C. CLAIMANT OF WATER RIGHT AS LISTED IN DIRECTOR'S REPORT

Name: Kathy L. Babington

Lynn J. Babington

Address: 2849 South 850 East
Hagerman, ID 83332

D. I object to the following elements as recommended in the Director's Report. (Please check the appropriate box(es)).

1. ☐ **Name and Address**
Should be: _____
2. ☐ **Source**
Should be: _____
3. ☒ **Quantity**
Should be: Less than .87 cfs
4. ☐ **Priority Date**
Should be: _____
5. ☐ **Point(s) of Diversion**
Should be: _____
6. ☐ **Instream Flow Description**
Should be: _____
7. ☐ **Purpose(s) of Use**
Should be: _____
8. ☐ **Period of Year**
Should be: _____
9. ☐ **Place of Use**
Should be: _____
11. **I object because:**

- ☐ This water right should not exist.
- ☐ This water right was not recommended, but should be recommended with the elements described above.

E. **REASONS SUPPORTING OBJECTION(S):** Contrary to the SRBA district court's ruling in the subcases involving this right, the sum of the rights recommended under the various 36-00003 splits exceeds the amount originally allocated to 36-00003 in the *New International Decree*. Further, the recommended quantity exceeds one inch/acre yet gives no indication if a portion of the quantity is allocated to conveyance loss. Further, the recommended quantity was determined without regard for the means of irrigation actually employed. The recommended quantity exceeds the amount actually beneficially used and the amount necessary.

I, Tricia J. Fahrenholz, being first duly sworn upon oath, depose and state:

2. I make this affidavit based on my personal knowledge, information, and belief. I am the secretary for Patrick D. Brown, attorney of record for the Claimants in the above-listed subcases. I am otherwise competent to testify about the matters set forth in this affidavit.
3. On May 31, 2000 I made copies of, and filed with the SRBA Court, a Motion to File Late Notice of Claim in each subcase, i.e. Nos. 36-00003C, 36-00003F, and 36-00003K. I mailed a copy of each Motion, and our records indicate the motions were mailed, on May 31, 2000 to the following parties and addressed as follows:

Peter Ampe

4. On June 2, 2000 I mailed a corrected page 2 of the 36-00003C Motion to the parties listed in paragraph 3 above.
5. Before June 28 none of the parties listed in paragraph 3 called indicating they had received the corrected page 2 of 36-0003C but that they had not received the original motion.
6. On June 28, 2000 Vicki Kelly from IDWR contacted me indicating that IDWR did have the corrected page 2 of 36-00003C. She further indicated they could not find the Motions to File Late Notice of Claim in the three subcases listed above.
7. On Wednesday, June 28, 2000 I faxed the three Motions to IDWR, Beeman & Hofstetter, and Peter Ampe. Attached is a printout of the office fax log for June 28 indicating documents were sent. Also, I mailed a second copy of each motion to the IDWR Document Depository and the U.S. Department of Justice Environmental and Natural Resources Division.
8. Further Affiant sayeth naught.

Dated this 29 day of June, 2000.

Case 39576

Subcase 36-00003C

STANDARD FORM 4

MOTION TO FILE AMENDED
NOTICE OF CLAIM

INSTRUCTIONS

This form is used to file a late Notice of Claim or an amendment to a Notice of Claim in a reporting area where the Director's Report has been filed. Forms may be obtained from the SRBA Court, the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form. If you copy or reproduce this form, please copy on both sides with the even number pages upside down.

The water right number for your late or amended claim must be indicated above in the blank space following "Subcase". You must use a separate form for each late or amended Notice of Claim.

By filing a *Motion to File Late Notice of Claim* or a *Motion to File an Amended Notice of Claim*, you certify that it is well-grounded in fact; is warranted by existing law or a good-faith argument for the extension, modification or reversal of existing law; and is not filed for any improper purpose, such as to harass, cause unnecessary delay, or needlessly increase the cost of litigation.

____ I have read SRBA Administrative Order 1, Rules of Procedure (amended Sept. 30, 1996).

My name is: Lynn J. and Kathy L. Babington

My address is: 2849 S 850 E, Hagerman, ID 83332

My phone number is: Work: (208) 837-4860 Home: (208) 837-4860

I am an attorney representing: Lynn J. and Kathy L. Babington

My name is: Patrick D. Brown

My address is: Patrick D. Brown, P.C.

My phone number is: (208) 644-1967

MOTION TO FILE LATE NOTICE OF CLAIM

A Motion to File Late Notice of Claim will require a hearing before the Presiding Judge.

____ I did not file a Notice of Claim to the use of water in the SRBA because:

The Motions for Late/Amended Claims for Water Right Nos. 36-00003, 36-00005, along with 36-00019 are made in order to conform the pleadings to the proof previously given at trial in the 36-00003 subcases and to conform to the Memorandum Decision and Order on Challenge, issued by Presiding Judge Wood, November 23, 1999.

Those three rights are described with the same point of diversion, priority date, have contiguous places of use on adjacent properties, and have been used together on the properties known as the "Buckeye Ranch." The purpose of the Motions for Late Claims and Motions to Amend Claims is in order to accurately reflect the nature and extent of use as set forth in the 1932 New International Mortgage Bank Decree, and the subsequent history wherein changes in place of use and commingling of the rights have occurred. The changes also reflect the deeded history and actual use of the rights, as described as controlling by Judge Wood's Memorandum Decision. The amended claims and late claims, read as a whole, do not enlarge the amount of water previously claimed under the 36-00003 claims and subcases.

____ I filed a Notice of Claim and elected to defer judicial proceedings on my domestic or stock watering use. I desire to reinstate my Notice of Claim for domestic or stockwatering use.

I am providing legal and factual documentation for my claimed use of water. You must describe these documents and attach a readable copy. (You do not need to fill this out if you are reinstating a Notice of Claim for domestic or stockwatering use, but you must attach a copy of your Notice of Claim.)

I have attached:

☒ A fully completed Amended Notice of Claim (available from IDWR), a map.

— A claim filing fee for a domestic and stock watering use. IDWR may charge this fee pursuant to I.C. § 42-1414. To determine this amount, contact IDWR at (800) 451-4129. I have enclosed a check payable to: State of Idaho Department of Water Resources in the amount of \$25.00.

☒ A claim filing fee and a late claim fee for those claims other than a domestic or stock watering use for which a notice of claim was not filed. To determine this amount, contact IDWR at (800) 451-4129. I have enclosed a check payable to: State of Idaho Department of Water Resources in the amount of \$_____.

Follow these instructions regarding the hearing on this motion.

1. Contact the Clerk of the SRBA Court (208-736-3011) to request a hearing date and time.
2. Fill in the following information:

IN THE DISTRICT COURT OF THE FIFTH JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF TWIN FALLS

In Re SRBA	)	SPECIAL MASTER’S REPORT
	)	
Case No. 39576	)	FINDINGS OF FACT AND
	)	CONCLUSIONS OF LAW
	)	
	)	FOR WATER RIGHT 36-00003C
	)	

I. FINDINGS OF FACT

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990). The Director of the State of Idaho Department of Water Resources examined the water system for this reporting area. The *Director's Report* contained a recommendation or abstract for the elements of this water right.

All objections, except for season of use, were resolved at trial. After the trial, the court entered *Findings of Fact and Conclusions of Law* (July 29, 1998), incorporated by reference herein. As to season of use, IDWR has informed the court that it intends to recommend February 15 through November 30 as the season of use in the Hagerman Valley in a forthcoming Director's Report. All parties, including the claimants, will be able to object to that recommendation when the Director's Report is filed. Until that time, the court will recommend February 15 through November 30 for the irrigation use in this water right, with the understanding that the season of use for the irrigation claims are not final.

II. CONCLUSIONS OF LAW

Therefore, based on the file and record herein, IT IS RECOMMENDED that this water right be decreed with the elements as set forth in the *Partial Decree Pursuant to I.R.C.P. 54(b) for Water Right 36-00003C*.

