I agree, I would like to see the OC processed at Western. A key factor for me, however, is the person/office location of the file. By chance, the reviewer is dealing with place of use issues and can determine the OC issues as well to provide guidance for data entry that could be done here. Sally, pursue finding who has the claim files.

I believe the responsibility for the change of ownership should still be with Western. Morgan could identify who at the S.O. is working on the record. The S.O. person assigned to the claim could then make that one a high priority and complete their review of it. When the S.O. work is done, the claim could be returned to Western to complete the change of ownership. I have already done a change of ownership review for one of Danni's Basin 67s, and I really don't want to take on any additional change of ownership work here at the S.O.

Don, what is your take on this?

I have two on my desk. One is very complete, but metes and bounds. The other one is metes and bounds and doesn't have a map. Who will do the ownership change?
