So in 1963 the well was moved 900 feet to the north. Now ever it was still located on the SW 1/4 NE 1/4 of Sec 17. And a continuous usage of water was maintained.

RE: Water right research

Dear Mr. and Ms. Hansen,

Per our meeting on 3-25-05, I did some research on the water right claims for the property around your home that is supplied from the two irrigation wells we looked at with you. It appears that there is a claim filed on those wells for irrigation, domestic and stockwatering purposes. The Snake River Basin Adjudication (SRBA) claim # for this right is 67-14108 (enclosed).

SRBA claim 67-14108 states that it is a combination of two previously filed statutory claims 67-04014 and 67-04015. Both 67-04014 and 67-04015 claimed the same 40 acre tract of irrigated ground with the original claims showing two different priority dates

67-04014 = 6-1-1950

67-04015 = 6-1-1937

I am assuming the reason these two claims were combined when filing in the SRBA is because both wells serve the same property. However the oldest priority date was carried over on the SRBA claim 67-14108 which was 6-1-1937.

I checked the historical records on microfilm and there is no evidence of priority. Thus, what I need from you is evidence of priority dating back as far as you can go showing when each well was drilled and used for irrigation of the 40 acres irrigated.

Evidence of priority can be as simple as a statement from yourself or someone with first hand knowledge of when the wells were dug/drilled and when water was first used for beneficial use. Other examples of evidence of priority can be maps, pump power records, receipts from purchase of irrigation equipment, etc. For your convenience I am enclosing a pamphlet that describes things that can be used as evidence of priority. Please submit this information to myself referencing SRBA claim # 67-14108. Note, without receiving some evidence to support the priority date claimed, IDWR cannot make a favorable recommendation to the SRBA court.

Place of Use:

When we met with you, you indicated that you irrigated 80 acres with the two wells covered under claim 67-14108. However only 40 acres are claimed. I checked the tax lot data and it appears that you own the 40 acres in the T10N, R5W, S16, NWSW. For now, I can only recommend 40 acres under this right. If you actually irrigate 80, and have done so from the date of priority that you can support, then your claim needs to be amended for me to include it on the recommendation. Feel free to contact me if you have any questions.

Application for Permit:

Enclosed is the application for permit we spoke about regarding the slough water used on the property by the airport runway. Please complete the form and sent it to:

THEORETICAL HORSEPOWER EQUATION WORKSHEET (cjh 1/92)

Water Right No.: 67-04016
 Examiner: Craig L. Saxton
 Date of Field Exam: 3/25/2005

	Option 1	OPTION 2	OPTION 3	
P/D No.:				
PUMP HORSEPOWER	15	15	15	
BOOSTER HORSEPOWER	0	0	0	
PUMPING LEVEL	20	20	25	
DISCHARGE PRESSURE	100	0	0	AVE
RATE OF FLOW (cfs)	0.37	4.62	3.70	2.10

The above calculates the formula =

$$Q = \frac{8.8 * (\text{Efficiency}) * \text{hp}}{\text{depth to water} + 2.31 * (\text{psi}) + \text{friction}}$$

Assumptions: %70 efficiency.
 No Friction

Examiners Notes:

The diversion Rate calculate three differet ways. System has 15hp pump with well depth of 25 feet. Calculations included assuming pump dept with pump set 5 feet off the bottom of the well as well as at the bottom of the well. Different discharge pressures were assumed ranging from no flow to open flow. Each calculation shows that system has the capacity to pump 1 inch per acre for the 15 acres recommended.

In addition, statutory claim says the system pumps 400 gpm which is 0.89 cfs. Recommend 1 in per acre.
