Dear Ms. Buffington:

Please find the attached Notices of Change of Water Right Ownership. These forms do not indicate any changes in the City of Boise's ownership, but request changes to how the City of Boise is listed as owner on its claims. Our intent is to have all the City's claims listed under the same format: City of Boise, followed by the managing Department and address.

Hopefully the forms are completed to your satisfaction. There are three forms and accompanying lists of water rights; one each managing department within the City of Boise. Also included is a list of Department heads as requested in item 7 on the Notice. If you have any questions please give me a call at 384-3984.

Sincerely,

TO: JIM JOHNSON
FROM: JAN SHURTE
SUBJECT: WATER RIGHTS FOR CURTIS & ORCHARD INTERCHANGES

Paul Philbrook from the Boise City Parks Dept. phoned yesterday with a question concerning the rights covering the irrigation of the Curtis & Orchard Interchanges. These rights are 63-08076, 63-09670, 63-10395A & 63-10395B.

The Curtis Road Interchange place of use is located in the NENE, Sec. 7 and NWNW, Sec. 8, Twp. 3N, Rge. 2E. The Orchard Street Interchange place of use is located in the NWNE & NENW, Sec. 8, Twp. 3N, Rge. 2E.

Originally, License Nos. 63-09670 & 63-10395B were licensed for the Curtis Road Interchange and 63-08076 & 63-10395A were licensed for the Orchard Street Interchange. The legals for the p.d.'s and p.o.u.'s are correct. They match up with the appropriate interchanges and still do.

The problem comes from the amended license for 63-09670. On June 13, 1988, a license was issued for this permit for the P.D. in the NENE, Sec. 7 and the POU in the NWNW, Sec. 8 - which is correct for the Curtis Road Interchange. The remarks stated that this license was for the Curtis Road Exit irrigation. Then, on May 17, 1989, the license was amended. It appears that the acre foot amount was reduced from 31.5 to 21 acre feet plus the remarks were changed to state that this license is for the Orchard Interchange. In the microfilm we only have the letter sent with the amended license stating that it was amended to better reflect the water right. So, I don't know why the remarks were changed.

Now, after putting the couplet in, they have drilled a new well for additional acres, but it has also been hooked up to the old Orchard Street Interchange well and they are interconnected. To make matters even worse, the Curtis Road Interchange well dried up, so they are irrigating the Curtis Road Interchange acres with the old & new Orchard Street Interchange wells. Pretty complicated.

Anyway, I was thinking maybe we should clear up the problem with 63-09670's remarks and change it to say it is used for the Curtis Road Interchange acres - since the legals prove that. Then, a transfer can be filed by whoever to add the new well to the Orchard Street Interchange rights, since they are now combined, and then add both the new & old well at the Orchard Street Interchange to the Curtis Road Interchange rights, since they are both irrigating the Curtis Road Interchange acres now. Paul wanted to leave the old Curtis Road Interchange well on the original rights because it hasn't been five years since it dried up and they left the pump, etc. in the well to use in case the water table comes back up. He is currently checking with the Dept. of Highways to see what they filed or didn't file when they were putting in the couplet. I can't find any transfers filed on these rights, but you might have them over there.

I'm sending a copy of this to Paul at Boise Parks and you may want to call him for a follow-up. Thanks, Jan.

Both wells are used to irrigate the area either individually or simultaneously.

Examination was made with both wells operating. Sprinkler pressure was 56 psi average. The Orchard well is on the north parking area between the Orchard on ramp and the connector. The Curtis well is on the south side of the Curtis west bound on ramp and north of the connector. The irrigation system is all solid set sprinklers for turf and shrubs.

H. REMARKS AND OVERLAP REVIEW ANALYSIS

The wells developed for this system are not amenable to installation of measuring ports or measuring devices without significant modification and expense. The mainline is PVC and is connected immediately to the pump riser pipe. In order to install any kind of measuring equipment would require removal of part of the mainline and replacement with steel. The formula used to calculate the flow produced was obtained from Western Division IDWR and is used by IDWR examiners for water right exams.
