Herbert Montierth et al**

Dear Ms. Bock:

For reference purposes, please find enclosed herewith copies of the following documents and/or correspondence:

1. Mortgage dated August 31, 1988 granted by Herb R. Montierth et al to Connecticut General Life Insurance Company secured by certain real property located in Elmore and Ada County, Idaho.
2. Assignment of Mortgage in connection therewith from Connecticut General Life Insurance Company to Western Mortgage & Realty Company dated October 28, 1996.
3. Satisfaction of Mortgage documents (2) executed by Western Mortgage & Realty Company.
4. Copy of correspondence from Connecticut General Life Insurance Company dated February 25, 1999 advising that they no longer have any security interest in the above described Water Rights.
5. Special Warranty Deed from Connecticut General Life Insurance Company to Herbert R. Montierth et al.

The above water rights were originally pledged to Connecticut General for security purposes in connection with a mortgage loan granted by Connecticut General to the Montierth's when the Montierth's repurchased the real property from Connecticut General. The beneficial interest in connection therewith was subsequently assigned to Western Mortgage. Said mortgage and the related promissory note have been fully satisfied and therefore, Connecticut General and Western Mortgage claim no further interest in and to these water rights.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 61-7306, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before March 1, 1982.
- c. Other: Measuring devices of a type approved by the Director shall be permanently installed and maintained as part of the diverting works.

2. Denial of said application is for the following reasons: _____

MEMORANDUM

December 18, 1995

TO: Files 61-07207A, 61-07207B, 61-07306B

FROM: Cindy Hodges *cyh*

RE: B/U Examinations, Montierth System #1 (West of Simco Rd)

NOTE: These files were previously forwarded to S.O. for licensing but recalled by me for modifications to original recommendations.

Four wells constructed in the mid to late 1970's were used to develop the above rights. A well log is available only for well #1 (Section 20). At the time of the field exam, only two of the wells (#1 and 2) were found with pumping equipment in place. Wells #3 and 4 were capped. All were said to be interconnected via common mainline.

SYSTEM CAPACITY

During the 12 year period between proof filings in 1980 and the field exams in 1992, two major system modifications occurred which make it difficult to conclusively assess this system capacity as of 1980. Well 1 (sec 22) was refitted at an unknown date. The well was test pumped in 1978 at 1100 gpm (at open discharge). Under field conditions of 368' pumping level plus 5 psi open discharge pressure, this flow could be attained with a 150 HP pump. In 1992, a 200 HP pump with 125 HP booster were found on well 1.

Wells 2 and 4 (sec 20) were refitted in 1981. A 200 HP pump and motor from well 4 were pulled and installed in well 2; a new 150 HP pump and motor were installed on well 4. It is unclear what equipment was removed from well 2, but there is reference to a discarded 100 HP motor (see attached work records). In 1992, I found a 200 HP motor with 100 HP booster on well 2 and no equipment in well 4. There is no evidence that well 3 was ever equipped during the development period.

Combined horsepower on this set of wells ranged from a presumed 450 in 1980 (150 on #1, 100 on #2, 200 on #4) to 625 in 1992. Should this be considered a diversion expansion? Consider that pre-1980 irrigation applications may have been in furrow with wells operating at open discharge. A (theoretical) rate of flow of 7.29 cfs could have been produced with 450 HP under those conditions. Irrigation applications by 1985 had been converted to high pressure (70 psi) pivot. The theoretical rate of flow under the system as I found it is 7.17 cfs. There is not a rate of flow increase. I do not know when the boosters were installed, but increased HP necessary to maintain a developed rate of flow for pressurized irrigation should not be considered expansion.

DETERMINATION OF ALLOWABLE ACREAGE

Total permitted acres is 560. Total found acres per ASCS maps is 556. Of those, 455 acres entered CRP beginning in 1989. The lapse in time since proof was filed again causes some problems with determining whether or not full beneficial use occurred during the development period. Dates of well construction in Section 22, along with a 1978 orthophotoquad map for Section 20 indicates that the entire area under this project was in fact irrigated before proof was filed in 1980.

For lands in CRP, an accounting of cropping patterns and land rotation for the five years prior to CRP was completed to verify the actual extent of development which could be considered protected by set-aside. For non-CRP land, irrigation patterns were investigated as far back as practicable.

Compliance photography from Ada and Elmore County CFSA (ASCS) offices for the years 1983-1988 was used for verification of acres enrolled in CRP, for permits 61-07207A and 07207B (see attachment A). Available photography evidences ongoing irrigation through 1985, with the irrigation of 371 acres under these two permits during the 1985 irrigation season. Sporadic irrigation occurred for the next three years, with the lands enrolled in CRP beginning in 1989. There may be up to three years of accrued forfeiture for most of these acres.

Acres under 61-07306B may have been irrigated prior to 1980 and into the early 1980's, but they do not appear irrigated for the years 1985 through 1991. These acres were not entered in CRP in either Ada or Elmore County records, and no other set-aside enrollment could be found, which strongly indicates forfeiture. This is not 100% conclusive because compliance slides are not present for the W $\frac{1}{2}$ of Section 20 for several years (see Attachment A). However, the photos which are available (Ada Co. CFSA) show an area almost fully reverted to native state during these years - no furrow markings or changes in color which could indicate recently broken or plowed ground. Irrigation of about 80 acres did occur in 1992; slides taken after 1992 show no irrigation but contain distinct visual evidence of recent cultivation. This evidence is missing in the pre-92 slides. Unless permit holder can document beneficial use during the critical period 1985 to 1989, this right forfeited due to non-use as of 1989. I have recommended the permit be canceled.

RECOMMENDATIONS

The 371 irrigated acres found for 1985 represent the maximum season acres demonstrated to be supported by this system. The acres are recommended under the splits of 61-07207, as follows:

61-07207A	136 acres	2.63 cfs
61-07207B	235 acres	4.54 cfs

The pro-rata flow per acre of -0.019 cfs/ac meets the expectations of required rates of flow for crops grown in this area.

The following restrictive condition (or its likeness) is recommended:

Use of this right with right no. 61-07207(A/B) is limited to a total diversion rate of 7.17 cfs, a total yearly diversion volume of 1484 AFA and the irrigation of 371 acres within a single irrigation season.

Re: Snake River Basin Adjudication (SRBA)
AR #C000037

Dear Mr. Montierth:

By your failure to pay the late fees as requested in my January 17, 1992, letter to you, the adjudication staff will continue processing only four of the claims (A63-07427A, A63-07427B, A63-07753, A63-07982). All the others listed below will go in a rejected status until such time as the late fees are paid.

A61-07195	A61-07207A	A61-07207B
A61-07210	A61-07265	A61-07274
A61-07298	A61-07306A	A61-07306B
A61-07390	A63-03150	A63-03151B
A63-03196B	A63-03198	A63-03311
A63-07425		

The staff is beginning the early phases of investigating claims in Basin 61 where a bulk of your claims subject to the late fees are located. Of course, no recommendation of the rejected claims can be made in the reports for Basin 61 that are scheduled for release later this year and early next year. Such timing requires investigating claims for irrigation use in Basin 61 during the coming growing season.

I believe you can appreciate the urgency to complete the filing process. Upon receipt of your payment of \$942.00, the subject claims can be investigated. Thank you for attending to this matter as quickly as possible.

If your payment is in the mail, we apologize for this letter.

Regards,

Donald V. Shaff
Manager, Adjudication Section
