Place of use is within the area served by Island Ward Canal Comapny.

The boundary encompassing the place of use for this water right is described with a digital boundary as defined by I.C. Section 42-202B(2) and authorized pursuant to I.C. Section 42-1411(2)(h). The data comprising the digital boundary are incorporated herein by reference and are stored on a CD-ROM disk issued in duplicate originals on file with the SRBA District Court and the Idaho Department of Water Resources. A map depicting the place of use is attached hereto to illustrate the place of use described by the digital boundary.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

EXPLANATORY MATERIAL: BASIS OF CLAIM - Decreed

Island Ward

- Has 2709.9 acres
- 2582 acres overlap
- That leaves 127.9 acres not overlaped
- Of the overlap Island ward gets 62%
= 1600.8
- $1600.8 + 127.9 = 1728.7$ acres to be recommended

I have received a list of shareholders for Consolidated and Island Ward. The lists don't seem to be accurate. I am taking how many share of consolidated the people on the Island Ward list own and adding that to the total shares on the Island Ward list. That gives me a total amount of shares. I am then finding out the percentage of those shares each company owns and applying that percentage to the overlapped acreage.

Island ward lists 106.5 shares.

People from Island ward also own 65.5 shares in consolidated.

Total shares is 172

Island ward owns 62% of those shares and Consolidated owns 38%.

Consolidated will get 38% of the overlap acres and Island Ward will get 62%

RE: Supporting documentation for Stock Water or Ground Water Recharge

Dear Claimant:

Over the past several months numerous meetings have taken place with individuals and representatives of water delivery organizations in the upper Snake River Valley and the Department of Water Resources (IDWR) concerning the non-irrigation season diversion of stock water and ground water recharge. In response to these meetings the following criteria were identified for evaluating and recommending these two uses.

- The claimant will have to provide documentation that verifies a historical practice of diverting water during the non-irrigation season for the purpose of providing stock water and ground water recharge. An example would be copies of the minutes for a water delivery organization referencing the diversion of water for these two uses. This information also will be used to help establish the priority date of the use.
- The claimant needs to provide copies of records showing the quantity of water historically diverted during the non-irrigation season. These records will be used as a basis for recommending the diversion rates for these two uses.
- The claimant will have to provide documents, written statements and/or affidavits from individuals who have witnessed the non-irrigation season diversion of water. These individuals need to provide a historical perspective based on actual observation.

SCANNED

AUG 10 2007

Claimants need to assess their actual diversion requirements for stock water and ground water recharge. The quantity of water claimed for non-irrigation season stock water should be the amount needed to reach the end of the delivery system plus provide drinking water for stock. Claimants should not rely upon ground water recharge as a use to supplement the stock water in order for water to reach the end of the delivery system. *Claimants holding Winter Water Savings contracts may have lost their entitlement to divert water for 150 days between November 1 and April 30 through either abandonment or forfeiture.*

For some claimants, amending claims to reflect the necessary quantity for stock water will result in a substantial filing fee (\$100 per cfs). This fee is not refundable, which emphasizes the importance of providing documentation that supports the claimed uses.

If you or the organization you represent have already amended one or more claims and provided the documentation identified above, you may disregard this letter.

Individuals or organizations wishing assistance in amending their claims can call the Eastern Region office.

Respectfully yours,
Ernest Carlsen

Water Right Supervisor

will have to meet to prove their claims, I am not sure that it will help them much. It is evidence of a historic practice of diverting large quantities of high water as early as February in order to undertake a peculiar IRRIGATION practice. I am not sure that it is particularly useful in proving that the appropriators diverted high quantities during the non-irrigation season simply to maintain the local water table in order to keep their wells from going dry. It seems to me that the finding may be evidence of an intent to appropriate for irrigation, but not proof of an intent to divert during the non-irrigation season for ground water recharge.

I think the finding also is evidence that the canals listed in it historically have large conveyance losses, but we already knew that anyway.