Nick,

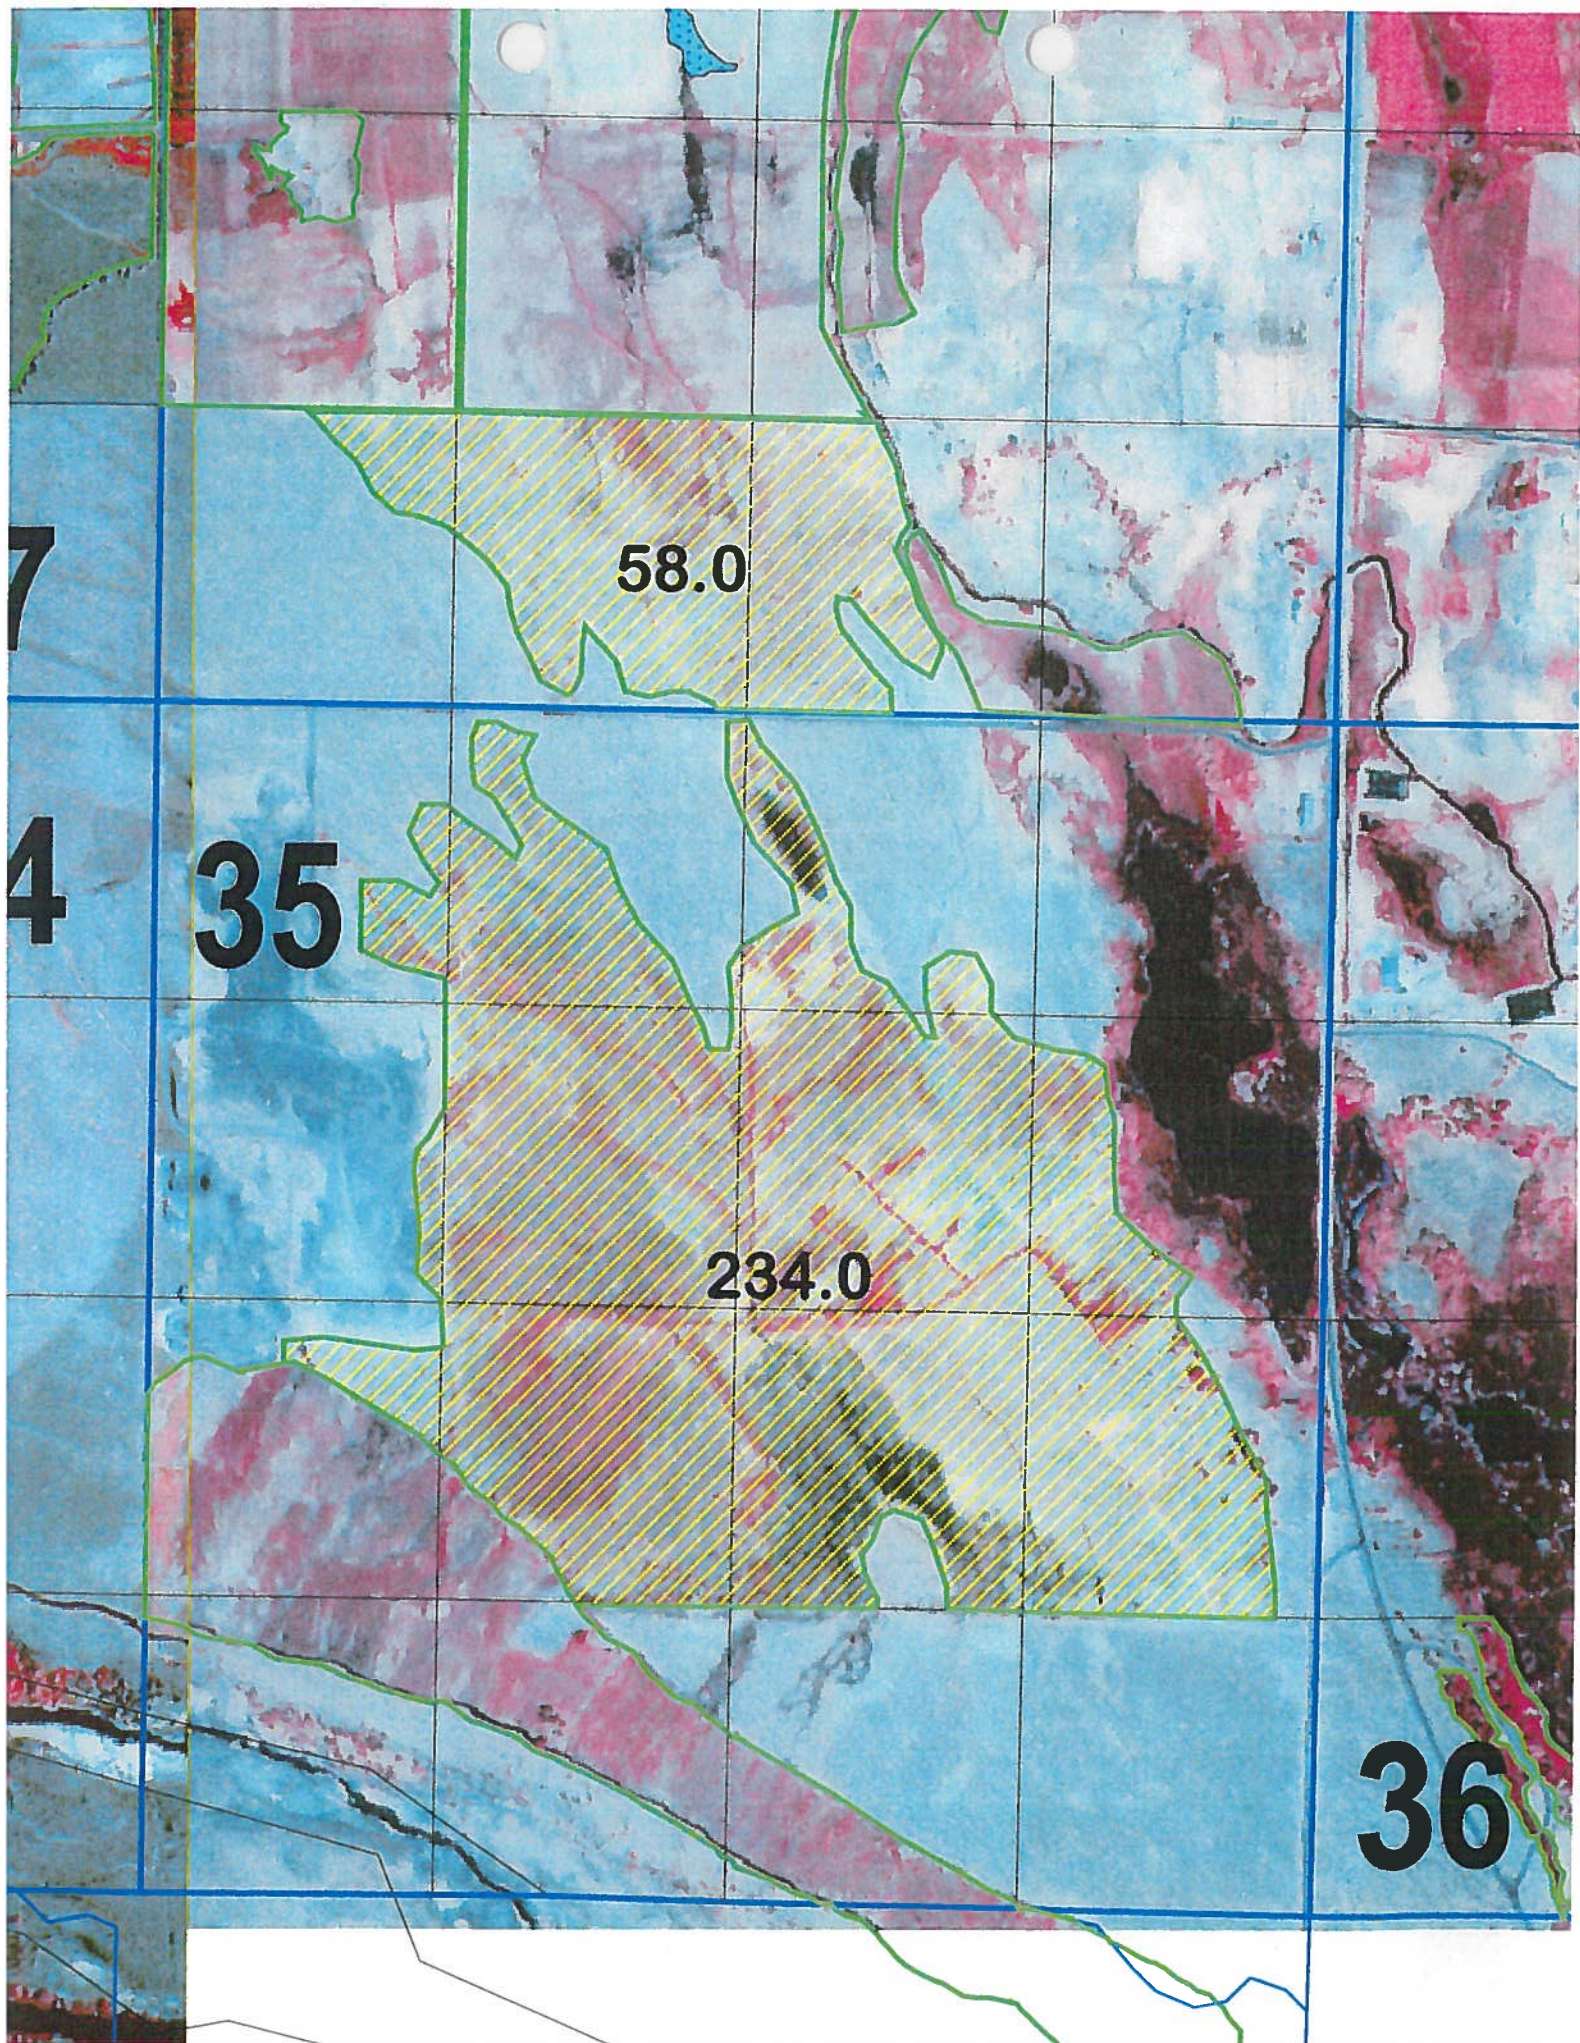

I Just spoke with John Simpson about the acres and issues... He seemed to agree the acres were close to a resolution (320-350 ac.) and I told him my latest GIS edits show about 320 acres. He thought we were trying to come to an agreeable acreage PLUS a duty of water for the full 20 cfs. I told him you and I had discussed this earlier today and concluded the same. He has been trying to call you to confirm this idea. He will contact Brockway to see how the duty numbers work with the 320 acres and I offered to forward these numbers along with this email to see if our staff can live with the duty of water.

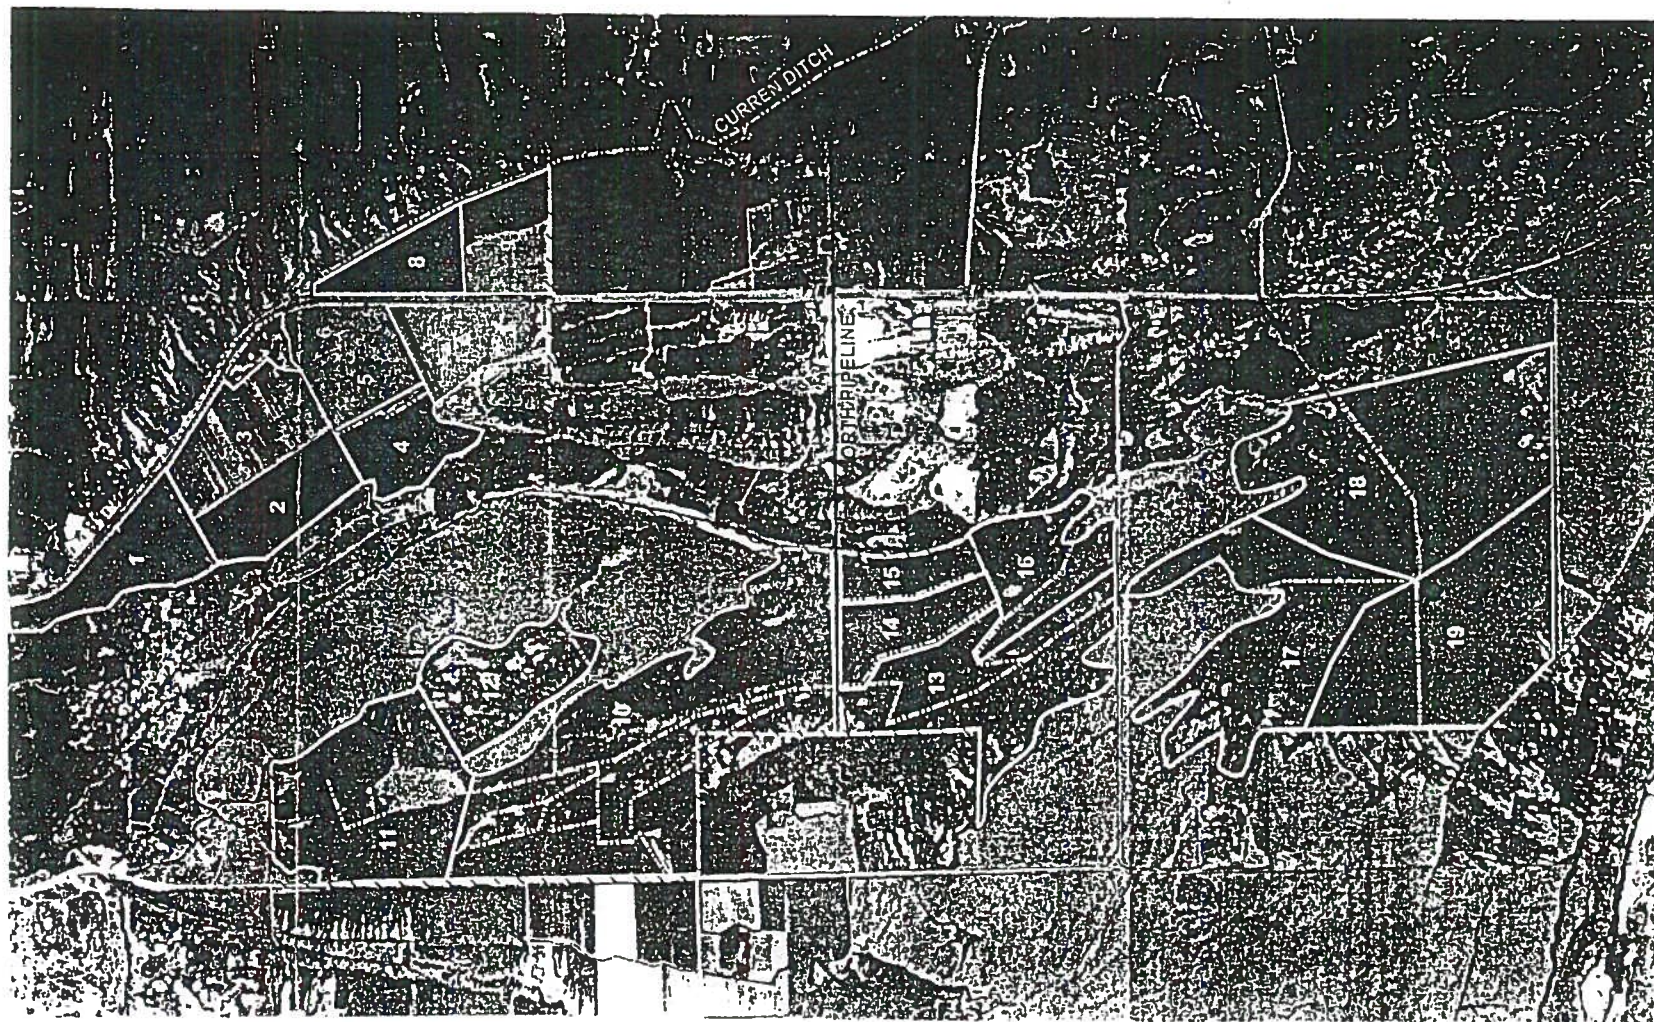

If you get a chance maybe you can give John S. a call...

Place of Use

Historical Use: all three water rights have historically been used on the subject property at various times as illustrated by historical data previously submitted.

This historical use is further supported by the three Claims for Water Rights filed by the Rosholt Law Firm.

Had the 36-00004 right been adjudicated at the same time as the 36-00018 and 36-00015, this administrative error of "Place of Use" might have been eliminated.

Place of Use is further supported by the following documents:

Agreement for Sale
Transfer Deed
Pasture Lease Agreement

These documents were not discovered prior to the 36-00018 and 36-00015 adjudication, thus the error in "Place of Use" of these two water rights.

RE: Transfer of Rights 36-00018/36-00015

DATE: April 12, 1999

I will be delivering to IDWR in Boise this date, the Exhibit Boards referenced herein.

I would like to summarize in writing the meeting of April 9, 1999. Due to schedules and illness, several parties either were absent or had to leave early. After several hours of negotiations, no resolution was reached. The meeting turned into a debate rather than a cohesive plan for effectuating the transfer.

The immediate problem: the Judge has stated that a SF5 must be signed by Wednesday, April 14, 1999.

Discussion was held concerning the criteria for determining this transfer. Chuck Brockway, Sr. inquired as to whether the photos were the sole source of determining irrigated acres. IDWR's response was that unless there were affidavits as to irrigation practices and acres irrigated, the photos would be the information upon which they would base their decision.

There are two factors which IDWR must consider in making their determination as to the Place of Use in this transfer.

1. The criteria in the Idaho Code 42-222, and
2. The historical information concerning acres irrigated.

Idaho Code 42-222 requires the director of IDWR to examine all the evidence and available information, and specifically issues set out in 42-222 must be addressed.

...the change does not constitute an enlargement in use of the original right.

IC 42-1416B(5)(a) "Expanded use" means an increase in the number of acres irrigated, or other additional use, under a valid ground water right without any increase in the rate of diversion or volume of water diverted."

Dovel v. Dobson, 122 Idaho 59, 831 P.2d 527 (1992) The transfer of water to divert 1.6 cfs of water to three separate fields did not result in an enlargement of the existing right even though consumptive use to one of the fields had been forfeited by nonuse.

The fact that the entire 560 acres has not been consistently irrigated over the 90 plus years should not prohibit the transfer. There has been no forfeiture, and there have been periods of time when the entire water right could not be delivered. Engineering studie proved up the duty of water for 483 acres.

Section 35 and portions of Section 26 have historically irrigated 560 acres. There are numerous documents relative to the Weatherby water (36-00015) and the Curran water (36-00018) substantiating this fact:

EXHIBIT BOARD NO. 1

1. Certificate of Completion of Works (Curran water) dated October 31, 1918, which identifies 520 acres in Section 35 as being the section for place of use of this water.

2. Engineer's Map (1918) showing Section 35 being owned by F. D. Brown showing the portion of Section 35 historically irrigated with the Curran water.

3. Certificate of Completion of Works dated October 31, 1918 issued by Fred A. Wilkie, State Engineer of the State of Idaho showing this Section as being the land to which this water is applied.

4. Deposition of Holder, F. D. Brown, dated March 21, 1918, testifying that the water has been turned into the works and is "running full of water". (Curran water on the 560 acres).

5. Deposition of Witness, Nat Owsley, dated March 21, 1918, describing the capacity of the "works" delivering the Curran water to Section 35.

6. Deposition of Witness A. T. Ingalls, dated March 21, 1918, describing the capacity of the "works" delivering the Curran water to Section 35.

EXHIBIT BOARD NO. 2

1. Indenture Agreement dated April 27, 1911, wherein The Buckeye Land Company, Inc. sells to Henry Bryant, thirty-five (35) inches of water to be used and applied on Lots numbered one and two (1 & 2) of Section Thirty-five (35), said water to be delivered from the Buckeye Ditch.

This document shows that water was historically delivered to the corner of Section 35 in question.

2. 1946 aerial photo showing the ditch system to Section 35 from the Buckeye Ditch.

3. 1964 aerial photo showing the ditch system to Section 35 from the Buckeye Ditch.

EXHIBIT BOARD NO. 3

1. 1946 aerial photo showing the irrigated acres reference in board documents.

2. 1918 Engineer Drawing indicating the location of a pipeline running parallel to Highway 30, which delivered water to the NE1/4 of the NE1/4 of Section 35, which was irrigated with the Weatherby water (IDWR determined that this 1/4 section could not have been irrigated by Weatherby water).

3. 1928 Engineer Drawing showing pipelines and the NE1/4 of the NE1/4 of Section 35 being irrigated by the Weatherby water.

4. Proof of Application of Water to Beneficial Use (Weatherby water) Deposition of Witness, Fred J. Vader, dated June 28, 1928, testifying to the acres being used for irrigation in Section 26 and the NE1/4 of the NE1/4 of Section 35.

5. 1911 Decree showing the Weatherby Water being decreed to the Ormsby Land and Livestock Company (then the owner of the Bar S property) in Section 26 and Section 35.

