IDAHO DEPARTMENT OF WATER RESOURCES

RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 1-23B

NAME AND ADDRESS: ABERDEEN-SPRINGFIELD CANAL CO
PO BOX 857
ABERDEEN ID 83210

SOURCE: SNAKE RIVER TRIBUTARY: COLUMBIA RIVER

QUANTITY: 1,172.100 CFS

PRIORITY DATE: 02/06/1895

POINT OF DIVERSION:

T01S R36E S34 SENE Lot 14 Within BINGHAM County

PURPOSE AND PERIOD OF USE:

PURPOSE OF USE	PERIOD OF USE	QUANTITY
IRRIGATION	04/01 10/31	1,172.100 CFS
~~RECHARGE FOR IRRIGATION~~	~~04/01 10/31~~	~~389.500 CFS~~

PLACE OF USE:

61,772.6 ACRES TOTAL

~~Diversion of this right for the purpose of recharge for irrigation is authorized for a maximum of 17,161.6 acres.~~

The rights listed below are limited to the irrigation of a combined total of 61,772.6 acres in a single irrigation season. Combined Right Nos.: 1-23B, 1-297, 35-2543, and 35-4246.

Place of use is within the area served by Aberdeen-Springfield Canal Company.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

~~The administration of this right is further defined and set forth in the Settlement Agreement Regarding Aberdeen-Springfield Canal Company's Basin 01 Surface Water Rights and Consolidated SRBA Subcase No. 35-2315, recorded as instrument number 563578 in the Bingham County Recorder's Office, Blackfoot, Idaho.~~

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

~~Right includes accomplished change in purpose of use pursuant to Section 42-1425, Idaho Code.~~

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT

OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	SUBCASE NOS. 01-00023B, 01-00297, 35-02543, & 35-04246
	)	
	)	**IDAHO EXHIBIT 2: AFFIDAVIT OF**
Case No. 39576	)	**MICHAEL HOLLIDAY DATED APRIL 15, 2009**
	)	

STATE OF IDAHO)
) ss.
County of Bonneville)

I, MICHAEL HOLLIDAY, being first duly sworn upon oath, deposes and states:

1. I make the following statements based on personal knowledge.

2. I am a Senior Water Resources Agent for the Idaho Department of Water Resources.

3. I prepared the recommendation for water right number 1-00023B (Aberdeen Springfield Canal Company). I prepared the recommendation consistent with IDWR's understanding of the agreement.

4. Water right number 1-00023 was decreed in the Rexburg decree for 1,250 cfs to American Falls Power & Canal Company and was later acquired by Aberdeen Springfield Canal Company (ASCC).

5. IDWR records indicate that Canyon View Irrigation District purchased 77.9 CFS of this water right in 1975. ASCC owns the remaining portion, which is now known as 1-23B.

6. The IDWR's recommendation for the quantity and purpose of use elements for water right number 1-23B is as follows:

Quantity: 1,172.100 CFS

Purpose of use:

Purpose of Use	Quantity
Irrigation	1,172.100 CFS
Recharge for Irrigation	389.5 CFS

7. IDWR recommended 389.5 CFS as the maximum amount of water authorized to be diverted for recharge purposes. It was calculated by the following equation: (GW Acres / Total Acres) * SUM WR = Maximum water available for recharge.

8. In this formula, GW Acres is the total number of acres irrigated by ASCC shareholders with only ground water. Total Acres is the total number of acres ASCC can serve with surface water. SUM WR is the total diversion rate of all ASCC's natural flow water rights from Snake River.

9. ASCC and IDWR concluded that 17,161.6 acres had been converted from surface water to ground water by ASCC shareholders.

10. ASCC and IDWR also concluded that ASCC can serve 61,772.6 acres with surface water.

11. The sum of ASCC surface water rights from the Snake River is the sum of water right numbers 1-00023B and 1-00297, which equals 1402.1 CFS

12. Thus, IDWR recommended 389.5 CFS as the maximum amount of water available for recharge purposes.

Further your Affiant sayeth naught.

DATED this 15TH day of April, 2009.

MICHAEL HOLLIDAY

SUBSCRIBED AND SWORN TO BEFORE ME this 15th day of April, 2009.

