RE: Attachment "A" to CSRBA Notice of Error Replies for North Kootenai Water and Sewer District ("NKWD")
Water Right Nos. 95-168, 95-506, 95-2199, 95-4027, 95-8936, 95-9113, and 95-9216

DATE: February 28, 2018

This attachment is intended to supplement the Notice of Error Replies for the seven water rights held by NKWD that were included in the Preliminary Director's Report dated February 9, 2018. This included six surface water rights that were recommended for approval and one ground water right that was recommended for disallowal.

NKWD thanks IDWR's staff for its efforts in making these preliminary recommendations and appreciates this opportunity to engage in this informal error correction process.

For those of you who have not yet met him, let me introduce Chris de Groot. Long-time District Manager Mike Galante will be retiring this April. Chris will be filling his shoes.

My Special Power of Attorney authorizing me to file these notices on behalf of NKWD is on file with IDWR.

I. DISALLOWAL OF NO. 95-4027

Per my letter of November 13, 2017 to Craig L. Saxton of IDWR, NKWD does not contest the disallowal of this claim.

II. PLACE OF USE (“POU”)

Of the six surface water rights, two (Nos. 95-9113 and 95-9216) were recommended with the following POU: “Place of use is the service area of North Kootenai Water District as provided for under Idaho law.” This is correct.

Four of the surface water rights (Nos. 95-168, 95-506, 95-2199, and 95-8936) were recommended with the following POU: “Place of use is within the Hayden Haven service area of North Kootenai Water District as provided for under Idaho law.” This should be changed to conform to the POU for Nos. 95-9113 and 95-9216.

All six claims were submitted with similar descriptions of the location of the existing distribution systems. However, these are claimed and recommended as municipal water rights. Accordingly, under Idaho law, they are entitled to a flexible municipal service area. See 10/12/2018 email from Mr. Peppersack to me, which noted: “You corrected that, saying that the Department will recommend a system-wide POU based on the ‘growing service area’ principle for municipal providers.” That email was addressing anticipated recommendations for NKWD’s ground water rights and permits, not its surface rights. But I would think the same would apply here.

By the way, on the notice forms I added the word “municipal” prior to “service area.” My thinking was that this helps to clarify what Idaho law applies. This is not of great consequence, however. We defer to how the Department prefers to identify it, so long as it is intended to capture the principle of an expanding municipal service area.

III. POINT OF DIVERSION (“POD”)

Two water rights have the wrong quarter-quarter listed for the POD (Nos. 95-168 and 95-8936). The claims for these rights listed only a government lot number. We now understand that the Department prefers a quarter-quarter as well, which it determined to be NENW. We believe that the correct quarter-quarter is SENW.

This is the same POD, by the way, that serves Nos. 95-506 and 95-2199. Those claims were filed with both a lot number and the correct quarter-quarter, and were recommended that way, so no change is required.

The point of diversion for these four rights is a single intake system with multiple pumps. As we understand it, the number of pumps is irrelevant to the water right, and this is correctly listed as a single POD.
