3857.7 ACRES TOTAL

STOCKWATER same as IRRIGATION

The rights listed below are limited to the irrigation of a combined total of 3857.7 acres in a single irrigation season. Combined Right Nos.: 21-59, 21-108, 21-116, 21-2017, 21-2054A and 21-2158

This right is limited to the irrigation of 180 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

Case No. 39576

Subcase Nos.: 21-59, 21-108,
21-116, 21-2017 AND 21-2054A.

**MOTION TO FILE LATE OBJECTION
AND AMENDED NOTICES OF CLAIM**

Natural Guardian Limited Partnership, by and through counsel of record Robert L. Harris of the law firm Holden, Kidwell, Hahn & Crapo, P.L.L.C., hereby files this Motion to File Late Objection and Amended Notices of Claim to the above numbered subcases. The motion is necessary as described below.

Despite extensive efforts to document accurately the elements of the above water rights, counsel for Natural Guardian misidentified a canal heading for what is commonly known as the "Quakie Knoll Canal" that eventually is used to irrigate the Sheridan Ranch under the above numbered water rights. The enclosed map attached at Exhibit A shows the currently claimed and recommended heading of the Quakie Knoll Canal. After notice of the Amended Water Right Recommendations were filed, counsel for Natural Guardian was contacted by the predecessors in interest to the Sheridan Ranch, the Hagenbarth family, informing them that the Quakie Knoll Canal

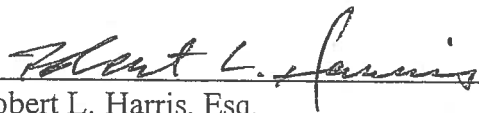

heading was actually located further north on Forest Service property. The Hagenbarths were positive that the canal heading was located north on Forest Service property, and after an opportunity to review the aerial photo, it is now clear that the canal heading is located further north than originally claimed. The map attached at Exhibit A shows the correct location of the Quakie Knoll Canal heading.

In light of the incorrect location of the Quakie Knoll Canal heading, it is now necessary to file a late objection, and request the Court to allow the filing of Amended Notices of Claim. Agents at the Eastern Region Office of the Idaho Department of Water Resources are aware of the error, and assisted Natural Guardian in preparing the enclosed Amended Notices of Claim. Additionally, counsel for Natural Guardian has contacted the Forest Service, through its water rights specialist, Steve Spencer, who sent a Forest Service representative to document the actual location of the canal heading. The Forest Service official confirmed its location on Forest Service property. Attached at Exhibit B is a copy of an email counsel for Natural Guardian received from Mr. Spencer wherein he does not object to the change in location of the canal heading description, with the qualification that Natural Guardian will obtain a special use permit consistent with Forest Service Policy.

We apologize for this error, and the further delay this may cause in the final processing of these water rights. Nevertheless, it is critical that the water rights are described accurately, and we believe with this correction, the water rights will be in a position to then be decreed.

For the reasons set forth above, Natural Guardian requests that the above motion to file late objection and motion to file amended notices of claims be granted. The original Amended Notices of Claim are attached hereto at Exhibit C, and we request they be filed with IDWR if the Court grants our motion as set forth above.

Dated this 7th day of December, 2009.

Subject: RE: Discovery of Error on Natural Guardian Water Rights (21-59 et al).

Rob,
A Forest Service person checked it out yesterday. He verifies that it is there, on NFS land, like you discovered. He'll work with Natural Guardian on the special use permit for this and it sounds like at least two more. It would be OK to proceed with your settlement. Although the FS is not a party to the subcases I'd appreciate seeing the water right descriptions, just another set of eyes, and so that I can let my guy in Ashton know the water right numbers and details of the water right as he works on the special use permit.

If you have any questions about this, please let me know. Thank you.

Subject RE: Discovery of Error on Natural Guardian Water Rights (21-59 et al).

Steve:

I actually viewed the diversion works at my site visit, and it is functioning, and was functioning in 1987. I had the ranch manager who managed the property then explain it to me. My problem is that I simply put the dot on the wrong spot. With the budget issues IDWR has, I'm not sure they would do a site visit. I'm wondering if one of your folks in that area may take a look. Let me know if that is a possibility. I've attached a photo we took when I did my field visit.

Regarding the POD, I think IDWR would move it provided that there is not an major issue with the Forest Service. The Hagenbarth family has provided a lot of information in this area, and they are reliable.