DAVID J. BARBER
Deputy Attorney General

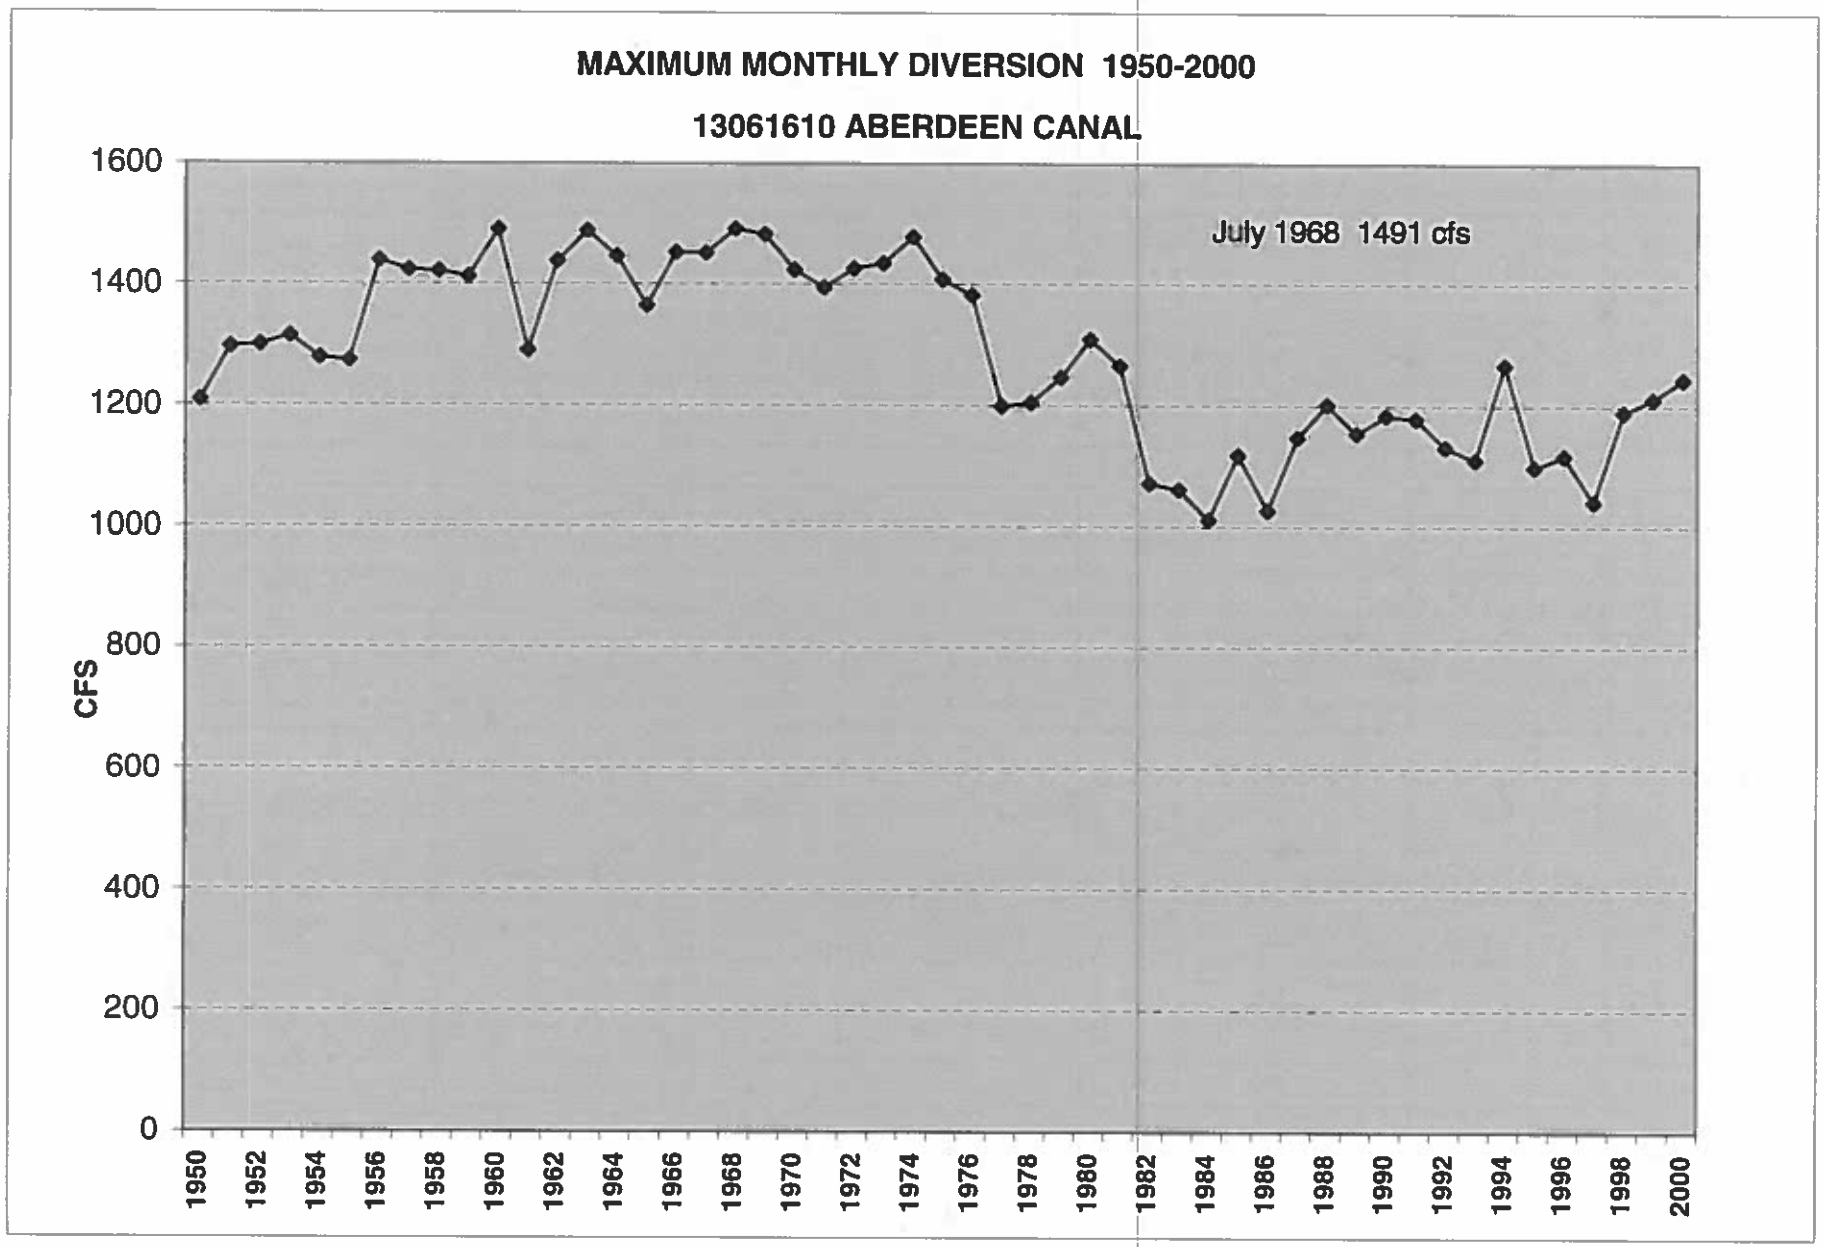

Aberdeen-Springfield Canal Company Mapping Project
Status as of April 1, 2007

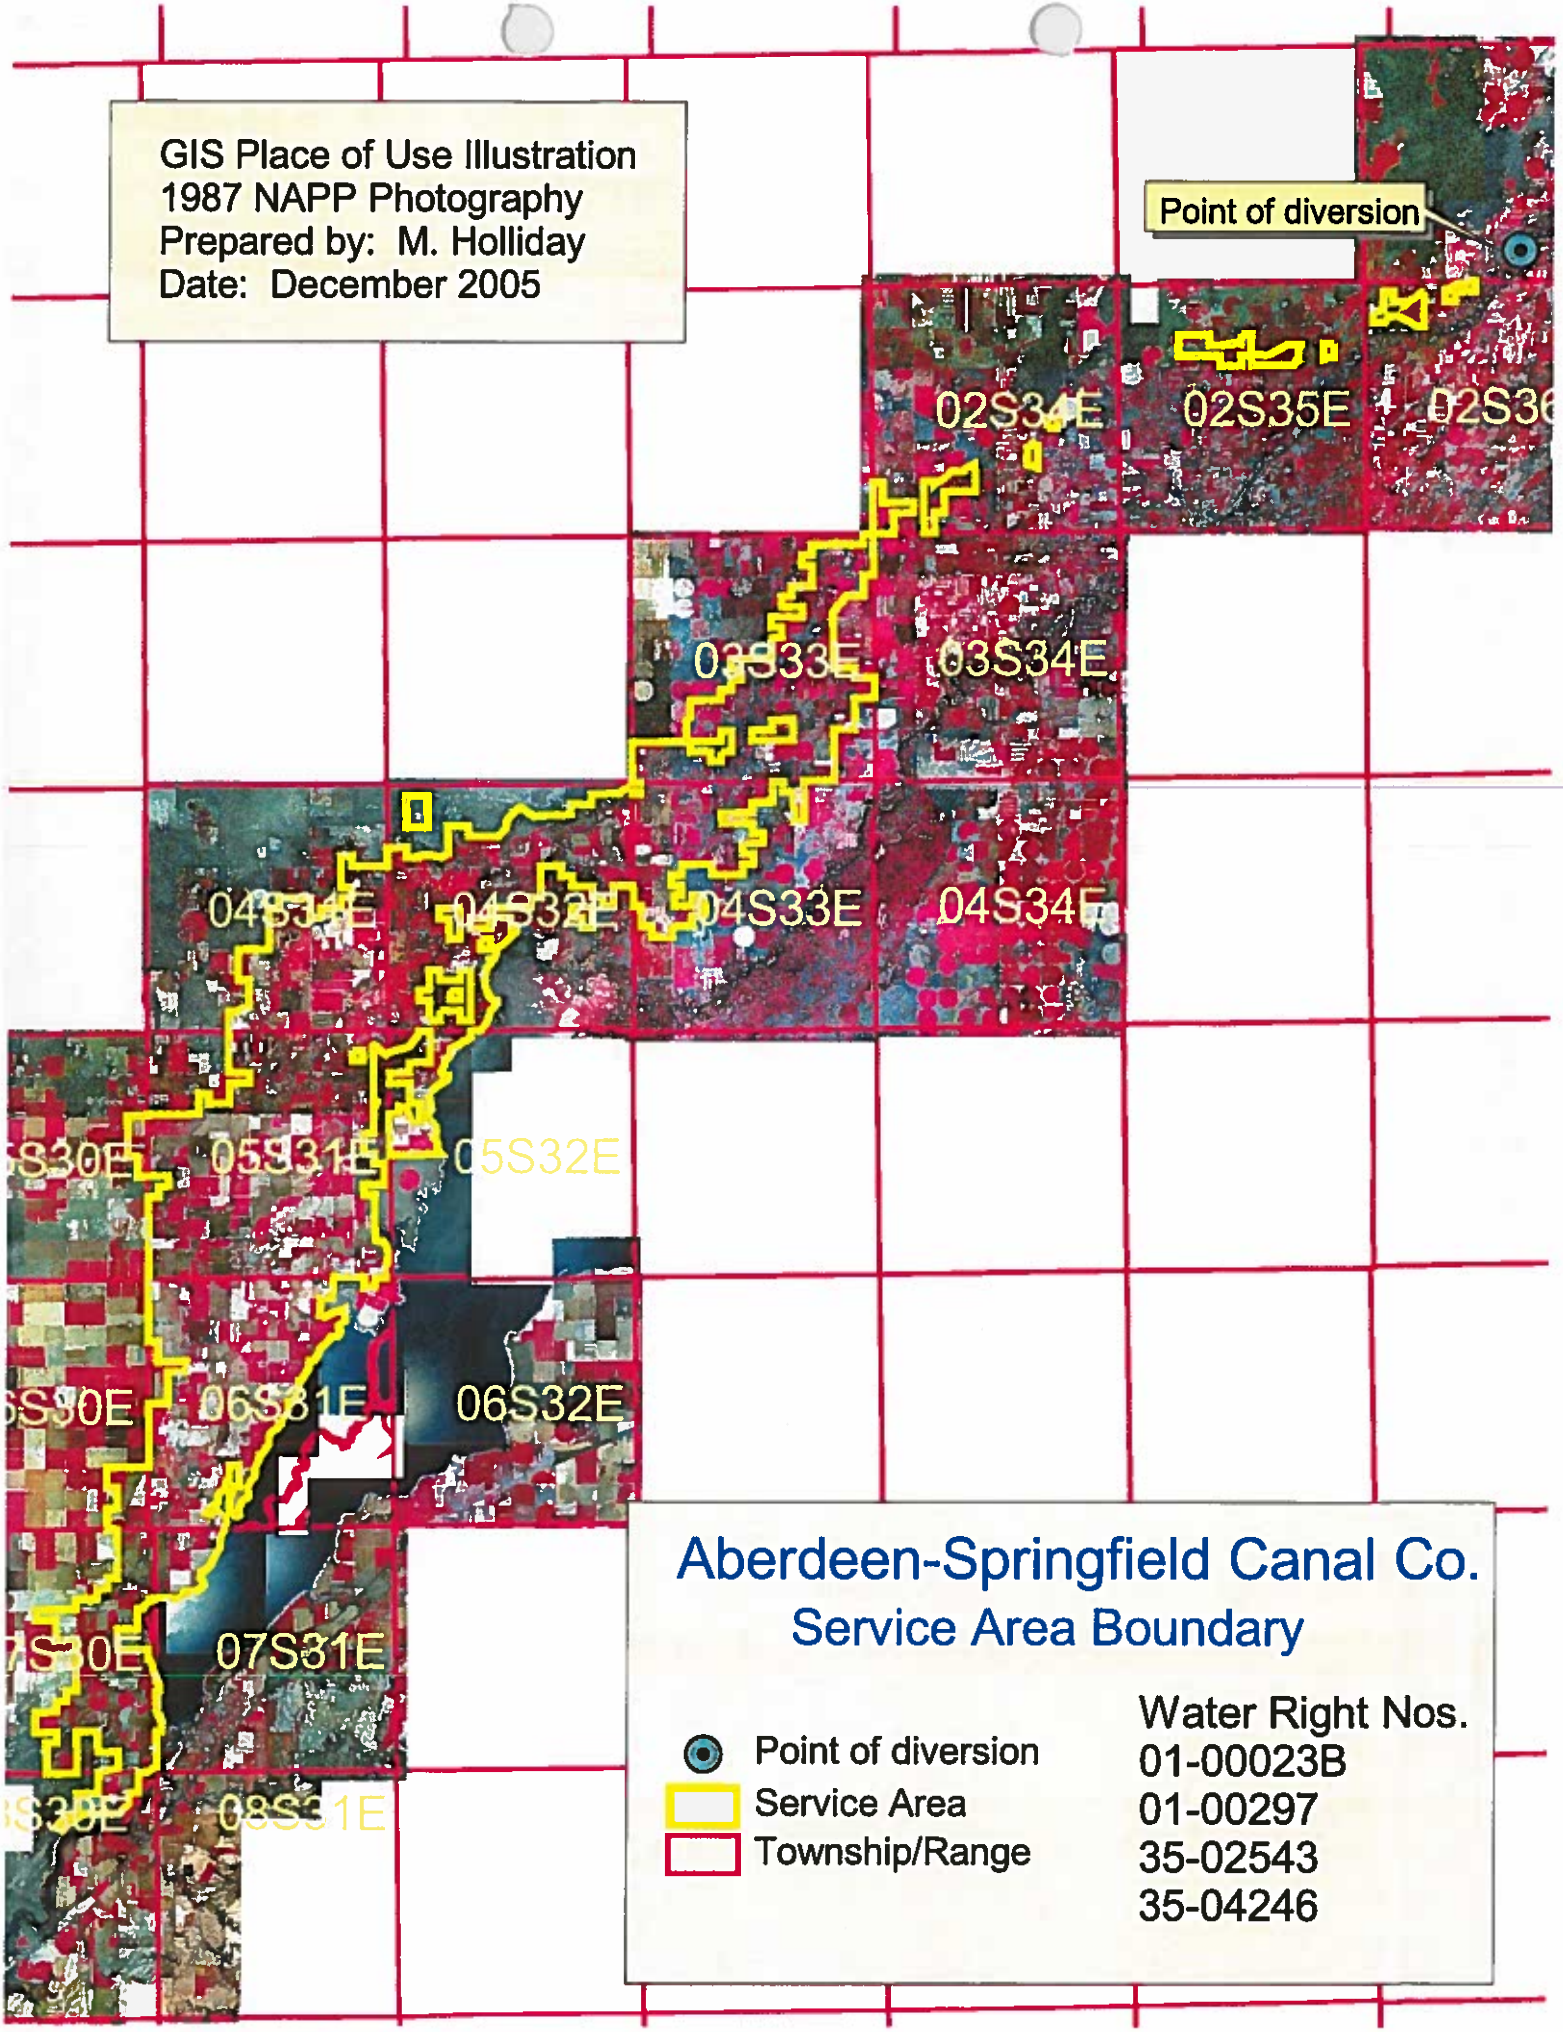

Since 1999, ASCC has been working to develop a complete and accurate GIS-based map of its system and irrigated lands. By September, 2002 an initial, quarter-quarter based map was produced and the system GPS inventory was partially completed. This initial map of quarter-quarters that had shares appurtenant was developed using legal descriptions of lands to which shares are appurtenant as recorded in ASCC's stock ledger and in some instances using copies of actual share certificates. This map was provided to the IDWR in GIS format in September, 2002 (sharesbyqq0902.shp) and contained 68,646.92 acres.

ASCC began to integrate the GIS system map into its operations and maintenance processes and in the process discovered several difficulties and problems with the initial acreage map. For example, when the quarter-quarter list of lands with shares appurtenant was compiled, government lots were recorded as quarter-quarters, consequently when this map was merged with the IDWR-provided PLSS quarter-quarter map, some lots were included and some were excluded. What's more, this quarter-quarter based map told us nothing about the total number of irrigated acres. At this point, ASCC began digitally mapping irrigated acreage using the IDWR-provided 1987 false-color infrared aerial photography and our original quarter-quarter based map. Use of this low-resolution photography resulted in the second map provided to the IDWR at their request in November, 2005 (asccgmdigitized05.shp) and contained approximately 62,421 acres. However, we were aware of some continuing problems with this version of the map as the acreage count arrived at through GIS mapping was different than that obtained through crop-survey data collected by the Company. Further, there were lands included in this map that were federally owned.

By the end of the 2006 water season, we completed our GPS system mapping effort and turned our attention back to the irrigated acreage map. We found that in using the GIS map provided to the Department in November, 2005 on a daily basis, there were several problems. Primarily, there were many lands that were not identified as irrigated based on the false-color infrared photography that were, in fact, being irrigated with water from ASCC's system. This prompted another mapping effort that included use of the 1987 false-color infrared aerial photography, the 2004 NAIP imagery, property ownership maps provided by the Bureau of Land Management and the Bureau of Reclamation, crop-survey data, headgate locations and delivery records, ground-truthing (i.e. actual site visits), ASCC's stock records, and personal interviews with ditchriders and shareholders. This effort has resulted in a map that we believe to be the most accurate representation of the lands that are authorized to receive irrigation water from ASCC. This map (ascc_srba_irrigated_acres.shp) contains 66,480.6 acres. Intersection of this map with IDWR's place of use map (idwr_wr_pou.shp) gives a total of 40,476.75 acres that have coincident ground water and ASCC rights.

All of this mapping was accomplished in-house by the Company's General Manager. The maps provided in 2002 and 2005 were prepared using ArcView 3.x and this most current map was prepared using ArcGIS 9.2.

Subject: RE: Acres serviced by Aberdeen Springfield Canal.

Ernie,

Thanks for the history lesson. Prior to my arrival at the company in 1998 very little had been done in house for the SRBA, most everything was handled by the attorney. Consequently it has been difficult for me to track what had been done and what hadn't. As I said, we assumed that when we provided the quarter-quarter map of shares in GIS format that that was all that was needed from us for the Department to calculate irrigated acreage within those quarter-quarters. I'm not sure of what my next step should be with respect to the acreage count. It would seem most expedient for me to go back to the GIS and make the irrigated acreage come out to 59,180 since that was our original claim. Barnett's report should not be taken as the final word. All of the information he included in his report came from this office and some of it was provided by tables and acreage counts that were most likely estimates. For example, in order to determine what lands were being irrigated with ground water, I simply intersected the ground water rights layer provided by the department with my quarter-quarter map showing location of shares. The overlapping acreage was then calculated and we assumed that all of this was being irrigated by ground water; to what extent those lands were being exclusively irrigated with ground water was never determined (for example with a site visit). All of those lands still have functional ASCC delivery systems in place (i.e. headgates). As for the Director's report for 35-2543 and 35-4246, the settlement agreement is supposed to correct this acreage to match our entire claimed acreage (you may recall that this is what started the whole settlement process, i.e. these rights are appurtenant to all acres that have shares appurtenant).

