STATE OF IDAHO
DEPARTMENT OF WATER ADMINISTRATION

APPLICATION FOR PERMIT APPROVED

To Appropriate the Public Waters of the State of Idaho
(TYPE OR PRINT IN INK)

1. Name of applicant Swiss Village Cheese Co.
post office address Box 280, Nampa, Idaho

2. Source of water supply groundwater which is a tributary of _____

3. a. Location of point of diversion is SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 8 Township 3N
Range 1W B.M. Canyon County; additional points of diversion if any: _____

b. If water is not consumed, it will be discharged into See Remarks at a point in _____ $\frac{1}{4}$
of _____ $\frac{1}{4}$ of Section _____ Township _____ Range _____ B.M. _____

4. Water will be used for the following purposes:

Amount .5 for Commercial purpose from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount .5 for Irrigation purpose from Jan. 1 to Dec. 31 (both dates inclusive)
(cfs or acre-feet per annum)

Amount .5 for Swage Treatment purpose from Oct 15 to Apr 15 (both dates inclusive)
(cfs or acre-feet per annum)

5. Total quantity to be appropriated:

a. .5 cubic feet per second and/or

b. _____ acre feet per annum.

6. Proposed diverting works:

a. Description of ditches, flumes, pumps, headgates, etc. Drilled well and electric pump

b. Height of storage dam _____ feet, active reservoir capacity _____ acre feet; total reservoir
capacity _____ acre feet, materials used in storage dam: _____

Period of year during which storage will occur _____ to _____ inclusive.
(Mo. Day) (Mo. Day)

c. Proposed well diameter is 8 inches; proposed depth of well is 300 feet.

7. a. Time required for the completion of the works and application of the water to the proposed beneficial use
is 3 years.

b. Estimated construction cost is \$ 5,000.

8. Description of proposed uses:

a. If water is **not** for irrigation:

(1) Give the place of use of water: SW $\frac{1}{4}$ of SW $\frac{1}{4}$ of Section 8 Township 3N
Range 1W B.M.

(2) Amount of power to be generated: _____ hp under _____ feet of head.

(3) List number of each kind of livestock to be watered _____

(4) Name of municipality to be served _____, or number of families to be
supplied with domestic water _____.

(5) If water is to be used for other purposes describe: Use is for cheese manufacturing and
processing.

b. If water is for irrigation, indicate acreage in each subdivision in the tabulation below:

TWP.	RANGE	SEC.	NE1/4				NW1/4				SW1/4				SE1/4				TOTALS
			NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	NE1/4	NW1/4	SW1/4	SE1/4	
		7																20	20
		8											20					~~20~~	20

