On November 22, 1991, the United States of America, acting through the Regional Director of the Pacific Northwest Region, Bureau of Reclamation (Bureau), filed three separate applications for transfer of water rights with the Idaho Department of Water Resources (Department). The transfer applications will be processed by the Department in accordance with the summary of procedure included in Attachment A to this order. The Bureau transfers and the corresponding Bureau water rights and Snake River Basin Adjudication claims are listed in Attachment B.

The Department has received a total of 555 timely protests to the transfers. The protests are filed against one, two, or all three of the above referenced transfer applications. Of the 555 timely protests 29 are by organizations, six by private individuals, 26 are form-letter protests filed by individuals with Payette River interests, and the remaining 494 were form-letter protests filed by individuals within the Wilder, Boise-Kuna, Nampa-Meridian, New York and Settlers Irrigation Districts on the Boise River. The five irrigation districts are among the 29 organizations which have filed separate protests. The

RE: Analysis of 01-4055, 01-10045 and 01-10044

These three claims filed by the BOR have a basis of beneficial use with the source of Jackson Lake Reservoir and the Snake River with the dam at Palisades Reservoir as the point of diversion. The claims list irrigation storage as the purpose of use with a combined total of 920,000 AF; stating this is the average total yield of the watershed upstream from the Wyoming Idaho state line.

The claims seem to seek rights for all the water in the Snake River at the state line consisting of both storage releases from Jackson Lake Reservoir and natural flow from tributaries to the Snake River below Jackson Lake Reservoir. The narratives in the claims also references bank storage and second fill from Jackson Lake Reservoir. To the extent BOR captures the natural flow on the Snake River system for storage in Palisades and American Falls Reservoirs it has obtained water rights issued by Idaho. If storage in Jackson Lake Reservoir is greater than Wyoming water rights authorize that issue is beyond the jurisdiction of the SRBA.

Claim 01-4055 also lists 1,415,000 AF for power generation, which is the maximum-recorded yield of the Snake River watershed in Wyoming recorded at the state line. For the purpose of power generation the BOR is entitled to a water right with the diversion at Palisades Dam. The use of water for this purpose is being recommended as 01-4054.

Though all the water in the Snake River flowing from Wyoming into Idaho does pass through Palisades Dam, during the irrigation season this natural flow is allocated to fill water rights below the reservoir and is captured for storage. Other than power generation the BOR does not put this water to beneficial use. I fail to see justification for favorably recommending these three claims.

RE: NOTICE OF CHANGE OF ADDRESS

Dear Sir or Madam:

Per your request, I have changed the address on the adjudication numbers listed on the following page.

Water right numbers A29-02262, A29-02306, A29-02307, A29-02310, A29-02341, A29-02567, A29-02568 and A29-02571 do not have Bureau of Reclamation as the current owner. The current owner in our database is Falls Irrigation District. Therefore, these rights have not been changed.

All other water right numbers not listed above or on the following page will be processed by our other regions and mailed to you at a later date.

If you have any questions feel free to contact this office at 208-525-7161.

Respectfully submitted,