I don't understand why you say you don't have access to the data I gave Larsen. Mike Ciscell had the quarter-quarter layer I provided when he called me two weeks ago and used that as a base layer before he sent me the data. I'm also confused as to who was supposed to be working with me. Since the beginning of my involvement I've worked directly with Mike Ciscell and Mark Larsen and Mike Holliday and I have only spoken on the phone once or twice. In July Candice McHugh contacted our attorney and requested that we amend our claims to better reflect the settlement agreement but I don't know what the status is on that. I will speak with Ling (hopefully today) and I'll get back to you to let you know what I'm going to do with respect to the mapping. If we decide to amend or re-file we may stick with the acreage map I have provided you (with the 62K acres). Otherwise I suspect I'll be spending my holiday fixing the map to reflect the 59,180 acres.

Thanks again,

Steven T. Howser,
General Manager

Subject: RE: Acres serviced by Aberdeen Springfield Canal.

Steve,
In your response you asked several questions about the Departments process and the preliminary recommendation. In 1993, prior to the Idaho Code being amended to provide for a digital boundary description for the place of use for water delivery organizations, an agent from this office spent three months field mapping by QQ and section the delivery system of ASCC and identifying the lands receiving surface water from the canal. The mapping also identifies some lands within the service area that were irrigated soley with ground water. Though the agent did not attempt to identify lands covered by shares in ASCC and irrigated just with ground water, his work did determine there were 37,798 acres irrigated from the canal. This acreage number is reflected in the Director's Reports for 35-2543 and 35-4246 filed with the SRBA Court in 1999.

Because the recommendation for a canal company's water right needs to include the number of acres irrigated by the water delivery organization prior to 1987, water delivery organizations have been tasked with providing mapping that identifies this acreage. Michael Holliday from this office has
been working closely with the canal companies to obtain this data.

Regrettably we do not have access to the data you submitted to Mark Larsen. Keep in mind the recommendation is supposed to represent what was historical irrigated prior to 1987. Unfortunately we have no historical records from ASCC in the file addressing irrigated or accessed acres as of 1987 or earlier. The information we have that seems most reliable for preparing a recommendation is the 1993 field mapping done by the Department and the 2000 report prepared by Barnett on recovery of water by ASCC. I discussed the field mapping above. The Barnett report contains a number of referrences to acres serviced by ASCC and acres irrigated strictly from ground water that historically were irrigated with canal water. It also contains a map you prepared, dated Sept 11, 2000, showing accessed acres. The scale is quite large since the map shows the entire service area for ASCC on an 8.5 X 11 page so at best it shows the location of accessed acres and not actual irrigated acres.

The Department's recommendation for the number of acres irrigated or serviced by a water delivery organization can not exceed the number of acres reflected on the organization's claims. As you noted in your response ASCC filed on 59,180 acres. In order for more than 59,180 acres to be considered by the Department in it's recommended ASCC would first need to amend their claims to reflect the greater number of acres and second provide historical documentation supporting the larger number.

The Preliminary Director's Reports (PDR) you received are going to be modified so they reflect what we believe is the intent of the Settlement Agreement signed by ASCC and IDWR in June, 2002. Department staff and attorneys are developing the conditions to reflect the agreement and hope to have this completed in the next week or so. Once completed you will get a copy of the new PDRs for review. Be aware, the regional office has only until December 30 to make changes to the PDRs.

Consequently, your opportunity to respond to the new PDRs will be fairly short and again
conflict with the holidays.

Ernie

Subject: RE: Acres serviced by Aberdeen Springfield Canal.

Hi Ernie,

Well, you've asked for a long story, but I'll try to make it short. The original claim of 59,180 acres was made based on a paper quarter-quarter map produced by my predecessors in the early to mid 1990's. Barnett's report should have reflected our extant shares (58,982.95). Shares were originally sold at one share per acre when the project was being built (100 years ago) and the Company authorized the sale of 75,000 shares. I believe somewhere around 62,000 shares were originally sold but some were foreclosed upon by the Company during our early years and some shares were taken back by the Company when the Rockford Pumping Company sold out. Obviously over the years shares have moved around and in some cases the Board of Directors allowed exceptions so that there are some parcels that have more than one share per acre and some parcels that have less than one share per acre. Most exceptions over one share per acre were limited to 1.25 per acre. As far as I can tell, most exceptions were to accommodate lands that required more than a single share to irrigate. Also, as far as I can tell, there are only a few of these exceptions. Another potential source of error are the stock certificates themselves that may have incomplete or (more likely) broad legal descriptions of the lands to which they are appurtenant.

