General, IDWR

Re: Remarks to Claim No. 1-6

Dear Mike:

On January 10, 2006 I sent you a letter in response to your solicitation of comments to a proposed change in the remarks to the above water rights. I indicated that the preliminary remarks were appropriate and that the proposed new remarks were inappropriate. I heard nothing further from you and I had assumed that the preliminary remarks would be used. However, I just received the recommended water right and the new remarks were inserted, rather than keeping the preliminary remarks.

Can you explain why we were not advised and given a chance to work with you in regards to preparing a more appropriate remark.

We will undoubtedly will be discussing the recommended right at the next Board meeting on June 1, 2006. From that discussion there may well be an objection filed, which will obviously delay this matter unnecessarily.

Your soonest response would be most appreciated.

Sincerely,

Craig D. Hobdey

Re: Remarks to Claim No. 1-6

Dear Mike:

The remark included the preliminary recommendation is appropriate. The proposed new remark seems to limit AFRD#2's ability to draw natural flow water when the storage right is not completely filled. As I read the Eagle Decree we can draw natural flow water up to 850 cfs, as long as it is available, whether or not storage right is filled. If the storage right fails to fill, then natural flow will be charged against our storage. However, if the reservoir eventually fills, or the storage right eventually fills, all prior diversions by AFRD#2 will be considered natural flow and not charged against storage. I do not believe the proposed language completely covers the scenario. This has been an ongoing battle between Water District #1 and AFRD#2. The original proposed remarks include language indicating that "in any year in which American Falls Reservoir is full to capacity on April 30, or fills after that date, taking into account any water that may be temporarily stored to its credit in upstream reservoirs, all water diverted by AFRD#2...shall be considered as natural flow".

That language is not reflected on the proposed replacement remarks.

Therefore, we are quite satisfied leaving the preliminary recommendation as is, in order to avoid confusion.

Sincerely,

Craig D. Hobdey

COMMUNICATION DOCUMENTATION

From: Vikie Hancock

May 8, 2002

Regarding:

Customer:

Claims of Big Wood Canal Co.

Lynn Harmon, Mgr

Mr. Harmon came into the office and met with Allen Merritt, Doug Jones and myself on May 6th. He was concerned about there being no storage right for Magic Reservoir filed in the SRBA. A cursory review of the Adjudication claims and of the water rights confirmed that there were no existing claims or water rights for irrigation storage at Magic, with the exception of decreed right 37-895 for 18 cfs that was not claimed in the Adjudication. Allen Merritt pointed out that the licensing field exam for 37-2116, which was the partial basis of decreed right 37-870, specifically mentions the reservoir and that there probably should have been some storage right associated with the first license issued, 37-2033 priority 1905.

The history of the reservoir was discussed briefly. According to Mr. Harmon, the reservoir originally had a capacity of 172,000 AF and was modified several years later to increase the capacity to it's current 191,500 AF. He thought that he heard 1910 as the year it was modified. It was decided by the claimant that an amendment to claim 37-867 (original basis 37-2033 priority 1905) to include irrigation storage and irrigation from storage in the amount of 172,000 would be appropriate. Options for claiming the balance of 19,500 AF were addressed. They included the filing of a new beneficial use claim with a 1910 priority date, or amending claim 37-870 (priority 1920) to add irrigation storage and irrigation from storage. It was pointed out to Mr. Harmon that he should probably discuss the options with the BWCC board and possibly their legal counsel, and that in his discussion with the BWCC board, he should point out that the claimed priority date of 1908 for claim 37-870 would most probably be modified to 1920 in the SRBA to agree with the 1925 decree findings in BWCC v Chapman. It was suggested that he find some records to confirm the year the capacity of the reservoir was increased.

Mr. Harmon also inquired as to whether they had stock water use covered in the SRBA. There was some inconclusive discussion as to whether the remarks about non-irrigation use for stock water included in the claim were adequate, whether the decree language would allow the inclusion of stock water as a purpose of use on the existing claims, or whether a separate beneficial use claim would need to be filed. A more detailed review of the decrees pertaining to the BWCC water rights needs to be undertaken as a step in resolving this issue.

In regard to the Big Wood's right to water from American Falls Reservoir, research conducted by Allen found that neither the BOR nor BWCC had filed

claims on the storage right associated with their diversion right from that source. Mr. Harmon was going to contact the BOR to get more information on which to base a decision of whether an additional SRBA claim needed to be filed.

A quick review of the SRBA claims filed by BWCC with Mr. Harmon showed some indiscrepancies and elements confusing to him as well as to us. Most had already been uncovered earlier and mentioned in a memo found in claim 37-13116. I advised Mr. Harmon that when he eventually sat down with an AJ agent that had had time to really delve into our records and compare them with BWCC records he might expect that there would be some changes needed in the claims as they were currently configured, and possibly some additional claims filed.

