OBJECTION TO WATER RIGHTS FINDINGS

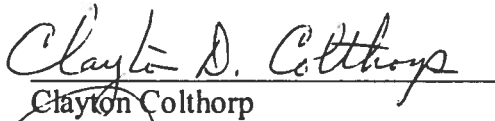

Subcase 61-07459
James W. Grimmett
Mountain Home, ID
June 9, 1999

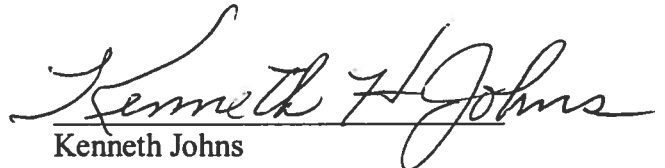

To Whom It May Concern:

When the water resource officer came around in 1992, we did not realize or appreciate the significance of her visit and she saw only the 4.3 acres that was then being irrigated. We wish we had given a more thorough history of the beneficial use of our water and land.

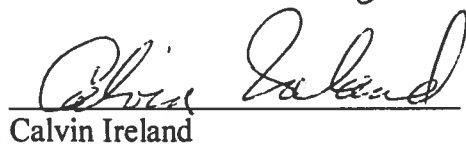

We purchased the land in 1963 from Mr. Vines and irrigated with water shares in the Mountain Home Irrigation District. We sold those shares to Vernal Hawkes and had a well-dug in 1972 from which we irrigated the full 15 acres. In 1977, we had a second well dug. From the 1977 well we irrigated the full 15 acres until the drought years of the early 1990s.

The following long time citizens of the area attest by signature to my irrigating the full 15 acres beginning in 1963 (including the period of Aug 23, 1977, through March 2, 1978) through the 1980s.

RE: Claim to a Water Right No. 61-07459

James W. Grimmett
Rt. 1, Box 677
Mountain Home, ID 83647

Dear Mr. Grimmett:

In response to the notice of error you submitted on the proposed recommendation of the above referenced claim, I offer the following information:

I have talked with the field examiner who conducted the examination of your irrigation system from your well, our regional supervisor and our State Office in regard to the license issued on the above referenced claim. In order to request an increase in the number of acres licensed under this right you will need to do a couple of things to initiate a reinvestigation of this water right.

1. You need to submit a request for this investigation. You should include the reason you believe the number of acres was incorrectly licensed and why the entire system was not shown to our examiner when she conducted her exam.
2. You need to include with your request some convincing documentation showing the total number of acres that were irrigated from your well during the permit period of August 23, 1977 through March 2, 1978.
3. All water right approvals, including amended licenses, are now issued as orders of the Department. Once issued, orders do not become final for 21 days after issuance. Because of this timeline, if you wish to pursue this matter you need to submit an objection to the Snake River Basin Adjudication Court in Twin Falls when you receive our final recommendation of this claim. We will be sending this Director's Report to the Judge next week so you should receive your notice soon. Be advised that I have not changed any of the information previously reported to you.

I am sorry I did not get this information out to you sooner. I have been busy preparing memos and having meetings to figure out what could be done to pursue your request. If you have any questions in regard to this, please do not hesitate to contact me. Also, if you wish to submit an objection to the Court, I can send the objection form out to you. If you don't take this action at this time, you will have no alternative but to submit an application for permit for an additional water right to irrigate the acres not covered under License No. 61-07459.

Sincerely,

MEMORANDUM

DATE: February 3, 1999

TO: Kay Walker

FROM: Shelley W. Keen *SWK*

RE: Request to amend license 61-07459

I have reviewed your memo requesting that IDWR consider amending water right license 61-07459, which was issued to J. W. Grimmert on July 10, 1992, to increase the authorized number of irrigated acres. In order to proceed, I will need the following items.

- A request signed by the right holder himself.
- Because the authorized development period did not extend beyond 1978, the 1987 NAPP photography cannot be used as the basis for amending the license. I will need good information demonstrating that more than 4.3 acres were irrigated prior to March 2, 1978, the date proof of beneficial use was submitted for the permit.
- Aerial photography is not necessarily a good indicator of the source of irrigation water. Therefore, I will need good information demonstrating that additional irrigated acres on Mr. Grimmert's land were, in fact, irrigated with water from the source well for this right.