In 2002 I provided the Department with a digital quarter-quarter map showing all quarter-quarters that had, according to our records, shares appurtenant and the metadata contained the number of shares present in that quarter-quarter. I should say here that it was apparent when I originally gave this work to Mark Larsen that there were some mistakes, either in my data entry (most likely) or in the information on our share certificates, though we assumed any mistakes would be obvious when Mark completed the irrigated acre base map and overlaid our quarter-quarter map. At that time, Mark and Mike both told me that they would intersect my quarter-quarter data with the Department's digitized irrigated acreage and we would then have a number for our irrigated acreage. I thought we were done. Then two weeks ago Mike Ciscell calls me and asks me for a number of irrigated acres for the project. I asked him why the intersect work hadn't been done by the department and he didn't know. When he did a quick intersect while we were on the phone together he got around 45,000 acres but showed lots of quarter-quarters that had shares but no digitized irrigated acreage (note that in 5 minutes Mike came up with a number very different from the one on our preliminary director's recommendation). I told Mike that if he sent me what he had done while we were on the phone I would make an effort to digitize the remaining irrigated acreage. A couple of days later I get the Director's preliminary report in the mail (the report is dated Nov. 18, I received it Nov. 21) with the note that I have to reply by Nov. 28. So not only did I only get 5 working days notice, it was over the Thanksgiving holiday as well. Nonetheless, I began work on the layers that Mike sent me and began digitizing all the lands that are irrigated that have ASCC shares or drain agreements appurtenant. Some of this I did by editing vertices in the layer Mike sent me and some by creating new polygons. Since my original map was by quarter-quarter, I discovered some discrepancies where farms crossed quarter-quarter boundaries. In these instances I digitized the entire field if it was obvious it was all one field. I suspect that there are some mistakes here but probably very

few. In addition, the lands irrigated from drains that were part of our original claims but not part of the quarter-quarter shapefile I provided I included in this iteration. On the other hand, if there were shares identified in a particular quarter-quarter and that quarter-quarter contained less than 40 irrigated acres, I digitized the irrigated acreage from the 1987 imagery. I looked at every quarter-quarter within my system boundaries and it took me a total of 52 hours to accomplish this work.

The department has our original claim of 59,180 irrigated acres within the quarter-quarter map I provided as a shapefile and my preliminary director's recommendation lists 37,798 (I don't know where that number came from). Then I have to come up with a complete map of our irrigated acreage in 7 days in order to meet the error reporting deadline. Did you require every other water right holder in the state to provide you with digitized maps? How about quarter-quarter maps? If this requirement had been made clear to us 3 years ago we could have been working on it and had it done long, long ago.

I am reasonably confident that this most recent layer, showing 62,411 acres is an accurate reflection of lands that are irrigated either directly from ASCC canals, from ASCC system drains, or from recovered water under IC 42-228. It all comes down to what exactly the department wants from us. It is my impression that the most important thing is to actually account for all the irrigated acres. OK, I've done that and I believe I have now done it more accurately than the quarter-quarter based count in our original claim. By the way, the difference between 62,411 and 59,180 is 3,231, about 5%.

We submitted our error response to the Director's preliminary recommendation including this new acreage count on the deadline date of November 28, 2005. I am wondering how many times we have to submit an acreage count? As I understood things, we were claiming 59,180 acres within the quarter-quarter shapefile we submitted but apparently that was insufficient. I still don't understand where the 37,798 acre number came from, or why our claimed acreage of 59,180 was not on the preliminary report, or why the preliminary report made no mention of the conditions of the settlement agreement we have with the department.

I hope that answers your question as to the basis for the 62,411 acres. If you don't want to accept this acreage count then I am at a loss.

Let me know if I can help in any way. I'd sure like to put this all to bed.

Thanks,

Steve

Subject: Acres serviced by Aberdeen Springfield Canal.

Hello Steve,
Michael Ciscell forwarded your shapefile of the acres serviced

by ASCC to Michael Holliday at Eastern. We were expecting this shapefile to show us the location of the acres serviced by the canal company, both from direct irrigation and recharge for irrigation. In looking at the shapefile Michael and I found there are 62,411 acres identified by the shapefile. The claims for ASCC only list 59,180 acres and the report done in 2000 by Barnett states 58,942 shares issued at one share per irrigated acre. Consequently we are wondering what is the basis for 62,411 acres?

Ernie

Re: Aberdeen-Springfield Basin 01 claims for irrigation recharge

Dear Roger:

As you recall, on August 2, 2005, I sent a letter to you requesting that you amend the Basin 01 claims for the Aberdeen-Springfield Canal Company in the Snake River Basin Adjudication (SRBA).

The amended claims were solicited by the Idaho Department of Water Resources (IDWR) to clarify the quantity, among other things, that Aberdeen-Springfield Canal Company is claiming for recharge for irrigation. To date, IDWR has not received the amended claims from Aberdeen-Springfield Canal Company. Without amended claims, IDWR will not recommend recharge for irrigation purposes for the Aberdeen-Springfield Canal Company water rights in its Director's Report to the SRBA Court for Basin 01, Part 1. You will be receiving Preliminary Director's Reports for these water rights in the next couple of days that show how they are currently being recommended.

If you want to have recharge for irrigation recommended on these water rights, amended claims must be received at the Department's Eastern Region Office by December 2, 2005.

Very Truly Yours,

CANDICE M. McHUGH
Deputy Attorney General, IDWR

Re: Aberdeen-Springfield Basin 01 Amended Claims

Dear Roger:

This letter follows-up on the conversation we had about Aberdeen-Springfield Canal Company needing to amend its Basin 01 claims in the Snake River Basin Adjudication. The claims need to be amended to reflect what was agreed to in the *Settlement Agreement Regarding Aberdeen-Springfield Canal Company's Basin 01 Surface Water Rights and Consolidated Subcase No. 35-2315* which was executed in 2002.

The claims need to clarify the quantity that Aberdeen-Springfield is claiming for irrigation and recharge for irrigation. The claims, among other things, should also show the total number of acres, the number of acres irrigated with ground water only, the number of acres irrigated with surface water only and the number of acres served by both sources. If you have any further questions, please direct them to Ernest Carlsen or Michael Holliday at our Eastern Region Office (208) 525-7161.

Time is of the essence on these since the Department wants to get our preliminary recommendations out for these water rights as soon as possible. If you could please your draft amended claims completed by August 10, 2005, that would be helpful. Thank you in advance for your prompt attention to this matter.

Very Truly Yours,

Candice M. McHugh
Deputy Attorney General, IDWR

Certificate of Water Right
Transferred Right No. 323.

This is to certify that the American Falls Canal Securities Company, of Salt Lake City, State of Utah, has a right to the use of the waters of Snake River, for irrigation and domestic use, and that said right has been confirmed by decree of the District Court of the Sixth Judicial District of the State of Idaho, in and for the County of Fremont, in the case entitled Rexburg Irrigation Company, et al, plaintiff, vs. Teton Irrigation Canal Company, et al, defendant, J. M. Stevens, District Judge, wherein 1250 second feet of the waters of Snake River, in Water District #36, were decreed to the American Falls Canal & Power Company, for the irrigation of the Northwest quarter of Northwest quarter (NW¼NW¼) Section 27, Township 4 South, Range 31 East of Boise Meridian, together with other lands, with date of priority of February 6, 1895; that said decree has been entered at Boise, Idaho, in the records of the Department of Reclamation of the State of Idaho, in Book 3 of Decrees, at page 450; that, upon the application of the American Falls Canal Securities Company, by its president, F. A. Sweet, for transfer of water right, made before the Commissioner of Reclamation of the State of Idaho, and the said application having been granted, the right to the use of 35 shares (20 inches) of the waters of Snake River upon the lands above described is hereby abandoned and a description of the lands to be irrigated under such right and to which the water right hereby confirmed shall by this certificate become appurtenant, for irrigation and domestic purposes, is shown in the following table, limited at any given time to an amount actually needed and beneficially used for such purposes and shall not exceed the following amount, to-wit:

35 shares (20 inches), dated February 6, 1895;

	NE¼				NW¼				SW¼				SE¼

In the Matter of the Application of the American Falls Canal Securities Company for Transfer of Water Right; Water Dist. #36, Case #109.

ORDER GRANTING TRANSFER

WHEREAS, the matter of the application of the American Falls Canal Securities Company for transfer of water right came regularly on for hearing on the 30th day of September, 1922, at the Department of Reclamation of the State of Idaho, at Boise, pursuant to the published notice; and,

WHEREAS, no one appeared at the hearing, either in person or by affidavit, to protest the said application for transfer, and the evidence on file in the Department of Reclamation of the State of Idaho in support of the said application showing a greater duty of water would result by making the transfer set out and described in said application, and that no one would be injured by reason of making such transfer;

IT IS, THEREFORE, Hereby ordered that the said application of the American Falls Canal Securities Company be and the same is hereby granted, and that a certificate of transfer be issued in the usual manner prescribed by law.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the official seal of this Department, at Boise, Idaho, this 14th day of October, 1922.

Application for Transfer of Water Right

STATE OF ~~Idaho~~, Utah,
County of Salt Lake, } ss.

E. A. Sweet, being first duly sworn, deposes and says:

That his name is E. A. Sweet; that he is the President of American Falls Canal Securities Co., a Utah corporation entitled to do business and hold ~~of the United States and of the State of Idaho, and that his postoffice address is~~ property in the State of Idaho; that the post office address of said corporation is 307 Kearns Building, Salt Lake City, Utah.
~~said~~ corporation

That ~~he~~ is the owner and using a certain water right, bearing date of priority of Feb. 6, 1905, for 1250 cubic feet per second of the waters of Snake River County of Bingham, State of Idaho, decreed to American Falls Canal & Power Co. by decree of Judge, J. H. Stevens of the Sixth Judicial District of the State of Idaho, in and for the County of Fremont, in the case of Enterprise Irrigation Co. et al vs. Teton Irr. Canal Co. et al., said decree bearing date of December 10, 1910 (or obtained by virtue of License No._____, issued by the State Engineer of the State of Idaho, dated _____, 19____, bearing date of priority of _____, 19____) for the purpose of irrigating the following described lands situate, lying and being in Water District No. 36 in the County of Bingham and State of Idaho, to-wit: The Northwest quarter of the Northwest quarter of Section 27, Township 4 South, Range 31 East, Boise Meridian, together with other lands.

