Talked with Dan Temple regarding the recommended point of diversion for the A & B Basin 01 rights. He thought that the p/d should be in section 24 rather than section 25. He said the BOR showed section 24 as well. He sent someone out to gather a gps location today and the lat/long coordinates are as follows:

42 degrees 32 minutes 00.300 seconds North
113 degrees 56 minutes 49.730 seconds West.

However, this point seems unreasonable since it shows up about 200 feet into the river channel based on the aerial photos. The aerial photos appear to be rectified correctly with the gcdb. Therefore I am making the recommendation based on the aerial photos.

Conditions of Approval:

- The beneficial use of the water represented hereby is for the landowners within the A & B Irrigation District pursuant to contract No. 14-06-100-2386, dated February 9, 1962 (as may be supplemented or amended) between the United States of America through the U.S. Bureau of Reclamation and the A & B Irrigation District for irrigation and other permitted purposes as authorized by the Act of September 30, 1950, CH. 1114, 64 STAT. 1083, of the North Side Pumping Division of the Minidoka Irrigation Project.
- 046 Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
- X61 The period of use for the irrigation described in this approval may be extended to a beginning date of 3/15 and an ending date of 11/15 provided that beneficial use of the water can be shown and other elements of the right are not exceeded. The use of water before 4/1 and after 10/31 is subordinate to all water rights having no subordinated early or late irrigation use and a priority date earlier than the SRBA partial decree date.
- WB4 The total instantaneous diversion of water from all points of diversion under Rights 36-2080, 36-15127A, 36-15127B, 36-15192, 36-15193A, 36-15193B, 36-15194A, 36-15194B, 36-15195A, 36-15195B, 36-15196A and 36-15196B shall not exceed 1100 cfs, nor a total combined annual volume of 266744.8 af, for the irrigation of 66,686.2 acres.
- R05 Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.
- X27 This right is limited to the irrigation of 62,604.3 acres within the place of use described above in a single irrigation season.
- 067 The right holder shall measure and annually report diversions of water and/or other pertinent hydrologic and system information as required by Section 42-701, Idaho Code.
- The new point of diversion located in the SENE (Lot 98 = Tract B), S9, T9S, R21E is limited to a maximum diversion rate of 6.00 cfs.

In 1989 I was made responsible for correlating the records and maps of the A & B Irrigation District which showed places of use as farm units to correspond to the Idaho Department of Water Resources record system that details the places of use by 40 acre tracts, Sections, and Township and Range.

This required contact with Virgil Temple, Manager of the A & B Irrigation District, and Diana Warburton, Office Manager of the District, to interpret some of the records they supplied and to explain changes that have occurred over time. These changes included some changes in points of diversion as well as places of use.

The places of use also correspond to aerial photos of the irrigation areas taken in 1976 and infrared aerial photos taken in 1987.

I have some knowledge of the historical operation of the A & B Irrigation District through intermittent (during 1967 to 1970) contacts with the people of the District through my employment with the Agricultural Research Service of the U.S. Department of Agriculture at Kimberly, ID.

MEMORANDUM

YES

TO: Glen Saxton

FROM: Dave Tuthill *DT*

DATE: February 26, 1985

RE: Review of Draft Bureau of Reclamation Filings for Expansion of
A and B Irrigation District

Pursuant to your request, the Water Allocation Section has reviewed the attached Draft Application for Permit and Application for Transfer, which were submitted to this office by the Bureau of Reclamation. Findings are as follows:

Application for Permit

- Item 3. Point of diversion should be shown as Government Lot 5 (SW $\frac{1}{4}$ SW $\frac{1}{4}$).
- Item 8B. Because the intended place of use is located within the boundaries of an irrigation district, the identification of exact acres to be irrigated is not required. However, some type of designation of place of use should be provided. For this type of filing, a map of the existing or proposed boundaries of the irrigation district is adequate.
- Item 8C. This item should refer to License No. 01-2060, which provides 240 cfs for the irrigation of 13,650 acres of land within a total irrigated area of 14,637 acres found at the time of the field exam, and Decree No. 01-0014, which decreed 267 cfs to be diverted at a point which is probably the same pumping plant although a different quarter-quarter is described. Based on a cursory view of the existing licensed and decreed rights, it appears that the licensed right has been included in the decreed right. However, the decree was signed on July 10, 1968 and the license was issued on January 14, 1971, so it is possible that the license is in some way additional to the decree. A complete analysis of this conflict is beyond the scope of this memorandum, but the existence of other water rights at the point of diversion should be identified in Item 8C.
