NOTICE OF ERROR

REPLY

Water Right Claim Number: 95-12921

Name and Address Correction:

G. W. Haight
1137 E. Skyline Drive
Coeur d'Alene, Idaho 83814

W. Dea Haight
1139 E. Skyline Drive
Coeur d'Alene, Idaho 83814

1. Portions of proposed recommendation with which we disagree:

- 1.1 Name and address of Mrs. Haight as set forth above.
- 1.2 Purpose of Use: Water is also used for pasture and fruit tree Irrigation as set forth on page 2 of the submitted Notice of Claim dated 6/1/2010. Water is also used for a large stands of cultivated Oak and Spruce trees. Irrigation use is typically from 3/1 to 10/31.
- 1.3 This Water Right has historically been the domestic water source for 2 households and since 1983 has been a supplemental water source for a third household.

2. Changes in the proposed recommendation which we seek:

- 2.1 Correct name and address for Mrs. Haight as set forth above.
- 2.2 Domestic Use of up to .04 cfs for one residence as set forth in the submitted Notice of Claim dated 6/1/2010.
- 2.3 Domestic Use of up to .04 cfs for a second residence as set forth in the submitted Notice of Claim dated 6/1/2010.
- 2.4 Domestic Use of up to .04 cfs for a third residence
- 2.5 Irrigation Use of up to 0.10 cfs for Irrigation purposes as set forth in the submitted Notice of Claim dated 6/1/2010.
- 2.6 Stock water Use of up to 0.02 cfs.

3. Explanation:

Our research thus far indicates the property has been occupied by at least one residence since 1913. Sometime subsequent to 1913 and before 1983 a second residential unit was added to the property. The property has never had a connection to any municipal services. It historically relied exclusively on the two hand dug wells. The rough location of the hand dug wells is reflected in the exhibit to Water Right Claim supporting Right Number: 95-12921.

At the request of a member of your staff we secured copies of aerial photographs. The earliest one we have so far been able to obtain dates to July 31, 1951. A copy of that photograph is attached hereto as Exhibit A. The road leading up to the property is highlighted. A second photograph taken, we believe, around 1960 and attached hereto as Exhibit B shows the parcel in question, portions of which appear to be a darker green, presumably giving evidence of irrigation on the property. Some ancient fruit trees still exist on the northern and eastern boundary of the property. The photograph attached hereto as Exhibit C was taken in 1965 after construction of Interstate Highway 90. Exhibit C again appears to show evidence of greener areas, more intense along the northerly border, again presumably reflecting such irrigation as the owners chose to accomplish. Exhibit A was taken 7/31/51. Exhibit C was taken 8/6/65. We believe Exhibit B was also taken mid -summer when fields were starting to dry out.

In 1983 a well was drilled on the property. The well driller's report is attached as an exhibit to the Notice of claim supporting Water Right number 95-12922. The drilled well is tied into the westerly hand dug well and those two wells combined provide most of the Domestic, Stock water and Irrigation water for the property.

In addition to the wells on the property there is seasonal surface water running from east to west through the middle of the property past the easterly hand dug well. Presumably the surface water is part of the water source for the eastern well and may also be a source for the drilled well. It irrigates fruit trees on the eastern border of the property. The seasonal surface water may also be used for future irrigation and livestock use.