The total acreage referenced in these documents is 560 in Section 35 and the portions of Section 26 in question. These documents show that historically at least "483 acres" (as Decreed in Water Rights 36-00015 and 36-00018) were irrigated.

EXHIBIT BOARD NO. 4

1. 1946 aerial photo with colored arrows showing the North pipeline and the pipeline heading south which irrigated the NE1/4 of the NE1/4 of Section 35.
2. Photos of the pipeline from the North pipeline used to irrigate the NE1/4 of the NE1/4 of Section 35.

EXHIBIT BOARD NO. 5

1. Photos of the ditch system from the "North Bar S" in Section 26 to the South quarter sections.
2. Photos of the old gates and pipeline used to irrigate the south portion of Section 26.

EXHIBIT BOARD NO. 6

A number of documents support the use of 18/15 water on Section 35 and Section 26.

1. 1932 New International Decree.
2. Agreement for Sale of Spring Valley Ranch, Inc.
2. Corporate Warranty Deed.
3. Transfer Deed.

Idaho Code 42-222 further states:

...the change is consistent with the conservation of water resources within the state of Idaho.

Idaho Code 42-1501 references minimum stream flow and the Legislative Purpose. Buckeye Farms, Inc. is complying with this statute by way of allowing a major portion of their water rights to be diverted into Billingsley Creek for five (5) months of each year, and they will use these waters after it has been beneficially used in Billingsley Creek.

... is in the public interest as defined in section 42-203A(5)

- (a) this transfer will not reduce water supply
- (b) water supply is sufficient
- (c) application is made in good faith
- (d) financial resource is not an issue
- (e) this transfer will not conflict with public interest
- (f) this transfer complies with the state's conservation of water resources.

Again, Buckeye's allowing water to flow through Billingsley Creek before their use of their water rights, certainly supports this criteria of ID 42-222 as to public interest.

...significantly affect the agricultural base of the local area

This transfer does not negatively affect the agricultural base.

...The transfer of a right to the use of stored water for irrigation purposes shall not constitute an enlargement in use of the original right even though more acres may be irrigated, if no other water rights are injured thereby.

This criteria does not apply in that this transfer is not to the use of stored water for irrigation purposes.

This transfer is only asking for 483 acres to be placed where historically 560 acres have been irrigated, yet this statute would allow more acres to be irrigated with stored water.

CONCLUSION

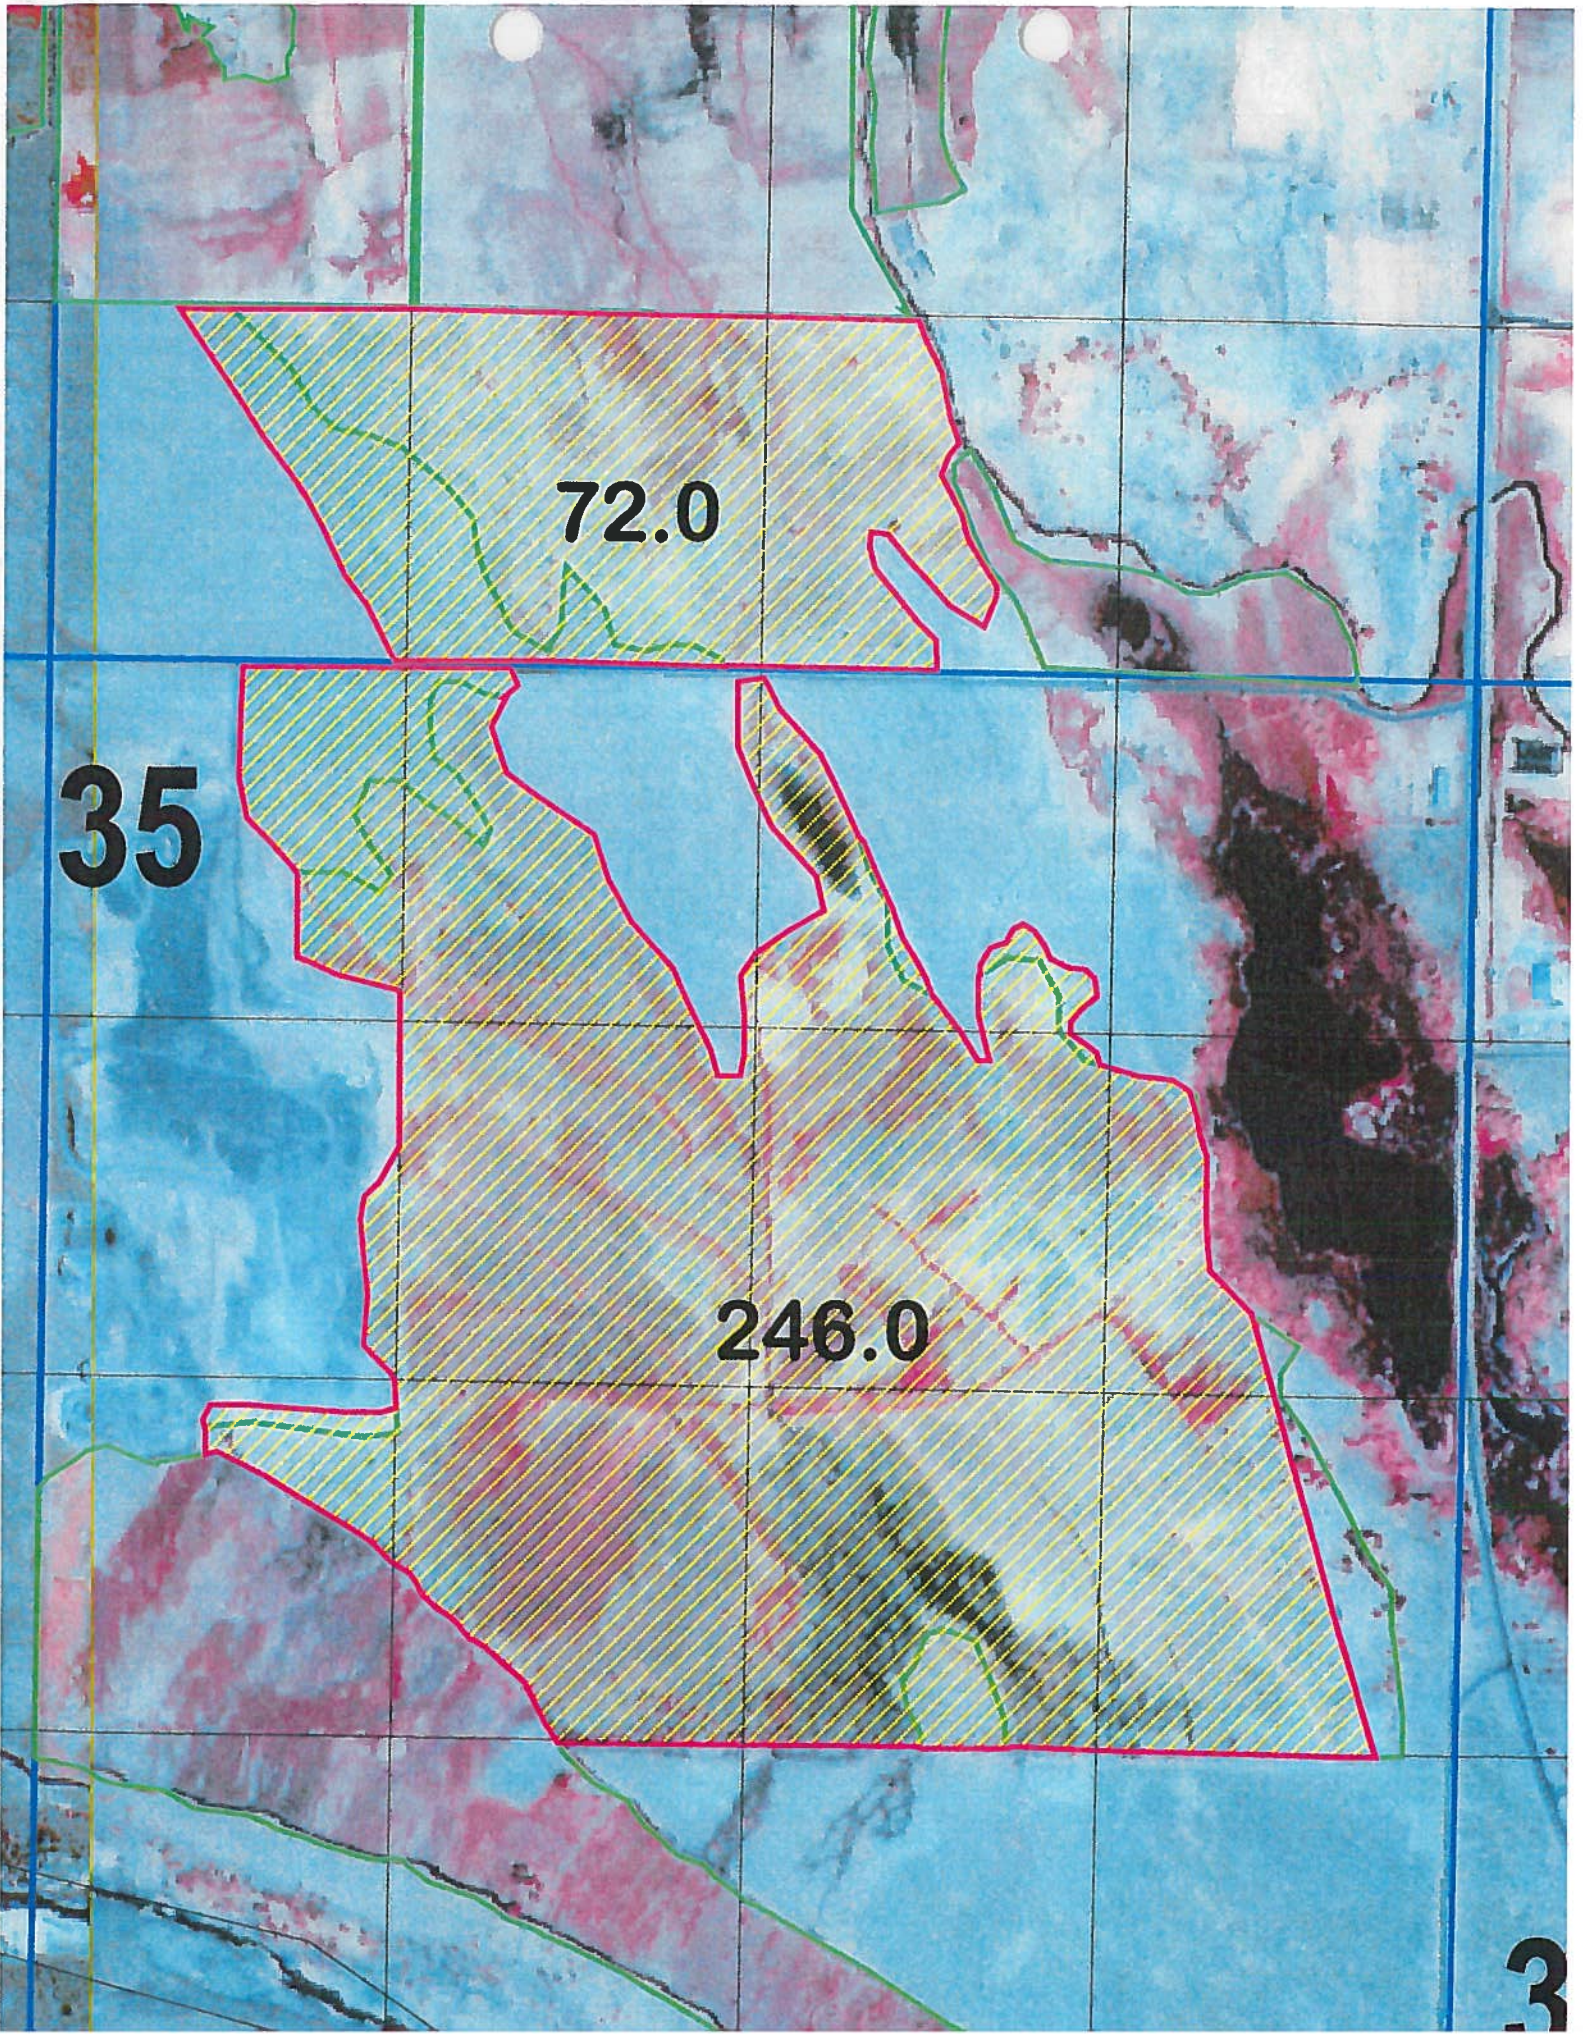

In our prior meeting in Twin Falls with Dave Tuthill, Nick Spencer, et al, the transfer was initially discussed, as well as historical irrigation practices. Issues of the protestants were also discussed. The issues of the protestants have been addressed. Buckeye Farms, Inc. and Western Legends LC (who was originally one of the protestants, and has withdrawn its protest), with the assistance of Chuck Brockway, Sr., is ready,

willing and able to obtain the withdrawal of all protests from protestants, having addressed their concerns immediately upon IDWR's approval of this transfer.

IDWR has stated from the inception of the Settlement Negotiations of 36-00004 that the removal of the 36-00015 and 36-00018 rights from the North Bar S must take place prior to the decreeing the 36-00004 right.

- All parties have complied with the requirement of the IDWR. Substantial evidence as to the historical use in Section 35 and Section 26 has been presented.
- IDWR stated that if Buckeye could prove that 483 acres were available in the South Bar S that either an administrative transfer or statutory transfer could take place, based on the fact that had the 04 right been adjudicated at the same time as the 15/18 right, this error in "place of use" would not have occurred.
- Time is of the essence in the conclusion of this matter due to the ruling of the Judge in the 36-00004. All parties to this adjudication have settled their differences, and IDWR needs to uphold their oral commitments in decreeing this 04 water right.
- Photos presented showing irrigated acreage are 5 examples of 1 day in 1 year, out of 90 plus years of irrigation on this property. These photos were presented to support IDWR's resolution to correcting an error in place of use.

IDWR has a fiduciary duty to complete this transfer based on their oral representations made to Buckeye Farms, Inc. and Western Legends LC., and based on the substantial evidence which more than adequately supports the Idaho Code requirements of this transfer.

MOTION TO COMBINE CLAIMS

★ ★ ★ ★ ★ ★ ★

MOTION TO COMBINE CLAIMS - 1

should be decreed as such as the evidence at trial established that both of the splits claimed by Babington have been used as a singular right upon the entire parcel of ground claimed to be irrigated under the two splits by Babington. Similarly, proof at trial established that Simcoe's two splits have been continuously used as a singular right through a singular irrigation system on the total parcel claimed and found to be irrigated on the Simcoe property.