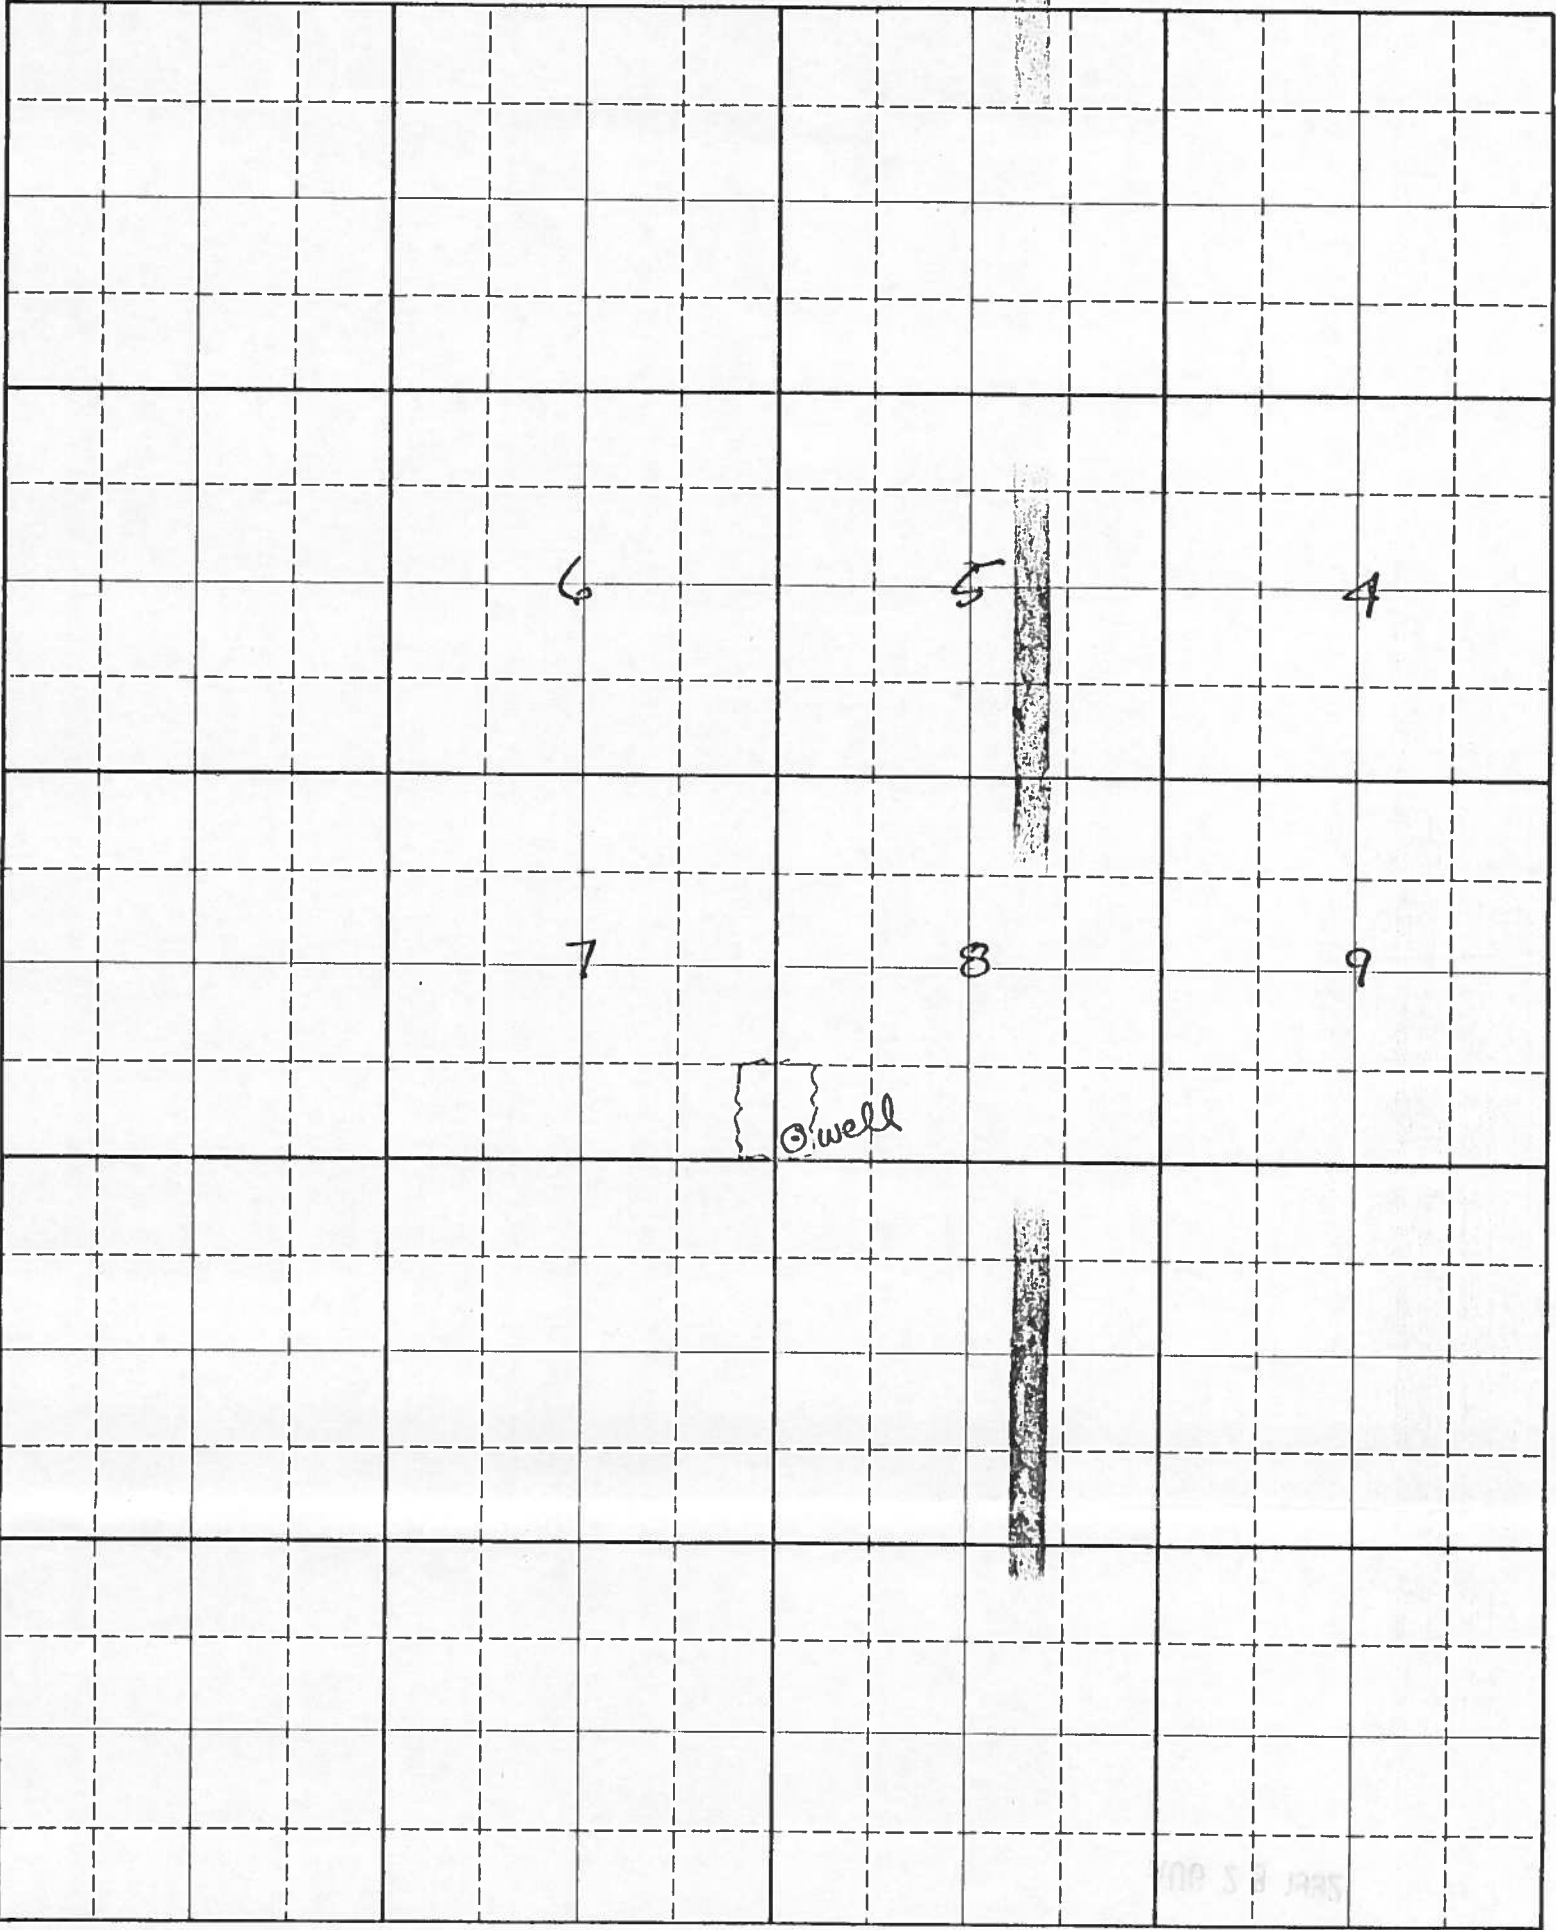

Total number of acres to be irrigated 40

c. Describe any other water rights used for the same purposes as described above. None