_____ and is the person (or representative of the corporation) to whom such right so issued, or has become the owner thereof in the following manner, i. e. purchase of assets of American Falls Canal & Power Company, as per abstract of title of said water right hereto attached and made a part of this statement:

That said waters are now diverted from said stream in the Southwest quarter of Section 34, Township 1 South, Range 36 East, _____, B. M., and conducted to the above described lands through Aberdeen Springfield Canal. as per map ~~herewith and of this affidavit made a part~~ on file in the office of the Commissioner of Reclamation of Idaho;

That affiant and petitioner desires to abandon the use of 35 Miners ~~cubic feet per second~~ of said water upon the above described land, and to convey and use same upon the following tract, situate, lying and being in the County of Bingham and State of Idaho, to-wit:
The Southeast quarter of the Southwest quarter of Section 6, Township 4 south, range 32 East, Boise Meridian.

That his reasons for desiring to make such transfer are as follows: That the lands to which it is desired to transfer said water were inadvertently omitted from the decree above mentioned, although said lands can be irrigated by gravity from the Aberdeen Springfield Canal; whereas the lands from which it is desired to transfer said water are all too high for such ~~irrigation.~~

SCANNED

Case 109 Lit 30 -

That he intends to divert and convey said 35 shares ~~second-feet~~ of water to the tract of land last above described in the following manner, to-wit: through a gravity farm lateral having standard diversion and measuring weir, as required by the Aberdeen Springfield Canal Company.

as set forth upon the map herewith; and that no one will be injured by such transfer.

WHEREFOR, Affiant and Petitioner prays that the Commissioner of Reclamation of the State of Idaho issue to him the proper certificate authorizing such transfer, in accordance with the provisions of Section 5582 of the Idaho Compiled Statutes.

AMERICAN FALLS CANAL SECURITIES COMPANY,

By [signature] Applicant.
President.

Subscribed and sworn to before me this fifteenth day of August A. D. 1922.

Warren Stratton
Notary Public residing at Salt Lake City, Utah.

APPLICANT WILL ANSWER THE FOLLOWING QUESTIONS:

From what stream is the water diverted? Snake River

Where is the diversion point located? In SW 1/4 Sec.34. T.1.S. R.36.E., B.M.

Through what ditch is it now conducted? Aberdeen Springfield Canal.

How much land is now irrigated by the water sought to be transferred? None

Give the description: Northwest quarter of Northwest quarter of Section 37, T. 4. S., R. 31. E., B.M.

What is the total amount of water in inches, or second feet, dedicated to said land? 3-1/2 acre feet per irrigating season.

What kind of crops are being raised? None

How much water per acre is now required to irrigate said land? None.

What will be the effect on the land now irrigated, if the use of water on it is discontinued? None. Land is all too high to be watered by gravity.

Give location of new point of diversion, if change is to be made See maps

Through what ditch will it be conducted after transfer? Aberdeen Spr.Canal and farm lateral.

How much water will be required per acre to irrigate the land to which this water is transferred? 3-1/2 acre feet per irrigating season.

Do you claim any other water right for the land from which you seek to abandon the use of this water? No.

If so, give amount, date and source. None.

Is there now any other water right for the land to which you seek to make this transfer? If so, give amount, date and source. No.

Signed AMERICAN FALLS CANAL SECURITIES CO.

Re – Transfer of Water Rights of American Falls Canal and Power Co., of Aberdeen, Idaho. } Report of Examining Engineer.

On Sept. 13th, 1915, the date set for the hearing of the above-named Company, relative to the transfer of water-right, no one appeared in protest to said transfer.

The lands, comprising 3760 acres, from which the transfer of water is asked, was examined by me on the 14th and 15th days of Sept., 1915 —— they are situated in Tp. 3 S., Rg. 32 E., B. M., and all are too high to receive beneficial use of said water from the Canal System.

The lands, comprising 3713.3 acres, to which the transfer of water right is asked, are all desert in character, requiring water for their reclamation, and have been watered by gravity from the Canal system.

The proposed transfer will have no effect upon other rights depending upon the same source of supply.

MICROFILMED SCANNED JUL 18 2005

any no other party or parties will be injured by the said transfer. The same canal and laterals as now constructed and in use, will deliver the water.

The lands, effected by this transfer, were examined by me on the 14th and 15 days of Sept, 1915, and are situated in Township 2 South, Range 34 and 35 East; Township 3 South, Range 33 and 34 East; Township 4 South, Range 31, 32 and 33 East; Township 5 South, Range 31 and 32 East; Township 6 South, Range 30 East; Township 7 South, Range 30 and 31 East, and Township 8 South, Range 30 East, all of Boise Base and Meridian.

RE: CHANGE IN WATER RIGHT OWNERSHIP FOR 01-23

Dear Mr. Parsons:

The request for Change in Ownership for a portion of the above-referenced Notice(s) of Claim has been processed with the new Notice(s) reflecting you as one of the claimants.

Since the Change in Ownership involved just a portion of the Notice(s) of Claim, the right was split as follows:

01-23A, 77.9 CFS, SOUTHWEST IRRIGATION DISTRICT
01-23B, 1172.1 CFS, ABERDEEN SPRINGFIELD CANAL CO.

Enclosed for your records is a typed Notice(s) reflecting your portion of the right. Review the Notice(s) and if you have other corrections or questions, please contact this office.

Respectfully submitted,

Jennifer Crabtree
Technical Records Specialist

cc: Aberdeen Springfield Canal Co.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
NOTICE OF CHANGE IN WATER RIGHT OWNERSHIP

Please print or type. Attach pages with additional information. Instructions are included at the end of this form. Incomplete forms will be returned.

Please list the water right number(s) and/or adjudication claim number(s) (if any) for each water right to be changed. List just the adjudication claim number if there is no corresponding water right record on file with the department. Indicate, by checking in the space provided (under the "split" heading), if the change in ownership is limited to a portion of a water right in which case division of the existing water right or adjudication claim record will be required.

Water Right No(s).	Transfer ~~Adjudication~~ Claim No(s).	Split	Water Right No(s).	Adjudication Claim No(s).	Split
01-00023	4859	___			___
		___			___
		___			___
		___			___
		___			___

The following **REQUIRED** information must be submitted with this form:

A. The appropriate **FILING FEE.** See instructions for fee amounts.

B. A copy of the most recent **DEED, TITLE POLICY, CONTRACT OF SALE** or other legal document indicating your ownership of the property and water right(s) or claim(s) in question, **WITH ATTACHED LEGAL DESCRIPTION.**

C. Either of the following (if necessary to clarify division of water rights or other complex property descriptions):
PLAT OF PROPERTY or SURVEY MAP clearly showing the location of the point(s) of diversion and place of use of your water right(s) and/or adjudication claim(s) (these are usually attached to your deed or on file with the county).

OR

If your water right(s) and/or adjudication claim(s) is for ten or more acres of irrigation, you must submit a USDA Farm Service Agency **AERIAL PHOTO** with the irrigated acres outlined and point(s) of diversion clearly marked. The AERIAL PHOTO should be submitted in place of the PLAT OF PROPERTY or SURVEY MAP.

Name and Address of Former Owner/Claimant(s): Canyon View Irrigation Company, Inc.

New Owner/Claimant(s): Southwest Irrigation District

TRANSFER NO. 4859
WATER RIGHT NO. 01-00023

RECEIVED
MAR 31 1997
Department of Water Resources
Southern Region

This is to certify that: SOUTHWEST IRRIGATION DISTRICT
PO BOX 668
BURLEY ID 83318

has requested a change to the above captioned water right(s). This change in water right(s) is authorized pursuant to the provisions of Section 42-222, Idaho Code, provided the conditions listed below are met.

BENEFICIAL USE	PERIOD OF USE	DIVERSION RATE	ANNUAL VOLUME
IRRIGATION	04/01 to 10/31	77.90 CFS	6725.0 AF

SOURCE	TRIBUTARY OF
SNAKE RIVER	COLUMBIA RIVER

Priority: 02/06/1895

LOCATION OF POINT(S) OF DIVERSION: Lot 7(SESW), Sec. 1, Township 09S, Range 25E
CASSIA County
Lot 5(SWNW), Sec. 28, Township 10S, Range 21E
SESE , Sec. 29, Township 10S, Range 21E
TWIN FALLS County

PLACE OF USE: See Remarks

CONDITIONS OF APPROVAL AND REMARKS

1. The change authorized by this transfer shall be accomplished within one (1) year of the date of this approval.
2. Use of Water Right No. 01-00023 pursuant to approved Transfer No. 4859 shall be subordinate to all existing water rights diverting from Snake River in the American Falls to Milner reach except to the extent that water available under this right at the Aberdeen Springfield Canal diversion is specifically identified and shown to be delivered in the American Falls-Milner reach.
3. The annual volume diverted under this right is limited to 6725 acre feet at the points of diversion approved under Transfer No. 4859 except that any water diverted during flood control operations that result in a release of water past Milner Dam shall not be charged against the seasonal volume limitation.

TRANSFER NO. 4859
WATER RIGHT NO. 01-00023

CONDITIONS OF APPROVAL AND REMARKS

4. Diversion and use of water under Right No. 01-00023 shall be regulated by the watermaster of State Water District 01 (Upper Snake River).
5. Approval of Transfer No. 4859 does not grant any easement or right-of-way to use diversion and delivery facilities owned by persons other than the right owner.
6. Water diverted under this right shall be used within the boundaries of and applied to the lands of the Southwest Irrigation District.
7. The Director of the Department of Water Resources retains jurisdiction to determine and assess a delivery loss to prevent injury to existing water rights in Water District 01.
8. Failure to comply with the conditions of this transfer is cause for the Director to issue an order to show cause why the approval of the transfer should not be rescinded and to take such other action as authorized by law to prevent unauthorized use of water.
9. Water used under this transfer when combined with all other right shall provide no more than 0.02 cubic feet per second per acre no more than 4.0 acre feet per acre per year for the lands herein authorized to be irrigated.

Dated this 21st day of MARCH, 1997.