In other words, as the trial testimony of Lynn Babington established, the two parcels of ground relating to his splits have continuously been irrigated through a system which took water from the Buckeye ditch, into gated pipe, out of the gated pipe onto the field corrugates. That water travels across the parcel identified as the place of use for 36-00003C and, still continuing in the same corrugates, across the property irrigated under 36-00003L claim. Mr. Babington corroborated this claim with exhibits, particularly no. 24, showing the gated pipe out of which the water emanates to cross the fields identified as the places of use for claims 36-00003C and 36-00003L. See, Exhibits 25-27. In short, although the Babington's acquired the properties in two separate purchase transactions (presumably the reason for splitting of his water into 36-00003C and 36-00003L), the use of the water has been continuously commingled and applied through a singular irrigation system. Consequently, it is impossible for the Court to decide that the record establishes separateness between the splits in any regard. There is unity in place of use, a singular method of application, a singular system, and unrefuted testimony that the two splits have always been used as one.

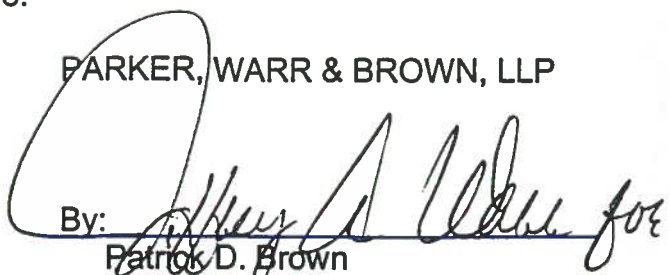

Therefore, Babington's claims should be combined, and a decree entered consolidating the quantity and places of use. Anything else fails to reflect the facts established at trial.

Similarly, Doyt Simcoe testified that the places he irrigates under his two splits have shared a common right, a common irrigation system (presently wheel lines) and have otherwise been treated as a single field for irrigation. Dan McFadden corroborated this use, and established that it was the use in 1987 when he hayed the parcels. Therefore, Simcoe's two splits should be combined into the singular use established by the unrefuted evidence. See, Exhibits 9, 12 and 28.

Oral argument is requested on this motion at the earliest convenience of the Court.

RE:

DISCUSS -003C, -003L

HE CAME IN TO GET SOME INFORMATION ON THESE TWO RIGHTS HE IS OBJECTING TO IN THE SRBA. WE DISCUSSED A NUMBER OF RELATED ISSUES ASSOCIATED WITH THESE CASES AND I CLEARLY INFORMED HIM OF THE DISCLAIMER THAT I AM NOT AN ATTORNEY; SOME OF MY STATEMENTS ARE ONLY MY OPINIONS OR OBSERVATIONS.

I EXPLAINED TO HIM THE SUMMARY OF THE SPLITS RECOMMENDED FOR THE DECREED RIGHT 36-00003 FOR 20.00 CFS. AT THIS DATE THERE IS ONLY 0.46 CFS REMAINING IN THE BALANCE OF RIGHT. IT IS MY OPINION THIS REMAINING PORTION SHOULD BE CONSIDERED THE RIGHT THAT IS LISTED AS FORFEITED: 36-00003M. IF THE COURT SHOULD OVERTURN THAT RIGHT THIS WATER WILL ALL BE USED TO FILL A PORTION OF THAT CLAIMED RIGHT. EVEN IF THE RIGHT IS DISALLOWED, NO REMAINING CLAIMANT CAN SHOW OWNERSHIP OF THIS PORTION WHICH HAS BEEN FORFEITED.

I TOLD HIM HOW WE WERE PREPARED TO RECOMMEND HIS AMENDED CLAIM 36-00003C RE: THE NON-IRRIGATION USES; THEY WILL NOT BE RECOMMENDED BY IDWR. I REMINDED HIM THAT NOTHING I SAY IS INTENDED TO PREVENT HIM FROM PURSUING WHAT HE THINKS HIS PROPER RIGHT SHOULD BE IN THE SRBA COURT.

WE DISCUSSED THE RECOMMENDATION AND PARTIAL DECREE ISSUED TO THE BUCKEYE FARMS UNDER RIGHT 36-00003H. I TOLD HIM I WAS NOT A PART OF THE RESOLUTION OF THIS RIGHT (NOR THOSE OF 36-00001 & 36-00002) AND THAT I HAD SOME RESERVATIONS ABOUT THE AMOUNT OF WATER THAT HAD BEEN ALLOWED BY THE SF5. HOWEVER, THESE RIGHTS ARE DECREED BY THE SRBA COURT AND IT IS A FINALIZED MATTER.

WE DISCUSSED NUMEROUS HYPOTHETICAL SOLUTIONS TO THE PROPER/CORRECT/ACCURATE WAY TO REVIEW AND DECREE RIGHTS WHICH ARE SPLIT INTO PIECES LIKE THIS ONE HAS BEEN. OF COURSE WITH ALL WE KNOW NOW IT APPEARS WE COULD RESOLVE ALL THIS MUCH MORE FAIRLY, HOWEVER, I REMINDED LYNN OF THE PERIOD DURING WHICH THE SF5 WAS SIGNED FOR -0003H. DURING THAT TIME THE COURT WAS NOT ALLOWING

ANYTHING FROM THE DEPT. TO BE USED IN TRIALS AND MOST EVERYTHING IN DISPUTE WAS BEING TREATED WITH SUMMARY JUDGEMENTS. THE DEPT. TRIES TO AVOID TRIALS IF POSSIBLE BY SETTling WITH THE PARTIES INVOLVED IN AN OBJECTION; IT APPEARS THERE WAS A MUTUAL AGREEMENT TO SETTLE AS THEY DID.

I REMINDED HIM THAT NO OTHER PARTY CHOSE TO OBJECT TO THE CLAIM EVEN THOUGH IT DID CLAIM THE ENTIRE AMOUNT OF THE RIGHT INVOLVED.

HEARING

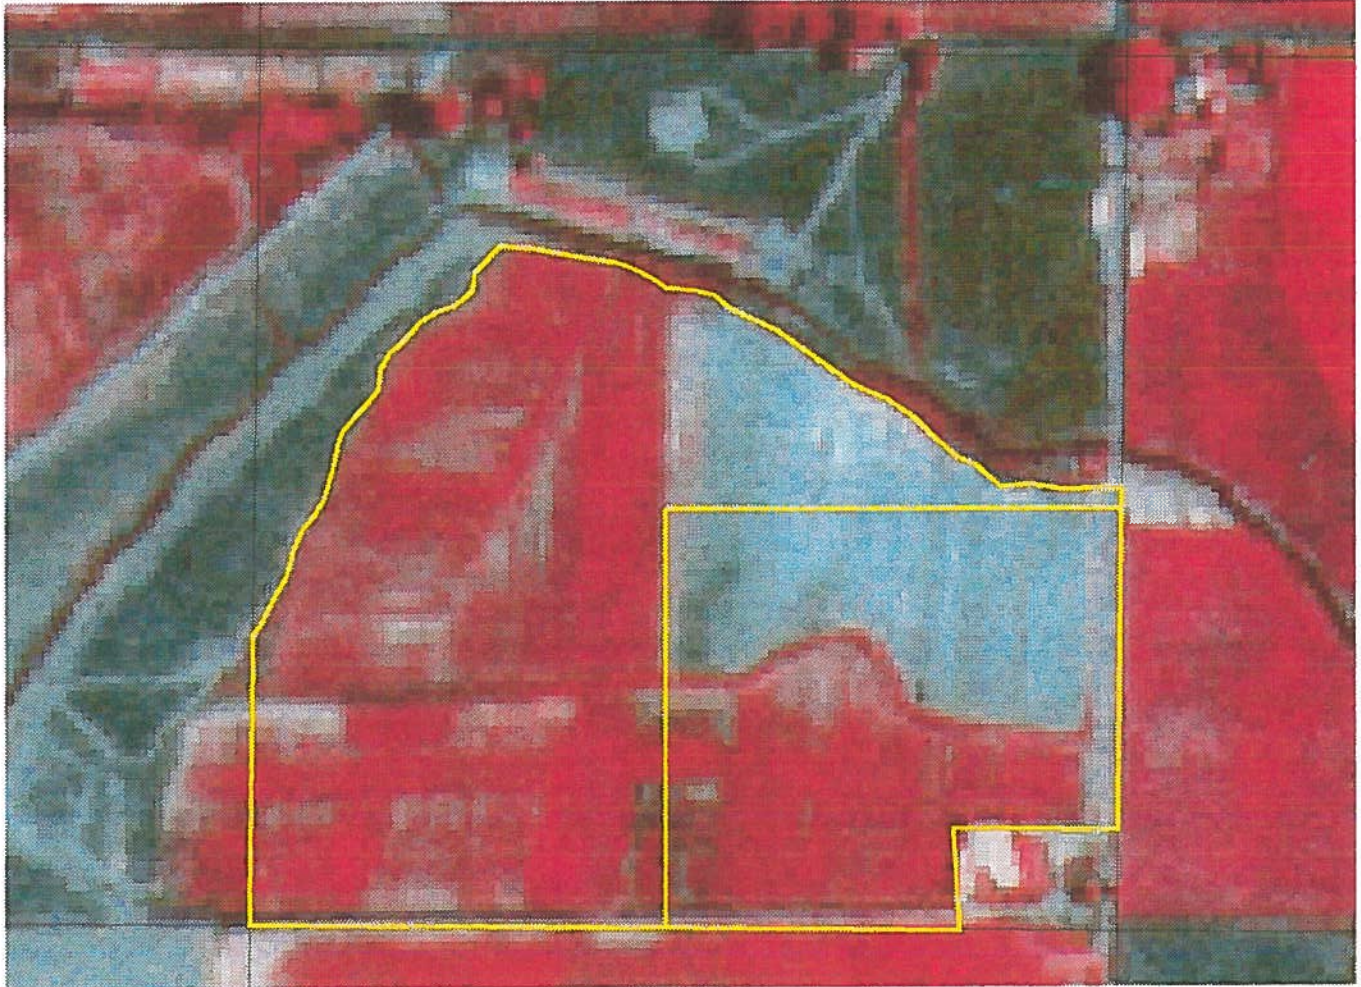

HE FIRST ASKED ABOUT OBJECTING TO THE D & S CLAIM HE RECEIVED, HE WANTED TO KNOW IF THE RATE AND THE 13,000 GPD LIMIT WERE CONTRADICTORY. I TOLD HIM THE FLOW RATE IS CAPABLE OF PRODUCING IN EXCESS OF THE 13,000 GPD AMOUNT BUT THE DOMESTIC RIGHT IS LIMITED TO THAT VOLUME BY IDAHO CODE IN THE DOMESTIC RIGHT DEFINITION.

WE DISCUSSED THE UPCOMING HEARINGS ON THE 20TH OF OCTOBER. I EXPLAINED THE PROPOSED PROCESS THAT WOULD TAKE PLACE ON THAT DAY, A PERIOD FOR SETTLEMENT FOLLOWED BY A BRIEF COURT HEARING TO SET A TRIAL IF NEEDED. IF THE OBJECTION COULD BE SETTLED THERE WE ARE PREPARED TO DRAFT A SF5 TO BE SIGNED THERE.

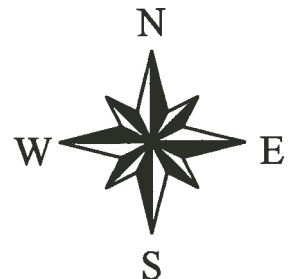

HE REQUESTED A COPY OF HIS RIGHTS AS RECOMMENDED, 36-00003C & 36-00003L, A COPY OF THE 1932 DECREE DESCRIBING HIS PORTION OF THE RIGHT, AND HE WANTED TO GET AN OBJECTION FORM FOR THE DOMESTIC CLAIM. (10/9/97 - ALL THESE DOCUMENTS WERE SENT TO HIM. I PREPARED DRAFT RECOMMENDATIONS OF HIS RIGHTS BECAUSE THE RIGHTS AS LISTED IN THE DIRECTOR'S REPORT WILL BE CHANGED SUBJECT TO THE COURT'S DIRECTIVES, ALSO 36-00003L IS SPLIT FROM A RIGHT IN THE DIRECTOR'S REPORT.)

REPORT REGARDING CLAIM TO WATER RIGHT NO. 36-00003C

The Director of the Idaho Department of Water Resources (IDWR) submits this report regarding claim to water right no. 36-00003C in response to the request of Special Master Haemmerle, pursuant to Idaho Code §42-1412(4) and the court's Order Re: Contested Claims for Amounts Claimed in Excess of .02 CFS. This report was prepared under the supervision of Karl J. Dreher, Director, David B. Shaw, Adjudication Bureau Chief, and David R. Tuthill Jr., Acting Adjudication Bureau Chief for IDWR. The following persons assisted in the preparation of the following portions of this report:

David B. Shaw, Adjudication Bureau Chief, reviewed and verified this Report Regarding Claim to Water Right No. 36-00003C. The Affidavit of David B. Shaw describes Mr. Shaw's education and work experience, and is incorporated by reference herein. Mr. Shaw also reviewed IDWR's Report Regarding Evaluation of Irrigation Diversion Rates, described below.

Jeff Peppersack, Adjudication Engineer, prepared and verified IDWR's Report Regarding Evaluation of Irrigation Diversion Rates, which is incorporated by reference herein. The Affidavit of Jeff Peppersack describes Mr. Peppersack's education and work experience, and is incorporated by reference herein. Mr. Peppersack also reviewed IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area, described below.

David R. Tuthill Jr., Acting Adjudication Bureau Chief, prepared IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area, which is incorporated by reference herein. Mr. Tuthill also reviewed this Report Regarding Claim To Water Right No. 36-00003C. The Affidavit of David R. Tuthill Jr. describes Mr. Tuthill's education and work experience, and is incorporated by reference herein.

Steven C. Clelland, Senior Water Resource Agent, investigated and prepared the preliminary recommendation for claim no. 36-00003C. The Affidavit of Steven C. Clelland describes Mr. Clelland's education and work experience, and is incorporated by reference herein. The affidavit also includes a general description of his investigation of claims in the Hagerman area.

I. INVESTIGATION AND RECOMMENDATION OF CLAIMS GENERALLY

IDWR's general methodology for the investigation and recommendation of claims is described in Appendix A, which is incorporated herein by reference.

