The Elmore Co. ACS office contains a CSP contract on the lands covered by A61-07308 and this right totaling 384.8 acres. A61-07308 describes two circles totaling 30.0 acres. The right was intended to cover the corners. There is no evidence that the outside corners were developed in 1987 (see NAPP)

RECOMMENDATIONS:

TOTAL ACRES: 30.0
REVIEWED BY: RME

DATE: 4-13-93

In addition, the CSP contract does not cover these outside corners.

I recommend that the outside corners (see map) be excluded from this claim based on 1987-1991 non-use. The inside corners are considered fully irrigated (7.5 acres each) based on NAPP and previous license.

Claimant contact concerning signature will be done.

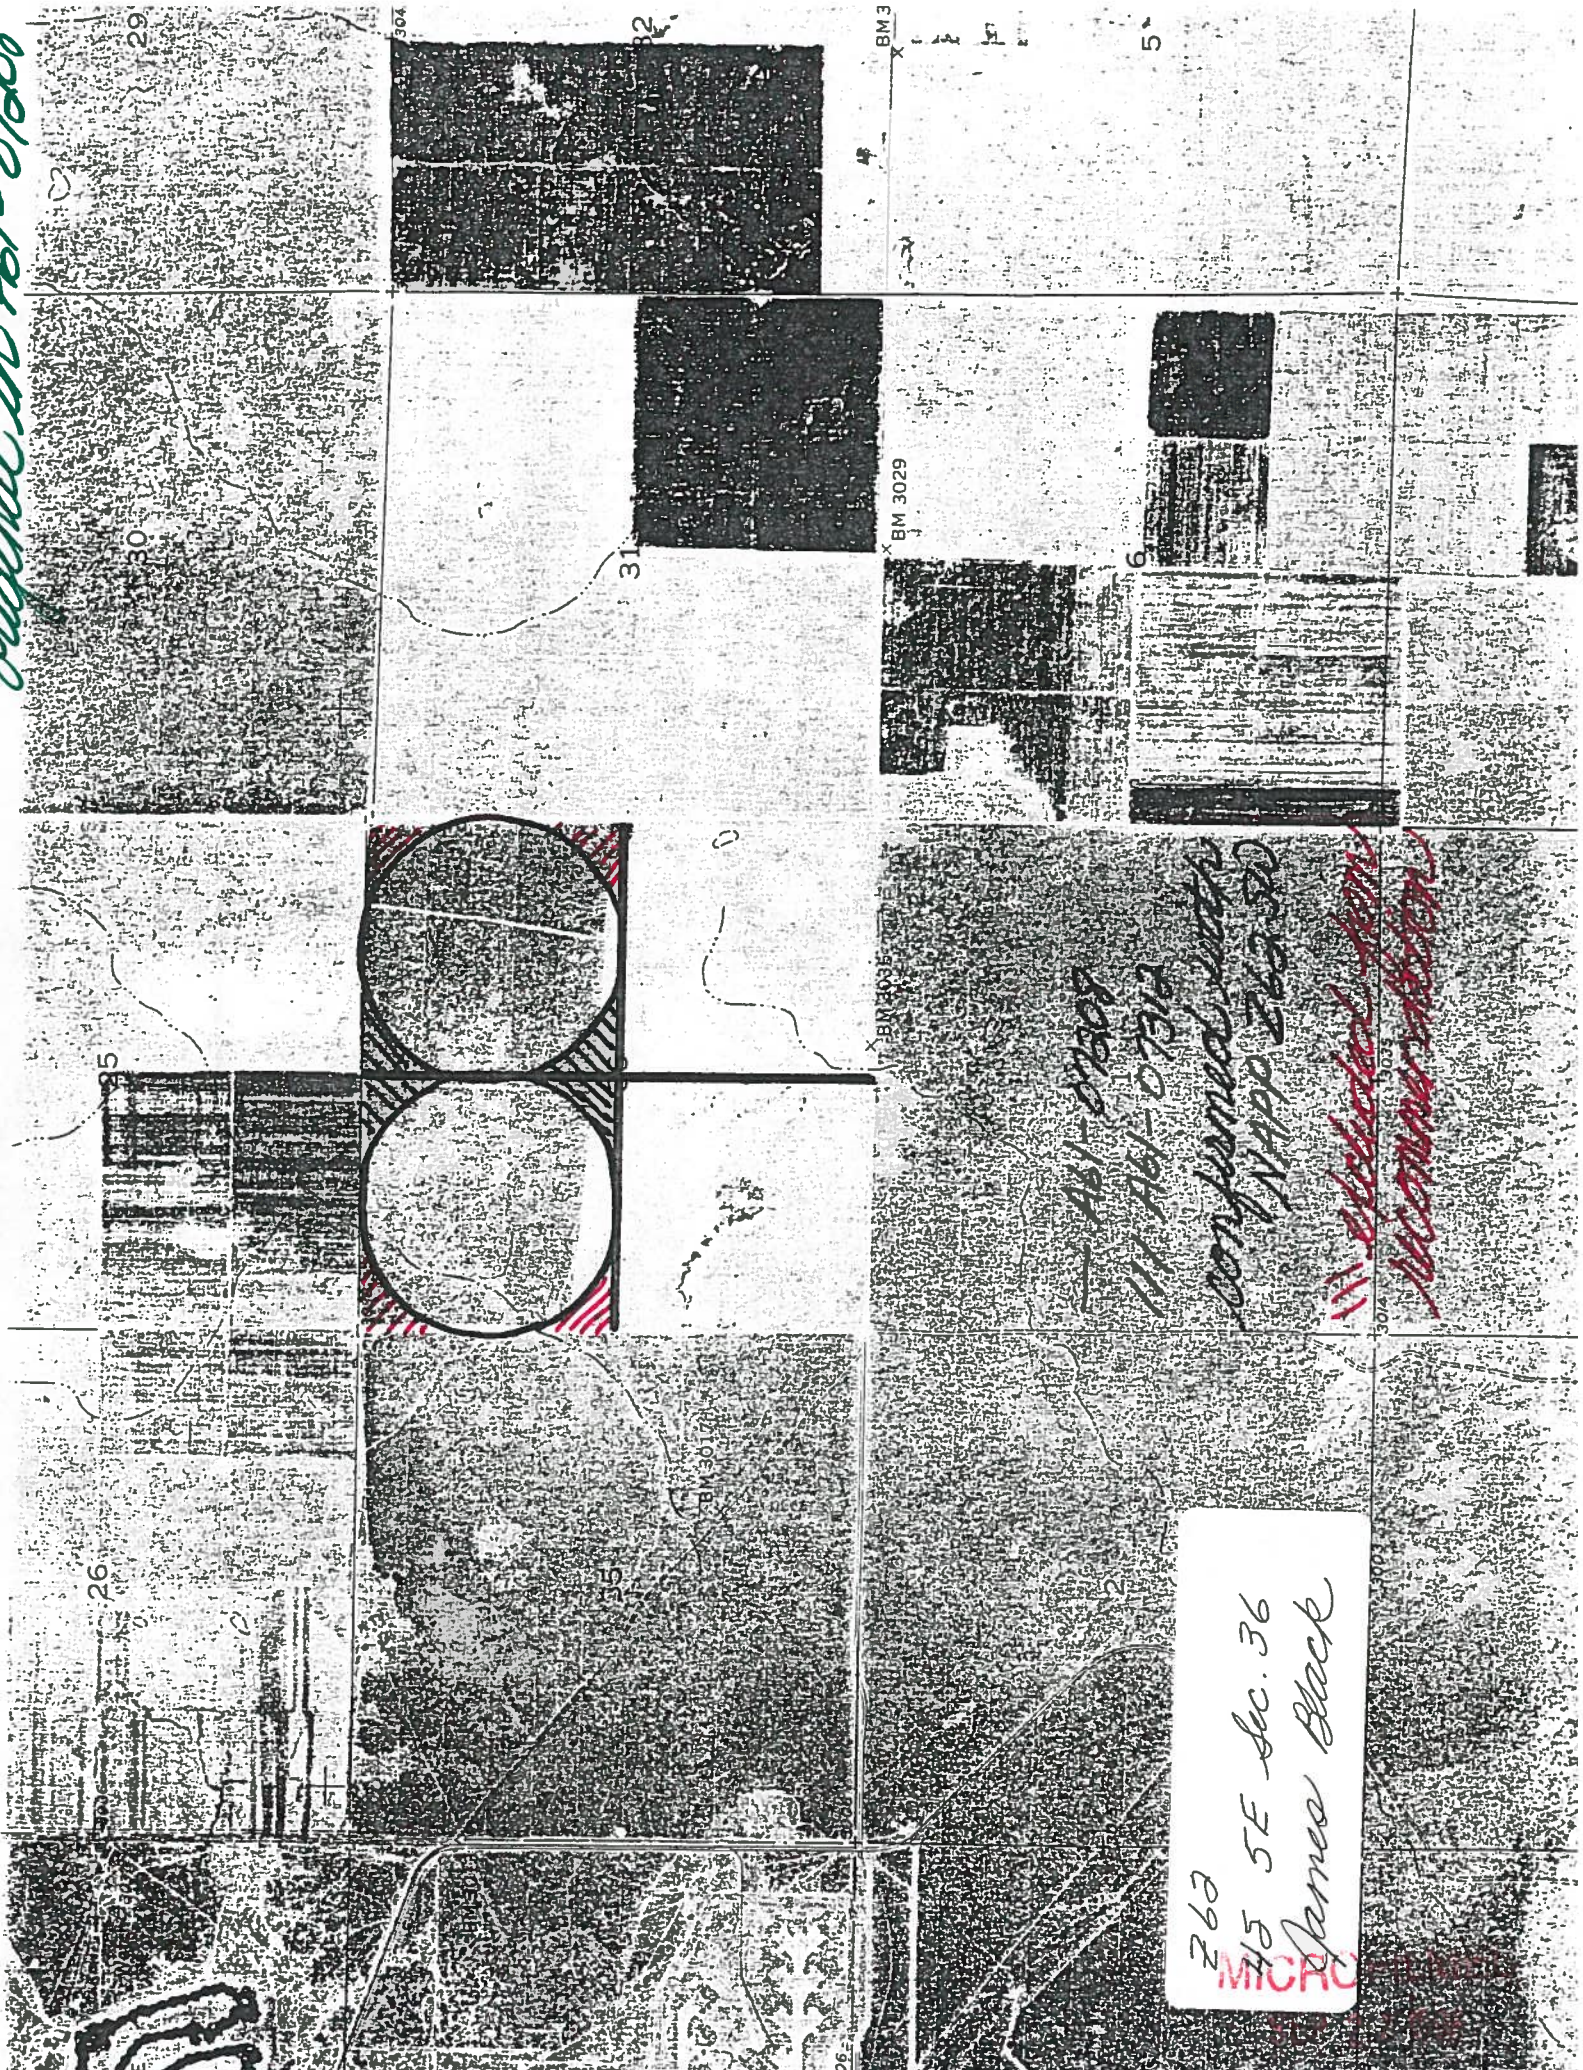

Mr. Black came to my office 4-20-93 and confirmed that the outside corners are not formed. RME

Re: Snake River Basin Adjudication (SRBA)
Elmore County - Claim No(s): A61-07312

Response Date : May 12, 1993

Dear Mr. Black,

IDWR's initial investigation of the Notice of Claim listed above indicates that a portion of the water right claimed was not used from 1987 to the present. The unused portion is believed to be the outside corners of the land covered by pivots prior to entry into the CRP program.

Under Idaho law, a portion of a water right may be forfeited by five years continuous nonuse. The use of water may be resumed under some circumstances, but resumption of use after forfeiture will sometimes result in a change in the priority date of the water right to the date use was resumed.

Before IDWR may recommend the portion of your claim listed above, you must submit one of two types of evidence. First, you may submit evidence showing use of the water during the period listed above. Such evidence must show use frequent enough to leave no five year period of nonuse. Second, you may provide IDWR with the date of resumption (including month, day and year) and submit some evidence tending to support that date.
