Re: Right Numbers 67-32D
67-4092A

We attended the Department of Water Resources meeting in Council on November 29th and talked with Vicky Music about the diversion point on the above right numbers. The preliminary recommendations show the diversion point as T15N R02W S31 NENE Washington County, the old Post-Weston Ditch.

We told Ms. Music our water is delivered through the Cambridge Ditch Company whose diversion point is T15N R02W S16 Adams County. She suggested we verify our relationship with the Cambridge Ditch Company before we request the diversion point change.

On November 30th, I talked with Jerry Jaeger, secretary of the Cambridge Ditch Company. He says the water rights are ours: the Cambridge Ditch Company carries our water. He also said that all of the old Post-Weston Ditch came into the Cambridge Ditch Company for delivery when the Cambridge Ditch Company was formed.

Hopefully the above information is sufficient to change the diversion point on Right Numbers 67-32D and 67-4092A to Cambridge Ditch Company's diversion point.

On December 1st I left a message on your voice mail, but this fax is the information I wanted to give you. Thanks for your consideration of this matter.

Water Supply Bank:

Memorandum

Date: August 31, 2005

To: File

From: Craig L. Saxton

Subject: POU and POD for 67-32D and 67-4092A

POU: There has been question on what is actually irrigated in the 80 acres claimed. I spoke with Ms. Larkin today and I told her that based on the statement from the previous owner Mike Fox stating that he irrigated 80 acres and the maps provided by the Larkins, I could recommend 70 acres. She wanted to make it clear that there is not 70 acres currently irrigated.

Ms. Larkin then went to say that what she knows is that Mr. Fox irrigated all 80 till he sold to Vaughn, and to her knowledge Vaughn irrigated all 80 till he sold to Larkin in 1992 (according to her statement - deed dated 1998). Claims were filed in 1989 so I have no evidence to show forfeiture of an established water right. I cannot currently confirm that 80 acres has always irrigated outside of affidavits and claimant statements as a field exam would show that currently little is irrigated.

Since I do not have enough evidence to support disallowal, I will recommend the POU at 70 acres found.

POD:

TR 1763 places POD where it was subsequently claimed in 1989. However, we now from a statement from Mr. Larkin, that when they bought the property in 1992, the water was taken out of the ditch on the East side of the property. I do not have evidence that an accomplished change in POD took place prior to 1987. I have no choice to recommend the POD as defined by TR 1763 and as claimed.

Note, that this is how the claimant prefers it anyway according to our telephone conversation on 8-31-05.

RE: SRBA Claims 67-32D and 67-4092A

Dear Mr. Saxton:

Attached is a "Notice of Change in Water Right Ownership."

In answer to the questions in your letter of June 26, 2005:

1. The ground is currently irrigated as noted on the attached map.
2. The 30 acres of water from 67-32D is co-mingled with 67-4092A, both delivered by the Cambridge Ditch Company. (Jerry Jaegar, 208-257-3713, is secretary)
3. Mr. Fox declines to make any written statements. He says that information is in the courthouse. He did say he irrigated the full 80 acres by sprinkler. An afternoon at the courthouse yielded a change in assessment between 1967 and 1968. That change is enclosed.

We have two other possible leads of persons who may have some knowledge of the 1960's, one of whom is out of town until next week. We will also contact Jerry Jaegar again.

Sincerely,

Albert R. Larkin

RE: SRBA Claims 67-32D and 67-4092A

Dear Mr. Saxton:

Regarding your letter of August 9, 2005, we irrigate from a headgate and gravity as well as using a movable gasoline pump and two-inch line. We also have a couple of large tanks on the hills into which we pump for distribution with smaller lines.

Looking at the attached map (positions are approximate), the headgate was at point A when we bought the property in 1992 but reset to its present location at point B in about 1998 when it was inadvertently ripped out in cleaning the ditch. The tanks we use for redistribution are at points C and D.

Our idea was to plant trees on this property. In 1993 or 1994 we planted seedlings - 200 pine, 50 honey locust, 50 Siberian elm, 25 Manchurian apricot and 10 pear. A major field mice infestation of several years took almost all of the pines and the fruit trees winter killed over a period of six years. In 1999 we planted more pine seedlings which moles have taken out. Then in 2000 we planted hybrid poplars sticks in the area that flood irrigates; unfortunately that area also has too high ground water for too long in the late winter and early spring so it is back to grass.

Our next idea is to have gravity feed water installed to our best ground (in yellow in NWNW), have the ground tilled, leveled and planted to alfalfa rather than trying more pines or poplars.

Good news on the priority date. Upon approaching Mr. Fox again, he filled in and signed the enclosed affidavit.

Sincerely,

Albert R. Larkin

RE: Snake River Basin Adjudication (SRBA) claims 67-32D and 67-4092A

Dear Mr. and Ms. Larkin,

I spoke with Joanne on 8-8-09 regarding the letter I sent on July 26, 2005. Per our conversation, I am enclosing 4 maps. 3 are of the same picture but each map is set on a different back-drop or base photography. Please take a look at the maps and pick whichever one is easiest for you to read. The thick green boundary surrounds the 80 acres claimed under 67-4092A. Per our conversation, you stated that you do not actually irrigate the full 80. Please outline in pen the acres that you do irrigate. In addition draw in how the water reaches your place and is spread around to irrigate.

The 4th map shows a larger view of the ground and includes where the point of diversion should be. Please draw in the point of diversion and the ditch that conveys water to your property. Please include a detailed history of your irrigation practices to support the water has been put to beneficial use, even if it was sporadic. When completed, please return it to this office ASAP.