Subject: Proposal to Transfer Title from the Bureau of Reclamation of Certain Irrigation Facilities to American Falls Reservoir District #2

Ladies and Gentlemen:

The Bureau of Reclamation (Reclamation) is considering a proposal to transfer title to certain Federal irrigation facilities (canals, laterals, and drains) and associated real property interests to American Falls Reservoir District #2 (AFRD2). The facilities and land interests included in this proposal are limited to those facilities which are currently operated and maintained by AFRD2. A more detailed description of the proposed title transfer is included in the attached information.

As part of Vice President Gore's National Performance Review, Reclamation has undertaken a program to transfer title of facilities that could be efficiently and effectively managed by non-Federal entities and that are not identified as having national importance. The transfer of title to these facilities will divest Reclamation of the oversight responsibility for the operation, maintenance, management, administration, regulation of, and liability for the facilities. In August 1995 Reclamation issued its "*Framework for the Transfer of Title*" (*Framework*) which outlines certain criteria that must be met prior to implementing the transfer of title action. Key elements of that *Framework* are:

- The Federal Treasury and thereby the taxpayers' financial interests must be protected.
- There must be compliance with all Federal and State laws.
- Interstate compacts and agreements must be protected.
- The Secretary of the Interior's Native American trusts responsibilities must be met.
- Treaty obligations and international agreements must be fulfilled.
- The public aspects of the projects must be protected.

AFRD2 has satisfied its construction repayment obligations and have effectively operated and maintained the facilities since 1933 and have asked for transfer of title under the *Framework*.

The National Environmental Policy Act (NEPA) requires Reclamation to evaluate the environmental impacts of this action. In order to meet the requirements of NEPA and to help determine if transfer of these facilities is in the best interest of the public, Reclamation is asking for your assistance in identifying issues and concerns you may have about the proposed title transfer. We invite you to send your written comments on this proposal to the Bureau of Reclamation, Snake River Area Office, 1359 Hansen Avenue, Burley, Idaho 83318 by August 1, 2000. If you have any questions concerning the proposal or the NEPA process, please contact Dick Bauman at (307) 739-8765.

Sincerely,

Jerrold D. Gregg
Area Manager

PROPOSED ACTION

TRANSFER OF TITLE TO IRRIGATION FACILITIES TO AMERICAN FALLS RESERVOIR DISTRICT #2

Background

American Falls Reservoir District #2 (AFRD2) is an irrigation district organized and existing under the laws of the State of Idaho for the purpose of operating the Gooding Division of the Minidoka Project. AFRD2 diverts water from the Snake River upstream of Milner Dam into the Milner-Gooding Canal and laterals for delivery to lands in Jerome and Lincoln Counties, Idaho. The canal and laterals serve 20,000 acres with a full water supply and 78,667 acres with a supplemental water supply. The location of AFRD2 facilities and lands are shown on the attached maps.

Construction of the Milner-Gooding Canal (Gooding Division, Gravity Extension Unit) was authorized by an act of Congress and signed by the President on July 3, 1928. The work (circa 1928 - 1932) consisted primarily of construction of the canal and support structures (ditch rider houses, shops, etc.). The canal extends 70 miles from near Milner Dam on the Snake River northward to the North Gooding Canal, northwest of Shoshone, Idaho. The initial capacity of the canal is 2,700 cubic feet per second.

About half (36 miles) of the canal is on Bureau of Land Management (BLM) land that has been withdrawn for Bureau of Reclamation (Reclamation) purposes. The other 34 miles of canal are on private lands that have 1890 Canal Act rights-of-way. Only one mile (13.74 acres) of the canal lies along acquired (fee title) land.

Reclamation's Title Transfer Initiative

Many of Reclamation's projects were constructed in the early 1900's before much of the West was settled and there were no local communities and utilities. Reclamation owns facilities that if located in other parts of the country, would be owned, operated, and funded by publicly operated private corporations or local government agencies. While it has been Reclamation's policy for decades to transfer operation and maintenance of projects to local entities where and, when appropriate, there currently is a growing interest in the transfer of title to the Federal facilities (with its attendant responsibilities).

In 1995, as part of Vice President Gore's National Performance Review, and with the goal of a Federal government which works better and costs less, Reclamation began a program to transfer title of facilities which could efficiently and effectively be managed by non-Federal entities and are not nationally important. Reclamation's aim is to transfer title directly to project beneficiaries where these entities are competent to manage the facilities and are willing and able

to fulfill legal obligations associated with taking ownership of those facilities. Reclamation believes that AFRD2 meets these requirements and is a good candidate for title transfer.