II. WATER RIGHT NO. 36-00003C

A. Basis of Claim

Claim no. 36-00003C was filed with IDWR by Michael J. Engles on August 18, 1988.¹ A notice of change in ownership was filed with IDWR March 4, 1992, informing IDWR of a change in ownership to Lynn J. and Kathy L. Babington. The claim is to a portion of one of three rights decreed to the New International Mortgage Bank in the *New International Mortgage* decree, entered in 1932.² The water rights decreed to the bank are numbered in IDWR's files as water right nos. 36-00001, 36-00002, and 36-00003. The first two rights are to water from Riley Creek, the third is to water from Billingsley Creek. All were decreed for use on the same lands, and all were decreed for irrigation "and for domestic and other purposes thereon." Water right nos. 36-00001 and 36-00002 were claimed by and recommended to Buckeye Farms, Inc.³ Portions of right no. 36-00003 were claimed by and recommended to various claimants.

B. Name and Address of Claimant

The name and address of the claimant set forth in the claimant's motion for summary judgment is the same as recommended in the director's report.

C. Source of Water

The source of water set forth in the claimant's motion for summary judgment is Billingsley Creek. The source of water is described in the director's report as Billingsley Creek tributary to Snake River.

The director's report includes the body of water to which the source of the right is tributary for each water right in the director's report, except for rights to ground water. IDWR adopted this standard for the description of the source of water

¹ The original notice of claim is currently located in the files of the SRBA District Court, attached to IDWR's response to the claimant's objection.

² *New International Mortgage Bank v. Idaho Power Co., et al.*, Equity No. 1602 (D.S.Id. 1932), at pp. 3-4.

³ Objections were filed to both 36-00001 and 36-00002; SF5s have been filed and the special master has issued preliminary special master's reports in both subcases.

rights because there are so many instances, sometimes in the same administrative basin, where different surface water sources bear the same name.⁴

D. Date of Priority

The priority date set forth in the claimant's motion for summary judgment is the same as recommended in the director's report.

E. Point of Diversion

The notice of claim listed two points of diversion, one in section 11 and one in section 27. The director's report recommends a point of diversion in section 11. The objection did not contest the point of diversion. The claimant's motion for summary judgment lists the two points listed on the notice of claim.

The point of diversion is the point at which water is diverted from the source. For this right, that point is in section 11, which is the heading for the Buckeye ditch. The point in section 27 is the point at which water is diverted from the Buckeye ditch to the claimant's lands. Because that point is on the ditch, not on the source, that point is not a "point of diversion" for this right.

F. Purpose of Use

The purpose of use claimed in the notice of claim and recommended in the director's report is irrigation. The objection did not contest the purpose of use. The claimant's motion for summary judgment now seeks to add stockwater, wildlife, recreation, aesthetics, and "diversion system maintenance."⁵

The description of the purposes of use of this right in the decree is ambiguous in that it describes the purposes of use for the three New International Mortgage Bank rights as irrigation "and domestic and other purposes," rather than specifically

⁴ IDWR relied upon the following in reaching its conclusion: Idaho Code §42-1411(2) (which provides that the director shall determine the source of the right to the extent the director deems appropriate and proper to define and administer water rights acquired under state law).

⁵ The filing fee for claims other than small domestic and stockwater claims consists of a \$50.00 flat fee, plus a variable fee of \$1.00 per acre for any claimed irrigation use, plus a per cfs variable fee for other claimed purposes of use. The filing fee paid for this claim was limited to the purposes of use claimed in the notice of claim. Filing fees are set forth in Idaho Code §42-1414 and IDWR's Adjudication Rules, IDAPA 37.03.01 *et seq.*

identifying each purpose of use for each right.⁶ IDWR's investigation confirmed the use of water for irrigation. Neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for the other purposes listed in the motion, either pursuant to the right as originally appropriated or as currently used.⁷ Such information is necessary not only to confirm the use but to quantify the amount of water beneficially used for that purpose.

G. Quantity of Water Used

The quantity claimed in the notice of claim and recommended in the director's report is 0.30 cfs. The objection contests the quantity element, but does not state the quantity claimed. The claimant's motion for summary judgment states a quantity of 0.30 cfs, the same as recommended. Any further information as to the basis for IDWR's recommendation as to quantity therefore appears to be unnecessary.

H. Period of Year Water is Used for Each Purpose of Use

The notice of claim states a period of use of 3/15 to 11/01 for irrigation. The director's report states a period of use of 3/15 to 11/15 for irrigation. The claimant's objection states a period of use of 1/1 to 12/31. The claimant's motion for summary judgment states the period of use as "the irrigation season." The *New International Mortgage* decree does not state a period of use for irrigation.

The recommended season of use is consistent with season of use standards for irrigation developed by IDWR for various climatic regions throughout the state, which are based on a 75% chance of a 24 degree Fahrenheit frost. In addition, the director's report included general provision 12b, which allowed use of water for irrigation outside the season of use stated in the description of the individual right subject to certain conditions. In the Memorandum Decision and Order Re: Basin-Wide

⁶ IDWR relied upon the following in reaching its conclusion: *Morgan v. Udy*, 58 Idaho 670, 79 P.2d 295 (1938) (a water right decree that omitted the description of the point of diversion necessarily determined the point of diversion but was ambiguous as to its location).

⁷ IDWR relies upon the following in reaching this conclusion: Idaho Code §42-1427 (which allows an ambiguity in a prior decree or license to be resolved based on current beneficial use); the statement of the Presiding Judge that this section "cannot change or exceed the previously decreed or recorded element of the decreed or licensed right" nor "be used to claim an expansion of use beyond the beneficial use existing at the time the right was originally memorialized in a decree or license," Revised Memorandum Decision and Order on Basin-Wide Issue 4, dated May 17, 1995, at page 9; and the statement of the Presiding Judge that, "the purpose of use is defined by the intentional application of water to an intended beneficial use of water," Memorandum Decision and Order Re: Basin-Wide Issue 5, dated April 26, 1996, at page 8.

Issue 5, the Presiding Judge concluded that this general provision was not necessary and would not be decreed. This decision further provided that "all decrees for irrigation in the SRBA shall set the period of use as the "irrigation season." Order, pp. 15-16. The district court denied a subsequent motion for permission to appeal the decision. Pending any further proceedings on the decision, any further statement of the basis for IDWR's recommendation as to the season of use for irrigation appears to be unnecessary.

As to the season of use for other purposes of use stated in the claimant's motion for summary judgment, neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for other purposes, as noted in section F above. Therefore, IDWR does not have information that would confirm the season of use for the other purposes

I. Legal Description of the Place of Use

The legal description under item 8 in the claimant's motion for summary judgment is the same as the legal description of the place of use for irrigation recommended in the director's report. The number of acres following the legal description is the same as the number of irrigated acres per 40-acre subdivision recommended in the director's report.

As to the legal description of the place of use for other purposes of use stated in the claimant's motion for summary judgment, neither the claimant nor IDWR's investigation has yielded information that would confirm the beneficial use of water for other purposes, as noted in section F above. Therefore, IDWR does not have information that would confirm the place of use for the other purposes.

J. Annual Volume of Consumptive Use

The notice of claim states an annual volume of consumptive use of 30 AFY, or 3.0 AFY per irrigated acre. The annual volume of consumptive use recommended in the director's report is the same. The claimant's objection contests the recommended consumptive use, but does not state an amount. The claimant's motion for summary judgment states an amount of 45 AFY, or 4.5 AFY per acre. The Affidavit of Charles E. Brockway, submitted by the claimant in support of the motion for summary judgment, states "that 3.75 acre feet per acre per annum is the amount of consumptive use that is reasonable [in the Hagerman area] based upon a yield of ten tons [of alfalfa] per acre." Applying this standard, the total annual consumptive use volume would be 37.5 AFY.

IDWR developed standards for annual volume of consumptive use for the various climatic areas throughout the state. The standard for the area in which the claimant's place of use is located is 3.0 AFY. IDWR's recommendation is based on this standard. The development of IDWR's standards for annual volume of consumptive use is described in IDWR's Report Regarding Evaluation of Irrigation Diversion Rates. IDWR has conducted further analysis of the annual volume of consumptive use based on further information IDWR received subsequent to its original analysis. The further analysis is described in IDWR's Report Regarding Consumptive Use for Irrigation in the Hagerman Area. Based on this further analysis, IDWR recommends an annual volume of consumptive use of 3.5 AFY per acre, for a total of 35 AFY for this right.

K. Conditions on the Exercise of the Right and Other Necessary Matters

The recommendation of this right in the director's report includes the following remarks:

WATER IS DELIVERED THROUGH THE BUCKEYE DITCH.
0.10 CFS OF THIS RIGHT IS LIMITED TO USE FOR CONVEYANCE LOSSES IN
DELIVERY OF THIS RIGHT.

The claimant's objection seeks deletion of the conveyance loss remark. The claimant's motion for summary judgment seeks deletion of both remarks.

In response to the request of the Presiding Judge, the director filed an Amended Director's Report for Reporting Area 3 (Basin 36), which substantially reduced the number of general provisions in the director's report. Attachment 2 to the amended report explains the changes made to the general provisions, and further explains changes to the list of recommended rights necessitated by the changes to the general provisions. The amended report deleted General Provision 16, which set forth certain provisions as to conveyance losses. The conveyance loss remark in the description of the individual right is a corollary to the deleted general provision. As a result, the remark in the description of this right as to conveyance losses is no longer necessary. (Deletion of the remark does not change IDWR's recommendation as to the quantity for this right.)

In response to the request of the Presiding Judge, IDWR submitted IDWR's Report for September 19, 1995 Status Conference. In this report, IDWR indicated that it had reviewed its use of remarks in the description of the individual water right, both to address concerns identified by the court, and to separate explanatory material from material the Director recommends be included in the decree of water rights

APPENDIX A

A. INVESTIGATION AND RECOMMENDATION OF CLAIMS GENERALLY

To promote the accuracy and consistency of water right decrees, and to minimize the burden on the court and the claimants in a water right adjudication, the state has made the specialized expertise of IDWR available through IDWR's investigation and reporting function.¹

The resources the state has made available for this function, however, are limited. IDWR has the duty to conduct a reasonable investigation within the spending authority granted by legislative appropriation. Those resources are not sufficient for IDWR to exhaustively investigate each and every potentially relevant fact regarding each and every claim and to make a conclusive determination of the water right. Rather, IDWR reviews the claim and the information already available to IDWR, and conducts such further investigation as is reasonable to determine whether there is sufficient information to support recommendation of the water right to be decreed.

To make the most efficient use of the available resources, IDWR must make determinations as to what is a reasonable level of investigation for various classes of claims prior to making a recommendation to the court regarding any particular claim. IDWR has employed two primary mechanisms to identify a reasonable level of investigation. First, the statutes set criteria and IDWR has developed standards for various types of uses, requiring less information to support a claim to water within those standards and more information to support a claim outside those standards. Second, IDWR has adopted a "tier" approach, identifying classes of claims which for various reasons merit further investigation.

Generally, with claims based on beneficial use², IDWR conducts a "licensing type" field exam, which includes confirmation of the source, point(s) of diversion, purpose(s) of use, place(s) of use, and an examination of the water delivery system and the quantity of water beneficially used. IDWR also contacts the claimant to obtain information supporting the priority date claimed. This level of examination is conducted because there has been no prior administrative or judicial

¹ Idaho Code §§ 42-1410 and 42-1411.

² Water rights based on beneficial use are sometimes referred to as constitutional rights or grandfather rights.

confirmation of the existence and extent of a water right based on beneficial use.³

Generally, for water rights that have been previously confirmed by license or decree, IDWR begins its examination by comparing the claim to information already available to IDWR. Other information includes, for example, IDWR's decree files; license, permit and transfer files; remotely sensed data, including Landsat imagery of irrigated acres and aerial photography; watermaster reports; applicable laws and IDWR's interpretation of those laws in light of the water resource policies of the state; etc. If there are discrepancies between the claim and information already available to IDWR, IDWR conducts further investigation to resolve the discrepancy, which generally includes a field exam and/or contacting the claimant for further information. Thus, where there has been a prior judicial or administrative confirmation of the existence and extent of a water right, IDWR uses information already available to IDWR to limit its review to issues identified by its discrepancy analysis.

Finally, IDWR uses both the court-ordered notice of error process⁴ and the statutory objection process to identify claims which merit further review. If this further review yields new information that supports a different description of the water right, then IDWR will revise its recommendation (in the case of a notice of error) or submit a supplemental director's report or offer a standard form 5 (in the case of an objection), consistent with the new information.⁵

Further information as to IDWR's standards and procedures for the investigation and recommendation is set forth in IDWR's Claim Investigation Manual, Field Examiner's Handbook, Administrative Memorandums, and

³ IDWR conducts a more summary investigation of beneficial use claims limited to domestic and/or stockwater use up to 0.24 cfs.

⁴ The notice of error process, as originally conceived and implemented, was limited to disagreements between the claimant and IDWR as to fairly straight-forward "errors", such as clerical errors or other readily verifiable matters. Based on its experience in the test basins, IDWR has subsequently recommended that the notice of error process be expanded to address any type of perceived error, as well as to address disagreements between claimants.

⁵ This "tiered" approach to determining a reasonable level of investigation is embodied in the statutory framework for water right adjudications. See §42-1410 (which provides for the discretion of the director in determining the level of IDWR's investigation, and allows but does not require the agency to conduct hearings), and §42-1412 (which authorizes IDWR to submit supplemental reports, and authorizes the court or the parties to request further investigation by IDWR in contested subcases). The tiered approach embodied in the statutory framework promotes efficiency and minimizes the burden on the court and the claimants by providing a report/objection process to identify disputed matters, and reserving the highest level of investigation for disputed matters.

B. METHODOLOGY TO DETERMINE IRRIGATED ACREAGE

The area of irrigated acreage can be determined by information obtained from scaled and non-scaled photographs of the place of use supplied by one of several U.S. government agencies. The use of aerial photography by the U.S. government dates back to 1937, when the U.S. Department of Agriculture, Agricultural Stabilization and Conservation Service (ASCS, now known as the Farm Service Agency, or FSA) began photographing selected counties of the United States on a repetitive basis. This coverage continues today and aerial photos are used by the ASCS (FSA) to figure acreage planted on farms for purposes of managing farm programs. Photos used by IDWR typically include: ASCS photos and 35 mm color slides⁷; NAPP photos⁸; ortho-photoquads⁹; and U2

These documents set forth general standards and procedures and do not address all possible exceptions to the general standards and procedures. In addition, as a result of its experience in the test basins, statutory changes, judicial decisions, etc., IDWR has identified refinements and revisions to its standards and procedures for the investigation and recommendation of claims that have not yet been included in these documents.