9. a. Who owns the property at the point of diversion Applicant
b. Who owns the land to be irrigated or place of use Applicant
c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing _____

10. Remarks Waste water will be applied by sprinklers
to fields. No runoff is expected.
Sprinkler system is approved by Dept. of Health.

11. Map of proposed project: show clearly the proposed point of diversion, place of use, section number, township and range number.

Scale: 2 inches equal 1 mile

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 63-8759, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before June 1, 1982.

c. Other:

2. Denial of said application is for the following reasons:

Witness my hand this 17 day of June, 19 77.

Director

Change of Address

Dear Claimant:

IDWR has been notified the address presently in our records is incorrect. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right(s) can be sent only to the address on your water right(s) or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary and list any other water rights you may have before returning this letter by April 12, 1999. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

If there has been a change in ownership of the property connected with the water right(s) referenced above, please call this office toll-free at 1-800/451-4129 to obtain a form to make this required change to the water right record.

Sincerely,

Sally Sherman
Technical Records Specialist

RE: Investigation of Water Right Claims in the Snake River Basin Adjudication, Basin 63

Dear Claimant:

As you may be aware, the Idaho Department of Water Resources (IDWR) is commencing its Snake River Basin Adjudication (SRBA) investigation of water rights in the Boise River Basin (Basin 63). This investigation is a major effort, and IDWR has hired a contractor, Water Works, Inc., to assist us with this task.

The purpose of this letter is to advise you that Water Works, Inc. might be contacting you to conduct a field investigation of your water use. This investigation is meant to provide important information to the IDWR Senior Water Resource Agent who will be making a recommendation for your water rights. Accordingly, we request that you provide Water Works, Inc. with access to your water diversion system so that their personnel can conduct this field examination. Water Works, Inc. will be gathering information on the rate of flow, diversion location and place of use of your water rights, and will be reporting this information to IDWR.

If you have sold your property in the Boise River Basin, we request that you forward this letter to the purchaser, so that the purchaser can report the new name and address to our office. If you are unable to forward this letter, please send any information regarding a new owner to our Western Regional Office located at 2735 Airport Way, Boise, 83705, (208) 334-2190.

The process of adjudicating your water rights is straightforward for most people, resulting in the issuance of decreed water rights on your property. ~~Experience has shown that water users who~~ work with our agency early in the process to ensure that their recordings are correct have a better experience than those who wait until IDWR has filed its findings with the SRBA Court. Thus, we encourage you to work with our staff and with Water Works, Inc. to ensure that the results accurately reflect your water uses.

Sincerely,

Jan Shurte
Adjudication Section Supervisor

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 63-31628

1. 105 If the surface water right(s) appurtenant to the place of use is sold, transferred, leased or used on any other place of use, this right to divert groundwater shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
2. The use of water for commercial purposes under this right shall not exceed 400 acre-feet each year.
3. WB7 This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 116 af at the field headgate for irrigation of the 25.7 acres described above.
4. Commercial use is for a cheese production facility, a combination deli and retail outlet, and the year-round dilution and land application of effluent discharged from the cheese production facility.
5. 065 The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water for irrigation under this right to those times when the surface water supply for irrigation is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
6. R61 This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
7. WD8 The commercial place of use authorized by this approval includes land in the SW1/4SW1/4 of Section 8, Township 3 North, Range 1 West, B.M., where the main commercial facility is located, and additional lands within the S1/2 of Section 8, Township 3 North, Range 1 West, B.M., upon which wastewater may be applied to satisfy water quality requirements. Water diverted for irrigation purposes under this approval shall not be used to irrigate more than the 25.7 acres described as the place of use for irrigation purposes under this right. Water diverted under this approval shall not be applied to the E1/2SW1/4 or the SE1/4 of Section 8, Township 3 North, Range 1 West, B.M., unless the water is first used in the cheese processing facility as authorized by this water right.

