RE: Water Rights, #95-14286

We are requesting a correction to the priority date for our Water Right for #95-14286.

The well was drilled/finished on 6/9/1989. Property owners were Ed and Gert Bush. They sold the property to Robert Legg who had a pole building built on this 20 acre parcel and installed several frost free faucets across the property, connected to this well. Upon our purchase of the property on 9/13/2004 the faucets were fully functioning and we used them for water for domestic and stock water. We applied for a building permit in May, 2005 and broke ground for the new house. The prior house on the property had been burned down by the CDA fire department for a training exercise when Robert Legg had owned the property. The well water continued to be used during construction and then connected to the new house.

Enclosed are copies of the Well Driller's report, our buyer's statement for the property, and our building permit.

Our original application for the water rights indicated date of the well driller's report of 6/9/1989 as we understood that to be the date the water right would be effective for this property. Please review which date can be assigned for priority date with the information we have provided to you. We believe it should be no later than our purchase date but feel it should be the date the well was finished – 6/9/1989.

Sincerely,

David and Bobbie Eatmon