Both the photos and slides are high oblique and vertical aerial photography. The ASCS photos are scaled and have selected features, such as roads, section lines, ditches, and field acreage superimposed on them by the ASCS. The color slides are simply color slides frequently taken with hand-held 35mm equipment. IDWR staff typically obtain copies (which are not scaled) of maps for lands claimed as the place of use during the investigation of the claims, either from the claimant or from the local ASCS office. Color slides may also be checked-out from the local ASCS office as needed; IDWR sometimes obtains the color slides as they are discarded by the local ASCS office.

NAPP (National Aerial Photography Program) photos are all color-infrared aerial photography. IDWR obtained coverage for most of the Snake River Basin, including all of the test basins; the photos are primarily from flights during 1987 and 1988, though some are from 1986 or 1989. The date of the flight is shown on the photo. NAPP photography is available from the U.S. Geological Survey Earth Resources Observation Systems (EROS) data center in Sioux Falls, South Dakota.

The full name for an ortho-photoquad is "orthographic photograph quadrangle." These are black and white photoimages prepared from aerial photographs that have been rectified to eliminate image displacement due to terrain relief that cover a systematically subdivided area of latitude and longitude. IDWR obtained coverage for most of the Snake River Basin, including all the test basins; the photos are primarily from flights during the 1970's. The date of the flight is shown on the quad sheet. Most of the orthophotos were obtained from the U.S. Geological Survey National Cartographic Information Center (NCIC) in Menlo Park, California. In some areas, maps were not available from U.S.G.S. but were available from other agencies, such as the United States Department of Agriculture, Forest Service.

aerial photos¹⁰.

A photographic "scale," like a map scale, is an expression that states that one unit of distance on a photograph represents a specific number of units of actual ground distance.

$$S = \text{Photo scale} = \frac{\text{Photo distance}}{\text{Ground distance}} = \frac{d}{D}$$

The scale may be expressed as unit equivalents, representative fractions, or ratios. For example, if 1 mm on a photo represents 25 m on the ground, the scale of the photo can be expressed as 1 mm = 25 m (unit equivalents), or 1/25,000 (representative fraction), or 1:25,000 (ratio).

The photo(s) used by IDWR personnel have varying scales. The ASCS photographs have map features drawn in by the ASCS. These photos are stated to be "not to scale," but do include the field acreage as determined by ASCS written on the places of use. NAPP photography is at a nominal scale of 1:40,000; U2 aerial photography is at a nominal scale of 1:120,000; and ortho-photoquads have a scale of 1:24,000.

To determine the area used, IDWR staff employed various transparent overlays, known as grid templates. These templates are available at most blueprint supply stores. One type consists of lines forming rectangles or squares of known area in the same scale that is utilized in the scaled photograph. The grid is placed over a scaled photograph and the area of a ground unit is estimated by counting grid units that fall within the unit to be measured.

Another commonly used grid is the dot grid, which is composed of uniformly spaced dots on a transparent overlay. The grid is placed over the photograph and the dots falling within the region to be measured are counted. The value assigned to each dot is dependent on the scale of the photograph. First, the number of acres per centimeter (or other measuring unit) is computed. This figure is then divided by the number of dots per measuring unit on the grid to obtain the acreage represented by each dot. For instance, a square 3.4 cm on each side containing 640 dots will cover 160 acres on a photo with a nominal

¹⁰ These photos are color-infrared aerial photography obtained by the National Aeronautics and Space Administration (NASA) Airborne Instrumentation Research Project, and available from EROS. IDWR obtained coverage of most of the southern portion of the Snake River Basin, most of which was flown in 1977. In addition, because the State of Idaho was part of an ongoing project with NASA to photograph selected areas, photography from various areas in various years is also available. The date of the flight is shown on the photo.

scale of 1:24000; 640 dots divided by 160 acres equals 4 dots to the acre, thus 1 dot equals 0.25 acres.

Because of its simplicity, the grid system is a practical method to determine the size of irrigated areas; it nonetheless requires some training and experience to be used effectively.

For non-scaled photos, such as the ASCS 35 mm photos, IDWR did not directly make acreage determinations. Instead, these photos were used to confirm whether the place of use and amount of irrigated acreage had changed for that year according to common landmarks visible in the photographs.

ALL MATTERS RAISED IN THE CLAIMANT'S ANSWER,
AFFIRMATIVE DEFENSES, AND PRAYER FOR RELIEF.

REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 3 and 3.a, and all allegations of the objection regarding those items, IDWR responds as follows: (1) it recommended the amount of water it determined was being beneficially used; (2) the claimant is not entitled to any amount greater than that which is beneficially used (Idaho Code Secs. 42-104 and 42-1402); (3) the recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right; and (4) the eventual decree by the SRBA Court of the amount of water beneficially used, even if less than the amount previously decreed, will not constitute a taking because the right is limited to that amount beneficially used. IDWR further responds that it recommended the diversion rate claimed.

In response to Statement of the Objection item 8, and all allegations of the objection regarding that item, IDWR responds as follows: The decree asserted by the claimant does not contain a period of use decreed for this water right. Idaho Code Sec. 42-1411(2)(g) requires the director to determine the period of use of each water right acquired under state law that is recommended in the director's report. IDWR has developed irrigation season of use standards for various climatic areas throughout the state based on a 75% chance of a 24 degree fahrenheit frost. The irrigation season of use cannot exceed the period in which water may be beneficially used. The period of the year during which this water right may be used is consistent with the standard irrigation season of use for the area in which the place of use of this water right is located. Water may be used for irrigation outside the standard season of use, subject to the conditions set forth in general provision 12b of the director's report.

In further response to this objection item, IDWR responds that it recommended a longer season of use than claimed based on the above standards. By now seeking a year around season of use, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim after a director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of the court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court.

(Over)

In response to Statement of the Objection item 10 and all allegations of the objection regarding that item, IDWR responds as follows: (1) The decree asserted by the claimant did not set an annual volume of consumptive use for this water right. (2) Idaho Code Sec. 42-1411(2)(i) requires the director to determine the annual volume of consumptive use for each water right acquired under state law and recommended in the director's report. (3) Idaho Code Sec. 42-1401A(2) provides that the quantification of consumptive use "is included as a rebuttable presumption in a decree only for the purpose of transfers pursuant to section 42-222, Idaho Code"; therefore, the consumptive use recommended for this water right is included solely for use in future transfer proceedings. (4) The annual volume of consumptive use recommended for this right is 3 acre feet per acre. This is the maximum volume of water consumed by the most water consumptive crop (pasture) that can be grown in the area during the period of year when water is used for irrigation, as provided for by Idaho Code Sec. 42-1401A(2). (5) The recommendation of the director to the SRBA Court as to how the right should be decreed does not constitute a taking because it is simply a recommendation and not a final determination of the right. (6) The eventual decree by the SRBA Court of the amount of water beneficially used, even if less than the amount previously decreed, will not constitute a taking because the right is limited to that amount beneficially used.

In further response to this objection item, IDWR responds that it recommended this element of the water right as claimed.

In response to Statement of the Objection item 11, and all allegations of the objection regarding that item, IDWR responds that it has authority pursuant to Idaho Code Sec. 42-1411(2)(j) to include in its recommendations of water rights acquired under state law and recommended in the director's report "such other matters as are necessary to define the right." The remark or remarks objected to are necessary to adequately describe and define this water right.

In response to Statement of the Objection item 14, and all allegations of the objection regarding that item, see attached "IDWR's Response to Answer Affirmative Defenses and Prayer for Relief of Claimant".

In response to the sentence listed in Changes to the Director's Report, whereby the claimant attempts to "reserve the right to claim all purposes of use and quantities of use as shown by the evidence at trial," IDWR responds as follows: Insofar as this

purported reservation of rights may constitute an attempt to reserve the right to amend at trial the claimant's notice of claim, the claimant improperly seeks to use the objection process to amend the claim. A claimant must obtain leave of the court to amend a claim just as a party must obtain leave of the court to file a late claim after the director's report is filed.

The attachment also contains part VIII, **AFFIRMATIVE DEFENSES** (pp. 20 through 28) and a **PRAYER FOR RELIEF** (untitled, p. 28).

In response to each of the items enumerated above IDWR responds that pursuant to Section 4 a.(2)(c) of SRBA Administrative Order 1, Rules of Procedure, IDWR generally denies each and every allegation, if any, contained in each enumerated portion of the attachment. IDWR affirmatively responds that neither SRBA Administrative Order 1, Rules of Procedure, nor Title 42, Chapter 14, Idaho Code, make provision for IDWR to affirm, amplify, or otherwise respond to the claimant's admissions, or to deny the claimant's denials, and that IDWR therefore does not believe that it is required to do so. Title 42, Chapter 14, Idaho Code solely defines the content and scope of the director's report. It is to contain a description of the water system and is to provide a recommendation as to each water right claimed and as to those matters necessary for administration of those water rights. Therefore, the content and scope of the objection is limited to those same matters. The attachment to the present objection asserts or otherwise raises matters not directly addressing the elements of the water right as recommended, the description of the water system, or the general provisions. Rather, the attachment raises broad issues as to the constitutional, statutory and administrative efficacy of the entire adjudication process. All such issues should be raised by means of motions to designate basinwide issues and similar procedural vehicles specifically designed to provide for basinwide notice and participation. They should not be permitted to divert the focus of any individual subcase away from the issues directly connected to the elements of the water right and the administration thereof. Therefore, because the attachment to the present objection is not within the scope of the statutory purpose of an objection it should be stricken.

However, in the event that the court should determine that all or part of the attachment is properly within the scope of the objection, IDWR further responds as follows:

IDWR affirmatively responds that all statements within the director's report are properly included therein pursuant to Title 42, Chapter 14, Idaho Code, and in particular pursuant to Idaho Code §§ 42-1411 and 42-1412(8); and that the provisions of the Idaho Rules of Civil Procedure regarding pleadings are inapplicable to the extent that they are in conflict with the statutory requirements. Therefore IDWR denies all allegations directed at the contents of the director's report.

As to the enumerated portions of the attachment addressing the listings of recommended water rights, abstracts of federal reserved water right claims, or negotiated agreements, other than the individual recommendation that is the subject of this objection, IDWR responds that such claims or agreements are not brought before this court by this objection.

OCT 1 1984

Responding to the 27 affirmative defenses asserted in the attachment, IDWR generally denies each and every affirmative defense asserted. IDWR further responds that affirmative defense numbers 1, 2, 4, 5, 10, 11, 12, 18, and 22, asserting various violations of civil or constitutional rights, fail to comply with the requirements I.R.C.P. 9(b) providing that in all averments of violation of civil or constitutional rights the factual circumstances constituting such violation must be stated with particularity. Accordingly, IDWR asserts that those affirmative defenses should be stricken.

In response to that portion of the multi-page attachment to the objection wherein the claimant asserts a prayer for relief, IDWR responds as follows:

1. IDWR denies that the director's report asserts any claims against the claimant; rather, the director's report contains only the recommendation of the director as to how the claimant's water right should be decreed and administered.
2. IDWR denies that the claimant is entitled to have the water right decreed as claimed unless in the director's report the water right has been recommended as claimed.
3. IDWR denies that any acts upon its part constitute the taking of private property for which just compensation should be allowed and awarded.
4. IDWR denies that the claimant is entitled to recover court costs and reasonable attorney fees.
5. IDWR denies that the claimant by this objection has raised any claims against IDWR entitling such claimant to any relief other than the eventual judicial determination and decree of the various elements of the claimant's water right, if any, and of those related matters necessary to describe and administer that water right.

INSTRUCTIONS

This form must be used to file an objection to any water right recommended in the Director's Report. You may object to one water right per objection form. The water right number you are objecting to must be indicated above in the blank space following "Case No." To object to more than one water right, you must file a separate objection form for each. Forms may be obtained from the Idaho Department of Water Resources (IDWR), or you may copy or reproduce this blank form, as long as it is identical to the court's form. You must file your objection by the deadline shown in the notice that IDWR mailed to you. The objection must be received by the court on or before the deadline specified. Instructions for mailing this objection are found at Page 6, and must be strictly followed.

Any party physically filing 25 (twenty-five) or more objections must make an appointment with the Clerk of the Adjudication Court and arrange for an appointment to file multiple objections.

GENERAL RESPONSE

Except as specifically admitted herein, objectors deny each and every allegation contained in the Director's Report, any related or subsidiary pleadings, and/or any attachments thereto.

II.

DESCRIPTIVE SUMMARY

(DIRECTOR'S REPORT PART I)

(hereinafter DRP-I)

(DRP-I at first unnumbered page)

The objectors admit that Part I of the Director's recommendation contains some claims to water rights appropriated under state law from Reporting Area 3. The objectors deny all other averments because the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of the averments.

III.

TABLE OF CONTENTS

(DRP-I at 2nd and 3rd unnumbered pages)

The objectors admit that the Table of Contents reflects the page numbers of the referenced sections and deny all other averments based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because any averment, expressed or implied, is so

OCT 11 1984
UNRECORDED

indefinite that it prevents the objectors from knowing what would be admitted or denied.

IV.

INTRODUCTION

1. INSTRUCTIONS FOR USING THIS REPORT PART I. (DRP-I at page 1)

The objectors admit that Part I consists of seven sections; that the description of the water system includes a brief description of Reporting Area 3 and an illustration of the boundaries of the reporting area; that the water rights and the list of the recommended rights are grouped alphabetically by source and listed chronologically by priority date; that the rights or claims in the list of claims/rights not recommended are listed numerically by water right number; and that brief instructions are found at the beginning of the applicable sections. The objectors deny that any description or any implication that the description of the water system or the illustrations are true and accurate due to lack of knowledge or information regarding the truth of the averment; deny that the general provisions apply to all water rights or define or limit classes of water rights; and deny that the general provisions "will affect your water right," based upon insufficient knowledge or information upon which to form a belief as to the truth of the averments.

2. SCOPE OF THE ADJUDICATION. (DRP-I at page 1 - 3)

The objectors deny all averments in paragraph a., due to lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments.