Purpose and Need for Action

Currently Reclamation oversees the operation, maintenance, management, and administration of the district and has responsibility for the regulation of, and liability for the facilities. Additionally, Reclamation and AFRD2 each review and respond to third party applicants requesting use of rights-of-way affecting Reclamation-owned facilities or related land interest. Reclamation normally requests AFRD2's formal approval since AFRD2 operates and maintains these facilities and knows what specific requirements are needed. This administrative process is a burden to both Reclamation and AFRD2, as well as the third party applicant

The transfer of title of the United States' interest in these facilities to AFRD2 would completely divest Reclamation of the responsibility for the operation, maintenance, management, regulation of, and liability for the facilities. It would streamline administrative processes for Reclamation, AFRD2 and the public and allow Reclamation to use its resources more effectively in other areas of water resource management while still ensuring the irrigation facilities within AFRD2 will continue to function properly.

The Proposed Action

The Proposed Action is for Reclamation to transfer all right, title, and interest in certain irrigation facilities and associated land interests to AFRD2. The facilities to be transferred are only those currently operated and maintained solely by AFRD2 and lie generally within the AFRD2 boundary as indicated on the attached maps. The facilities include canals, laterals, and structures for ditch riders' residences and maintenance facilities which were constructed, extended, or enlarged by Reclamation and the associated rights-of-way, withdrawn lands, and fee title land interests held by Reclamation shown on the attached maps. **Title to major facilities, natural flow water rights, reserved power rights or storage rights held by the United States, that are affiliated with the Minidoka Project, will not be considered for transfer.**

The facilities to be transferred include:

1. Conveyance facilities and associated features,
2. Rights-of-way for the conveyance facilities,
3. Acquired lands located along and under one mile of canal consisting of 13.74 acres.
4. Two parcels of withdrawn land and associated ditch riders' houses and maintenance buildings, totaling 48.49 acres.
5. Houses, shops, and warehouses that are in the name of the United States.

The land withdrawn from BLM for the canal would be returned to the BLM. The Legislation would grant a permanent easement for the canal (where it is currently located on withdrawn lands). The withdrawn land for the material sites (gravel pits) would be returned to the BLM. The BLM would issue the district a free use permit for up to 5,000 cubic yards of material per year.

There are several tracts of withdrawn land where there are no canals or associated structures that are required to facilitate operations. These tracts would be returned to the BLM and depending on the operational need, special use permits would be issued by BLM. Legislation would grant a permanent easement for the emergency floodway on one parcel.

The Reclamation also has three agricultural leases, six grazing leases, and one agricultural and grazing lease on withdrawn land. It has been proposed that the grazing land would be returned to the BLM. However, the BLM has indicated that they have no interest in the agricultural lease lands. Disposition of these agricultural lands will be subject to a separate action not associated with this title transfer process.

The Process

Reclamation does not currently have the authority to transfer title to these facilities and lands. Specific legislation would need to be passed by Congress. If the decision is made to proceed with the title transfer, AFRD2 would draft legislation with provisions that are consistent with Reclamation's 1995 Framework for Title Transfer, and, where appropriate, environmental commitments that would be made by Reclamation through the National Environmental Policy Act, Endangered Species Act, and/or National Historic Preservation Act process.

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 1-6

NAME AND ADDRESS: AMERICAN FALLS RESERVOIR DIST #2
PO BOX C
SHOSHONE ID 83352

SOURCE: SNAKE RIVER

TRIBUTARY: COLUMBIA RIVER

QUANTITY: ¹⁷⁰⁰
~~1,665,000~~ CFS

The right to divert as natural flow during each irrigation season under this right, having a March 30, 1921, priority, as follows: From May 1 of each irrigation season continuing during that season so long as there is natural flow available for that priority, the first 1,700 cubic feet per second of flow to be available one-half (1/2) to American Falls Reservoir District No. 2 and one-half (1/2) to American Falls Reservoir, except that in any year in which American Falls Reservoir is full to capacity on April 30 or fills after that date, taking into account any water that may be temporarily stored to its credit in upstream reservoirs, all water diverted by American Falls Reservoir District No. 2 within the maximum of ~~1,665~~ cubic feet per second during the year prior to the initial storage draft on American Falls Reservoir after the reservoir finally fills in that year shall be considered as natural flow under this right. Nothing herein shall prevent American Falls Reservoir District No. 2 from diverting water under said right prior to May 1 of a given irrigation season but all such diversions shall be charged as storage in the event the reservoir is not full on April 30 of that season or does not fill after April 30 of that season.

Water available at American Falls Reservoir for the March 30, 1921, priority, under this right, other than that to be available to American Falls Reservoir District No. 2 as above provided, to be available for storage in American Falls Reservoir.

PRIORITY DATE: 03/30/1921

POINT OF DIVERSION:
T10S R21E S28 SWNW Lot 5 Within JEROME CountyPURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/15 11/15	1,665,000 CFS

PLACE OF USE:

27301.2 ACRES TOTAL

Place of use is within the boundary of American Falls Reservoir District No. 2 pursuant to Section 43-323, Idaho Code.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

PROFILED

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

~~The remainder of this right was forfeited for non-use from 1950 to 1989.~~

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Right includes accomplished change in point of diversion pursuant to Section 42-1425, Idaho Code.

Water is delivered through Milner Gooding Canal.