Remarks:

IDAHO DEPARTMENT OF WATER RESOURCES

Water Right Report 63-31628

Comments:

1. S. Keen 2/7/2003 Ownership

Comment: This portion of the right developed under Permit 63-11047 is now owned by Sorrento Lactalis, Inc., according to attorney Mike Creamer. He will submit ownership change documentation.

2. S. Keen 2/10/2003 Licensing Review

Comment: Licensing review and data entry by S. Keen on 2/10/2003.

SPLIT RIGHT

The license is being drafted in two parts in anticipation of the ownership change noted in my comment of 2/7/2003. Right 63-31628 will be the factory portion owned by Sorrento Lactalis. Right 63-31629 will be the irrigation portion retained by Simplot.

IRRIGATION PLACE OF USE

The irrigated place of use for this right is those lands shown to be irrigated within the Sorrento Lactalis parcel on the 1994 Treasure Valley infrared aerial photography. Significant reduction in irrigated land on this parcel is apparent in the 2000 infrared aerial photography, but the license is intended to reflect what was occurring when proof of beneficial use was submitted in 1991.

COMMERCIAL VOLUME

The commercial volume of 400 af is based on the former right holders statement that the 254 af (253.54 af) used in the plant is typical of the use during the development period, plus the 0.63 af (203,682.5 gallons) per day the former right holder says was used for 232 days each year to dilute the effluent before applying it to the irrigated land.

COMMERCIAL DIVERSION RATE

Calculated by adding the capacity of the well pumped for use inside the factory (0.68 cfs) to the capacity of the "pond well" (0.92 cfs). I discounted the former owners report that 142 gpm (0.32 cfs) was diverted from the "pond well" to dilute waste water before applying it to the land because he seems to have calculated backwards from a daily volume to get that rate. It is more likely that the well is pumped at capacity for a period less than 24 hours per day.

IRRIGATION DIVERSIO RATE

Without any better information, I split the rate for irrigation between 63-31628 and 63-31629 by equivalent rate per acre.

Edwin Gossner Sr. was born in 1909. He came from the eastern region of Edliswiel-Waldkirch, Switzerland where five generations of his family had lived as farmers. Today, the seventh generation of Gossners carry on the family tradition and continue to maintain the same homestead that has been a part of the family heritage for all these years.

Due to a declining European economy and limited prospects for the future, Edwin Gossner decided to seek a new life in America. He immigrated to the United States in 1930, scarcely speaking a word of English, and immediately went to work for his older brother Ernest in Wisconsin. Ernest had preceded Edwin seven years earlier to the U.S. after graduating from the Swiss Cheesemaking School of Switzerland and now owned his own cheese factory. For the next three years Edwin Gossner served his own apprenticeship and learned the art making fine Swiss cheese following the traditional methods of the old country. In 1933 Edwin married Josephine Oechslin of Darlington, Wisconsin and she was to be a major influence on him all their married life. Two children, Edwin, Jr. and Dolores, soon followed.

It was also in 1933 that his brother got an offer elsewhere and Edwin was asked to take over as Cheesemaker at the Burke factory. He held this position until 1937 when the factory burned down. Edwin then moved on to California where he accepted a position with the Rumiano family making cheese. While there he converted the plant from a Monterey Jack to a Swiss cheese facility. This was to be an invaluable experience as he was able to improve upon his knowledge of making Swiss cheese utilizing milk from cows fed on fermented feeds (silage) instead of fresh feed. The traditional method of making Swiss cheese did not allow for the use of milk from cows fed on silage, but he proved that it could be done. This was an important new concept that Gossner would later successfully employ in Cache Valley.

