In 1989 I was made responsible for correlating the records and maps of the A & B Irrigation District which showed places of use as farm units to correspond to the Idaho Department of Water Resources record system that details the places of use by 40 acre tracts, Sections, and Township and Range.

This required contact with Virgil Temple, Manager of the A & B Irrigation District, and Diana Warburton, Office Manager of the District, to interpret some of the records they supplied and to explain changes that have occurred over time. These changes included some changes in points of diversion as well as places of use.

The places of use also correspond to aerial photos of the irrigation areas taken in 1976 and infrared aerial photos taken in 1987.

I have some knowledge of the historical operation of the A & B Irrigation District through intermittent (during 1967 to 1970) contacts with the people of the District through my employment with the Agricultural Research Service of the U.S. Department of Agriculture at Kimberly, ID.

I, DAVID GANGWER, being first duly sworn on oath depose and say:

1. I was employed as a Planning Division Supervisor in the Pacific Northwest Regional Office of the Bureau of Reclamation (Reclamation), Department of the Interior, from 1973 until January 3, 1987.

2. One of my assignments was the supervision and coordination of a planning study and report called the Minidoka North Side Extension Project.

3. In connection with that report a survey was completed in the summer of 1984, of all lands receiving Reclamation Project water during the 1984 crop season. First, irrigated lands were identified by field examination using aerial photographs as support. The verified service lands were then compared to the original project irrigable area plats to determine the lands not originally classified irrigable which were then receiving water (water-spread lands).

4. Within Unit B of the A and B Irrigation District, 4,591.9 acres of water-spread lands were determined to be irrigated from Reclamation Project ground water during the 1984 irrigation season.

5. Within Unit A of the A and B Irrigation District, 1,083 acres of water-spread lands were determined to be irrigated from Reclamation Project surface water during the 1984 irrigation season.

6. The water-spread lands were actually developed by the individual growers sometime between 1955, when the project was first developed, and 1984, when the survey was completed.

6. The study maps and accompanying tabulations were delivered to the A and B Irrigation District for their records.

DATED this 12th day of April, 1991