Maybe, too, some creative claimant will be able to make a case for reading the finding's description of how filling the soil profile with high water results in its delayed release for downstream use later in the irrigation season as evidence of a historic general intent to "recharge" the groundwater table so that downstream users could make beneficial use of spring discharge later in the season. But let's see what creative arguments they make before we decide whether we're going to go there.

The canals listed in the finding are broken into three groups:

Egin Canal
St. Anthony Union Canal
Independent Canal
Last Chance Canal

FROM: Eric Verner

RE: Adjudication claim.

Mr. Clements, Sec. Island Ward Canal, wanted to be sure the record on claim A22-00605 was clear as to the current delivery practices on the Island Ward Canal. As the attached agreement b/t other tributary canals states, the Island Ward is required to carry any excess water flowing out of the Consolidated Farmers Canal Co. Historically the excess flows from this, and other tributary ditches, has meet the irrigation needs of the Island Ward share holders. In other words most of the time the entire amount of water decreed to the Island Ward is not diverted at its headgate. Water District records would show that little if any water is diverted from the Island Ward's headgate. Water used to fill shareholders rights comes from excess or waste flows from tributary canals and ditches.

The Board of Island Ward is concerned that if the other canals are cut back so as to diminish excess or "waste water" flows into the Island Ward canal that the Island Ward be allowed to take the entire decreed flow from their headgate. No measurements are available as to these excess flows, but records to show that share holders of Island Ward Canal have received their fare share of water from the Canal Company.

To Whom it May Concern

The Island Ward Canal Co. is bound by contract to take all the water the Salem Irrigation Canal Co wishes to send. (see attachment location is described) at a point NW 4 of the NE 4 sec. 12 the Consolidated Farmers Canal Co. empties into the Island Ward Canal Co. also. Many of the stockholders of the Island Ward Canal Co are also stockholders of the Consolidated Farmers Canal Co but if the tailings from these two canals are withheld at some future date the Island Ward Canal Co. would certainly need the full ^{Jan. 23} June 1, 1901 decree of 100 cfs. We would appreciate complete consideration of these facts in the adjudication of our share.

Affidavit for Change of Point of Diversion of Decreed Water Right

STATE OF IDAHO, }
County of Madison } ss.

Island Ward Canal Company, being first duly sworn, deposes and says: That his postoffice address is Rexburg, Idaho; That he is the owner of and using a certain water right, bearing date of priority of January 23, 1901, for 100 cubic feet per second of the waters of the Teton River, County of Madison, State of Idaho, decreed to Island Ward Canal Company, by decree of Judge J. M. Stevens, of the Sixth Judicial District of the State of Idaho, in and for the County of Fremont, in the case of Rexburg Irrigation Company vs. Teton Irrigation Canal Company said decree bearing date of December 16, 1910, for the purpose of irrigating the following described lands, situate, lying and being in Water Dist. No. 36, in the County of Madison, and State of Idaho, to-wit: Approximately 3000 acres in Sections 9, 10, 11, 15, 16, 20, and 21 all in Township 6 North, Range 39 E. B. M.

That he is the person (or representative of the corporation) to whom such right was issued, (or has become the owner thereof in the following manner: Decreed

That said waters are now diverted from said stream in the NW 1/4 NW 1/4 of Sec. 5, Twp. 6 N., Range 40 E., and conducted to the above described lands through the Island Ward Canal Co. ditch, as per map filed herewith and of this affidavit made a part;

That affiant desires to change the point of diversion of said water from the point above described to a point located in NE 1/4 of NE 1/4, Sec. 6, Twp. 6 N., Range 40 E., and thereafter conduct same to the above described land through the _____ ditch, as per map above referred to:

That his reasons for desiring to make such change are as follows: Shorten canal approximately 1/8 of a mile. Do away with the hazard of the river washing into canal along approximately 1/8 of a mile where river and canal are now running parallel and within a few feet of each other.