Regarding paragraph b., the objectors lack sufficient information or knowledge upon which to form a belief as to whether water rights which are not claimed in the adjudication will or will not exist upon entry of the court's decree and, therefore, deny such averment. The objectors admit that the court entered an order dated January 17, 1989, but presently lack sufficient knowledge to know whether any of the other averments concerning the court's order are true or accurate and, therefore, deny the same. The objectors deny that a right must be adjudicated before water may be distributed by the director. The objectors deny all other averments in paragraph b.

3. PURPOSE OF THIS REPORT PART I. (DRP-I at page 3 - 4)

The objectors admit that portion of the first sentence which states "This report contains the Director's recommendations to the SRBA District Court as to the nature and extent of water rights," but deny that such recommendations "are necessary for administration of water rights in Reporting Area 3," and further deny the Director has authority to "administer" such rights.

Regarding the second paragraph, the objectors admit that all water rights remain subject to the applicable law generally, but deny the remainder of the second paragraph.

Regarding the third paragraph of this section, the objectors deny all averments therein based upon lack of knowledge or information upon which to form a belief as to the truthfulness of the averments.

V.

DESCRIPTION OF THE WATER SYSTEM: BASIN 36

1. BOUNDARIES OF BASIN. (DRP-I at pages 4 - 6)

Regarding the first paragraph of this section, the objectors deny all averments due to a lack of knowledge or information upon which to admit or deny.

Regarding the second, third and fourth paragraphs of this section, the objectors admit that as broad statements, those paragraphs are generally accurate but the statements are so broad and attenuated from any matter relevant to the objectors' water right that the objectors are unable to know what would be implicitly admitted or denied and therefore, deny the same.

With respect to the fifth paragraph of this section, the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred and, therefore, deny the averments.

2. WATER SOURCES. (DRP-I at page 6)

The objectors admit that the Snake River Plain Aquifer is the source of outflows of springs located along the Snake River Canyon Wall in the Hagerman Valley. The objectors presently lack sufficient knowledge or information upon which to form an opinion as to the truth of the other averments set out in this section and, therefore, deny the same.

3. DEVELOPMENT OF WATER USE. (DRP-I at pages 6 - 9)

The objectors admit that numerous factual and historical averments are set out in this section, which may be accurate, but

these objectors have no basis for knowing whether some or all of the averments are intended to relate to the objectors' claims and, thus, are prevented from knowing what would be admitted or denied. Therefore, the averments are denied.

VI.

GENERAL PROVISIONS

GENERAL PROVISIONS 1 - 8 APPLY TO ALL WATER RIGHTS IN BASIN 36.
(DRP-I at page 9)

The objectors deny that "General Provisions 1 - 8" apply to all water rights in Basin 36 as the statements are so broad and attenuated from any matter relevant to the objectors' water rights, that the objectors are unable to know what would be explicitly admitted or denied. The objectors also specifically deny that general provisions 1-8 apply to the objectors' right.

1. EFFECT OF ADJUDICATION. (DRP-I at page 9)

With respect to paragraph a., the objectors presently have no knowledge or information upon which to form a belief as to the truth of whether a future decree would supersede prior decrees, or whether unclaimed rights would cease to exist and, therefore, deny the same.

Regarding paragraph b., the objectors deny that the Director has any powers to administer water rights other than those specifically delegated by the Legislature of the State of Idaho, and which do not violate the objectors' state and federal constitutional rights, and therefore the averments are denied.

01171881
MICROFILMED

2. GENERAL ADMINISTRATIVE PROVISIONS. (DRP-I at pages 9 - 10)

The objectors admit paragraphs a. and b.

3. CONJUNCTIVE ADMINISTRATION (DRP-I at page 10)

The objectors deny the conjunctive administration provisions based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because any averment expressed or implied is so indefinite that it prevents the objectors from fairly understanding what would be admitted or denied. Additionally, the objectors deny that the Department of Water Resources has any statutory or regulatory authority for the "conjunctive administration" as therein described.

4. ADMINISTRATION OF GROUND WATER RIGHTS (DRP-I at page 10)

The objectors deny the averments within this section.

5. ADMINISTRATION OF BASIN 36 RELATIVE TO THE SNAKE RIVER (DRP-I at page 10)

The objectors admit that the springs are hydrologically interconnected with the Snake River Aquifer, but deny all other averments based upon the objectors' lack of sufficient information or knowledge upon which to form a belief as to the averments herein. The objectors additionally deny any said averments expressed or implied because the averments are so indefinite and generalized as to prevent the objectors from fairly understanding what would be admitted or denied.

6. ADMINISTRATION OF SMALL DOMESTIC AND STOCK WATER RIGHTS (DRP-I at page 11)

The objectors admit that part of the first sentence of subparagraph a. to the effect that "small domestic and stock water rights from surface water are not subject to administration," but deny the balance of said sentence and said paragraph.

The objectors admit the first sentence of paragraph b., and deny the balance of that paragraph because the criteria set forth therein ("if the director determines that administration is necessary") is so ambiguous, indefinite and uncertain that it prevents the objectors from knowing what would be admitted or denied, and by further reason of the fact that no statutory or regulatory authority exists conferring such sweeping and unlimited authority upon the Director or the Department.

The objectors deny the averments in paragraph c. as the averments are inaccurate and because the objectors lack sufficient knowledge or information upon which to form a belief as to the truth of the matters averred.

7. MEASURING DEVICES AND CONTROL WORKS (DRP-I at page 11)

The objectors deny all averments contained herein as such averments are based upon an indeterminate subjective standards which are so ambiguous and indefinite as to prevent the objectors from fairly knowing what would be admitted or denied. Additionally, no statutory or regulatory authority exists conferring such sweeping and unlimited authority upon the Director or the Department as is alleged in this paragraph.

8. FIRE FIGHTING PURPOSES (DRP-I at page 11)

The objectors admit that subparagraph a. and subparagraph b. are generally accurate statements of present law, but deny the averments are in any way relevant to defining the objectors' right.

9. CONSUMPTIVE USE (DRP-I at page 12)

The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred and, therefore, deny the same.

GENERAL PROVISION 10 APPLIES TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH DOMESTIC USE AS A PURPOSE OF USE (DRP-I at page 12)

The objectors deny that "General Provision 10" applies to all water rights in Basin 36 shown with domestic use as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water rights, that the objectors are unable to fairly understand what would be explicitly admitted or denied and, therefore, deny the same.

10. DOMESTIC USE (DRP-I at page 12)

The objectors deny that the definition of "domestic use" contained in paragraphs a., b., and c. is consistent or in conformity with the definition of such term for purposes of the Idaho Constitution, or statutory definition contained in I.C. Section 42-111 as now, or as heretofore in effect at relevant times. The objectors further deny that the limitations set forth therein exist, are in force, or apply or serve in any way to limit objectors' rights.

GENERAL PROVISION 11 APPLIES TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH STOCK WATER USE AS A PURPOSE OF USE. (DRP-I at page 13)

The objectors deny that "General Provision 11" applies to all water rights in Basin 36 shown with stock water use as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water right, that the objectors are unable to fairly understand what would be admitted or denied and, therefore, deny the same.

11. STOCK WATER USE (DRP-I at page 13)

The objectors deny the averments herein as beyond the scope and applicability of the definition as provided by Idaho law as now, or as heretofore in effect at relevant times. The objectors further deny that the limitations set forth therein limit the objectors' right or are relevant to the right.

GENERAL PROVISIONS 12 - 16 APPLY TO ALL WATER RIGHTS IN BASIN 36 SHOWN WITH IRRIGATION AS A PURPOSE OF USE (DRP-I at page 13)

The objectors deny that "General Provisions 12 - 16" apply to all water rights in Basin 36 shown with irrigation as a purpose of use as the statements are so broad and attenuated from any matter relevant to the objectors' water right that the objectors are unable to fairly understand what would be admitted or denied.

12. IRRIGATION USE. (DRP-I at pages 13 - 14)

The objectors deny all averments based upon the objectors' lack of sufficient knowledge or information upon which to form a belief as to the truth of the averments and because

prevent the objectors from fairly knowing what would be admitted or denied; because the standard utilized ("as determined by the director") is ambiguous, subjective and indefinite so as to prevent objectors from knowing what would be admitted or denied; and because it is both expressly and implicitly in excess of the power and authority conferred upon the State of Idaho, the Director or the Department by the Constitutions of the United States and State of Idaho, pertinent provisions of the Idaho Code or valid applicable regulations, if any, adopted by the Department in conformity with law. Therefore, the objectors deny the same.

13. DIVERSION VOLUME FOR IRRIGATION. (DRP-I at page 14)

The objectors admit that Figure 1 generally depicts certain lands in Basin 36; however, the objectors deny all other averments including that the amounts set forth are the maximum annual volume of water reasonably required at the field headgate for irrigation, either within Basin 36 in general, or upon objectors' real property in particular. The objectors additionally deny that the maximum annual volumes per acre set forth is that which is "reasonably required for irrigation unless a higher annual diversion volume is reasonably required due to conveyance losses, method of irrigation or field conditions;" because the standard utilized ("as determined by the director") is ambiguous, subjective and indefinite so as to prevent objectors from knowing what would be admitted or denied; and because it is both expressly and implicitly in excess of the power and authority conferred upon the State of Idaho, the Director or the Department

by the Constitutions of the United States and State of Idaho, pertinent provisions of the Idaho Code or valid applicable regulations, if any, adopted by the Department in conformity with law. Therefore, the objectors deny the same.

14. CONSUMPTIVE USE FOR IRRIGATION. (DRP-I at page 14 and 15)

The objectors admit that the recommended water rights contained within the Director's Report show only the irrigation use listed unless otherwise indicated in "Remarks." The objectors deny all other averments contained within this section, including the amount of maximum annual volume of consumptive use per acre in the northern and southern portions of the basin, all of which is beyond the scope of any power or authority vested in the Director or the Department, and contrary to fact; historical use; established, vested, decreed, licensed or permitted rights.

15. AMOUNT OF COMBINED WATER RIGHTS FOR IRRIGATION. (DRP-I at page 15)

The specific averments have no relationship to or basis in fact relating to the individual needs or rights of the objectors, and accordingly, objectors deny this section in its entirety. In addition, no statutory or regulatory authority exists conferring upon the Director, or the Department, the power to limit use and ownership of objectors' private property rights as alleged.

0000000000
MICROFILMED

16. DIVERSION RATES IN EXCESS OF .02 CFS PER ACRE. (DRP-I at page 15 - 16)

The objectors deny the averments contained in this section in its entirety.

17. INSTRUCTIONS FOR USE OF LIST OF RECOMMENDED WATER RIGHTS. (DRP-I at page A-i, A-ii and A-iii)

The objectors admit that each water right in the list of recommended water rights includes a description including right number, name and address, source, maximum quantity, consumptive use, priority date, point of diversion, purpose of use, period of use, place of use, basis of right and others. The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred in said descriptions other than that the descriptions allegedly include the Director's or Department's version of the facts as they relate to the matters identified. Objectors deny the accuracy of the substantive allegations or information set forth with regard to the objectors' right.

18. IDAHO DEPARTMENT OF WATER RESOURCES RECOMMENDED WATER RIGHTS ACQUIRED UNDER STATE LAW. (DRP-I, pages A-1 - B-25)

The objectors lack sufficient knowledge or information upon which to form a belief as to the truth of any matter averred in said recommended water rights other than those specific admissions contained in Questions 1 - 12 of the attached individual objection, and therefore deny the same.

DIRECTOR'S REPORT FOR REPORTING AREA 3 (BASIN 36)

(DIRECTOR'S REPORT PART II)

I.

Objectors do not understand the allegations, averments or contents of Part II of the Director's Report for Reporting Area 3 (Basin 36) to pertain or relate to objectors or their claims, and do not believe any response is required. To the extent a response is required, objectors deny the same in its entirety.

DIRECTOR'S REPORT FOR REPORTING AREA 3 (BASIN 36)

(DIRECTOR'S REPORT PART III)

I.

No report denominated as Part III of the Director's Report for Reporting Area 3 (Basin 36) has been filed, and accordingly objectors are unable to admit, deny or otherwise response to the same. Objectors do not understand that the contemplated subject matter of such Part III will relate or pertain to objectors or their claims, and no response is required in any case. To the extent any response is required, objectors deny the same in its entirety.

VIII.

AFFIRMATIVE DEFENSES

Pursuant to I.R.C.P. 8(c), objectors herewith state the following matters of affirmative defense or avoidance:

AFFIRMATIVE DEFENSE NO. 1

The objectors' water right is an incorporeal form of real property (as defined by Idaho Code Sections 7-703, 73-114, 55-101,

and like statutes) protected by Section 14, Article 1, of the Idaho Constitution, and the Fifth Amendment to the United States Constitution, and allege that the actions of the Director in recommending, limiting and/or regulating said rights is an unconstitutional infringement upon and a taking of private property, without just compensation and violation thereof.

AFFIRMATIVE DEFENSE NO. 2

The adjudication authorization legislation, I.C. Section 42-1401, et seq., on its face and as applied by the Director and the Department constitutes an improper delegation of constitutional power and authority conferred upon the executive, legislative and/or judicial branches of government and as such violate the provisions governing separation of powers set forth in Article 2, Section 1, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 3

The procedure set forth in the adjudication authorization legislation, statutes, I.C. Section 42-1401, et seq., and any rules, regulations, procedures, policies or standards promulgated by the Director and/or the Department, if any, are vague and so lacking in reasonable specificity so as to render them impossible of reasonable comprehension, or consistent and meaningful application.

AFFIRMATIVE DEFENSE NO. 4

The procedures, rules, regulations, policies or standards, if any, adopted, implemented and applied by the Department and/or the Director violate the equal protection and due

process clauses of the Fourteenth Amendment, United States Constitution, and Article 1, Sections 2 and 13, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 5

The adjudication authorization legislation, Idaho Code Section 42-1401, et seq., and the actions of the Director and Department in recommending, limiting and/or regulating the objectors' water right constitutes a violation of 42 U.S.C. Section 1983.

AFFIRMATIVE DEFENSE NO. 6

The water right owned by the objectors is the subject of valid existing decrees issued by the Director and Department, which decrees are binding upon the State of Idaho, the Department and the Director. As a result, the State of Idaho, the Department and the Director are precluded by the doctrines of res judicata, collateral estoppel, judicial estoppel and the like from relitigating or questioning the validity, existence or priority of such right, and/or from taking any position in the Director's Report, or otherwise, which is inconsistent with such decrees.

AFFIRMATIVE DEFENSE NO. 7

The Director's recommendations are contrary to decreed rights, historical use and extent licenses and permits issued by the Department. There has been no forfeiture nor abandonment of the objectors' water rights, nor have the objectors' water rights been prescriptively or adversely possessed, nor have such decrees been vacated or such licenses and permits revoked.