STOCKWATER same as IRRIGATION

3857.7 ACRES TOTAL

The rights listed below are limited to the irrigation of a combined total of 3857.7 acres in a single irrigation season. Combined Right Nos.: 21-59, 21-108, 21-116, 21-2017, 21-2054A and 21-2158

This right is limited to the irrigation of 180 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

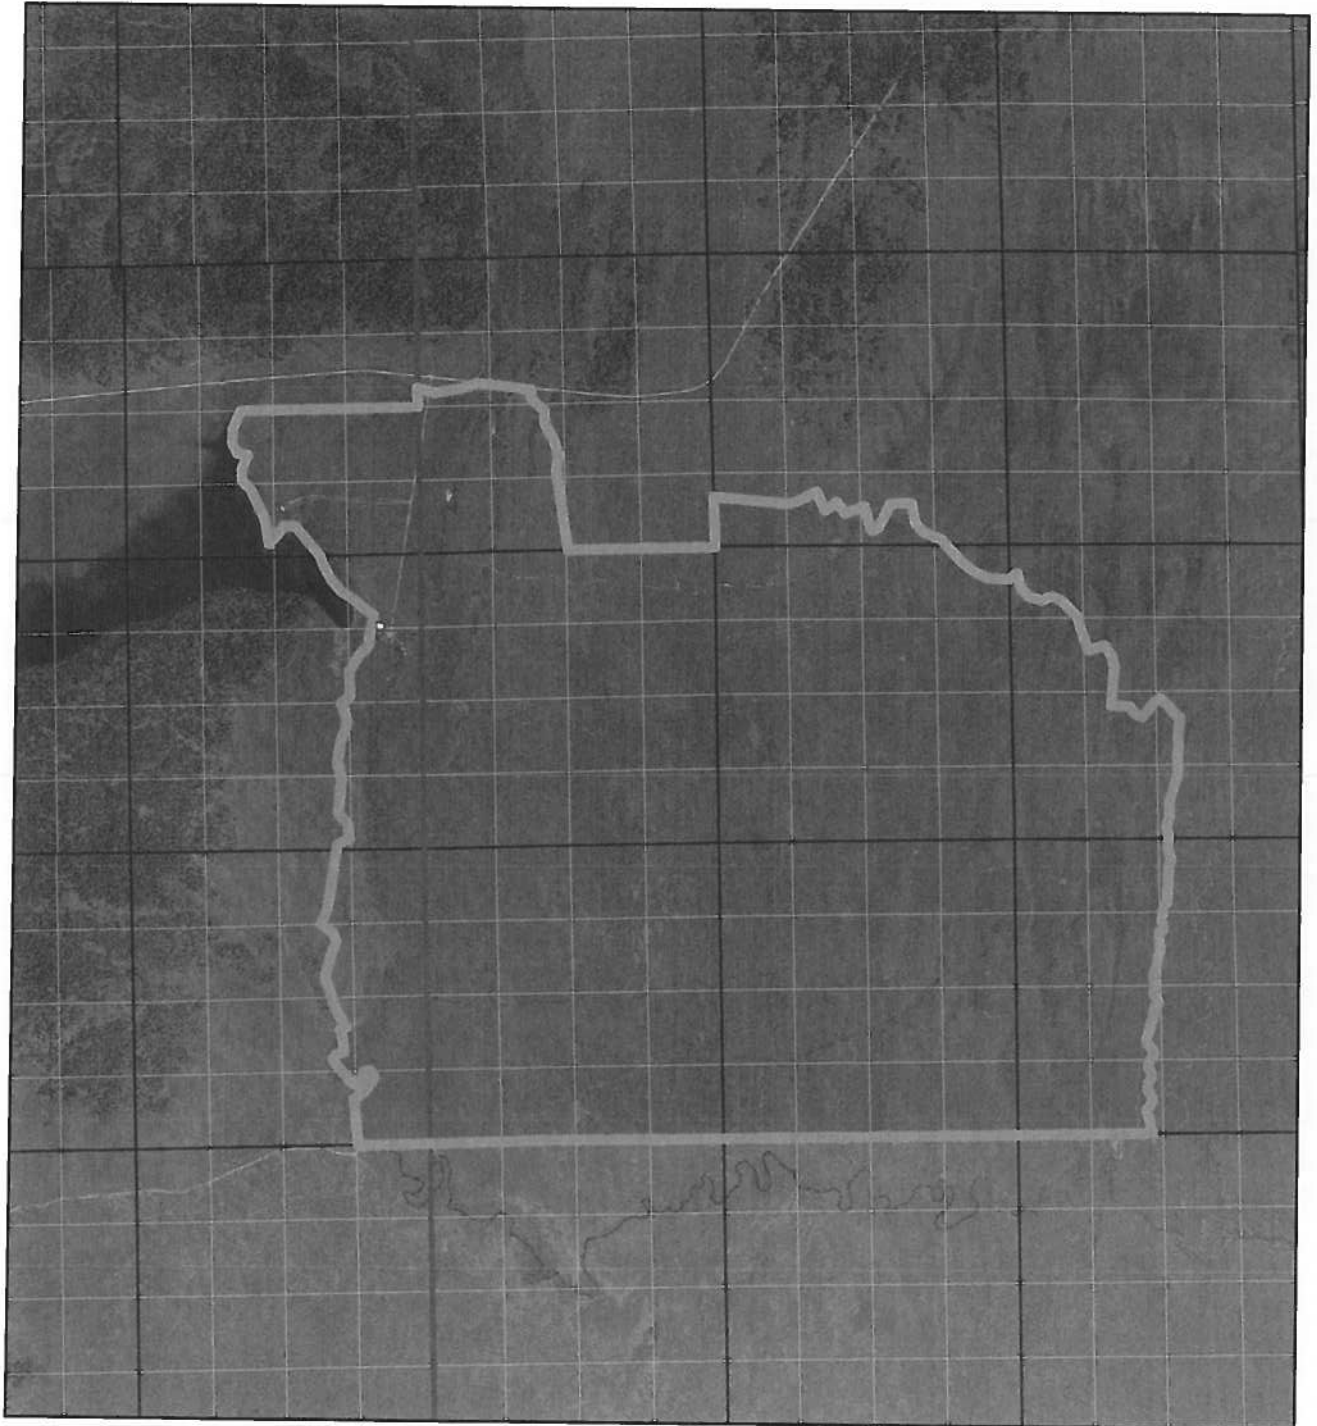

The quantity of water decreed for this water right for stockwater use is not a determination of historical beneficial use.

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Right includes accomplished change in place of use pursuant to Section 42-1425, Idaho Code.

Nick, Denise and I spent several hours over the last couple of days working on resolution of the state's objection to Natural Guardian's water rights from Sheridan and Willow Creeks. Rather than splitting all these rights I suggested to Rob Harris and David Barber that we modify the recommendations so only 21-2054A is appurtenant to the State's land. Rob agreed with the idea and David indicated he needed to speak with Allen Ruberry at IDL before agreeing. Hopefully he will have an update for today's status conference. Yesterday Rob Harris came to office and we reviewed available the maps, aerial photos. We concluded the location of a few PODs is in question there is some state land being irrigated for which there is no claim and we are not certain how some of the land is irrigated. Rob indicated to me he will ask the Special Master for additional time to conduct a field visit and collect the missing information.

Also I received an SF5 from David Barber this morning that he had prepared for 21-7133. I am sending it to you for your review.

Rob Harris has created shapefile.

Yes, we can make the changes via the SF-5 route assuming everyone is in agreement. Since the error is basically clerical in nature I cannot imagine either Kent Foster or David Barber having any difficulty with correcting it. NBS

Nick,

Ernie is working on a response for you regarding Hagenbarth, but in looking at hagenbarth we found another issue with 21-2158 (Natural Guardian). This is an old license for 4500 AF for irrigation and domestic uses. They divert water from Sheridan Creek into the reservoir and then inject it from the reservoir back into Sheridan Creek. When I was doing the recommendation for this one we realized we needed to find out how much they were diverting to storage even though the license does not state that. So I put a flow rate on the recommendation but neglectfully did not change the use to reflect:

Diversion to Storage: 30.04 CFS

Irrigation Storage 4500 AF

Irrigation From Storage 4500 AF

The question is what do we do about it now? There is a status conference scheduled for July. There was an objection on this right from the Department of Lands. I believe it was for a trespass issue. Can we just add this into the SF5 if it is agreed upon by all parties or do we need to take another route?

Thanks,

Trent Galbraith