Ed kept an eye open for a place of his own where he could make Swiss cheese. In 1941

he located such a place in Northern Utah (Cache Valley) while on vacation to Yellowstone National Park with his family. Cache Valley proved to be an ideal location with its climate and elevation closely resembling that of Switzerland. And there was more than an abundant supply of milk with hundreds of dairymen producing locally. By the end of the year Gossner had moved to Utah and was set up for business. Within five years he had built up what was at the time the largest Swiss cheese making factory in the world, producing 120 two hundred pound wheels of cheese a day.

[Continue...](#)

|| [Gossner History Clip 1](#) ||

In the ensuing years Gossner was the guiding force in upgrading Cache Valley milk production to Grade A market status. He brought sustained benefits to the dairymen by opening new markets for them and increasing their overall profits. Gossner also made important innovations such as introducing to the area the means of making processed cheese and a more efficient recovery method of whey by-products.

In 1966 Edwin Gossner and his family began anew by starting Gossner Foods. Again the focus was placed on making Swiss cheese. They started with a half vat of milk (12,500 lbs.) every other day and Ed was quoted as saying that he would be happy if he could make up to two vats (50,000 lbs.) every other day. Today, over 25 years later, Gossner Foods uses over a half million pounds of milk a day for cheese production. In 1967 Gossners began packaging a line of cheeses starting with Swiss, Cheddar and Monterey Jack. Eventually Muenster and others were added so that in time over 30 varieties carried the Gossner name.

[Continue...](#)

Edwin Gossner had his eye on the future. In 1973 he helped establish Swiss Village, a cheese manufacturing plant in Nampa, Idaho and in 1982 he brought out a new fluid milk product that utilized ultra high temperature packaging technology. Rather than compete with the existing Grade A milk market this new technology allowed Gossners to open up new marketing avenues. Gossner Milk can be kept unrefrigerated at room temperature for months and as such has proved to be highly desirable to the military community and others. Today, Gossner Milk travels all over the world with our troops, and it is sold in places as diverse as Puerto Rico and Panama where milk supplies and refrigeration are limited.

The mainstay of Gossner Foods continues to be Swiss cheese. It is made using the same formula that Edwin Gossner developed years ago. The Gossner Swiss cheese is a specialty cheese that has a milder flavor and softer body than other Swiss cheeses, yet it remains distinctly Swiss. Gossner Foods now utilizes state-of-the-art equipment for aseptic packaging and cheesemaking and is currently exploring new ideas to expand its product line.

When Edwin Gossner died in 1987 he left behind as part of his legacy a well-oiled machine that consisted of a corps of caring, knowledgeable, and well-trained employees. It is duly noted that were it not for these dedicated people Gossner Foods would not be what it is today, a successful family business.

Three of the original four members of the Gossner family that came to the Valley in 1941 are no longer with us. During their lifetimes, Edwin, Josephine, and Edwin Jr. were greatly respected in the community and received numerous civic awards in recognition of their involvement and contributions. That tradition of service to the community continues to this day at Gossner's.

POD id 172447

Legal Description 03N 01W 8 SE SW

Desc of Diversion W 15' dug well, 1 1/2 hp pump, sprinklers and hose.

Site Tag # A0002021

GPS File Name 220

Motor Make Franklin Electric model 1103

Pump Make Jacuzzi model 2hjm5/a, s/n

Horsepower 2

Pressure gage 30 psi

pump bowl or static pump

Depth level 0 Ft.

dyn. pump level 0 Ft.

POD Remarks:

Well is located in the basement of the main house. The maintenance mgr. didn't know anything about the well including the existence of it. The well is connected to a sprinkler system that irrigates the lawns around 2 houses that are lived in and the barn. There is one other old house that is no longer used. The sprinklers were running at the time of our visit.

Pressure gage at sprinkler 0 psi

Bucket Measurment (gps) 0

Calc Method: Theoretical

Flow (cfs) 0.18