AFFIRMATIVE DEFENSE NO. 8

The Directors' Report fails to state a claim to the extent the same asserts a forfeiture, abandonment, prescriptive or adverse acquisition or loss, or loss resulting from estoppel, of the objectors' water right in the absence of any fact upon which forfeiture, abandonment, prescriptive or adverse acquisition for loss, or loss resulting from estoppel, may be based or asserted.

AFFIRMATIVE DEFENSE NO. 9

The objectors' water right is an incorporeal form of real property, as defined by Idaho Code Sections 7-703, 73-114, 55-101, and like statutes, and, as such, pursuant to Idaho Code Section 7-904, et. seq., the actions of the Director in attempting to limit, reduce and/or regulate such rights, and the assertion of some inconsistent proprietary ownership or right to use or control by the State of Idaho, constitutes an unauthorized and invalid taking of private property without the payment of just compensation, or compliance with statutory requirements, all in violation of Title 7, Chapter 7, Idaho Code.

AFFIRMATIVE DEFENSE NO. 10

The actions of the Director, the Department and their agents, servants and employees in recommending, limiting, reducing and/or regulating objector's water rights, either as alleged in the Director's Report or as in fact applied, violates objectors' rights as secured by Art. 1, Section 1; Art. 15, Sections 3, 4 and/or 5; and/or as otherwise provided in the Constitution of the State of Idaho.

AFFIRMATIVE DEFENSE NO. 11

The various allegations, statements and assertions contained in the Director's Report concerning the Department and/or the Director's position or intentions with regard to the adjudication, as well as the implementation of statutes and/or regulations, as well as the administration of water or management of water rights or claims to the beneficial uses of water, if implemented, constitute a violation of various provisions the United States and Idaho constitutions, and/or a violation of the letter, spirit and/or intent of various statutes enacted by the legislature, and/or constitute an exercise of purported authority or powers either in excess of those conferred by law, or in a manner inconsistent with those conferred by law, or both.

AFFIRMATIVE DEFENSE NO. 12

The individual recommendations relating to the specific water right of the objectors as set forth in the Director's Report are (1) not based upon substantial evidence and/or are not, in fact, the product of any reasonable, complete or accurate investigation as required by law; (2) are the product of arbitrary and capricious action on the part of the Department or the Director; (3) have been made in excess of the constitutional and statutory authority of the Department and the Director; (4) have been made upon an unlawful and invalid procedure; (5) are affected by various and sundry errors of law; and/or (6) are clearly erroneous in view of the reliable, probative and substantial evidence.

APR 1 1984
MICROFILMED

AFFIRMATIVE DEFENSE NO. 13

The Director's Report is a pleading subject to the provisions of the Idaho Rules of Civil Procedure, including, but not limited to the requirement of I.R.C.P. 8(a)(1) that such pleadings contain a clear and plain statement of the facts, demonstrating an entitlement to relief. The Director's Report violates such provision.

AFFIRMATIVE DEFENSE NO. 14

The Director's Report fails to state a claim upon which relief may be granted.

AFFIRMATIVE DEFENSE NO. 15

The Director's Report is subject to, and must comply with, the requirements of Idaho Code Section 42-1411. The Director's Report does not comply with the requirements of the statute.

AFFIRMATIVE DEFENSE NO. 16

In conducting the investigation and compiling the Director's Report, the Department and the Director have not complied with the requirements of Idaho Code Section 42-1410.

AFFIRMATIVE DEFENSE NO. 17

In conducting the investigation and compiling the Director's Report, the Department and the Director have not complied with the requirements of Idaho Code Section 42-1416.

AFFIRMATIVE DEFENSE NO. 18

The procedures specified in the authorizing legislation and procedural rules promulgated in accordance therewith serve to

deny objectors due process of law in violation of Amendment Fourteen to the Constitution of the United States and Art. 1, Section 13, Idaho Constitution.

AFFIRMATIVE DEFENSE NO. 19

The "General Provisions" and "Other Statements" contained in the Director's Report, along with the Claims Investigation Manual, Adjudication Memoranda and other materials of a similar nature used or employed by the Department, the Director and/or their agents, servants and/or employees constitute rules and regulations which were required to be proposed, promulgated, adopted and approved in conformity with the Administrative Procedures Act and other applicable statutory provisions. The Department, Director and their agents, servants and employees have failed to comply with such requirements, and accordingly, the "General Provisions," "Other Statements", Claims Investigation Manual and the like are invalid, void and of no force or effect.

AFFIRMATIVE DEFENSE NO. 20

Neither the "General Conditions," the Claims Adjudication Manual, Adjudication Memoranda or other promulgations, adoptions, policies, or the like have been submitted to or approved by the Legislature as required by Idaho Code Section 67-5217.

AFFIRMATIVE DEFENSE NO. 21

The relief requested by the Department and the Director in the Director's Report are beyond and in excess of the subject matter jurisdiction of the Court.

OCT 11 1987
MICROFILMED

AFFIRMATIVE DEFENSE NO. 22

The actions of the Legislature, or the Department and the Director to enact, adopt, implement or enforce statutes, regulations, rules or policies subsequent to November 19, 1987, and to apply or enforce the same for the purpose of, or with the effect of recommending, diminishing or altering objectors' water rights, constitute a violation of Amendment Fourteen, United States Constitution; Art. 1, Section 13, Idaho Constitution; the SRBA authorization legislation; and Idaho Code Sections 73-101 and 73-106.

AFFIRMATIVE DEFENSE NO. 23

These proceedings are subject to the requirements and provisions of Idaho Code Sections 12-117, 12-121, 12-123 and I.R.C.P. 11, and the provisions of the private attorney general doctrine, and other related doctrines, and the Department, Director and State of Idaho are obligated to objectors for the payment and reimbursement of any and all reasonable costs or attorney fees incurred herein.

AFFIRMATIVE DEFENSE NO. 24

The Director's Report asserts what amounts to be a taking of private property by power of eminent domain as governed by Idaho Code Section 7-701 et seq., and as such, venue is therefore improper.

AFFIRMATIVE DEFENSE NO. 25

The Department and the Director are equitably estopped from seeking any reduction in the quantity, quality or priority of

objectors' water rights by virtue of prior statements, representations and actions of the Department, Director or their agents, servants and employees.

AFFIRMATIVE DEFENSE NO. 26

The Department and the Director are barred by laches and the applicable statutes of limitation, including, but not limited to, Idaho Code Sections 5-202, 5-203, 5-204, 5-206, 5-207, 5-208, 5-215, 5-218, 5-219(2), 5-224 and/or 5-241.

AFFIRMATIVE DEFENSE NO. 27

Objectors hereby reserve the right to assert any further affirmative defenses not expressly stated herein, but which subsequently become apparent.

WHEREFORE, the objectors pray for judgment as follows:

1. That the State of Idaho take nothing by reason of its Directors' Report, and that this action, and any claims asserted against objectors, be dismissed.

2. That a decree be entered adjudicating the existence, validity, amount and priority of objectors' water rights in accordance with objectors' claims.

3. That to the extent the acts of the Department or Director constitute a taking of objectors' property for public use, that objectors be allowed and awarded just compensation therefor.

4. That the objectors be allowed all costs of suit and reasonable attorney fees incurred herein.

5. For such further relief to which the Court finds objectors justly entitled.

Re: Notice of Appearance

Dear Mr. Brown:

We received your Notice of Appearance on behalf of Hagerman Water Owners, Inc. and its individual members on February 10, 1993. The records listed on the notice were updated with some exceptions.

Claim numbers with "A" prefixes identify claims filed in the SRBA. Claim numbers without prefixes identify recommendations in the Director's Report. The following table identifies claimants for which you filed a notice of appearance, but the number you referred to is actually the identification of the recommendation. They have been updated with the notice information.

Claimant's Name	Recommendation No. (no "A" prefix)

RE: NOTICE OF ERROR FOR SEASON OF USE AND DIVERSION AMOUNTS
WATER RIGHT NO(S): 36-00003C

DEAR MR. BABINGTON:

THIS LETTER IS IN RESPONSE TO THE NOTICE OF ERROR (NOE) YOU RECENTLY FILED WITH IDWR REGARDING THE DIRECTOR'S PROPOSED RECOMMENDATION OF THE CLAIM LISTED ABOVE. YOUR NOE QUESTIONS TWO POINTS; 1) YOUR NOE INDICATES THAT YOU WOULD LIKE THE RECOMMENDATION TO SHOW A LONGER SEASON OF USE FOR IRRIGATION. AND 2) THE BASIS FOR RECOMMENDATION OF AN AMOUNT THAT IS LESS THAN THE AMOUNT SHOWN IN A PREVIOUS DECREE.

1) THE DIRECTOR HAS APPROVED EXTENDING THE PERIOD OF USE FOR THE HAGERMAN VALLEY TO 3/15 TO 11/15.

THE PROPOSED RECOMMENDATION IS BASED ON IRRIGATION SEASON OF USE STANDARDS ADOPTED BY THE DIRECTOR FOR THE VARIOUS REGIONS THROUGH THE STATE. THESE STANDARDS ARE BASED ON THE PERIOD OF THE YEAR IN WHICH THERE IS LESS THAN A 75% CHANCE OF A 24 DEGREE F. FROST.

IN ADDITION, SINCE THERE ARE SOME YEARS IN WHICH WATER CAN BE BENEFICIALLY USED FOR IRRIGATION OUTSIDE THE IRRIGATION SEASON, THE PROPOSED DIRECTOR'S REPORT INCLUDES A GENERAL PROVISION WHICH PROVIDES FOR IRRIGATION OUTSIDE THE IRRIGATION SEASON UNDER CERTAIN CONDITIONS. THE CONDITIONS ARE THAT THE WATER IS BENEFICIALLY USED, AS DETERMINED BY THE DIRECTOR; THAT ALL WATER RIGHTS WITH A PERIOD OF USE OUTSIDE THE IRRIGATION SEASON REGARDLESS OF PRIORITY, ARE SATISFIED; AND THAT THE USE DOES NOT CONFLICT WITH THE PUBLIC INTEREST AS DETERMINED BY THE DIRECTOR. THIS PROPOSED GENERAL PROVISION WILL BE INCLUDED IN THE DIRECTOR'S REPORT.

2) UNDER IDAHO LAW, A WATER RIGHT IS LIMITED TO THE AMOUNT OF WATER BENEFICIALLY USED FOR THE PURPOSES FOR WHICH THE WATER RIGHT WAS ESTABLISHED. THE AMOUNT OF WATER BENEFICIALLY USED IS LIMITED TO THE AMOUNT THAT IS ACTUALLY USED AND IS REASONABLY REQUIRED. FOR IRRIGATION PURPOSES, A REASONABLE AMOUNT IS THE

MICROFILMED

JAN 20 1993

PAGE 2

AMOUNT REQUIRED USING IRRIGATION METHODS THAT ARE REASONABLY EFFICIENT UNDER CURRENT CIRCUMSTANCES. IF THE AMOUNT OF A WATER RIGHT SHOWN IN A DECREE IS GREATER THAN THE AMOUNT THAT IS BENEFICIALLY USED, THEN THE PORTION THAT IS NOT BENEFICIALLY USE FORFEITED.

THE AMOUNT PROPOSED TO BE RECOMMENDED FOR YOUR CLAIM IS BAS ON THE AMOUNT OF WATER DETERMINED TO BE BENEFICIALLY USED FOR TH RECOMMENDED USES, BASED ON AVAILABLE DATA AND CURRENT METHODS OF ANALYSIS.

IF YOU STILL DISAGREE WITH IDWR'S RECOMMENDATIONS YOU WILL AN OPPORTUNTIY TO FILE AN OBJECTION TO THE DIRECTOR'S REPORT WIT THE COURT. WHEN THE DIRECTOR'S REPORT IS FILED WITH THE COURT, WILL BE MAILED A NOTICE THAT WILL CONTAIN MORE INFORMATION ABOUT OBJECTION PROCESS.

SINCERELY,

A handwritten signature in cursive script, reading "Robert V. Worstell".

REACH = SECTION OF CHANNEL
LENGTH = LENGTH OF REACH, THE CHANNEL CAN BE DIVIDED INTO EQUAL LENGTH REACHES
OR ACTUAL LENGTHS BETWEEN DELIVERY POINTS
AVE WIDTH = AVERAGE TOP WIDTH OF REACH
SEEPAGE = SOIL SEEPAGE RATE OF REACH
WORSTELL LOSS = CONVEYANCE LOSS IN REACH BASED ON WORSTELL METHOD
DELIVERY = TOTAL DELIVERIES IN REACH
DELIVERY LEFT = SUM(DELIVERIES OF CURRENT AND REMAINING REACHES)
LOSS FACTOR = WORSTELL LOSS/DELIVERY LEFT
DELIVERY LOSS = SUM(LOSS FACTORS OF CURRENT AND PREVIOUS REACHES) X DELIVERY,
REPRESENTS THE LOSSES ASSIGNED TO THE DELIVERIES IN THE REACH
FLOW = TOTAL FLOW AT BEGINNING OF EACH REACH

GROUNDWATER MEASUREMENT REQUIREMENT ANALYSIS

FILE: A36-00003C
DATE: 3-18-92
BY: SC

THEORETICAL RATE OF FLOW: $Q = \frac{(8.8) \times (H.P.) \times (EFF.)}{TDH}$

Q = CFS
H.P. = Total Brake Horsepower of pumping plant (including booster)
EFF. = Pumping plant efficiency (ASSUME 70% OR 0.70)
TDH = total dynamic head = [(LIFT) + (PSI X 2.31)]
LIFT = depth to water in FEET from land surface to pumping water level
PSI = pumping pressure measured in psi near pump (if open discharge assume zero [0])

$$Q = \frac{(8.8) (7.60) (0.70)}{[(\emptyset) + (60 \times 2.31)]} = 0.34 \text{ cfs}$$

Re: Ownership Change for Adjudication Claim NO.(S): A36-00003C
A36-10521 - MICHAEL J. ENGLES -

Dear Claimant(s):

Pursuant to the notification that you presently own the property in which the above-referenced Adjudication Claim(s) is appurtenant, the Department has changed the record of the current owners as you requested. Please find enclosed a copy of the computer record of the claim(s) noting the change in claimant.

Please review the record and if you have any corrections or questions, please feel free to call this office.

Sincerely,

A handwritten signature in dark ink, appearing to read 'Judy Givens'.
