RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

RIGHT NUMBER: 63-11185

NAME AND ADDRESS: SETTLERS IRRIGATION DISTRICT
PO BOX 7571
BOISE ID 83707

SOURCE: GROUND WATER

TRIBUTARY:

QUANTITY: 1.000 CFS
516.000 AFY

This right when combined with all other rights shall provide no more than .02 cfs per acre nor exceed a combined annual maximum diversion volume of 1580.0 af at the field headgate for the 352 acres of land authorized for irrigation under this right.

PRIORITY DATE: 01/26/1990

POINT OF DIVERSION:

T04N R01W S28 NESENE Within ADA County

PURPOSE AND
PERIOD OF USE:

<u>PURPOSE OF USE</u>	<u>PERIOD OF USE</u>	<u>QUANTITY</u>
IRRIGATION	03/01 11/15	1.000 CFS 516.00 AFY

PLACE OF USE:

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

This right is limited to the irrigation of 13135 acres within the boundary of the Settlers Irrigation District.

This right is limited to the irrigation of 352 acres within the place of use described above in a single irrigation season.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the Court at a point in time no later than the entry of a final unified decree. Section 42-1412(6), Idaho Code.

EXPLANATORY MATERIAL: BASIS OF CLAIM - License

The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.

If the surface water rights appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Jan,
 I called Andy Waldera and he checked with his client to see if there was some reason that Settler's would not want the digital boundary. Your assessment was correct that Settler's prefers to have the digital boundary rather than a quarter-quarter description. It is my assessment that we can make the change without having an amended Director's Report. We will delete the current POU description and replace it with the digital boundary language, together with the 13,135 acreage limitation.

Hi Ted,

After reviewing these two rights, it appears they were recommended exactly like the licenses and not like the normal irrigation district rights.

What would be best is to take off the acres, along with the acre limiter and add the digital boundary language on both. Right No. 63-2080 has the boundary language already. We would only need to add it to 63-11185. Also add the condition "This right is limited to the irrigation of 13135 acres within the boundary of the Settlers Irrigation District." I'm not sure what happened with these two, just a mix-up.

Can we go ahead and change the records here and you issue the partial decrees with the changes? I'm sure the irrigation district would rather have it this way than with the quarter-quarters listed and acre limits. All of the rights would then be consistent with how we do irrigation districts and with the rest of Settler's. Please let me know if we need to do an Amended Director's Reports or something else.

Thanks,
 Jan

Jan,
 The POU for these two rights is described by quarter-quarters, but the maps prepared for the digital boundary POU for Settlers Irrigation District includes these two right numbers on the heading (along with 63-230L, 63-231D, and 63-3060). Please review.

Remarks:Comments:

1. mschulte 3/23/2005 claim amended by license

Comment: This claim was amended by the license approved January 26, 2005

2. jshurte 11/15/2005 Change in 1/41/4

Comment: It was discovered that the 1/41/4 listed in the SESE, S21 on the license should have been located in the SWSE, S21. In review of the original file and the map in the file it clearly shows this error. Therefore, this recommendation reflects the 38 acres in the SWSE, S21 rather than in the SESE, S21 as licensed.

G. NARRATIVE/REMARKS/COMMENTS

I was asked to complete this exam originally started by Sara West. A second review of the site was needed.

The water for this permit is diverted from a 15 inch well located on the north side of a private lane in the NESENE of S28 T4N R1W. The water is open discharged into the McMullen Lateral. The water from this point flows westward to a series of ditches and laterals that supply water to 408.6 acres on the west end of the Settlers Irrigation District system (please see system diagram). The well was developed to alleviate drainage problems in the area. A permit was filed for this well in May of 1963 to ensure the water users at the end of the system received their full supply of water. Proof of beneficial use was never filed on the earlier permit, but the well has been used as needed since that time.

There was some confusion during the processing of this permit regarding the number of acres this system served and the diversion rate of the pump. It seems as though the diversion rate was reduced below the pump capacity after IDWR staff questioned the capacity. The acre amounts were also reduced. The permit does not seem to have been filed to the capacity of the irrigation districts system or the capacity of the well. Therefore, I have proposed to the irrigation district that we license this right for the amount requested under this permit of 1.00 cfs and 352 acres within the 408.6 acre permissible place of us. Since the well drilled and the irrigation use started in 1963, I have recommended that the irrigation district file for another permit to cover the remaining well capacity of 0.56 cfs and to cover the entire 408.6 acres where the well water can be used. This will allow them to use the full capacity of the system. A new application can be filed on this system, since it was developed prior to 1987.