RE: **Settlement Agreement between Aberdeen-Springfield Canal Company and Idaho Department of Water Resources on Basin 35 "Recovered" Water" Subcases**

Dear Susan:

The Board of Directors of Aberdeen-Springfield Canal Company has agreed, in principal, to the proposed Settlement Agreement recently sent to me from your office. There are however some provisions which need some clarification.

In determining the amount credited for mitigation, there is no dispute as to the method by which the amount of surface water diverted each year into the Aberdeen-Springfield Canal Company system is measured or the source of the measured returns from the wasteways and drains of ASCC to the Snake River. Our concern is the formula for arriving at the amount of water that is diverted that is actually used for surface irrigation, and the amount that is diverted for ground water recharge. The formula in the agreement provides that the total acre-feet diverted is one inch per acre times the number of days in the irrigation season. This part of the equation needs to be revisited, as our concern is determining the amount of recharge provided during drought periods. For instance, in the year 2001, Aberdeen-Springfield Canal Company diverted water for only 151 days. If it had delivered water for the entire 214 days for the total 44,137.25 acres irrigated with surface water (acres include lands dry-fallowed in 2001), and that figure is multiplied by the factor of .66, the amount of water applicable to crops would be 246,864 acre-feet. At the same time, in years such as 1993, only 246,425 acre-feet was diverted into the entire system. Therefore, using the formula would result in there being no ground water recharge in 1993, even though it is clear that the canal company has no present ability to avoid substantial losses in its system. The factor of .66 is accurate so long as we adjust the formula to represent the actual days that water is diverted. For instance, if we consider a short season of 150 days, the formula using one-inch per acre per day for the 150 days, multiplied by the factor .66, would show a crop use from surface irrigation of 173,035 acre-feet. If you deducted that amount from the 246,425 acre-feet diverted in 1993 (net),

there would be 73,390 acre-feet of ground water recharge available for mitigation.

Although we did not discuss these items, I feel they need to be discussed before we reach a final document ready to be signed. If Aberdeen-Springfield Canal Company could spread its water supply to insure the delivery of water for the full irrigation season of 214 days, then it is likely that there would be no recharge to the aquifer in dry years. Unfortunately, in dry years, it is not the recharge to the aquifer that suffers, but the surface water provided to the lands irrigated with such water within the canal company area. I would therefore assume that it was contemplated that the number of days of irrigation would vary from year to year, and the actual days of water diversion would be used in the formula, not the irrigation season.

Another concern is the method by which we can determine the mitigation available each year before the end of the year. To avoid this problem, perhaps we should provide that the mitigation credit accrued in one year may be applied to the next year's depletions from ground water diversions. Otherwise, it will be impossible to determine the mitigation credits available in the year of depletion. At the same time, we do not expect credits to carry over for more than one year. It seems that it is better to have recharge the year before the year of depletion for mitigation than to provide mitigation in the year following the depletion. This will also allow the ground water diverters to plan their use after they know their use will be fully mitigated by the previous year's recharge.

I do not believe there are other concerns. The two ground water rights held by Aberdeen-Springfield Canal Company show a total number of acres within which the lands under these rights may be irrigated with these rights. I assume that we will resolve our objection to the acres recommended when we have determined the total irrigable acres within Aberdeen-Springfield Canal Company to which shares are appurtenant.

Very truly yours,

Roger D. Ling

Re: Settlement Agreement between Aberdeen-Springfield Canal Company and Idaho Department of Water Resources on Basin 35 "Recovered Water" Subcases

Dear Roger:

This letter is written in response to your letter to me dated December 31, 2001. This response incorporates the information on acreage counts that we requested of you, and that you hand-delivered to Dave Tuthill at the Water District 01 meeting last month.

I believe the best method to respond to your question concerning the "appropriate factor (less than 1)" contained in paragraph E of the proposed Settlement Agreement is to apply the formula using actual numbers provided by your client. Accordingly, please find enclosed a computation of this factor as applied to the Aberdeen Springfield Canal Company. Note that the numbers used in the computation are based on the estimates of acres irrigated from surface water, ground water, and a combination of the two that you supplied. We recognize that this number will change, but the numbers provided do allow for a sample computation.

If you have any further questions please contact either Dave Tuthill or me at (208) 327-7900.

Sincerely,

Susan Hamlin Nygard
Deputy Attorney General, IDWR

MEMORANDUM

TO: Susan Hamlin-Nygard

FROM: Dave Tuthill

DATE: April 12, 2002

RE: Computations for Aberdeen-Springfield Canal Company

The purpose of this memorandum is to provide a sample computation for Item 2.E of the "Settlement Agreement Regarding Aberdeen-Springfield Canal Company's Basin 01 Surface Water Rights and Consolidated SRBA Subcase No. 35-2315." This item specifies the technique of computing the amount credited for mitigation.

The Adjudication Bureau conducted an investigation of crop types in Bingham County as a mechanism for computing the anticipated consumptive irrigation requirement for irrigated lands within the Aberdeen-Springfield Canal Company (ASCC). This investigation, combined with other information assembled in Attachments 1 through 8, results in the assessment that the average annual consumptive irrigation requirement in the ASCC, based on the crop mix found in Bingham County, is estimated to be 1.86 acre-feet per acre.

Item 2.E computations are demonstrated in the Excel spreadsheet identified as Attachment 10, based on the estimated irrigated acres provided by ASCC (Attachment 9). Note that for the estimated values provided, the ASCC diversions provide sufficient mitigation water for the estimated number of acres eligible for mitigation credit under the Agreement.

Attachments

Attachment 1: Crop type information as described in the attached memo dated February 14, 2002

Attachment 2: Estimated Consumptive Use and Consumptive Irrigation Requirement, Aberdeen Experimental Station (Allen and Brockway, 1983)

DATE: February 14, 2002

RE: USDA Ag Statistics Information for Bingham County

Pursuant to a telephone call on this date, I was advised by Mr. Bob Tratz of the USDA Ag Statistics Center in Boise that the following tabulations have been computed for crops planted in Bingham County for the year 2000. He stated that his information does not refine the statistics to a unit smaller than by county

Crop Type	1000's of Acres	Percent of Total
Alfalfa	52.3	17.1
Barley	23	7.5
Corn	2	0.6
Oats	1.9	0.6
Potatoes	67.5	22.0
Spring wheat	65	21.2
Sugar beets	23.5	7.7
Winter wheat	71	23.2
Total	306.2	99.9

For purposes of estimating the drop mix in the Aberdeen Springfield Canal Company area, use this crop mix for a first cut. Additional refinement of crop mix computation can be requested of the canal company if needed in the future

Prepared by Mr. Steve Howser, Manager of ASCC

These are preliminary figures, subject to revision.

ATTACHMENT 9

Mitigation Credit for Aberdeen Springfield Canal Company

Sample -- Using Estimated Data Prepared by D. Tuthill April 12, 2002

Agreement Category	Explanation	Value	Units	Multiplied by	Result	Units	Notes
1	Amount of surface water diverted	316,400	Acre-feet		316,400	Acre-feet	Average annual diversion
2	Measured returns to the Snake River	8,475	Acre-feet		8,475	Acre-feet	Estimate
3	Number of acres irrigated with surface water*	38,218	Acres	8.474	323,859	Acre-feet	**
	Factor representing variation in monthly diversions***	0.66	Multiplier	Category 3	213,321	Acre-Feet	

* Note: Consists of 35,540 acres irrigated with surface water and 2,678 ares irrigated with surface and ground water per Attachment 9

** Note: .02 cfs/acre *1.98 Acre-feet/ cfs day *214 days/annum = 8.474 This is the factor used to compute acre-feet per acre for a season of diversion.

*** Compute as (See Attachment 7)

Month	Avg Div in 1000s of AF
Apr	16.5
May	50.6
Jun	63.1
Jul	68.6
Aug	53.9
Sep	42.9
Oct	20.7
Average	45.2

Factor = avg/max = 0.66

Computation	Category	Result	Units	Action	Subtotal
	1	316,400	Acre-feet		316,400
	2	8,475	Acre-feet	Subtract	307,925
	3	213,321	Acre-feet	Subtract	94,604

Result: Amount of water available for mitigation = 94,604 Acre-feet

Restatement of computation: 316,400 minus 8,475 minus (.02 times 1.98 times 214 times 0.66 times 38,218)
Equals 94,604 Acre-feet

Acres requiring mitigation: 15,108 (per attachment 9)

Acre-feet of Mitigation required per acre: 1.86 (see memo to Susan Hamlin dated 4/12/2002)

Mitigation required (acres times Acre-feet per acre): 28,101 Acre-feet

Assessment: Mitigation provided is sufficient for the eligible acres if this number is less than the amount available for mitigation

Re Settlement Agreement Between Aberdeen Springfield Canal Company and Idaho Department of Water Resources on Basin 35, Recovered Water Subcases

Dear Roger:

This is in response to your letter to me dated April 26, 2002. We explained to you on the phone May 6, 2002, the computation of the mitigation credit equation. I need to clarify two items. First, your letter to me sought to have the number of days in the irrigation season to be variable based upon the actual number of days of irrigation as opposed to the standard season in the area of 214 days. As we indicated in our telephone conversation with you, the factor already accounts for the Canal Company not diverting for the entire 214 days. Thus, the factor will change from year to year Attached to this letter is a second example of the computation using the 1993 data. You will notice that the data shows the factor to be 0.57 and the amount of water available for mitigation credit is 78,759 acre feet. Secondly, I think you will find by using this formula with different years that carryover of mitigation credit is not necessary.

Please review the attachment and see if you have further questions I think by comparing this example with the example that we sent to you in the last letter, you will see that using various data from drought years to abundant water years, there will still be enough mitigation credit available to your client. If you have questions, please don't hesitate to contact either Dave Tuthill or me.

