RE: Coeur d'Alene-Spokane River Basin Adjudication (CSRBA) claims **95-8475 & 95-17280**

Dear Mr. Berger,

Thank you for sending the map with the irrigated acreage identified. I have had a chance to look through it and I think we should amend your claims to reflect the diversion rate and volume associated with the 64 acres of irrigation that you and the board have identified as being irrigated, or having been irrigated under the Morrison Estates Homeowners Water Assn. system since the commencement of the CSRBA.

I wanted to briefly explain a couple of points on the attached claims.

95-17280:

- I updated the address to match the one on the letter you sent me. If this isn't the address you want on the claim / water right, then please just cross out what you want to remove, and initial the changes you make.
- I included both wells as points of diversion on both claims
- I am recommending changing the purpose of use to municipal. You will still be limited to the irrigation season of use and a defined number of acres that can be irrigated, but it will allow you change which acres are irrigated within the service area boundary without needing to file a transfer.
- The diversion rate and volume was calculated as follows.
 - 64 Acres at 0.02 cfs per acre = 1.28 cfs
 - 64 Acres at 3.5 acre-feet per acre = 224 acre-feet

95-8475:

- I included both wells as points of diversion on both claims
- I am recommending changing the purpose of use to municipal. This better reflects your historical practice when it comes to adding, moving, and disconnecting individual connections.
- The authorized rate and volume are the same as originally licensed.

Please note that these are your claims and you should file them as you feel is appropriate. Please initial any changes you wish to make. When satisfied, please sign the claims and return them to me by **December 15, 2017**. No additional filing fees are required.

Thanks for working with me on this. Please contact me if you have any questions.

Respectfully,

Craig L. Saxton
