**BEFORE THE DEPARTMENT OF WATER RESOURCES
OF THE STATE OF IDAHO**

SECOND AFFIDAVIT OF MATT ISCH

SCANNED
JUN 13 2018

1

3. In the Coeur d'Alene-Spokane River Basin Adjudication, the City filed a claim for the water right associated with the Riverbend system, which was licensed by the Idaho Department of Water Resources as water right no. 95-8572 ("Riverbend wells").
4. Generally east of McGuire Road, the City was originally served by its main production wells ("main production wells"), commonly referred to by the City by numbers (e.g., Well 0, Well 1, Well 2, Well 2A, Well 3, Well 4, Well 5, Well 6, Well 7, and Well 8). The main production wells are interconnected.
5. Generally west of McGuire Road, the main production wells described in Paragraph 4 supplied water to the West Standpipe and customers north of Interstate 90 ("I-90"). Separate municipal systems south of I-90 included Majestic View and Riverbend Water.
6. Prior to 2002, the Riverbend wells provided municipal water to customers in the area of the City west of Pleasant View Road and south of I-90. Majestic View wells provided municipal water to customers in the area of the City east of Pleasant View Road and south of I-90.
7. In 2002, the City interconnected the Riverbend system with the main production wells described in Paragraph 5. Municipal water was pumped from the main production wells described in Paragraph 5 and supplied water to the Riverbend area west of Pleasant View Road and south of I-90.
8. The Majestic View system remained as a separate system until after the construction of Well 9 and the completion of the Riverbend Phase 4 expansion in 2008. Once these were completed, the City classified the area west of McGuire Road as the West Zone and the Majestic View system was interconnected.

9. Recently, I was asked by the Idaho Department of Water Resources to clarify an affidavit I signed on April 18, 2017, regarding the extent of interconnection of the City's municipal wells prior to January 1, 2006.

10. As I stated previously, I have been employed by the City since 1991. Based on my tenure, I have personal knowledge of the City's municipal system and have reviewed the documents regarding the same. Based on my personal knowledge and review of the documents, and for purposes of this affidavit, I interlineated connection lines, with dates, on a map attached hereto, documenting when the City's municipal wells were interconnected. The conclusion reached in my April 18, 2017 affidavit is the same as the affidavit I am signing today – that with the exception of the Majestic View system, all of the City's municipal wells were interconnected prior to January 1, 2006.

DATED this 4th day of June, 2018.