Very truly yours,

Susan Hamlin Nygard

ASCC vs. IDWR - Shareholder Claims to Ground Water

A & B Irrigation District - Enlargement Claim Nos.
35-15127B, 36-15193B, 36-15194B, 35-15195B, 35-15196B

Dear Special Master Dolan:

In regard to the above subcases, I felt that it may be helpful to you to understand our present position on those matters. As to the ASCC Objections in the consolidated subcases relating to ground water rights of shareholders, we have reached a tentative agreement with the Idaho Department of Water Resources by which the objections of ASCC can be resolved. As soon as the agreement has been finalized with IDWR, we will file a formal Motion to Stay the proceedings on these Objections, pending a resolution of the surface water rights of Aberdeen-Springfield Canal Company, which will involve the settlement of the objections to shareholder ground water rights. We should be in a position to file that formal Motion upon my return from a short vacation, sometime after January 22.

The second matter on which I want to advise you is the enlargement claims of A & B Irrigation District. We have reached a tentative settlement on the terms of the stipulation to resolve these claims while preserving the right of A & B Irrigation District to rule on those issues that were adverse to A & B Irrigation District in the Special Master's Order Granting Respondent's Motion for Partial Summary Judgment. Again, this stipulation should be prepared and ready to submit to you shortly after my

return. I hope that this will not cause any undue burdens upon the Court.

Very truly yours,

RE: Settlement Agreement between Aberdeen-Springfield Canal Company and the Idaho Department of Water Resources

Dear Susan:

As we discussed on the telephone, I am circulating the Settlement Agreement to obtain approval from my clients to sign the same. I am recommending that we sign the agreement, but feel that there is still one issue that has not been resolved and that issue could affect the benefits obtained from the agreement. The issue is the "appropriate factor (less than 1)" contained in paragraph E that will be used to determine the volume of water credited for mitigation in each year, and the resulting mitigation credits. Perhaps you can give me some enlightenment on this issue. In applying the formula to factors that we generally know (even though the surface irrigated lands have not been clearly identified as of 1987), it appears that the number by which the appropriate factor must be multiplied by is generally greater than the total diversions less the waste and spills back to the Snake River.

To protect the position of the parties, I propose that I write to Special Master Dolan, advising him that we have a proposed Settlement Agreement between Aberdeen-Springfield Canal Company and the Idaho Department of Water Resources and that as soon as the Settlement Agreement has been finalized, we will be asking for a stay of all proceedings in these consolidated subcases until the surface water rights in Basin 01 of Aberdeen-Springfield Canal Company have been resolved, which rights are an integral part of the Settlement Agreement. I do not believe that it is necessary

to advise the Special Master of anything more in regard to the agreement at this time. I would appreciate your views on the matter.

Very truly yours,

Roger D. Ling

RE: **Settlement Proposal for Consolidated Subcase No. 35-2315 - Aberdeen-Springfield Canal Company**

Dear Karl:

I would like to confirm in writing that Aberdeen-Springfield Canal Company is willing to pursue a settlement based upon your offer of settlement in the above matter. The only area that may need further discussion between the parties is the formula for determining mitigation credits. In your example, you use the rate of diversion of one inch per acre, when in fact ASCC is barely able to divert one inch per acre at the river diversion, and is not required to provide one inch per acre to the shareholders at their headgate. Of course, the most controlling number in the formula will be the factor used to account for times when less than maximum is being diverted. As we discussed on the phone, this should be a matter than can be easily resolved.

Very truly yours,

Roger D. Ling

Re: Offer of Settlement for Consolidated Subcase 35-2315 Pursuant to I.R.E. 408
Further Clarification of Certain Provisions

Dear Roger:

In response to your letter dated November 13, 2001, I am writing to provide further clarification of several provisions of the settlement offer conveyed to you by letter dated November 8, 2001. Regarding your concern that all that can be offered at this time is a commitment to recommend the surface water rights held by the Aberdeen-Springfield Canal Company (the "Canal Company") in accordance with the proposed settlement agreement, I agree with you that the Canal Company's objections should be stayed to provide the Canal Company a fall-back position if the settlement is not acceptable to the SRBA District Court. Both IDWR and the state would support the Canal Company's request for a stay from the SRBA District Court, and we would provide the court with the appropriate level of explanation as needed.

Concerning the use of stored water for "ground water recharge for irrigation," I view this use as being for irrigation. Preserving the use of stored water for irrigation is specifically why I crafted the terminology for the purpose of use as being "ground water recharge for irrigation." IDWR will consider this use as a valid irrigation use under the existing licenses and subsequent decreed right of the U. S. Bureau of Reclamation.

Regarding the ability of a shareholder in the Canal Company who is currently using ground water but may want to use surface water directly in the future, this could be provided for by using a sort of "permissible purpose of use" that would be somewhat analogous to a "permissible place of use." IDWR would recommend all of the acreage of lands to which the Canal Company's surface water rights are appurtenant and irrigated by shareholders using either surface water or ground water, as of 1987, as being authorized to divert and use surface water under the Canal Company's water rights. The diversion rate recommended by IDWR would allow either direct surface water irrigation of as much as all of the acreage, or for direct surface

water irrigation of as little as the lands under surface water irrigation in 1987 together with ground water recharge for irrigation. The allocation of the diversion rate between the minimum amount of direct surface water irrigation and the maximum amount for ground water recharge for irrigation, fixed as of 1987 through an accomplished transfer, would be as described in provision no. 4 of the settlement outlined in the November 8 settlement letter from myself and Clive Strong.

Lastly, in regards to the mitigation credits for ground water recharge, your assumption is correct that mitigation credits would accrue only to the extent that surface water is diverted for recharge in a given year and would not carry over to future years. This is in part due to the fact that ground water level data for the years 1980 and 2001 show no significant mounding under the Aberdeen-Springfield Canal. In terms of accounting, we will work with you and the Canal Company to develop the details of a practical methodology that is adequate but not unduly burdensome. Conceptually, mitigation credits would accrue for surface water diverted for recharge that is beyond the amount needed for application to acreage irrigated with surface water. The amount credited for mitigation would be calculated as: (1) the amount of surface water diverted; (2) less the measured returns to the Snake River through wasteways or drains; (3) less 0.02 cfs multiplied by the number of acres irrigated with surface water (including those acres using supplemental ground water), multiplied by 1.98 acre feet/cfs/day, multiplied by 214 days (the irrigation season), and multiplied by an appropriate factor (less than 1) to account for the Canal Company not constantly diverting the maximum amount needed for surface water irrigation throughout the entire irrigation season.

Please call me if you have further questions or if further clarification of the above is needed.

Sincerely,

Karl J. Dreher

RE: **Settlement Offer for Consolidated Subcase No. 35-2315**

Dear Karl:

I have carefully considered the offer of settlement of November 8, 2001, submitted by yourself and Clive Strong, Chief of the Natural Resource Division of the Idaho Attorney General's Office. I intend to submit that proposal to the Board of Directors of Aberdeen-Springfield Canal Company for their consideration as soon as possible, and hopefully prior to November 20. Meanwhile, I have several questions that need further discussion, hopefully before the Special Meeting of the Board of Directors of Aberdeen-Springfield Canal Company.

Under paragraphs 1. and 2. of the offer of settlement, some provisions will be recommended to the SRBA Court by the Director. I understand that all that can be offered at this time is a commitment to recommend the provisions of the settlement agreement. Under paragraph 1. of the offer of settlement, my concern is, what would happen to the Objections to the ground water rights that have been filed in the event the recommendations are not accepted by the SRBA Court for whatever reason? It seems that we should in some way stay the Objections until the settlement agreement has been accepted, which would give ASCC the fall-back position of pursuing its Objections if for some reason the settlement is not acceptable to the Court. Any suggestions you or Clive may have would be appreciated.

As to paragraph 2., do you foresee any concern over the use of stored water for ground water recharge for irrigation? As you know, the recognized use of the storage rights of the Bureau of Reclamation from which ASCC receives stored water under its spaceholder agreement is limited to irrigation. It seems to me that "recharge for irrigation" is identical to a diversion for "irrigation." I would like your assurance that you will support that interpretation in that

recharge for irrigation is a permissible use of the stored water under the existing licenses of the Bureau of Reclamation.

As to paragraph 3. of the offer of settlement, we have not provided a means by which a shareholder now using ground water may prefer to receive surface water from ASCC for the irrigation of the lands to which his shares are appurtenant. It seems to me that we should accommodate any such proposed change, with a commensurate reduction in lands solely irrigated by ground water.

As to paragraph 5. of the offer of settlement, it is not clear to me as to how the measurements and accounting will occur each year. (I assume that your proposal indicates a credit for ground water recharge in the year the water is diverted only, and there will be no carry-over of recharge credit. If this is your intention, I need to have it confirmed.) As to the annual accounting, it appears to me that the proposal contemplates that there will be no accounting for ground water recharge for that portion of the water diverted for surface water irrigation. On the other hand, if I am correct in my interpretation of this paragraph, the percent of all water diverted will be applied to ground water recharge. If I am correct in my interpretation of this paragraph, substantial computations are necessary to determine whether or not ASCC is receiving the full credit for the ground water recharge it is providing. It seems to me that the actual ground water recharge is the amount diverted each year, less the consumptive use by the crops irrigated with the surface water right. If there is no carry-over, it should make no difference as to the amount of ground water recharge that ASCC may be entitled to, as it can only use the amount that will be diverted for use on lands to which its shares are appurtenant. The consumptive use would be the amount of surface water being directly used for irrigation.

Very truly yours,

VIA HAND DELIVERY

Re: Offer of Settlement for Consolidated Subcase 35-2315 Pursuant to I.R.E. 408

Dear Roger:

The Idaho Department of Water Resources ("IDWR") and the State of Idaho offer the following resolution to the objections of the Aberdeen-Springfield Canal Company ("Canal Company") in Consolidated Subcase 35-2315. This offer is made pursuant to Idaho Rule of Evidence 408 and shall not be admissible to prove the validity or invalidity of Claim No. 35-2315, or any other claim.

Currently, the Canal Company does not use the entire quantity of water under its surface water rights directly for irrigation purposes. It appears that some of the delivery works have not been used for many years, the majority of the shareholders have converted from flood irrigation to sprinkler irrigation, and a significant number of its shareholders have appropriated ground water to use in place of surface water. IDWR and the State propose a settlement to preserve the right of the Canal Company to continue to lawfully divert the full quantity of surface water under its water rights, without the extensive litigation that will occur if the Canal Company pursues its objections in the consolidated subcase in reliance on Idaho Code § 42-228.