That no one will be injured by such change and that such change will be made at affiant's own risk.

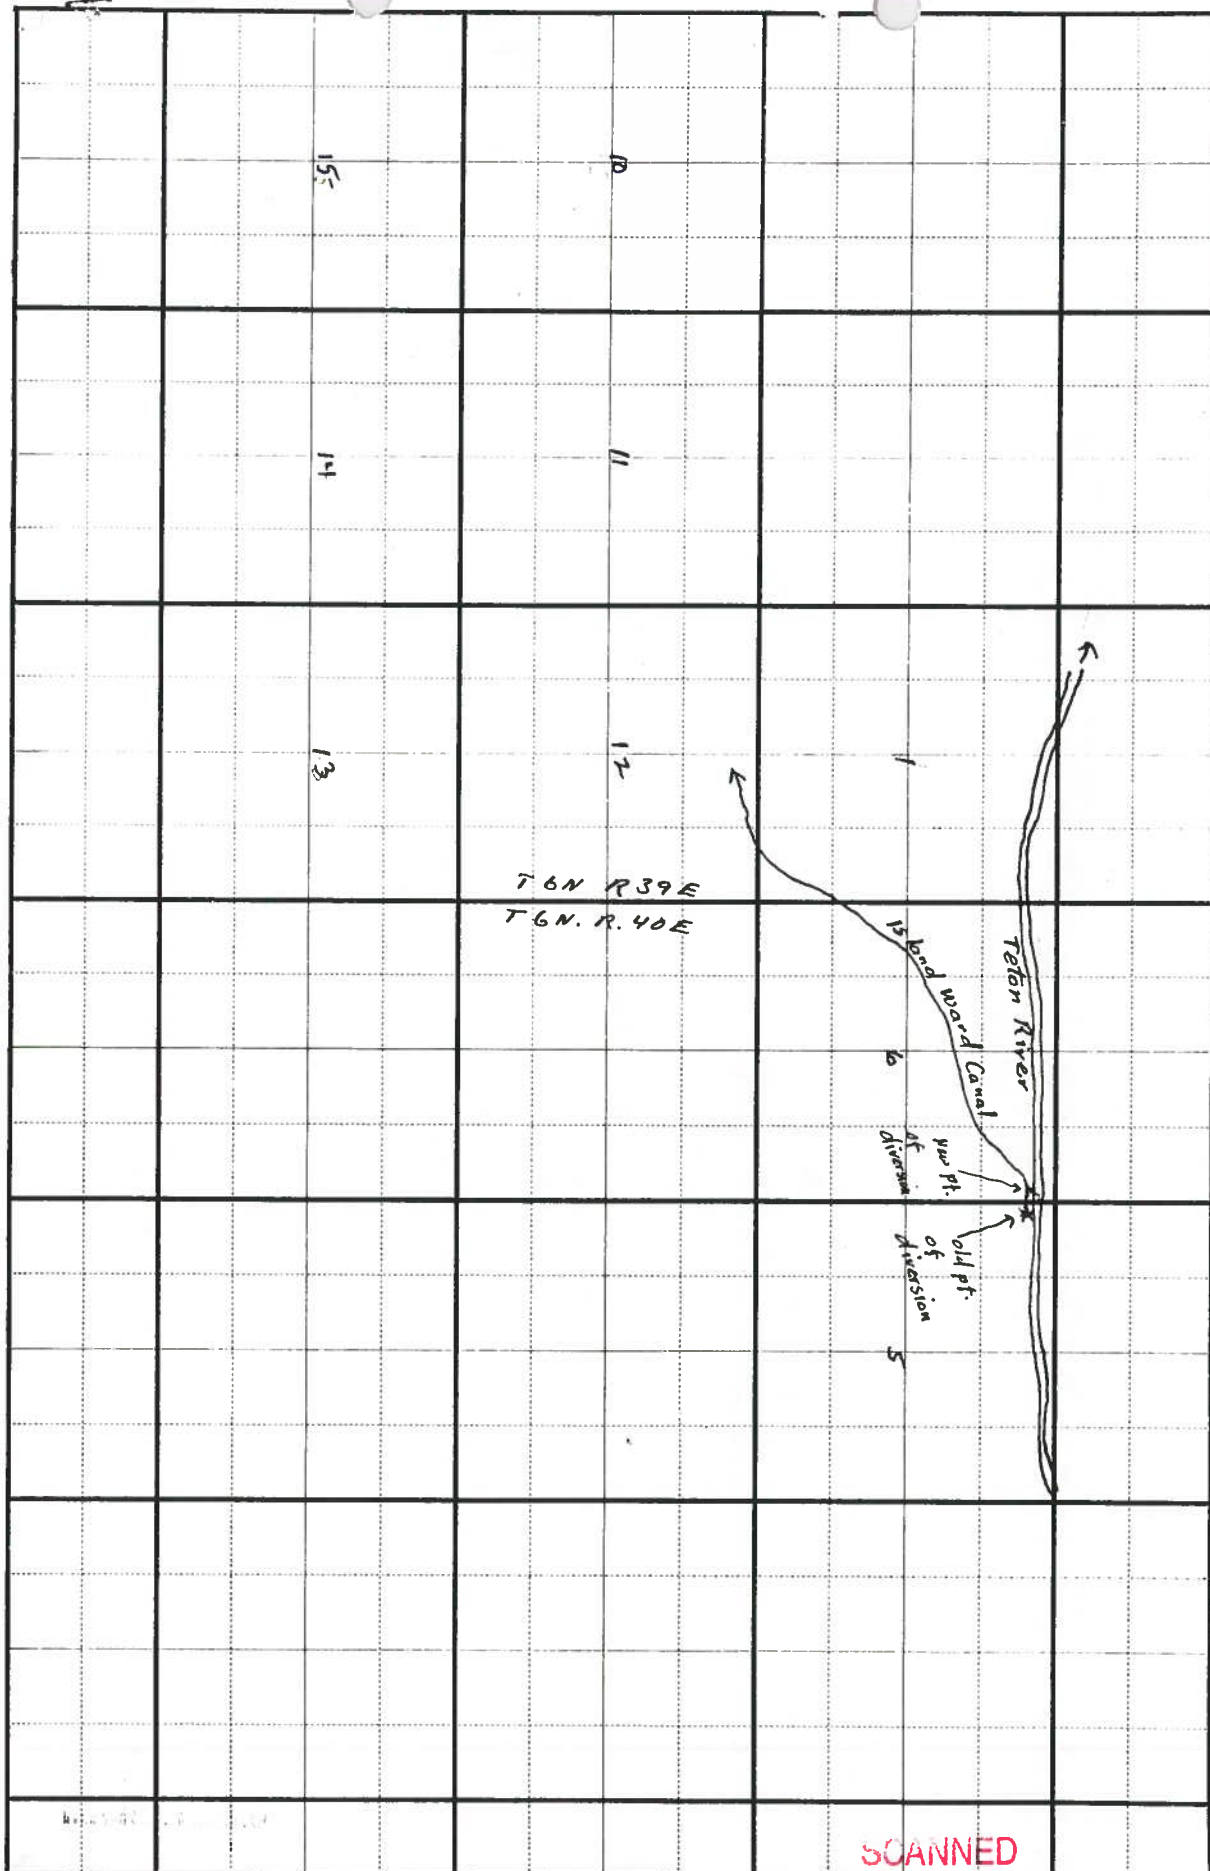

J. F. Sellers
J. F. Sellers, President of Affiant.
Island Ward Canal Company

Subscribed and sworn to before me this _____ day of _____, 19____.

NOTE:—If this water right has heretofore been carried jointly in a ditch with other water, affiant should secure written consent of other owners or users to removal from its original carrier and file such consent with this affidavit.
