INSTRUCTIONS

Proof of Completion of Works.

Boise, Idaho,
October 1, 1907

Pack Saddle Creek Canal Co.
Oasis, Fremont Co., Idaho

Dear Sir:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your Permit No. 423.

This form should be filled out and mailed to the State Engineer at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before January 15, 1908. Upon receipt of the blank, properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place, convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

One of the requirements of the law is that an examination of the works constructed shall be made under the authority of the State Engineer. In order to make the expense as light as possible you are requested to furnish the name of a competent engineer, or surveyor, who can do this work for you at a reasonable cost. Upon receipt of name of such engineer or surveyor I will authorize him to make the examination and send me a report on or before the date set for the proof.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

JAS. STEPHENSON, Jr.,

State Engineer.
