Attachments: 95-2114 Preliminary Recommendation.rtf; 95-8891 Preliminary Recommendation.rtf; 95-8896 Preliminary Recommendation.rtf

Brandon,

As per our conversation last week, I went through the recommendations for the three water rights at the golf course and made some updates. The overall combined diversion rate for 95-2114, 95-8891, and 95-8896 is 1.87 CFS. This maximum combined diversion rate is based on the limitation of 0.02 CFS per acre irrigated, a condition carried over from water right license nos. 95-8891 and 95-8896. Water rights 95-8891 and 95-8896 are limited to a maximum combined diversion rate of 1.59 CFS, again based upon the previously issued licenses. For your convenience, I have attached copies of the updated preliminary recommendations for these water rights. If your intention is to divert more than the maximum combined diversion rates allowed under these water rights, a new application for permit should be submitted to cover the increase. Please feel free to contact me if you have any further questions or concerns.

Evan,

The map looks great to me! Thanks for your work on this.

Subject: Revised irrigation layout for 95-2114

Brandon,

As discussed over the phone, here is the revised irrigation layout for water right claim No. 95-2114. Please let me know if you have any questions. I will get back to you about the possibility of separating the diversion rates as soon as possible.

Regards,
