Remarks:Comments:

1. Igraves 9/7/2006 Parcel No.

Comment: Irrigation is within Parcel No. R3924100000.

2. Igraves 9/7/2006 P/U

Comment: The original SRBA claim was filed in 1990 indicating the p/u had changed from that which was licensed. The claimed p/u was not considered as an accomplished transfer for this recommendation because the license was issued in 1987. The licensed acres were slightly redistributed based on ArcView technology and 1987 aerial photography.

3. Igraves 9/7/2006 Split History

Comment: This claim was split, then recombined. VanVliets own all 94 original licensed acres. See memo in file dated 9/5/2006 for more information.

CONVERSATION MEMO

Date: 9/5/2006

Agent: Lori Graves

With: James Hitch

Subject: P/U

Claim No.(s): 63-8404A

Mr. Hitch filed a change in ownership in on water right 63-8404 in 1990. He retained 1 acre and the VanVliets were assigned the remaining 93 acres. Ownership information was not included with the form and the specific location of Mr. Hitch's retained acre was not indicated in the file. Current tax info shows the licensed p/u all owned by the VanVliets. Mr. Hitch told me in a telephone conversation that he did not own an acre within the licensed p/u, that he only "pocketed" an acre's worth of water. At one time, he was going to build in the area, but decided to live on the Snake River instead. I explained that a water right has to be beneficially used and that I could not recommend a pocketed water right for decree. James understood and agreed to withdraw claim 63-8404A. A withdrawal Notice was mailed to James 9/5/2006.

As a result, claims 63-8404A & B have been recombined into 63-8404 for the 94 original licensed acres owned by the VanVliets.

System pumps water from South Boise Drain via pipe to 48" vertical culvert (corrugated steel). A Parma Water Litter pump is submerged in the culvert and is powered with v-belts and pulley by a 20 H.P. GE motor. The water is pumped into a 12" steel pipe that is above ground for 6' and ~~then~~ is buried for ~~at~~ approx 370'. The water is delivered to a concrete diversion box where a 16" concrete ditch flows to the south