All water right approvals, including amended licenses, are now issued as orders of the department. Once issued, the orders do not become final for 21 days even if no petition for reconsideration is filed. Within 28 days of the order becoming final, the decision can be appealed to district court. Because of this timeline, it will not be possible to complete the licensing amendment process this week even if the required information is submitted immediately.

by & Lori Graves, Field Examiner

Date: 01/05/99

Re: License 61-07459

In review of this file for recommendation in the SRBA, I prepared my recommendations based upon the field examination conducted by Lori Graves on June 18, 1991 and the License issued July 10, 1992. When our SRBA recommendations were sent out to Mr. Grimmatt, the license holder, he disagreed with my recommendations because he irrigates more land than the 4.3 acres licensed. I asked Mr. Grimmatt why he had not contested the license when it was issued and mailed out to him. His neighbor piped up and stated that Mr. Grimmatt was not a fighter.

In review of the 1987 NAPP photo Mr. Grimmatt had irrigated more than 4.3 acres. His well had problems due to the drought and he quit irrigating all the land. When Lori conducted her exam, she called and set up an appointment to meet with the permit holder. When Lori arrived at their place Mrs. Grimmatt was busy in the kitchen and just pointed to the land being irrigated on the day of the exam. She did not offer any information in regard to the lands that had been irrigated previously under the permit. Lori conducted her exam and submitted her findings to the state office for licensing.

I am caught in the middle of this situation now. Mr. Grimmatt is not happy with the proposed recommendations; he cannot receive another water right for the extra acres due to this property being located in the Mountain Home Groundwater Management Area (established 11/1992); the land was irrigated on the 1987 NAPP photo which we base our SRBA recommendations on for beneficial use claims along with field examinations; drought conditions prior to the beneficial use examination could not be controlled by the permit holder.

I am attaching a GIS shape file which shows all of the land owned by Mr. Grimmatt and the 4.3 recommended acres. Please review this information and see if we can offer additional acres under this right which would require an amended license. Mr. Grimmatt has stated he had work done on his well and that it can now irrigate the entire place.

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.

V = Smaller of V_{LH} and V_{DR} = 19.35 AFA

2. Volume Calculations for Other Uses:

STOCK USE: 6 horses + beef = $6 \times 12 \times 365 \div 325,850 = .08 = \underline{.1 \text{ AFA}}$

ALTERNATE: .02 x 365 x 1.9835 = 14.48 = 14.5 AFA

IRRIGATION RIGHT FROM A GROUND WATER SOURCE

A theoretical calculation is necessary to determine if a measurement is required for irrigation from a groundwater source.

1. Using the found acres (or an estimate by the permit holder) calculate the acre-foot per annum limit. This is the volume that the system must be able to theoretically produce to exclude a rate of flow measurement.
2. Next, given the pump hp and the estimated dynamic water level, calculate the theoretical rate of flow that the system can produce.
3. Using the rate found in step 2 and the days in the permitted irrigation season, calculate the theoretical AFA that the system could produce. This volume is then compared to the first AFA calculation. If the theoretical volume (step 3) is greater than the irrigation requirement volume (step 1) then no measurement is necessary. If it is less, then you must make a diversion rate measurement during the field examination.

$$1. \quad \frac{4.3}{\text{Found Acres}} \times \frac{4.5}{\text{Irr. Req.}} = \frac{19.35}{\text{AFA}}$$

$$* 2. \quad \frac{(10) \text{ HP} \times 8.8 \times (.50) \text{ EFF}}{(110) \text{ Dyn Level} + (2.3 \times (40) \text{ PSI})} = \frac{217}{\text{Theor. Div. Rate}} \text{ CFS}$$

$$3. \quad \frac{122}{\text{Theoretical Div. Rate}} \times \frac{246}{\text{Days in season}} \times 1.9835 = \frac{107.3}{\text{AFA}}$$

Note: for electrical motors
EFF = 0.70
for diesel motors
EFF = 0.60