There are several overlapping water rights under Settlers Irrigation District's portfolio of water rights. Most of these rights are from surface water sources and should not affect the licensing of this water right. There are several other supplemental water rights owned by individual landowners to supplement the Settlers Irrigation District water. None of these rights should affect the licensing of this permit. This permit is only used when Settlers is delivering water through their canal system, so the well is not used once their full delivery of the surface water has been accomplished. Therefore, the individual supplemental rights would not generally be in use while Settler's well is in operation.

I recommend that this applicant be licensed with the condition that they use the full allocation of surface water when available prior to using this well. The well can only be used when the system cannot supply a full allocation of surface water to the lands described in this permit. This well can only supply water to the 408.6 acres described above. Therefore, it should be limited directly to those acres and not be moved unless a formal transfer has been filed. When combined with all other water rights, this right should be limited to 0.02 cfs and 4.5 afa at the field headgate.

Have conditions of permit approval been met? X Yes No

A cipoletti weir is available for measurement when needed. Due to power demand charges it was not reasonable to ask the permit holder to turn on the pump at this time for a measurement.

RE: License No. 63-11185 - Issuance of License

Dear Water Right Holder(s):

The Department of Water Resources has issued the enclosed Water Right License confirming that a water right has been established in accordance with your permit. Please be sure to thoroughly review the conditions of approval and remarks listed on your license.

The license is a PRELIMINARY ORDER issued by the Department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a copy of the approved Application for Amendment.

Please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at 208-287-4947.

Sincerely,

Shelley W. Keen

ACTION OF THE DEPARTMENT OF WATER RESOURCES

I, Karl J. Dreher, of the Department of Water Resources hereby approve the
above Application for Amendment for Permit No. 63-11185 with the following:

CONDITIONS OF APPROVAL

1. This right is limited to the irrigation of 352 acres within the place of use described above in a single irrigation season.
2. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 1580.0 af at the field headgate for the 352 acres of land authorized for irrigation under this right.
3. This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
4. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
5. If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.

Witness my hand this 26th day of January, 2005.

Yes, I want my application processed and before it is advertised, I will amend my application to demonstrate that the proposed appropriation is in the local public interest including the need to preserve flows in the Snake River during the migration periods of anadromous fish.

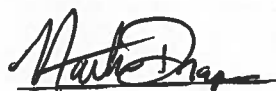

PROPOSE MITIGATION NOW

Yes, I want my application processed and before it is advertised, I will amend my application to include proposed mitigation to offset anticipated depletions in the Snake River during periods of anadromous fish migration.

XX WILL AGREE TO MITIGATION IN THE FUTURE IF NECESSARY

Yes, I want my application processed at this time, and I will accept a condition of approval that will require mitigation should the Director of the Idaho Department of Water Resources determine that mitigation is necessary to offset depletions from this appropriation to flows in the Snake River during periods of anadromous fish migration. I understand that mitigation is not required now but may be needed in the future. I also understand that the Director will not require mitigation until I have an opportunity to review the process by which the need for mitigation is established and the amount of water required is quantified.

MEMORANDUM

TO: STATE OFFICE LICENSING STAFF

FROM: DANIEL A. NELSON

DATE: 8/19/04

SUBJECT: SETTLERS IRRIGATION EXAM AND PERMIT

The field exam and field report for permit 63-11185 has been completed. During the field exam I discovered some discrepancies that needed to be address. Consequently, a new application for permit was filed to cover land and excess flow that was not covered under this permit. Attached to this memo is a copy of the new permit, which is currently in advertising. Once the application completes advertising, it will be sent over to the State Office with a completed and paid for proof of beneficial use form and completed field exam.

This should finalize the uses associated with this well. If you have any questions, please contact me and I will answer any questions necessary.

Thank you for your time and effort.

Re: Notice of Claim to a Water Right No. 63-11185

Dear Claimant(s):

Enclosed is your copy of the above referenced claim(s), in which you recently filed with the Department.

Please note that the enclosed Notice of Claim to a Water Right is not a determination of your water right. This claim has not yet been verified by this Department. Water rights are established and maintained by beneficial use of water for the uses designated on this claim form dating back to the priority date listed. This claim will be investigated, verified and recommended to the SRBA Court for court decree sometime in the near future. You will be notified prior to the beginning of any verification of this water right.

Thank you for your patience and cooperation. If you have any questions concerning the enclosed claim(s), please feel free to contact this office.

Sincerely,

Adjudication Section