The following terms for settlement are contingent on the Canal Company withdrawing its objections to Consolidated Subcase 35-2315 in the SRBA District Court, once the settlement has been executed:

1. In the Director's Report for Basin 01, IDWR will recommend the place of use for the Canal Company's surface water rights from the Snake River to include both lands that were irrigated with surface water, as of 1987, as well as lands that were originally irrigated by surface water but as of 1987 were irrigated solely by ground water.

2. The purposes of use recommended by IDWR in the Director's Report will be irrigation and recharge for irrigation. The recharge for irrigation will be recognized as a change in purpose of use under the accomplished transfer provisions of Idaho Code § 42-1425.

3. The place of use recommended pursuant to item 1 will be subdivided to separately quantify the acreage remaining for irrigation directly by surface water (including acreage with supplemental ground water irrigation), as of 1987, and the acreage originally irrigated by surface water for which the purpose of use for the associated quantity of water has been changed as an accomplished transfer from irrigation to recharge for irrigation. The place of use for the lands irrigated by surface water will include a recommendation for a maximum acreage to be irrigated within the service area of the Canal Company. The recommendation for the place of use for the accomplished change to recharge will include the entire service area of the Canal Company.

4. The maximum quantity of water (diversion rate) historically diverted and beneficially used for the combined use of irrigation and recharge for irrigation, as of 1987, will be recommended in the Director's Report. The recommended diversion rate will be recommended in two components: (a) the diversion rate associated with acreage directly irrigated with surface water will be the total recommended diversion rate multiplied by the acreage directly irrigated with surface water (including acreage with supplemental ground water irrigation) divided by the total acreage originally irrigated with surface water; and (b) the remaining portion of the total recommended diversion rate will be for recharge for irrigation.

5. Existing ground water rights used for irrigation within the service area of the Canal Company on lands paying assessments to the Canal Company and to which the Canal Company's surface water rights are appurtenant will be given mitigation credit for the amount of water recharged against ground water depletions arising from the authorized diversion and use of ground water. The volume of water credited for mitigation in each year must be determined from measurements and accounting. Depletions resulting from ground water diversions eligible for mitigation credits, as described above, will be considered to have been mitigated in any year to the extent to which the recharge documented through accounting equals or exceeds ground water depletions in the same year.

The above settlement offer is proper under Idaho Code § 42-1425 for the following reasons. The amount of surface water not being directly used for irrigation within the Canal Company's service area recharges the aquifer. Thus, an accomplished transfer of the amount of water used for recharge for irrigation under Idaho Code § 42-1425 is appropriate. Idaho Code § 42-1425(1)(b) allows for this accomplished transfer without legislative approval as follows:

> [d]enial of a claim based solely upon a failure to comply with sections 42-108 and 42-222, Idaho Code, where no injury or enlargement exists, would cause significant undue financial impact to a claimant and the local economy. Approval of the accomplished transfer through the procedure set forth in this section avoids the harsh economic impacts that would result from a denial of the claim.

Because of the need to prepare for litigation in the event this offer is rejected, this offer is good until November 20, 2001. Please discuss this offer with your client and contact either of us prior to November 20, 2001, to discuss this matter further or to convey acceptance.

Sincerely,

Karl J. Dreher

RE: *Letters to Water Right Holders*

Dear Steve:

The Department has received several questions from water right owners within your company area regarding your water right letter sent in early October For clarification I am enclosing a copy of one of these letters, sent to Raymond and Betty Funk on October 2, 2001 The purpose of my letter is to advise you of concerns that I have regarding the information contained in the letter, and to invite a discussion in this regard

The letter indicates that according to the Department of Water Resources, the Funks' water right numbers 35-8791 and 35-8197 are invalid The Funks' water right numbers 35-8791 and 35-8197 do represent valid water right licenses on file with the Department Although the Funks have not filed claims for these water right licenses in the Snake River Basin Adjudication (SRBA), the water rights are still valid rights

According to the *Commencement Order* for the SRBA and *Idaho Code* § 42-1420(1)(d), claims in the SRBA are only required for permits or licenses where proof of beneficial use had already been filed prior to the date of the commencement of the SRBA In the case of the Funks' water rights 35-8197 and 35-8791, the proofs of beneficial use for these rights were not submitted until 1990 and 1991 respectively Thus, the Funks were not required to file claims in the SRBA for water right numbers 35-8791 and 35-8197

I am aware of the legal actions being taken on behalf of ASCC in the SRBA, and I understand that your letter was related to these actions The reason that I am writing to you directly is to initiate a discussion to clarify guidance to holders of licensed water

rights such as those held by the Funks I am aware that your attorney, Roger Ling, is involved in this matter, and I would welcome a discussion in this regard including Mr. Ling

If you have any questions concerning this matter please contact me at (208) 327-7929

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief

Aberdeen ID 83210

RE: Water Rights 35-8791 and 35-8197

Dear Raymond and Betty,

According to the Idaho Department of Water Resources, the water right number that you submitted to ASCC for inclusion in our project water recovery efforts is invalid. The IDWR has no record of a claim being filed on your water right. Your right was issued after 1989 and no claim has been filed. Since there is no claim and was issued after the Snake River Basin Adjudication was established your right is considered invalid.

If you desire to make a claim in the Snake River Basin Adjudication on these rights, you must file a Motion to File a Late Claim. You must move quickly on this. I suggest you contact your attorney at your earliest convenience.

Hopefully, if we can establish that shareholders of Aberdeen-Springfield Canal Company have the right to recapture this ground water as project water, that finding will be applicable to licenses that have not been adjudicated as well as those specific claims to a water right that are before the court under the consolidated sub-cases we are now involved with. If you have questions please do not hesitate to call me.

Thank you,

Steven T. Howser,
General Manager

1A. IRRIGATION RATE

ACRES 37.848 X 0.02 CFS/ACRE = _____ CFS
(TAKEN FROM P/U REVIEW)

DOES AMOUNT CLAIMED EXCEED 0.02 CFS/ACRE? Y(__) N(__)

*** IF YES ADDITIONAL WATER USE FORM FILED AND ATTACHED? Y(__) N(__) ***

2. IRRIGATION CONSUMPTIVE USE

CLAIMED CONSUMPTIVE USE = 366.0 AF/A

ACRES 37.848 X CONSUMPTIVE VOL. AF/A FOR AREA 3 =

TOTAL CONSUMPTIVE USE _____ AF/A

3. IRRIGATION DIVERSION VOLUME

CLAIMED DIVERSION VOLUME = AF/A

ACRES 37.848 X DIVERSION VOL. AF/A FOR AREA 4 =

TOTAL DIVERSION VOLUME _____ AF/A

4. CALCULATIONS FOR USES OTHER THAN IRRIGATION:

SEE ATTACHED SHEET? Y(___) N(___)

1B. CALCULATIONS

Recommend claimed rate on diversion based on documents pertinent to the well.

ASC also has water rights from Snake River, as Basin 01. These rights and the combined consumptive use volumes will be considered when Basin 01 is recommended.

No ASC delivery. Irrig. is by well 35-08665.

See above note.

No ASC delivery. Irrig. is by well A35-02119

ASC delivered via ditch from M-44-9 to sump/pump-mainline.

1 Ac Rd. $\frac{40}{1}$

$\frac{}{39}$

No ASC delivered. Irrig. is by well A35-02119.

ASC delivered via ditch from M-44-9 to Sump/pump-mainline.

$\frac{1\text{ Ac Rd.} + 1\text{ Ac Hs.}}{2}$ $\frac{40}{2}$

$\frac{}{38}$

ASC delivered by ditch from canal in Sec. 9 Lat. G;G-HD to Pump-mainline. Also can deliver to L-6-10 disch. in standard-pipeline to SW SE.

Gov't Lot 1 41.20 ac.

Gov't Lot 2 - 41.10 ac.

Receives water from A35-02867
No ASC delivery.

Receives water from A35-028
No ASC delivery.

Receives water from A35-02867.
No ASC delivery.

ASC delivery via Y-0-6 (M-268 on Main Canal piped from SWSW Sec. 33. T3S, R3E, to a pump-manu

1 ac to HS
2 ac to Co Rd.
3

41.2 ⇒ 42
− 3
39

ASC delivered to Sump/pump-manif from buried pipeline from C1-03.

1 ac Co. Rd.
7 ac to HS, Canal, Canal, Ditch/waste
8

41.1 ⇒ 42
− 8
34

Receives ASC via Pump/pump in NW NE.
Portion So. Side Canal Lat. C1 is irri By A35-02398 or not farmed.

ASC DELIVERED AS WENT.

NO ASC DELIVERY North OF CANAL.

South, ASC IS DELIVERED By M-39-9 to a SMALL pump-MAINLINE.

DOT COUNT 12AC

No ASC DELIVERED North OF ASC or WEST OF LAT. F.

DELIVERY E OF LAT. F IS By Pump-MAINLINE FROM F-0-2.

DOT COUNT 20AC

ASC DELIVERED BY F-0-2 AS ABOVE AND BY F-0-6.

4AC TO WASTE/CANAL $\frac{40}{-4}$ $\frac{}{36}$

ASC DELIVERED By Pump-MAINLING FROM F-0-2.

1AC TO RD

3AC TO HS/WASTE $\frac{40}{-4}$ $\frac{}{36}$

$\frac{}{4}$

No ASC DELIVERED. IRRIG IS By WELL A35-07798.

SHOW PAGE

Rocky Brushy AREA. HAS A PIVOT IRRIG. SYSTEM - DOES RECEIVE WATER FROM M-24-5 IN SEC. 28.
Very Rocky Brushy.
ASCS photo show 45 AC. IN NW¼. CROPPED
PLANIMETER MEASUREMENT ALSO shows 45 AC.
REMAINDER IS Rocky Brushy Pastures.

VIA DITCH works THIS AREA RECEIVES WATER FROM ASC VIA M-24-5 IN SEC. 28.
Very Rocky Brushy.
Pastures?

ASC DELIVERED VIA DITCH WORKS FROM M-24-7.