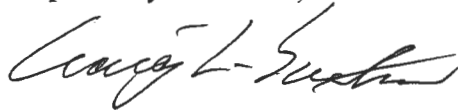

In addition to knowing the irrigated acres, we need evidence of priority. We spoke a little about your conversation with Mr. Yates that lead to a contact of Mr. Fox. We need some support that the ground you are claiming to be irrigated with water, in addition to the decreed water from 67-32D, since 1962. Probably the easiest way to do this is to get an affidavit from Mr. Fox or someone that knows the history of the area that references:

- The date the flood water was first put to beneficial use
- Where the water was used
- Source of water
- The extent of use (how many acres and/or inches of water)
- How the person writing the affidavit knows this information

Please get this information to me as soon as possible. My deadline to complete the recommendations for individual rights that flow through the Cambridge Ditch Company system is September 2, 2005.

I appreciate your prompt attention to this issue. Please feel free to contact me if you have any questions.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Craig L. Saxton". The signature is fluid and cursive, with the first name "Craig" being more prominent.

CONVERSATIONAL MEMORANDUM

Date: August 8, 2005

To: File

From: Craig L. Saxton

Re: Conversation with Joanne Larkin (67-32D and 67-4092A)

I spoke with Joanne on the phone about the letter I sent her on July 26, 2005. She said that out of the 80 acres defined in 67-32D and 67-4092A, 40 of them are now owned by her daughter. But she doesn't want to split the rights. I explained that the water right is applicable to the land and if her daughter owns the land, then it is her water right. I called back after speaking with Don and will explain how they can do that.

We spoke about evidence of priority for 67-4092A and Joanne said she could get something from Mr. Fox.

Then we spoke about how nothing looks irrigated. She was insistent that water has been put to b-use since they bought it in 1992, however she admits it has been sporadic and has not been used on the entire 80 acres claimed. I told her that I would send her maps of the area where she could draw in the irrigated POU and return it to us for review.

7-26-05: This does not appear irrigated, No evidence of Priority, and Needs Change of ownership.

: Need Measurement

: Send letter to: Albert Larkin
2950 Cove Road
Cambridge ID 83610

Explain what is going on. See if Mr Larkin Bites.

8-8-05 : Joanne Larkin Called about letter.
208-257-3557

: Her Daughter owns 40 of the 80 acres claimed. Joanne doesn't want to split the rights, but does need Change of ownership. I told her to send both Deeds and we will put both names on the two WR's for that 80, then we won't have to split them. This may not be correct.

: We spoke about Evidence of Priority for this claim. See memo in file.

RE: Snake River Basin Adjudication (SRBA) claims 67-32D and 67-4092A

Dear Mr. Larkin,

The Idaho Department of Water Resources is currently in the process of reviewing SRBA claims filed in basin 67. In my review, it appears that you now own property in Washington county that was previously owned by Vaughn Nelson. The legal description is as follows:

T14N R02W S05 NE1/4 NW1/4
 NW1/4 NW1/4

Two claims to a water right have been filed on that property (enclosed).

If you use the water claimed for beneficial use, you need to file a change of ownership form in order to allow IDWR to change the name on the claims and ensure that you receive future correspondence (form enclosed).

In my initial review, despite needing a change of ownership, I have come across several issues that need to be addressed regarding the water right claims.

- 1) Looking at 1987 and 1998 aerial photography, the ground does not appear to be irrigated. Has water been put to beneficial use? If so, to what extent and how long ago has it been used.
- 2) 67-32D claims 30 acres within what appeared to be 80 acres originally owned by Vaughn Nelson. What 30 acres are irrigated with water from 67-32D? Is it co-mingled with water from 67-4092A?
- 3) 67-4092A is a beneficial use claim for 80 acres of irrigation. 67-4092A claims a priority date of May 15, 1962. Evidence needs to be submitted supporting that water was put to beneficial use on that date to the extent used. For your convenience, I am enclosing a pamphlet titled Evidence Of Priority which describes what documents can be used to support the claimed priority date.

- 4) Because 67-4092A is claimed based on beneficial use, all elements of the water right need to be verified. If water is being put to beneficial use, IDWR personnel will need to conduct a field exam to verify the elements of the water right.

Without the requested information, the recommendation to the SRBA court for the two above mentioned claims could result in disallowed.

I realize that this is a lot of information all at once. Please feel free to contact me with any questions.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "Craig L. Saxton".

In RE: Duplicate fee paid

It seems that this fee may have been paid twice. Receipt number M004740 indicates this. There have been two claims filed by this party. A67-04092 and A67-04092A. I believe 4092A is an extension of 4092. Each party has adjoining property and if my memory serves me right, they are related and Mr. Nelson may have filed the second claim (A) to separate these properties.

The field exam flag has been checked for this claim so we may remedy this during the review portion of the adjudication. Also reference A67-00032D for further information-overlapping acreage.

Canyon, TX 79015

Dear Mr. Nelson;

Enclosed you will find one more Notice of Claim to a Water Right, A67-04092A. This claim will not be filed on by the ditch company.

Note item 6, the amount of water and uses. If the usages are inaccurate please indicate the correct usage, ie; stockwater. Also, this claim also included a portion of acreage in section 6, the E1/2 of the SE1/4. As indicated by your sister when she was in my office you do not own any land in that area. Because of this, I have split the water right and in doing so have proportioned the amount of water. The amount represented for the irrigation portion is an inch to the acre, which is the standard.

The fee for this claim is \$50.00. Please return this claim to my attention, signed and notarized. The deadline for Washington county is October 19, 1989.

Sincerely,

Linda A. Werner
Sr. Water Resources Agent
