SUBJECT: CLAIM REVIEW

The above-mentioned claims are the result of three licenses that were filed on the same ground. The licenses were then split in the Snake River Basin Adjudication (SRBA) when one of the brothers wanted his portion of the water rights in his name and not the name of the corporation. All six of these claims are still operated as a single system, so it is best to address them as a group instead of each claim individually. Department records still show the licenses under single ownership, and only the adjudication claims have been split.

63-7955 was the first right licensed. It was licensed from a single well. 63-9818 was then filed on pretty much the same land using the original well with the development of a second well. 63-9818 was applied for in 1981 and the field exam was done in 1986. Water right 63-10364 was then filed to include additional acres, and license the full capacity of the two wells.

A63-7955A and A63-7955B adjudication claims claim both wells, even though they were only licensed with a single point of diversion. Whereas the second well was in place and verified in a field exam for 63-9818 by the department in 1986, it should be allowable to have both wells on the earlier right with an accomplished transfer, since the second well was introduced to the system prior to 1987.

Both 63-7955 and 63-9818 were licensed with two irrigation components. The first irrigation component was for standard irrigation between 3/15 to 11/15. The second component was for orchard frost control between 3/1 to 3/15. In reviewing these uses, they did not fit the true definition of irrigation. Therefore, I changed these uses to a more accurate descriptor of commercial use. The commercial use is a better fit to this scenario, and would allow the additional volume granted on the licenses. I would be hesitant to recommend more than the standard volume even for multiple type irrigation uses. This will make the files cleaner, and fit better in the overall description of the four adjudication claims with this component. Like in wastewater land application for commercial dairy uses, the commercial use will share the place of use as the irrigation component.

Page 2
Henggeler memo

63-7955 and 63-9818 were licensed with some combined limitations for diversion rate and volume. 63-9818 was filed to add a couple of additional acres to the system, and increase the diversion rate to a minor inch or 0.02 cfs per acre for the lands covered by 63-7955. 63-9818 was not even assigned a volume during licensing, but it is not possible to divert water without consuming any volume. Therefore, I assigned a volume based on the rate of diversion for A63-9818A and A63-9818B, and added remarks that would limit the total use to the standard use per acre of 0.02 cfs and 4.5 afa per acre irrigated for all six adjudication claims.

Water right 63-10364 was in essence filed to have the full diversion capacity of the well licensed, and to add 11.5 additional acres to fill in around the edges of the other two licenses. I added a condition to all six rights that limits the system capacity at the time of licensing.

It was difficult to determine which acres were licensed under each right due to previous mapping capabilities, but I believe that the shape files were the best possible depictions of the way they were originally licensed.

MEMORANDUM

TO: FILE NO.'S 63-7955, 63-9818, & 63-10364

FROM: JAN SHURTE *J*

SUBJECT: THE WHOLE STORY BEHIND THE EXAMS FOR 63-7955 & 63-9818 AND
WHY PERMIT NO. 63-10364 WAS FILED
✓

On August 12, 1980, Ric Morris conducted an exam for Robert Henggeler on Permit No. 63-7955. At that time he measured the well in Govt. Lot. 2, SWNW, S. 7, T. 6N, R. 4W (Well #1) and found a rate of flow of 4.31 cfs for 280 acres. Mr. Henggler did not agree with that measurement nor with an additional measurement later (same amount) which was not documented by Ric. Then Dave Shaw requested that Lee Sisco measure the discharge again and on November 17, 1981, he went to Henggeler's farm to conduct the measurement. At that time he measured the same or maybe a little less than Ric Morris had and in lieu of this Mr. Henggler agreed to accept Ric's measurement of 4.31 cfs (this information came per phone conversation with Lee Sisco on 12/11/86). Then Mr. Henggler wanted to try and get a measurement on Permit No. 63-9818 (Well #2) and that's when Lee went out on Dec. 18, 1981 (see attached incomplete exam for 63-9818). He said that either the power was not turned on or something was froze up and he couldn't do the measurement then. So the exam was not completed until this last summer when Rich Gemperle did it.

There is some confusion on the point of diversion legal for both 63-7955 and 63-9818. I believe 63-7955 had been taken care of and the whole thing is explained in the memo of 6/17/86 attached to the amendment already filed. No fee was charged for this amendment. However, Permit No. 63-9818 also needs an amendment and it appears to be an error Mr. Henggler had on his permit from the very beginning. The point of diversion was listed in the NESW, S. 7 on the original application. Then an amendment was filed on 63-9818 to add well #1 (63-7955) since both wells were now used together in the system. However, the quarter-quarter for well #2 still remained the NESW, S. 7. Rich Gemperle found that the actual point for well #2 is in the NWSW (Lot 3), S. 7 so it appears that Mr. Henggler will have to pay for this one.

So, I have written the exam up for Permit No. 63-7955 for 4.31 cfs as Ric Morris measured in 1980 and 280 acres from Well #1 in Lot 2, SWNW, S. 7, T. 6N, R. 4W as it was the only well in operation at that time. Then Permit No. 63-9818 will show both wells, which is the present operation at this time, but using only the measurement from Well #2 for the amount of water, 1.39 cfs. This permit will be for 285 acres of irrigation rather than 280 as shown on 63-7955. Mr. Henggeler stated that Well No. 1 (63-7955) has not increased since Ric Morris measured it and probably has decreased (Mr. Henggler did not say it has decreased). The measurement from Well #2 made this summer is sufficient to satisfy this right and then some.

This brings me to the next permit. This is a new application recently filed and has been approved under Permit No. 63-10364. This permit was filed to utilize

RECEIVED
MAR 14 1988

the additional capacity of well #2 as measured under Permit No. 63-9818. Rich Gemperle measured 1.82 cfs and the permit amount is 1.39 cfs which leaves .43 cfs available. The important part for the field examiner to be aware of when he/she conducts the exam is that in order for Mr. Henggeler to receive the .35 cfs he applied for on Permit No. 63-10364 he must develop the 17 additional acres applied for in this permit($302-285=17$). The 285 acres now irrigated have a full inch to the acre after 63-7955 and 63-9818 are licensed. This new permit shows two points of diversion, one in the NWSW(Lt. 3), and one in the NESW, S. 7, T. 6N, R. 4W. Actually, Mr. Henggeler filed on well #2 which was measured under 63-9818, and listed both quarter-quarters because he wasn't sure which one was right. So, he is not filing on a new well and well #2 is in the NWSW(Lt. 3), S. 7, as found by the field examiner, Rich Gemperle. I will place a copy of this memo in Permit No. 63-10364 to, hopefully, avoid any further confusion when the exam is done concerning Mr. Henggeler's water rights and irrigation system.

FRUITLAND, ID 836190000 has complied with the terms and conditions of the permit, issued pursuant to Application for Permit dated June 16, 1986; and has submitted Proof of Beneficial Use on October 13, 1987. An examination indicates that the works have a diversion capacity of 6.130 cfs of water from a GROUNDWATER source, and a water right has been established as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>	<u>ANNUAL VOLUME</u>

CONDITIONS/REMARKS:

1. The maximum diversion volume is defined as the maximum allowable volume of water that may be diverted annually from the source under this right. The use of water confirmed by this right is limited to the amount which can actually be beneficially used. The maximum diversion volume may be adjusted to more accurately describe the beneficial use or to implement accepted standards of diversion and use efficiency.
2. This water right is appurtenant to the described place of use.
3. This right is subject to all prior water rights and may be forfeited by five years of non-use.
4. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho law.
5. This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 4.5 afa per acre for the lands above.

Mr. Hennrich has Filed for this Permit to INCREASE HIS WATER RIGHTS to 1 inch per acre based on wells used to obtain licenses 63-7955 and 63-9818. The wells with combined Pumps of 300 horse power lift water from a DYNAMIC HEAD of 308 feet and apply it on approximately 300 acres of Hay, wheat and mostly Apple orchards.
